BRITISH FORCES SENT TO END HEAVY FIGHTING

Storm-Buffeted Giant Airship Is Now More Than Half Way Across Pacific

ZEPPELIN IS REPORTED AS NEARER HOME

n Spite of Fogs, Winds and Rain, Air Liner Is Steadily Making Its Way to Los Angeles

AY NOT BE SEEN FROM THIS COAST

Many Preparations Are Being Made to Give Ship and Passengers Reception on Arrival

AT midnight the Graf Zeppelin gave her position as 44.20 north, 82.0 west, and was making ninety iles per hour, according to the ionsain Hill wireless station.

A message received at 7 p.m., ictoria time, read in part as follows:

"Three hundred miles from 180th ieridian, at which point Graf will ntil from tomorrow into today. On asing the 180th meridian we lost an hours in clock time. Position ill change from seventeen hours ased of Eastern Daylight Time to venteen hours behind that time. essages from the wireless room of e dirigible, out of touch with the orld save by the marvels of ado, tell that all passengers are ell and happy and thankful for ainvance from the fury of the urricane which caught the huge ship in its swirling grip yesterday."

Mr. S. J. Lawrence, 2560 Shelburne Street, who followed the zeppelin's messages until early this orning, reported that the words ictoria or Seattle did not figure in ly of them. Most of the correspondence after midnight was in erman, some message running to 500 words, with the word Los ngeles occurring frequently.

NEARER AND NEARER

SAN FRANCISCO, Cal., Aug. 24.—Radio messages from the world-ircling Graf Zeppelin indicated that e giant airship late today was ore than half way across the acific on her brave flight from anamigapiri, Japan, to Los Angeles, California, 5,470 miles. If us rate of progress she has averaged since leaving Japan (10.30 a.m. S.T. Friday), it maintained, she as expected to be seen over San rancisco in the early hours of onday.

Adverse winds made it possible at Seattle would not be visited ut that San Francisco, directly on a great circle of shipping, would e the first mainland point of western America to sight the ship

Thought Dead, but Live

MR. and Mrs. T. A. Glover, the explorers, who were reported dead while on an expedition in Central Africa, have arrived in England safely. The picture shows the adventurous pair leaving Euston station.

Thousands Throng Fair Grounds on Closing Day Of Provincial Exhibition

YESTERDAY, the last and biggest day of the Victoria Provincial Exhibition, opened with glorious sunshine, heralding the largest and best attendance yet recorded in Victoria. Soon after 1 o'clock the crowds began to arrive, streaming through the various gates. The special street cars run from the city, brought a full load every trip. Soon the Midway was packed with an ever-changing throng, eager to enjoy the many special features of the final day.

Above the murmur of the crowd could be heard the ceaseless cries of the showmen, exhorting passers-by to try their luck at the competitions, the persistent crack of the rifles from the shooting alley, and all the varied sounds that go to make up the Fair spirit and fun. The Joy Zone, with its Ferris wheel, and the miniature Ferris wheel for the less venturesome children, the Lindy dip, the whip, the Lindy seaplane all attracted hundreds, young and old, to try their luck or to enjoy the thrill of a journey aloft.

ENDLESS PROCESSION

Through the buildings passed an endless procession of people, intent on examining the many wonders exhibited for their inspection.

B.C. ELECTRIC MAY EXTEND TO SOOKE HARBOR

Company Outlines Terms and Conditions Under Which Electric Current Will Be Supplied

CANVASS WILL BE STARTED AT ONCE

The B.C. Electric Railway proposes to give a lighting and power service to Sooke Harbor. It is planned to supply the district by tapping the Jordan River 60,000-volt transmission line.

At a special meeting of the executive of the Sooke District Development Association, held at the Belvedere Hotel, Sooke, on Friday evening, the question of electrical energy supply to the district was fully discussed with Mr. S. J. Hails, manager of the light and power department of the B.C. Electric Railway Company.

OUTLINE OF TARIFF

After a frank discussion on details, Mr. Hails outlined the conditions under which service could be provided by the company. The rates which the company was prepared to extend to Sooke were the company's regular suburban schedules, namely: eight cents per kilowatt hour for lighting with a minimum charge of $1; a power rate sliding from seven cents to two cents per kilowatt hour, dependent on monthly consumption, a three-cent cooking rate, and also commercial tariffs for large consumers.

These rates were considered by the Development Association executive, over which Mr. Raoul Rodillard, the president, presided, as being likely to popularize the use of electrical energy when available.

Mr. Hails intimated that his company would favorably consider proceeding with the scheme provided approximately seventy-five to ninety consumers could be secured for the service, in addition to the Belvedere Hotel, which would be the largest individual user.

The route of the proposed line covers a distance of roughly five to six miles on the Sooke Road, from near Sassenos westerly to a point past the cannery wharf.

FUTURE ACTION

The matter was left with the company, Mr. Hails undertaking to have a representative at once interview all residents on the route with a view to securing sufficient support to justify the company in proceeding with construction on the main highway. The executive felt that with this support forthcoming, this Winter should see the advent of a long anticipated improvement, which would be of great value to the future prosperity of Sooke.

Local Gardener Has Best Spike At Gladiolus Show

Residents and visitors who admire the beautiful gladioli blossoms in Victoria gardens, will learn with satisfaction that a Victoria horticulturist has won the championship for the best spike in the district. Decision was made in favor of Mr. Angus McKay at the B.C. Gladiolus Show in progress at Vancouver Friday and yesterday.

His winning blossom was Perm Kiss, a delicate ivory, and it speaks well for the express company that the specimen, as well as the other exhibits, arrived in perfect condition at the Fair grounds.

Wilfy Peter Thompson he won the first in carnations.

In addition to the honor mentioned above, Mr. McKay, who is a well-known member of the Victoria Horticultural Society, obtained three firsts and three seconds.

Including his awards at the Vancouver Exhibition, he has won 106 prizes this year as against his 112 for the whole season of 1928. As he has several shows ahead in the current season, his remarkable record in 1928 is likely to be surpassed. And all this wonderful success from two-thirds of a large city lot!

DEMANDS OF GT. BRITAIN MAY BE MET

New Phase of Conversations at The Hague Makes It Appear That Concessions Are Likely

STRENUOUS EFFORT NOW BEING MADE

Believed That During This Week Some Suitable Agreement Will Be Reached by Powers

THE HAGUE, Aug. 24 (British United Press).—The powers represented at the international reparations conference appeared to be coming slowly around to Great Britain's terms tonight.

The spirit of concession demonstrated by the four-power bloc—France, Belgium, Italy and Japan—with the moral support of Germany, made it seem probable a compromise agreement might be reached next week.

MORE CONVERSATIONS

After Rt. Hon. Philip Snowden, the British Chancellor of the Exchequer had tonight delivered another of his "ultimatums" demanding that Premier Henri Jasper, of Belgium, present a new proposal in behalf of the four powers, the representatives of the powers met with Germany for two hours, adjourning at 8.45 p.m. They devoted their time to a strenuous effort to comply with Mr. Snowden's request for a written offer means the British claims more or less in full.

Emerging from the conference, Gustav Stresemann, the German Foreign Minister, remarked to the United Press correspondent:

"Mr. Snowden probably will not receive a written proposal tonight."

FIND TRACES OF OLD RACE OF PEOPLES

Scientist Says They Lived 7,000 Years Ago and Worshiped the Moon and the Stars

IN HIGH STATE OF CIVILIZATION

CAPETOWN, South Africa, Aug. 24 (British United Press).—Professor Leo Frobenius, German savant, who has just returned from a study of the ancient civilization, ruins of which are to be found at Zimbabwe, says that a great race lived 7,000 years ago in the region extending from Lake Nyasa to Rhodesia.

These people worshipped the moon and the stars. The fabric of their empire collapsed, and thousands fled to the north.

Dispatches from Cairo state the ruins at Zimbabwe may have been concerned with the religious system of this ancient race, who must have had a remarkable knowledge of geology, because, as there is proof that they discovered three places where from two-thirds of a large city lot

British Business Circles Get Hold of Well-Known Politicians

LONDON, Aug. 24.—The City of London's—that is its financial headquarters—craving for politicians is exciting much comment throughout the country. Once again the Conservative Party is being approached to know if it has done its best in the services of Sir Austen Chamberlain, former Foreign Secretary, and Lord Worthington-Evans, former Secretary of State for War, both of whom have accepted the offer of Lord Birkenhead, chairman of the Conservative London & Counties Securities Trust, Limited, to take positions as members of his board of directors.

This organization is rapidly getting control of Britain's electrical resources, and is said to have considerable American capital behind it.

It used to be argued that politics needed business men, but now it seems that business needs politicians. The list of politicians who have dropped politics for business is steadily growing.

Reginald McKenna and Sir Robert Horne, both former Chancellors of the Exchequer, began it, and the present developments would appear to indicate that the Conservative party is going to be robbed of two of its chief leaders.

It is a notable fact that nearly all those leaving Westminster for the City are Conservatives, and it is regarded as serious for the Conservative organization that the temptation to dabble in finance should overcome their devotion to the party.

Going to Japan as People's Voice

HON. HERBERT MARLER

Canada's first Minister to Japan, who left Ottawa on Friday for his new post, stated that he would not go as trade commissioner, as Mr. Marler, representative of the Canadian people, accepted for that purpose by His Majesty the King.

MEN BARELY ESCAPE DEATH IN BUSH FIRE

Only by Quick Rush From the Concentration Camp Were They Able to Get Into Safety

FIRE MAKES JUMP OF NEARLY MILE

NELSON, Aug. 24.—Men ran for their lives today when a fire swept through the bush on the slopes of the west side of Kootenay Lake, from Rhinocerus Point to Proctor and south to Midge creek. While no one was reported missing there were grave fears for a time that all the men from the Canadian Pacific construction camps might not have made good their escape.

Seventeen of these camps are believed to have been wiped out by fire. The flames leaped from the shore of Kootenay Lake to heights of ground approximately a mile distant, fanned by a fifty-five-mile an hour gale.

There is thought to be a smaller blaze started from the forest conflagration which threatened Nelson city last week. A forestry plane flying through smoke on a reconnaissance trip, reported back that there were fires burning near Nelson yesterday South of Nelson there is no menace, however. Other parts of British Columbia reported fires well under control.

Lord Queenborough And Mr. Meighen to Meet Mr. Churchill

VANCOUVER, Aug. 24.—Lord Queenborough and Rt. Hon. Arthur Meighen left Vancouver tonight for Calgary, to meet Rt. Hon. Winston Churchill, ex-Chancellor of the British Exchequer, who will be entertained by the citizens of Calgary at a public lunch on Monday.

Lord Queenborough and Mr. Meighen have been considered as investigation into conditions and industrial prospects in Canada in the interests of their group who manage the Canadian General Investment Trust.

FOUR ARE DROWNED

SIT JOHNS, Nfld., Aug. 24.—Four persons were drowned tonight when a motor car containing nine persons went over a bank and into the Missouri River, two miles south of Forest City, Mo.

NANAIMO MINES TO START

NANAIMO, Aug. 24.—A notice posted at the Extension Mines states that operations will resume Monday. The first work train left Ladysmith today.

CANADIANS MUST LOOK TO CANADA

Hon. R. B. Bennett Calls Upon People of This Country to Assert Themselves in Industry

IS CONCERNED AT SITUATION

Must Use Powers of Parliament to Make Effective Weapons in Hands of the People

NELSON, B.C., Aug. 24.—Vigorous condemnation of the tariff policy of the Liberal Government was voiced here tonight by Hon. R. B. Bennett, Dominion Conservative leader. The Government of Mr. Mackenzie King never had a majority of votes of the Canadian electors, Mr. Bennett asiclaimed. In the last election it only received slightly over 43 per cent of the vote. The Government boasts that Canada was the only country in the world to have reduced duties last since the Great War. In other words, a Government which had the votes of slightly more than four million people professes to be wiser than all the rest of the world with its one million six hundred million people.

EASY FOR FOREIGNERS

The Opposition chieftain continued: "By a combination of groups, the Government has made it easier for foreigners to send their goods into this country. Mr. Bennett asked his audience to consider the speech of Premier King in Parliament last session that Canada must not provoke the United States in the matter of the tariff. "Why should we, of all the people in the world, be afraid to assert ourselves as Canadians?" the Opposition leader questioned.

The Prime Minister, he declared, said he will not legislate for Canada because it might be unfair to the United States.

King George Now Is in Residence At Sandringham

SANDRINGHAM, England, Aug. 24.—His Majesty the King was safely and comfortably settled in Sandringham House tonight, all ready to lead the life he loves so well, that of a country gentleman. He was still under care of Nurse Black, who attended him at Buckingham Palace, but other members of his medical staff returned to London.

The medical needs of His Majesty's henceforth will be supervised by Dr. Frederick Hall-Edwards, surgeon apothecary to His Majesty's household at Sandringham since 1924.

Looking moderately well and vigorous, the King came in his Majesty appeared in the auto when he was arrested this afternoon, accompanied by Queen Mary, several attendants and his favorite terrier. Stepping off the car on the red carpet at Wolferton railway station, the King walked over to the King walked directly to a small group of humble folk from his estate and shook hands with each of them.

Treasure Hunt of Young London Typist Expected To Find Untold Riches

LONDON, Aug. 24 (British United Press).—Gold buried before Columbus discovered America, priceless jewels and jewel-filigree work, reputed to be worth a king's ransom, are the objects of a treasure hunt undertaken by Gladys Nome, a London stenographer.

Some time within the next two years she hopes to return to Bogota with a rich woman, for in her possession is an old map left to her by her native father, which she believes will enable her to discover the hiding place of untold wealth buried thousands of years ago by the Aztecs in Costa Rica.

AFTER AZTEC GOLD

"Ten years ago," said Miss Nome before she left, "my father, who came here from Costa Rica, and told us that an Indian, whose life he had saved, had given him a map purporting to show the position of the places in which the ancient Aztecs buried their gold.

"My father said he had made an attempt to locate the spot, but had decided to return to Bogota at once because his money ran out. On his death, six months ago, he gave me the map and told me to use it if I wished.

"So, partly as a result of a recent windfall at the death of an uncle, I have now got $7,000, and I am setting off for Central America with high hopes of finding the treasure. An old seafaring friend of my father has arranged a cheap passage for me on a cargo boat. When I get out there, I shall try to find the Indian whose life my father saved and round up the necessary guides. I am well able to take care of myself, but just in case of accidents I am taking a revolver along with me."

TROOPS AND PLANES RUSH TO PALESTINE

Serious Rioting Breaks Out Between Jews and Arabs, and British Forces and Battleships Are Sent to Quell Troubles—Dispute Arose Over the Use of "Wailing Wall"

Situation in Jerusalem Gives Rise to Anxiety

LONDON, Aug. 24 (British United Press).—British warships, troops and airplanes rushed to Palestine tonight to cope with serious rioting between Jews and Arabs in Jerusalem, where many have been killed and wounded in street fighting. The London Jewish Times informed the United Press tonight that it had been advised that twenty-nine Jews had been killed and 107 wounded. The extent of the Arab casualties was unknown, although it was understood to be considerable.

The Admiralty announced that the warships Barham and Suasex were en route to Palestine from Malta, at the request of the British High Commissioner in Palestine, which is under British mandate.

WILL USE PLANES

A United Press dispatch from Malta also said that aircraft carrier Courageous had proceeded to the Near East. It was understood that she was proceeding to Palestine, and that her fleet of planes would be used over Jerusalem and its surrounding territory to co-operate with the authorities in restoring order.

A United Press dispatch from Jaffa, on the Palestine coast, said tonight that a state of emergency had been proclaimed in Palestine. All newspapers were suspended and the police and military authorities were in control.

The order is the equivalent of martial law. It was that British troops and battleships were en route, tended to relieve the tension, the dispatch said.

BRITISH TROOPS SENT

The War Office announced that fifty British soldiers had been sent from Egypt to Palestine by airplane, and that a complete battalion of available troops was following tonight by rail.

The War Office announcement said that in view of the disturbances the general commanding British troops in Egypt was ordered the forces to Palestine at the request of the British High Commissioner there and with the concurrence of the acting British High Commissioner in Egypt.

The situation in Jerusalem was viewed with concern here. Ceremonial ship appeared had been imposed and it was difficult to get a complete account of what was occurring in the Holy City.

THE WAILING WALL

The trouble there has been intermittent for months. At the root of

SURVEY FOR FAIR NEEDS EMPHASIZED

Paid Admissions to Exhibition Totaled 36,485, and Estimated Attendance Is 164,000

AFTERNOON LOWER; EVENING HIGHER

"The lesson of this Exhibition again stresses the need for a survey and relocation of buildings in the Willows Park," said Mr. W. H. Mearns, secretary of the B.C. Agricultural Association, as late last evening the gates closed on one of the most successful displays.

Mr. Mearns pointed out that an analysis of the figures published yesterday in the Colonist of afternoon and evening paid admissions showed clearly that there was a falling off in the afternoons and an increase in the evenings when, in addition to the horse show features, the Winter Garden Revue had been an exceptional attraction.

The figures for the final day in paid admissions were:

	1929	1928
Afternoon	3,384	3,904
Evening	1,154	1,146

Adding these to the figures of the five previous days of the Exhibition, already published, the total shows paid admissions for 1929 totalling 36,485, as compared with 34,816 in 1928.

The quota of 4.6 is taken, this year to obtain an estimate of the aggregate admissions within the grounds as compared with 4.0 a year ago, the difference being due to extra passes being given to racing entrants. On this basis it is estimated that 164,000 people were within the grounds during the period of the Exhibition.

SAVED BY JUMP

DALLAS, Tex., Aug. 24.—C. J. Hoiombek, thirty-one, of Los Angeles, Department of Commerce aeronautic engineering inspector, saved his life today by a parachute jump when his plane went into a spin and crashed near here.

KING'S PRIZE WINNER GETS WILD CHEERS

Big Reception Is Given to Colonel Blair on His Arrival Back Home in Vancouver

ACCORDED MANY HONORS BY CITY

VANCOUVER, Aug. 26.—Lieutenant-Colonel R. M. Blair, V.D., winner of the King's Prize, arrived here today from his recent triumphs at Bisley. The great ovation of honor which met him at the city platform was commanded by his own son. His adjutant was the escorting officer.

There was no sound at the platform when Colonel Blair stood at the "present" when the guard of honor presented the parade ground. A little hand-clapping from the crowds, but when Lieut. Captain Blair, officer of the guard, met his father and saluted him stiffly on his inspection of troops, the crowd, the Royal Canadian Mounted sergeants of the Highland Battalion stepped forward. They hoisted him suddenly, falling to beside a pipe band and they carried their overwhelming officer on their shoulders while every skill and the great gathering of people cheered tumultuously.

Colonel Blair was later accorded a public reception at Stanley Park, and a dinner during the evening in his honor concluded the official programme of welcome. His family claimed him first.

Thousands Throng Fair Grounds on Closing Day Of Provincial Exhibition

Continued from Page 1

manufacture, the glittering cars on display in the automobile building the art gallery, and the flowers in the main building. Here it was exceptionally noticeable what care had been exercised by the exhibitors, for flower, shrub and specimen was fresh as on the opening day. City man and farmer alike flocked to see the finest showing of livestock that has ever been held in Victoria. Cattle, horses, sheep and swine, poultry, rabbits, goats and even squirrels, all were represented as never before. As the day wore on the crowd thickened, slackened for a short interval, while householders returned to their homes for the evening meal, then back to the fair grounds for the redoubled fun of the evening. Lights began to flicker through the dusk, the booths glared with electric lights and the joyousness of the scene increased. Fletcher Bros. in the main building, and Davis & King in the manufacturers' building, entertained the visitors with splendid concerts from radio and record reproductions from their centrally placed stalls. The benches about the machines were packed all afternoon and evening.

EXHIBITORS SATISFIED

After 4 o'clock in the afternoon the stockmen began to remove their animals, some to return to their respective homes, others to move on to further honors at other exhibitions. All were high in their praise of the treatment they had received during their stay in Victoria. Good queriers and courteous consideration have made for a splendid feeling of good-will between exhibitors and fair officials. The buildings closed at 8 o'clock, and here, too, the same movement of packing and removal was made. But the other attractions continued in full swing. The horse show before the grandstand and the Winter Garden Revue drew hundreds during the evening to witness the finish of the six-horse team driving competition, many jumping events and an entirely new turn put on by the famous revue artists.

The fun continued until midnight, when the gates closed and the crowd returned to their homes, with the happy knowledge that they had participated in the finale of the record day of a record exhibition.

STABLE COMPETITION

The stable competition resulted—1, R. C. Mann, of J. O. Dunwaters; 2, L. McKay, of J. W. Landry; 3, C. Evans, of D. Spencer, Ltd.; 4, P. Wearing, of Allister Forbes.

FOOD PRICE CONTROL IS SUGGESTION

Great Britain Excited Over Likely Fight Between Food Producers and Consuming Public

DAIRYMAN DEFY FOOD COUNCIL

LONDON, Aug. 24 (British United Press)—Control of food prices in Britain is likely to become a matter for legislation when Parliament reassembles, it was revealed today.

The Food Council has no power to enforce its opinions and can only tell the public it is being unfairly treated.

Today the milk trade of London defied the Government and, in spite of an appeal by Rt. Hon. William Graham, President of the Board of Trade, refused to grant milk consumers the Summer price of twelve cents a quart any further.

Sir William Price, head of the United Dairies, one of the largest distributing organizations in the country, declared that dairymen would resist any attempt to force them to lower the price of milk until next April, when Summer prices will again prevail, and the farmers have adopted a similar attitude.

Last week the Food Council revealed that the millers had issued the "official prices" of flour, which were higher than the actual prices charged, with the result that a loaf of bread became one cent dearer than it should have been. The meat trade has also ignored the Food Council, and as a result the Government is now considering whether the council should not be vested with the power to force traders to charge fair prices.

The introduction of such legislation would undoubtedly raise the cry of "Socialism," but even the late Conservative Government regarded unjustifiable increases in the price of food as a crime.

ZEPPELIN IS REPORTED AS NEARER HOME

Continued from Page 1

ROUGH VOYAGE

Breasting the winds over the great waste of the Pacific Ocean, through the fog and the night, drenched with the rain, the great vessel of the air bore its nineteen passengers and crew of forty-one safely on towards their goal, the achievement of an epochal flight in the world's history. Only occasionally did the great craft's commander, Dr. Hugo Eckener, think it necessary to give her motors, for she had ploughed the skies at the rate of forty-seven miles an hour average since she left Japan's sea.

The Graf's position was given as 44 degrees, 20 minutes north latitude, 134 degrees, 20 minutes west longitude. She was seven then 400 miles on her way to Los Angeles, with 2,962 miles to go.

READY WITH HELP

The United States Government stretched a welcoming hand over the seas to draw the Graf Zeppelin away to America's shores, the weather bureau came up to report and radioed them to the commander, Dr. Eckener, to guide him in dodging adverse winds and developing storms, and American ships of war were ordered to stand by to aid should the Graf Zeppelin failer in her flight. Commercial shipping was mustered into the service of the dirigible, too, to give reports of position and to be ready for emergency.

On the mainland civic communities prepared to do honor to the visitor. Seattle still hoped to be the first to welcome her, despite the advice of the weather bureau to Dr. Eckener to avoid reaching the coast at the northly latitude because of weather disturbances. At Tacoma preparations were made to use a mooring mast, should emergency speed the dirigible there. But Los Angeles, confidently awaiting the airship's arrival, went forward with plans to acclaim the conclusion of the Pacific flight, and later to greet the Graf Zeppelin on to Lakehurst, N.J., the start and finish of her round-the world tour

"Summer girl, Summer girl, where have you been?"
"To the loveliest seaside I've ever seen."
"Summer girl, Summer girl, what did you do there?"
"I got engaged thrice, which was thought pretty fair."

Office Boy—"Two men outside to see you, sir. One is a poet and the othe a deaf man."
Editor—"Well, tell the poet that the deaf man is the editor!"

Centenarian Is in Excellent Health

MR. MICHAEL FINNERTY

Mr. Finnerty, whose farm gives his name to a road in Cordova Bay, celebrated his hundredth birthday on August 18 at Cowichan Bay, where he resides with a son. He is in excellent health both mentally and physically, and enjoys life in a quiet way.

Mr. Finnerty was born in Ireland in 1829, and came to the United States shortly before the outbreak of the Civil War. He was at Hampton Roads when the engagement between the Merrimac and Monitor took place on March 8, 1862, noted in naval history as the first battle between ironclads and on the whole conflict.

Coming to British Columbia soon afterwards he established the farm, then located in bush, adjoining the Hudson's Bay property at Gordon Head, and lived there and reared his family before increasing years compelled his retirement. His farm is a rendezvous, his stories being illuminated with a lively Irish wit, made him well known to a wide circle of friends here before he moved Upisland.

PROSPECT FOR PEACE BRIGHT AND ENDURING

Sir William Clark Says This Has Followed All the Horrors and Tragedy of the Great War

SHOWN BY LEAGUE AND DISARMAMENT

TORONTO, Aug. 24.—Out of the horror and tragedy of the long years of the Great War has emerged the brightest prospect of enduring peace the world has yet seen, but the cause of peace is not furthered by those who find only evil and idleness in war, said Sir William Clark, British High Commissioner in Canada, in an address at the directors' luncheon of the Canadian National Exhibition.

Today was "Warriors' Day" at the exhibition, and Sir William dealt at length with the services of the Canadian Corps during the Great War.

SOMETHING LOST

When the permanent reign of peace, so much to be desired, should be attained, and the possibility of war banished from the world, the world would have lost something, Sir William said. Though small in comparison to the bond of enduring peace, the loss that the opportunity for supreme self-sacrifice, for unmeasurable valor and the joy of putting man's loyalties and creeds to the supreme test of death would be gone, and the loss is not to be lightly. He suggested these things should be kept in mind in honoring the dead warriors.

"The British Empire has been served well by its warriors," said Sir William. "Warriors in an appropriate term, for the British peoples have also been a warlike rather than a military nation. There is a real difference there.

"We could not have won or maintained our Empire without the use of the sword against the enemy, but equally it would have crumbled as so many empires have fallen in their day if we had depended upon the sword to maintain unity within.

"The incessant war against poverty, the raising of the standard of living the elimination of famine, the progressive conquest of disease, the gradual leading of the people until they can assume a larger share in the control of their destinies—these are the things which have made enduring an Empire founded on war."

DESIRE FOR PEACE

Sir William said the strength and influence of the League of Nations, the signing of the Kellogg Pact and Locarno Agreement were all evidences of a growing desire for world peace, and were pioneers which no one would have dared to predict a few years ago.

Honolulu Air Route Planned By Dirigible

SAN FRANCISCO, Aug. 24.—Preliminary steps have already been taken by air, rail and steamship interests for negotiations of the proposed thirty-five-hour dirigible service between San Francisco and Honolulu. Two airships will be built after specifications of the United States Navy.

The proposed dirigibles will carry seventy-five passengers and 20,000 pounds of mail and express, and will be 790 feet long, larger than the Graf Zeppelin. The southern end of the San Francisco Bay region is contemplated for a terminal.

Troops and Planes Rushed to Palestine

Continued from Page 1

it is the "Wailing Wall," the remains of the west wall of Solomon's great temple, and the only part of the temple left standing. It is an Arab district, but it is the most Holy Place in the world to orthodox Jews, and they claim the right to worship undisturbed at the "Wailing Wall."

With Christians, Jews and Moslems all claiming Jerusalem as their holy city, the difficulties of the authorities have been tremendous. The latest trouble between Jews and Arabs reached a climax ten days ago, when Jews, celebrating a fast day at the "Wailing Wall," were disturbed by Arabs. The ensuing fighting was suppressed, but the flame spread through the city, especially among the Arabs, by anti-Jewish propaganda.

ARABS ATTACK JEWS

On Friday morning thousands of Jews who were following the body of a Jewish boy killed in the riots, to the cemetery, were attacked by Arabs, and the authorities cleared the streets with difficulty.

The rioting reached its height yesterday and last night, and casualties were heavy.

Arabs from surrounding villages invaded the city and stormed the Jewish quarter. Despite their best efforts, the authorities were unable to cope with the situation. The streets were cleared and the entrances to the city closed.

Police with swords and bayonets patrolled the streets, backed by armored cars, while available aircraft were ordered forward.

The Colonial Office, in a statement tonight said: "Immediate action is being taken in Jerusalem to enable the local authorities to restore and maintain order."

EMERGENCY PROCLAIMED

JERUSALEM, Aug. 24.—A state of emergency was proclaimed today all over Palestine tonight, with clashes between Arabs and Jews spreading from the point of rioting in Jerusalem and with a death list of more than fifty already recorded.

Word that British warships and troops were en route to supplement the police forces was received with joy. The calm restored in Jerusalem this morning, after two days of rioting in the streets, was only temporary, and at 6 o'clock tonight the disorders were in full blast again.

Jewish sources estimated the number of Jewish dead at thirty with thirty-five others gravely wounded, and estimates of the Arab losses much earlier had been seventeen killed with others likely to die. The injured numbered more than two hundred.

FIGHTING SPREADS

The fighting had spread from the Old City, to the Jewish suburbs of Yemin Moshe, Odad Saul, Odad Bavods and Sephardim, the gravest fears were expressed for the safety of Petach Tikvah, the oldest Jewish colony in Palestine and noted for its rich orange groves.

Jewish leaders appealed to their race to co-operate with the British administration in restoring order. They charged that the Arab attack gave every evidence of prepared warfare and that the Arabs were well armed, especially with daggers. It was also claimed that Communist propaganda was urging the Arabs to fight the Jews and expel the English from the country.

CABINET MEETING

LONDON, Aug. 24.—The seriousness of the race riots in Palestine led to Prime Minister MacDonald tonight to summon his Cabinet to a special meeting tomorrow morning. The First Sea Lord was recalled from leave.

The War Office ordered the railway from Cairo to Alexandria cleared of traffic to facilitate prompt transport of British troops to the trouble zone near Jerusalem. It was announced that five warships, carrying troops, had been ordered to leave Malta for Palestine.

CANADIANS MUST LOOK TO CANADA

Continued from Page 1

as provocative. Have we fallen so low, he declared, when a people who have accomplished so much and remembering the stock from which we claim, that we will not maintain for Canadians but be content to be beggars of wood and drawers of water for another country.

Where do you think your country and mine will ever get to as a country where the head of the Government, your Prime Minister and mine, says it will refrain from legislating for Canadians because it might be provocative to some other country.

SHOULD RESPECT OURSELVES

The United States, Mr. Bennett proceeded, "respect us if we respect ourselves. That country bore no ill will against this Dominion, but was looking after the interests of its own people as Canada should be doing.

If there is any Canadian, the Opposition leader declared, in returning to the Prime Minister's remarks, "who has read that speech, told to the world, and feels proud of it, I should like to see him."

"I never was more concerned about my country than when that speech was delivered in Parliament. How the Prime Minister of this country could stand in his place in Parliament and tell the world we will do nothing for Canada, for fear of provoking the United States, is incomprehensible to me." Economic dependence was incompatible with freedom.

ISSUE IS PLAIN

"The issue is plain and simple," he stated. "Are we going to use the powers of Parliament to make effective the weapons in our hands to give Canadians equal competition or are we not? Men and women, can we afford to see this country become a dependent country? The situation was acute. You will have to say sooner or later," Mr Bennett declared, "whether you are for Canada or for another part of the world."

The increase in the tariff now proposed by the United States was against the world and not against Canada only.

Senator R. F. Green, Victoria, and Mr. W. K. Ketling supported Mr. Bennett, who en route here today met party followers at Wilkie and South Slocan. On Monday Mr. Bennett will enter the last week of his Itinerary in British Columbia with an address at Creston.

GYROS ELECT OFFICERS

ASTORIA, Ore., Aug. 24.—Alex. Davis, of Tacoma, was elected governor of District No. 4 of the Gyro International at the final business session of the four-day district convention here today. Other officers named were Reg. Rutherford, Kelowna, B.C., lieutenant-governor, and Tom Thompson, Tacoma, secretary.

PRISONER RELEASED

LONDON, Aug 24.—A dispatch to the Exchange Telegraph Company from Bombay said today, owing to the conditions resulting from the floods in the Sind region, hundreds of prisoners held there awaiting trial have been released on their personal recognizances to reappear.

Last Excursion to Seattle this season will be on Thursday, August 29, Princess Patricia.

DR. TOLMIE WILL MEET MR. THOMAS

Premier of Province Goes East to Confer With British Minister on Matters of Mutual Interest

CONFERENCE IS SET AT TORONTO

Development of Industries and Colonization Will Be Among Subjects Discussed at Meeting

PREMIER Tolmie will leave at once for the East for the purpose of discussing with Right Hon. J. H. Thomas, Lord Privy Seal in the new British Government, matters which may be of mutual interest to British Columbia and the Motherland. Arrangements have been made for the holding of a conference between the Prime Minister of this Province and the representative of the Imperial Government in Toronto, when these subjects will be dealt with.

The visit of the Premier to the East will occupy as short a time as possible, as Dr. Tolmie is anxious to get back to the province without unnecessary delay.

INTRODUCTION OF CAPITAL

Discussing the questions which would be taken up in the meeting with Mr. Thomas, it was explained by the Premier that attention would be given to the matter of development of industries in this province. From time to time there have been matters brought to the attention of the Premier since he assumed office that one may say looking to the introduction of British capital into this province in an industrial way.

This is something which Dr. Tolmie feels is a very necessary step in harmony with the development of the province along the different lines which indicate the natural outlook for British Columbia in the working out of her destinies.

There is room also in this province for certain lines of colonization, which have been brought to the attention of the British administration, and along this line there are avenues which may work to the advantage of the province.

Mr. Thomas is charged with an important mission by his Government, and in view of the part which British Columbia is likely to play in the plans it is deemed exceedingly wise to take advantage of the conference.

OTHER MATTERS

During the visit of the Premier in the East he will take advantage of the fact that he is close to the centres represented at Ottawa and Montreal to take up certain matters which require attention there, as well as at Toronto, and which can be better dealt with by personal touch than by correspondence.

It is anticipated that the Premier may be absent for nearly three weeks from Victoria.

NOT COMMISSIONER BUT TO REPRESENT CANADIAN PEOPLE

NEW WESTMINSTER, Aug. 22.—"I am not going to Japan in the guise of a trade commissioner, but as a representative of the people of Canada at Tokio, appointed by His Majesty the King," said Hon. Herbert Marler at a luncheon of members of the Board of Trade and service clubs today.

From what he had learned while on a visit to the province Mr. Marler said he believed the people have greater foresight and courage than the officers of British Columbia. One example of this which might be cited, he said, was the construction of the Pacific Great terminals here, which he believed would play a large part in the extension of trade between Canada and the Orient.

Canada's foreign trade since the beginning of the century had increased two billion dollars and when anyone said that this country is not prosperous, Mr. Marler pointed to this fact, he said.

WHASSAT?

Missionaries for Orient

DR. N. G. Graham, left, and Rev. A. A. Lowther, right, will sail at the end of the month to take up work under the Foreign Mission Board of the Presbyterian Church. Dr. Graham, accompanied by his wife, will be stationed for medical work at the McKay Memorial Hospital at Tamsui, Formosa, and Rev. Mr. Lowther will be engaged in missionary work in Gwalior, Central India.

British Group Coming to West For Convention

MONTREAL, Aug. 24.—Fourteen British Societies from Great Britain to the annual convention of the Canadian Chamber of Commerce, to be held in Edmonton and Calgary, September 11, 12 and 13, arrived in Montreal last night on the Duchess of Bedford.

Included in the group were the Earl of Radford, engineer, financier and alderman for the counties of Hertfordshire and Middlesex; Hon. Evan Morgan, author and artist; J. W. Parsons, chairman of the provision trade section of the London Chamber of Commerce; George Hutchinson, representing the Aberdeen Chamber of Commerce; Major A. J. Muirhead, M.P., Unionist member for the Wells Division of Somerset; Dr. R. O. Sigmere, author and journalist; Right Hon. George Lambert, M.P., a former Civil Lord of the Admiralty, and a former chairman of the Liberal Party; Dr. Leslie Burgin, M.P., member of the General Council of the League of Nations, and A. E. Howitt, of the Nottingham Chamber of Commerce.

MINISTER PLANS VISIT TO NORTH

Hon. N. S. Lougheed Proposes to Visit Hazelton Regarding Bridge Location

The old question of the construction of crossing over the Bulkley River to serve Hazelton and other parts of the country near will not be settled until the Minister of Public Works, Hon. N. S. Lougheed, visits the location, and looks into the whole subject. Mr. Lougheed expects in the next week or two to make the trip north and go into the question from every standpoint, and then make a decision.

There are many aspects connected with this matter of locating the crossing or crossings that will be constructed over the Bulkley River, which are not to be ascribed to the score of expediency alone. There is a sentimental side connected with the question which can readily be understood when it is known that Hazelton has been on the map for many years.

It was established as a Hudson's Bay post in 1867. It was connected up with the company's service through the avenue of Fort St. James and Fraser Lake for a long time, rather than by way of the Pacific Coast. This was due to the fact that interbital ways between Interior and Coast Indians made the connection with the sea coast well nigh impossible.

During the time of the construction of the G.T.P. Railway a suspension bridge across the Bulkley River at New Hazelton was erected out by a private company interested in the latter township. That bridge has been condemned as unsafe within recent times. There is also other bridge which serves as a crossing from Hazelton into the town to the railway.

There is a proposal to locate a new bridge site between the existing ones, opposite the site of the hospital and make it for the future serve the purposes of all. On the other hand there is a pressing demand made by the supporters of the existing bridges for the maintenance of those sites for the future.

Mr. Lougheed will look carefully into the whole matter. He will study the situation from the standpoint, not only of the immediate present, but also from the viewpoint of the future, and having regard to all matters associated with the question will reach a decision.

TRYING FOR RECORD

CHICAGO, Aug 24.—The airplane Chicago—We Will, which took off at 11:31 a.m. yesterday on an endurance flight to seek the world's record now held by the St. Louis Robin, was soaring over the city harbor expert early today with every indication that it will was well with the plane.

C. E. Steele and Russell Moseman.

Waken a Sallow Skin To Life and Loveliness

Sallow or ash skin is sickly. Blemish and dull tissues are indicative of natural processes that make for skin health. Don't try to cover up this condition—correct it. Acquire the tissues to normal healthy activity. Nature's way is the best way. Stimulate the circulation to free skin of poisons, and you see clearly and brighten a sallow complexion and overcome that disagreeable "shine." Two or three times a week give your skin this tissue-rejuvenating treatment. Get a few ounces of Mercolized Wax from any druggist and put a little to the face and then rub gently with the powder using a rotary motion, follow with hot and cold water and apply a good cream. We recommend Cuticura cream. This helps to restore a delicately flesh to your skin, improves its texture and brings natural color to the cheeks. (Adv.)

BEAUTIFUL ART GLASS VISIBLE AT CATHEDRAL

Sum of $23,000 Is Necessary to Open First Unit of Christ Church Cathedral Debt Free

SCAFFOLDING IS BEING REMOVED

Another gift of $1,000 from a local citizen has brought renewed encouragement to members of the committee for completing the West of the New Christ Church Cathedral whose aim is the finishing and furnishing of the first portion of Victoria's magnificent Gothic edifice, free of all debt, in time for its consecration on Saturday, September 28.

Subscriptions amounting to $16,960 have been received by the treasurer of the building fund, Sir Richard Lake, at the Memorial Hall, in response to the Bishop of Columbia's appeal for $40,000, leaving a balance still required of $23,040. Small sums as well as larger amounts are welcomed by the committee, as it is recognized that the assistance of all in favor of the committee's aim of completing the payment of the new building is needed, if the objective is to be reached.

INTERIOR BEAUTY

The interior scaffolding has now been removed, revealing the beauty of the architect's design. From the acres of ice, graceful arches in the ambulatory arcade, covering the full length of the north and south aisles, to the lofty vaulted ceiling, with its restful tone in brown stone and red brick, the general impression is that of spiritual uplift and joyous satisfaction.

The soft tones of the stained glass windows add enchantment to the scene. The figures of saints and martyrs of early and mediaeval times in the Christian era, set like many colored jewels in stone, harmonize with the thirteenth century style of architecture in which the building has been planned, and convey a series of historical continuity linking the present day with the time of Christ and the Apostles.

The windows of the west front, depicting in colored glass and exquisite detail, an outline of the Book of Revelation, point to the future as well as to the past. Prophecy the messages to the angels of the seven churches, pictured in the lower windows, is the vision in the great rose window of a door opened in heaven and One sitting on the throne with a rainbow round about the throne.

The nave floor was finished yesterday. Construction of platforms for the choir and sanctuary will be commenced this week. Electrical work for the new organ is being installed, and tests of the scheme of illumination are being carried out. In the front of the building, concealed from view, work on the erection of the porch of the northwest tower.

DAHLIA SHOW IS SET FOR TWO DAYS

Early Next Month at Armories Local Exhibitors Will Present Their Blooms to Adjudication

Plans in progress in connection with the dahlia show to be held at the Armories on the afternoon and evening of September 4 and throughout the following day, indicate great development on the initial effort made a year ago.

There has been a marked increase in the number of dahlia specialists who have set up the new seedlings will be on display.

Owing to the adequate accommodation in the armories it will be possible to make provision for competition in non-competitive exhibits and most of the leading fanciers will be represented.

In the competitive classes some forty entries will be available, displaying every variety of the higher grade species. In order that all classes of growers an opportunity to exhibit, the prize list is divided into four classifications, novices, inexperienced amateurs, experienced amateurs and professional classes, and commercial growers.

FORESTRY IN CANADA ERRS

British Expert Says That Dominion Will Not Be Able to Meet Empire Call for Soft Wood

LONDON, Aug 24.—A strong indictment of the forestry methods used in Canada, is made in the current issue of The Empire Forestry Journal, by Fraser Story, the editor. After referring to the ever-growing needs of the Empire for soft woods the writer points out the magnificent white pine forests of Eastern Canada are gone and the lumber industry is now concentrating on the great forests of the West.

The treatment of old stands and the neglect and abuse of young growth, in spite of the efforts of the forestry service, the absence of care in the abstraction of product and the large percentage of waste come as a shock to European forestry," he writes.

"Generally speaking," he continues, "no effort is made to restock cleared areas with profitable species. During logging operations all valuable conifers are removed, while fire nearly always breaks out in the debris and burns any that remain.

"Valuable coniferous forests are succeeded by practically worthless trees, which are in the nature of weeds. What makes matters worse is the tendency to cut down young trees for fuel sale.

"The lack of regard for future crops seems to be principally due to thoughtlessness. Canada will no doubt always have a sufficient supply of soft woods to satisfy her own needs, but as an Empire supply she is a failing source."

Women's Ailments Caused by Neglect

Proper Treatment Will Quickly Bring Back Robust Health

Because of their mildness of action no medicine for women can compare with Dr. Hamilton's Pills. The kidneys quickly respond to the remedial action of Dr. Hamilton's Pills and the result is as you would expect—pain in the back and side, shortness of breath and bad color disappear—the functions of the body then operate naturally, congestion and pain are prevented and perfect health returns. Get Dr. Hamilton's Pills today. 25c, at all dealers. (Advt.)

SALVATION ARMY CHIEF EN ROUTE

LONDON, Aug 24.—General Edward J. Higgins head of the Salvation Army, and his wife, left here today for Southampton, where they will sail on the Empress of Australia for a two months' trip to Canada. The General said he would conduct several conferences there and "do everything I can to encourage the work of the Salvation Army in the Dominion."

CAR KILLS CHILD

WINNIPEG, Aug. 24.—Knocked through a plate glass window of a downtown departmental store when struck by an automobile, Barbara, the five-year-old daughter of Mrs. J. N. Long, Winnipeg, was fatally injured and the mother severely cut and bruised here late yesterday. The child died in hospital.

THE FIRST SEVENTY

It is to the Lady Douglas Chapter of the Daughters of Empire that credit is due for the commemoration of tomorrow's anniversary which marks the departure, fifteen years ago, of Victoria's first draft en route for the scene of the Great War. This episode of the setting forth of some seventy officers, non-commissioned officers and men, drawn from the 5th Regiment, Canadian Garrison Artillery, was the first of many such; this city, from which so many thousands departed on the Great Adventure, was one of the earliest of all the cities of the Dominion to answer the call. It is fitting, indeed, that the sailing of the first draft should be remembered through the years.

Some of those who left among the "first seventy," have returned to peace-time pursuits; others lie dead in Flanders' Fields. Those among us and those who never came back, jointly wrote an imperishable page into the history of the race. They heard the summons and responded instantly, without thought of their own futures; they left home and dear ones and careers at a moment's notice, as it were, and in leaving inspired thousands to follow their example. When the "first seventy" set sail the German hosts were advancing on Paris, beating back the Old Contemptibles on their way. The war had only begun and the cause of the Allies looked black and ominous. The sound of the German guns was reverberating in all human hearts. It was the summons to manhood, and Victoria, in common with the Empire at large, answered in the words of Colonel John McCrae:

Tell them, O guns, that we have heard their call;
That we have sworn and will not turn aside;
That we will onward till we win or fall;
That we will keep the faith for which they died.

The older generation remembers with poignant thoughts the departure of the first and succeeding drafts en route to Flanders and other battlefields of the Great War. It is the new generation which needs to be reminded of the events which made more stirring history than anything else within living memory. For this *Day the "first seventy"* sounded the bugle call of self-sacrifice which kept echoing with intensity throughout the fateful years of the struggle. Where such an episode as this is concerned it is small wonder that the Lady Douglas Chapter should desire to keep one hand on the traditions of the past. It is a highly patriotic duty to do reverence to those who by their self-sacrifice made us what we are and preserved our heritage for this and succeeding generations. In that task the "first seventy" set a glorious example. The memory of how they trod the path of duty can never fade.

EXPORT TRADE

The Federal Department of Trade and Commerce is engaged on an advertising campaign with a view to promoting the export trade of the country. One of its advertisements appeared in yesterday's issue of The Colonist dealing with export trade figures since 1921, giving a list of Canada's Trade Commissioners abroad and pointing out how the latter can assist producers and manufacturers in this country. It is conceivable that at present producers and manufacturers as a whole do not avail themselves sufficiently of the governmental facilities that exist for promoting trade. It may be taken for granted that this is the case, or otherwise the Department of Trade and Commerce would find no value in such an advertising campaign. Publicity of this character will undoubtedly do good. It will serve as a strong reminder to producing and manufacturing interests in the Dominion that there are contacts in foreign countries for the purpose of making surveys in connection with any particular product and so informing the industries of Canada how and to what extent they can find markets for their goods overseas.

The roll of Canada's Trade Commissioners is a fairly lengthy one. The information they gather is assembled and published by the Commercial Intelligence Service at Ottawa, and is available to anyone who wishes to secure it. It must be said for the Government that it is trying consistently to bring the producers and manufacturers into closer touch with foreign markets, and it is increasing its efforts in this direction all the time. Advertising in the press of this country is one of the best methods it could employ, and apart from this it can rely on the assistance of the newspaper through their news columns in drawing public attention to a variety of matters affecting trade development. There is one suggestion, however, that seems obvious from the standpoint of publicity. Much of the matter which is disseminated through the Commercial Intelligence Department comes in such a form that it is not suitable for newspaper publication. Dry as-dust trade statistics and purely statistical and technical details of commodities, prepared in a stereotyped way, do not appeal to readers. The newspapers, or many of them, are sufficiently busy without going to the trouble of rewriting governmental information and propaganda with the object of making it more interesting and therefore with a wider public appeal. It is the task of the public appointed in the routine reports of Trade Commissioners which needs amendment.

The advertisements designed to promote export trade are well prepared. There is every reason to believe that with more attention given to reading matter of trade opportunities furnished to the newspapers there would be far wider publicity secured. It is through the secular press, and not through trade journals, that the greatest number of producers and manufacturers can be reached. Special excerpts, written for newspaper publication, should be made from the Trade Commissioners' reports, and those should have a local bearing for newspaper readers in different territories. The director of the Commercial Intelligence Service will see the value of this suggestion. He has accomodated his advertisements to newspaper usage. He should do the same with reports which are intended to be published in the news columns. In this way the Department of Trade and Commerce can add to its already great usefulness and obtain wider publicity for its activities than it now enjoys.

A RACING COMMISSION

Hardly a race meet is held in this province at which incidents do not occur that suggest, sometimes very emphatically, the need of the appointment of a racing commission to govern the sport in British Columbia. It would seem that under the present organization the stewards at race courses occupy their positions as mere figureheads instead of exercising disciplinary action when considered necessary. The public cannot understand the in and out form displayed by some of the horses; suspicion is aroused when this is especially flagrant, and it is a suspicion which must necessarily involve both owners and jockeys. Probably that suspicion affords one explanation of why there has been a substantial falling off in betting during the present year at all the race meets held in British Columbia.

A racing commission, properly devised and fully empowered, would correct the grievances that now exist. As matters stand the protection afforded to the betting public is insufficient, chiefly because it is exercised inadequately. The stewards, for instance, do not appear to be invested with the authority which they should have on any race course. If they were they would take disciplinary action in preventing horses being allowed to run when physically unfit and in demanding explanations from both owners and jockeys in cases where there is a complete reversal of form between horses at the same weights. It is understandable that a horse may win by a head or a neck, or even half a length one day, and a few days later be beaten by the horse which ran second to him by the same margin and at the same weights and distance. There is the luck of the start and the varying ability shown by jockeys. It is not understandable, however, that any horse should win with comparative ease one day, and a few days later, in a field of the same calibre and at approximately the same weights, be beaten a dozen distance, finish ten lengths behind the winner.

It is aggravated in and out form among horses that incenses the public. A racing commission would restore confidence and be an incentive to the stewards on a race course to carry out the tasks for which they are appointed. A central disciplinary authority for racing in this province is sadly needed. The Provincial Government was requested to appoint such a commission during the course of the last session of the Legislature. Nothing was done, and the abuses of which complaint was made at the time are persisting. This year's experience should determine the Provincial Government to take a hand in the governance of racing so as to remove all suspicion regarding its conduct, and, incidentally, to promote the breeding of thoroughbreds in this province.

TO THE FIRST DRAFT

Just sprig of Island heather,
Such as we have done and day
When they broke each tie and tether,
And so bravely marched away.

To their ears the ringing "Reilly!"
Was command and argument.
Barnyards, they did not dally:
Swift to answer, quick they went.

Fighting, suffering, conquering, dying,
With the best the Maple gave,
Each with each in valor vying,
They found glory—and the grave.

Ypres and Dickebusche both knew them,
And the mud-fed, blood-red Somme,
Passchendaele and Vimy Ridge;
Countless battles "sans le nom."

Each took toll of their slim numbers,
(Naught that's worthy comes cheaply)
And it flamed amid the thunders
On the heights of Vimy Ridge.

Few are left that were the brother
Both a brief short time ago.
But, that their fought, true together,
Holding Honor high, we know!

Not in sorrow, but with gladness—
With the joy that pride imparts;
But, with just a touch of sadness,
We wear their badge above our hearts.

—Charles Armstrong
a O.C. No. 2 Platoon, 6th Bde., C.E.F.

HORSES GIVE FINE DISPLAY

Baron Van Amerongen's Black Pirate and the Victoria Academy's Robin Win Jump

PORTLAND TEAM WINS ITS ENTRY

A splendid exhibition of horses and horsemanship, under harmonious and the ideal which was seen at the horse show at the Willows last evening.

The grandstand was not so well filled as on Wednesday and Thursday evenings, but great enthusiasm marked the performances in the various classes, particularly the winners of the championships for jump in which Baron Van Amerongen's Black Pirate and the Victoria Academy's Robin tied for first when they cleared the bars at five feet. Russell's Riding Academy's The Imp took second prize. The Imp and Robin for their respective owners. Baron Van Amerongen rode his own mount.

Another particularly show item of the programme was the six-horse team driving competition, which brought three magnificent teams of heavy draft horses before the grandstand. Under banners for hundred dollars in prizes were given in this event, the winner of the first prize is which was Robey Stock Farm, Portland, Ore. Ruby, Jr., dated up and down the Pacific Coast as an expert with the team, drove this team, the average weight of the horses being about 1,800 pounds. The second prize in this competition was won by the Burns Stock Farm, Albany, Ore. Mr. Burns driving. His team, also, was composed of horses, Percherons, and in actual merit there was little to choose between this and the winner of the first. The Merritt Stock Farm of Seattle, Wash., was the only other entry, winning third place with a team of big grays, Percherons, Mr. Merritt driving. Despite the great size of the animals they showed fine mobility in action. The awards were made for the combined performances in the judging of the six horses as one, the manner of the animals, their response to the rein, the keeping of the trace tight, the orderly movement of the horses, the handling of the lines, and general get-up. Although the decorative touch did not influence the judges in their judging, the electrical lighting of the Robey harness and wagon appealed to the fancy of the spectators and undoubtedly helped to make this a popular favorite

JUDGES SPEAK

The judges of the horse events were Dr. Sparrow, of Vancouver, who is well known in the majority all over this province and is twice judge for a six weeks' engagement in the same kind of work in the northern part of the province; and Mr. S. Haggerty, who has had completed his fifteenth assignment of the kind this season. These two gentlemen have worked together all week, judging the heavy and light horse competitions. Mr. Haggerty was specially delighted with the experience. During the exhibition last evening he stated that he had been very glad to have the privilege of working with Dr. Sparrow, judging of the show as a whole, and comparing it with fourteen other shows of the kind which he had attended this Summer, he remarked that although the number of horses was not, perhaps as great as might have been expected, the quality of the Percherons and Belgians was exceptionally good. These breeds were much better represented than the Clydesdales, which was unusual. It had been a disappointment not only to him, but to the judge, that the Victoria Fair, that the Mainland Provincial of Vancouver, six-horse team and the Fraser Valley six-horse team of Clydesdales had not come over. He would have liked to have had the honor of placing them, as it would have rounded out one of the finest exhibitions he had seen.

Mr. J. R. Scobey, of Victoria, acted all week as ringmaster.

The saddle horses were excellent in this show, the ponies had also proved weak on the high jump. In some of the classes were several Prairie horses which have just finished schooling, but this entry of imported new blood furnished a welcome addition to events which otherwise would have had little competition.

THE RESULTS

Following is a complete list of the awards in last night's ribbons:

Section 59, six-horse team driving competition, 1, Ruby Stock Farm, Portland, Ore.; 2, Burns Stock Farm, Albany, Ore.; 3, Merritt Stock Farm, Roselle, Wash.

Section 11, riding classes, high school horses (nine competitors): 1, Baron Van Amerongen, of Cobble Hill; 2, Russell's Riding Academy, Vancouver; 3, Victoria Riding Academy.

Section 116, jumping classes (nine competitors): Corinthian, open to hunters, conditions calling for post and rail, brush jump, in-and-out jump and water jump—1, Victoria Riding Academy; 2, Victoria Riding Academy; 3, Williamson's Riding School.

Section 117, best performance over four successive jumps, bars not over 5 ins. high (three entries)—1, Williamson's Riding Academy; 2, Williamson's Riding Academy; 3, Russell's Riding School, Vancouver.

Section 118, ponies or horses under fifteen hands, high jump (four entries)—1, Victoria Riding Academy; 2, P. J. Bagley, Vancouver, Wash.; 3, Belvedere Riding Academy, Sooke.

Section 119, championship high jump (four entries)—1, Baron Van Amerongen on Black Pirate and Victoria Riding Academy (Mr. Carpenter up) with Robin; 3, Russell's Riding Academy (Mr. Carpenter up) with The Imp.

Miss Muriel Price, of Duncan, was blue ribbon first prize in the jumping in pairs section at the horse show on Friday evening. Mr Staples was riding with her.

THE COLONIST IN NEW YORK

Jots From Literature

COUNT ILYA TOLSTOY, son of the famous Russian novelist, who died in 1910, has spent the greater part of his history death in lecturing on his great works. When the revolution broke out in Russia, Count Tolstoy fled from his native country and has never returned. Most of his time is spent in America, where his father's library now is, and he is regarded. He has been heard in nearly every city of importance in the country.

FAYTH'S OWNER PUBLISHES LOG OF RUN SOUTH

Account of Voyage of Dr. Harper's Ketch to California Waters Makes Fascinating Reading

PREVAILING WINDS COME FROM EASTERN

The recent cruise of Dr. John Harper's ketch Faytih, which was fitted out in Victoria last Spring, aroused much interest among local yachtsmen. Dr. Harper's crew, besides himself, was composed of Mr. Basil Lubbock, cruise master, of the Royal Vancouver Yacht Club anchorage on the afternoon of July 3, and sailed for San Francisco with a crew of five, all told. Two of these had seaman's certificates, on previous occasions; but to the others she was an entirely new ship. A night spent at the outer docks gave the hands a chance to settle down and get their gear stowed away, and a hard march down the straits upon the following day proved the average of the stores, kit and crockery to be efficient. July 4 was spent at Neah Bay, where the day was duly celebrated in the customary manner with Fourteenth July sports. Leaving the anchorage upon the morning of July 5, a start was made upon the long run to San Francisco. Upon leaving Tatoosh Island all hands settled down to the usual routine of watch keeping. With prevailing northerlies and flat calms but little way was made until the following day, when a fair wind got up and some 100 miles was logged. From this date onward a "soldier's wind," with calm intervals during the nights and a complete absence of fog, helped the little ketch on her way. The owner notes that off the Oregon coast the heavy swell, topped by a strong northerly gale wind, formed a magnificent sight when viewed from the deck of a small yacht.

NEVER LOSES POSITION

No carping headlands or their lights being duly observed, the position of the Farth was never in doubt, and when Point Reyes, the steering spot off the California coast, was passed on a brilliant moonlight night, with the ocean going steamer traffic heading northward, it was seen that the destination of the yacht was drawing near, and that the Pacific had been kind towards the little craft.

The approach to the Golden Gate was made early in the morning, and when the anchor was let go off Belvedere, in San Francisco Bay, a well-earned swim, followed by a lazy in the sunshine, was enjoyed by the crew. During Faytih's stay in the bay all of her crew were in high spirits, pleasantly entertained by the members of the San Francisco and St. Francis Yacht Clubs. The latter club extended the use of its club house on the day and rejoices in an excellent mooring ground and club house.

MEMBER OF CREW DESERTS

"One of the yacht's crew," writes Dr. Harper, "having decided to enjoy the bonds of matrimony while in California, left the ship at the stage of the cruise, but, his berth having been taken by a friend from San Francisco, he had decided to go up in the port of Santa Barbara and anchored in the roadstead. Here again the crew was warmly welcomed. We were detained from the city and neighboring district by members of the local yacht club.

"From Santa Barbara to San Pedro, continues Dr. Harper, "the channel, protected as it is by offlying islands, forms a delightful cruising ground for pleasure craft. Rounding the breakwater at San Pedro and sailing up to the California Yacht Club anchorage terminated what to each and every one of the crew of the Faytih was a very enjoyable holiday."

MANY ANGLERS OCCUPY LAKES AND STREAMS

Local and Visiting Fishermen Enjoying Sport on Vancouver Island, Says Publicity Bureau

SOME VALUABLE DATA IS GIVEN

For the benefit of the many anglers, local and visiting, the Victoria and Island Publicity Bureau issued some valuable data on the salmon, trout, steelhead, sea trout, grilse, deep-sea halibut and fishing regulations yesterday. So far, the angling seven days enjoyed some wonderful catches in the various streams and lakes throughout the Island.

A few interesting notes on how the fish are running, and where they are mostly caught, is given as follows:

Salmon—The big annual run of springs and coho is now on or in the way up the East Coast from Victoria to Campbell River. Catches of fish, many running as high as fifty pounds and even over, are being taken daily at the following points: Cowichan Bay, Chemainus, off Brotchie Ledge and Oak Bay, Victoria, Brentwood Bay, Deep Bay and Cowichan Bay, in Saanich Arm; Departure Bay, Nanaimo, Qualicum Beach, Comox Bay and Campbell River. Trout fishing is exceptionally good and fish are running in greater numbers every week than mentioned in the issued at all points mentioned.

Trout—Late in the season, water in most rivers and lakes too warm and low. Fair sport at Cowichan Lake, Little Qualicum River, Sproat Lake, Campbell River, Campbell, Cowichan Lake, Great Central Lake, Little River, Puntledge River, Campbell River and Cowichan River. Trout fishing will be better after September after the first Fall freshets.

Steelhead—This is the steelhead season in the Stamp River, Waters necessary; light tackle. Fish running from 8 to 14 pounds in weight. Big Sea Trout—Large numbers of these fish now off mouths of Jordan, Tyee, Jordan and Little Qualicum Rivers. Good catches being made. Dogfish—Plenty as well as halibut off Gulf Islands and Saanich Arm, Cowichan Bay, Deep Bay, Sooke Harbor.

Fishing Regulations—Licence for season, $10, or $1 for a day up to three days, may be obtained from Provincial Parliament Buildings, Victoria, or from game wardens in Nanaimo, Courtenay, Campbell River, Port Alberni, Victoria, Duncan, Sooke, Port Renfrew. No fish may be taken from streams in size to be taken from water.

ARMOUR CAPTURES OPEN GOLF TITLE

OZAUKEE COUNTRY CLUB, MILWAUKEE, Aug. 24.—Tommy Armour, the fighting Scot whose home is now in Detroit, but who came from the Tam O'Shanter Club of Orchard Lake, Michigan, was crowned king with the Western Golf Association championship today with 291 strokes, the lowest seventy-hole medal score in the tournament, twenty-nine years of play. Horton Smith, the blonde wizard from Joplin, Mo., who runner-up, eight strokes to the rear: Willard Hutchison, youthful amateur professional from Chicago Ills, was third, with 285, while Gene Sarazen, the Kingsmarkham Scot from Flushing, L.I., landed fourth, one stroke more.

Other leaders were Joe Kirkwood, transient jerky shot artist, and P. Walsh, of Augusta, Ga., sport champion, 285; Jock Hutchison, Chicago; Mehlhorn, said to be the man Harry Hampton, each of whom turned in 286.

Armour, one of the greatest marksmen of irons that golf has ever known, topped the brilliant field from the start.

TOMMY ARMOUR

WAR GENERAL DIES

BERLIN, Aug. 24.—Field Marshal Lieman von Sander, seventy-four, the German commander against the British in Gallipoli during the World War, died Friday at Hamburg.

The only reason a great many American families don't own an elephant is that they have never been offered an elephant for a dollar down and easy weekly payments.

Butter Tommy does a young man call here in the evening to see your daughter?

Tommy: Not exactly to see her, but I generally do light in the room by when he's there.

FIFTY YEARS AGO TODAY

(From The Daily British Colonist of August 26, 1879)

London, Aug. 26—Her Charles Tupper has ordered 20,000 tons of steel rails, for delivery at Montreal, for the new Pacific railway.

Rev. Sheldon Jackson, D.D., superintendent of Presbyterian Missions for the West, arrived from the North yesterday.

Among the passengers by the Alaska was Mr S. Brown, M.P.P. the new Westminster, who has been returned from a trip to Europe.

Occasional Furniture

In the Weiler collection each piece of occasional furniture has been selected for its beauty of design and careful craftsmanship. It is the type of furniture which you can choose for your own drawing-room or for a gift occasion requiring the utmost care and discrimination. Weiler's prices are always moderate, as an inspection of these attractive furniture pieces will show.

GYROS TO HOLD PICNIC TODAY AT METCHOSIN

All Members of Club Asked to Attend and Bring Families to "Get-To-gether" Gathering

BUSY WEEK FOR SERVICE CLUBS

CLUB CALENDAR

Sunday—Gyro Club picnic at Metchosin; 2:30 p.m.

Monday — Gyro Club luncheon; Chamber of Commerce, 12:10 p.m. Mr. David Leeming on "Tourist Trade and How to Hold It."

Monday—Kumtuks Club, swimming at Crystal Garden, 7 p.m.

Tuesday—Rotarians Club luncheon, Empress Hotel, 12.10 p.m. Report of delegates to District Convention at Salem, Ore.

Wednesday — Gyro and Rotary Clubs return softball game; Beacon Hill Park, 8 p.m.

Thursday—Rotary Club luncheon; Empress Hotel, 12.10 p.m. Mr. F. Waring on "By Car Over the Caribboo Road."

Thursday—Kiwanis Club; Empress Hotel, 8.15 p.m. General business.

Friday—Deadlock Club; Dominion Hotel, 12.45 p.m.

The delayed picnic of the Gyro Club will be held today at the Whitney-Griffiths farm, "The Grange," Metchosin, at 3.30 p.m., weather permitting. The occasion is to be a real "get-together" and the club wishes to see all members on hand, accompanied, if possible, by their wives and children. Those who are going are asked to bring their own lunches. Hot water will be provided, and ice cream for the youngsters.

The programme of sports will include events for the young and aged; races, putting contests and softball games. There will be two direction signs placed on the way out to the farm, which is on the main Metchosin Road.

At the club's luncheon meeting, at the Chamber of Commerce on Monday, Mr. David Leeming, president of the Publicity Bureau, will speak on "Tourist Trade and How to Hold It."

KIWANIS

At Tuesday's meeting of the Kiwanis Club, at the Empress Hotel, the delegates are to give their reports in as interesting a manner as possible, and no long-winded documents will be read. Messrs. Harry Beach and H. M. Dagon will be the feature speakers. In view of the fact that the 1930 convention will be held in Vancouver, members are requested not to miss the opportunity to bear at first hand the responsibility resting on all of them.

In addition to the address on the subject of "By Car Over the Caribboo Road," to be given by Mr. F. Waring at the luncheon meeting of the Rotary Club, at the Empress Hotel on Thursday, Mr. J. M. Whitney will give a classification talk, and members of the acquaintance committee will stage an opening turn.

TOC H NOTES

The next meeting of the Victoria group of Toc H will be held on Thursday evening, August 29, at 8 o'clock, in the Toc H O Pip, 631 Bastion Street. This is the monthly business meeting.

At the last Toc H meeting Padre Leslie Beckley gave an interesting talk on Hyde Hall, Rugby, the new Talbot House on Tower Hill, headquarters, etc. He also gave an interesting account of his trip to Australia, where Toc H is particularly strong. Toc H Australia is self-governing, with its own federal headquarters, and Padre Beckley expressed the hope that before very long, Toc H Canada might also be autonomous. Sir William Campbell is one of the strongest and most active supporters of Toc H in the Commonwealth.

GRANGE V. HOLT KILLED BY AUTO

Prominent Banker of Vancouver Is Struck by Truck and Dies Soon After Reaching Hospital

VANCOUVER, Aug. 24.—Grange V. Holt, retired banker, who for many years occupied a commanding place in the financial life of the city, was killed at 10.45 a.m. today when he was struck by a truck at West Fourth Avenue and Granville Street. Mr. Holt, who was manager for the Canadian Bank of Commerce for thirteen years before he retired last November, died at Vancouver General Hospital emergency ward, twenty-five minutes after he was hit. The truck was driven by Fred H. Lewis, eighteen. Lewis is under $5,000 bail on a manslaughter charge.

Profound sorrow was expressed throughout the city this afternoon as news of Mr. Holt's death became known. Not only in banking and financial but in shipping, social, civic and golfing circles was he known and revered by thousands.

At the time of his death, Mr. Holt, who was sixty-six years of age, was finishing a term as president of the Vancouver Merchants' Exchange.

No More Piles

Piles sufferers who suffer just quick, safe and lasting relief by removing the cause—bad blood circulation. Stop the pain, stop the itching, stop the misery! No drugs, no internal remedy must be used. Dr. Leonhardt's Hem-Roid, a tasteless tablet, does all this. Hem-Roid relieves piles blood congestion and strengthens the rectal parts. Hem-Roid has a wonderful record for quick, safe and lasting relief to Piles sufferers. It will do the same for you. Guaranteed by all druggists. Mail Orders Drug Co., Vancouver Drug Co., Lyon & Hughes, and Hem-Roid with this advertisement. (Adv.)

Local Optometrist Secures Licence for New Lens Here

A new type of spectacle lens developed by Bausch & Lomb Optical Company, of Rochester, N.Y., bids fair to revolutionize optical standards throughout the country. Superiority is claimed over all flat, periscope and toric forms now in use.

In an interview with Mr. H. S. Timberlake, of the Victoria Optical Company, new licensee for this lens, it is stated that, unlike previous forms, clear and distinct vision is offered right out to the edge of the lens, in cases where patients have endured eye fatigue and headaches from the lens they will give immediate relief. Leading refractionists have no hesitation in stating that the Orthogon will supersede all other curved forms.

Licensees under the Orthogon patent must qualify under rigid inspection standards set by Bausch & Lomb, the originators of Orthogon.

Mr. H. S. Timberlake announces that he is now ready to offer patients complete service on this lens.

Judges Appointed

Judges for Ward Two, Saanich Cottage Gardeners' Society's annual exhibition, which will be held in St. Mark's Hall, Rolston Road, Cloverdale, on September 7, have been appointed by the Department of Agriculture as follows: Fruit and vegetables, Mr. George Robinson, Royal Oak; flowers, Mr. John Hutchison, F.R.H.S., of Rockholme Gardens; women's work, etc., Mrs. J. D. Gordon, 1326 Woodlands Road. Prizelists and new entry forms are now ready for distribution, and may be had from the secretary, Mr. W. F. Llewellyn, 3710 Saanich Road.

Oil Wells Enrich Indians of Alberta

THE Stoney Indians on the Morley Reservation along the line of the Canadian Pacific Railway near Calgary are benefiting by the oil development on their reserve. Chief Wolf Dog, a member of the tribe, representing 130 families, receives $10 per annum for oil lease rentals on the tribe's land and, should oil materialize, will receive a 12½ per cent. royalty on all production, a certain amount of which will be set aside for agricultural implements. They gathered in all their Indian bravery of feathers and finely worked shirts, shawls and moccasins on the occasion of the first payment. Pictures show Chief Wolf Dog, Lost Buffalo and Black Buffalo saluting the derrick, Chief Wolf Dog and Lost Buffalo, Chief Wolf Dog receiving payment from B. Hinton, Indian Agent at Morley, Indian with pipe in mouth is Wild Man, son of Wild Woman. Chief Wolf Dog's inside derrick with driller, Squaw Becky Beaver and papoose, counting her money. She looks heap happy.

ENGLISH WRITER VISITS VICTORIA

Mr. A. M. Lyons, one of the prominent barristers of Nottingham, England, and Conservative candidate for Clay Cross, Derbyshire, in the last general election in Great Britain, arrived in Victoria yesterday morning. Mr. Lyons, who is on his second visit to Canada, is touring the Dominion in search of material for special articles for the British press. He expressed himself as being much impressed with the general prosperity and forward achievement of this country.

Obituary

TOON—The remains of the late Lee Pock Toon are repasing at Hayward's B.C. Funeral Chapel, from where the funeral will take place on Wednesday, at 2 o'clock. Interment will be made in the Chinese Cemetery.

BISSETT—The body of the late Miss Ella Bruce Bissett were laid to rest in St. Stephen's Cemetery yesterday morning, the funeral taking place from Hayward's B.C. Funeral Chapel at 10 o'clock, proceeding to St. Stephen's Church, Mount Newton Crossroad, Saanich, where service was conducted by Rev. J. S. A. Baatin, at 11 o'clock. A very large number of sympathizing friends were present. The hymns sung were "When On My Day of Life the night Is Falling", and, "O Love That Will Not Let Me Go." Numerous beautiful floral designs were received and placed on the casket and graves. The pallbearers were Messrs. R. Lawson, A. M. Thomson, George Love, F. Turgoose, J. Nimmo and R. Crawford.

MITCHELL—The funeral of the late Edward Hamilton Mitchell took place yesterday afternoon from Hayward's B.C. Funeral Chapel, at 3:15. Rev. Dean Quainton, assisted by Rev. Bruce O. Gray, officiated in the presence of many friends. The hymns sung were: "Lone Yet Disconsolate" and "Nearer, My God to Thee." The large number of beautiful floral tributes received conveyed a message of sympathy. The following acted as pallbearers: Messrs. Howard Dickson, Thomas Cliphant, W. T. Edwards, G. P. Player, A. R. Green and G. r. Simpson. The remains were laid to rest in Royal Oak Burial Park.

LIP—The funeral of the late Lim Kwong Lip will take place today at 2 o'clock, from the Thomson Funeral Home, where service will be conducted. The late Mr. Lip was seventy years of age and had been a merchant at 33 Pugard Street, for over thirty years. He is survived by his widow, four sons and ... daughters, all residing in Victoria, and by one daughter in Vancouver. The remains will be laid to rest in the Chinese Cemetery.

LEWIS—On August 23, at the Royal Jubilee Hospital, there passed away Henry Lewis, aged seventy-two years, a native of the State of Connecticut. The late Mr. Lewis had been a resident of Victoria for the past twenty-two years and had recently lived in the Hatley Park district. He is survived by his widow. The remains are resting at the Thomson Funeral Home, from where the funeral will take place on Tuesday afternoon at 2 o'clock. Rev. James Hood will officiate. The remains will be laid to rest in the Royal Oak Burial Park.

TO ATTEND THEATRE

Members of the Junior Chamber of Commerce and their wives will be the guests of the management of the Coliseum Theatre tomorrow evening for the opening performance by the Mildred Page Players.

Last Excursion to Seattle, this season will be on Thursday, August 29, Princess Patricia.

Health and Diet Advice

By DR. FRANK McCOY

RINGWORM

It has been estimated that practically one half of the adult population of the United States has had ringworm at some time or other. This is a popular name for several diseases of the skin caused by small vegetable fungi or molds.

All forms of ringworm are very contagious and are easily transmitted from one person to another. These diseases are frequently found on cats, dogs, cattle and birds, and are sometimes conveyed by handling, to humans.

The ringworm of the foot is a frequent occurrence wherever people use common dressing and bathing rooms. Infected premises should be thoroughly scrubbed with some powerful disinfecting agent. Ringworm of the body is easily cured by the use of a cleansing diet, and painting the infected area, night and morning with a solution of silver nitrate, iodine or mercurochrome.

Ringworm of the body usually begins with a small patch which spreads out in a circle, with a red, scaly margin. The skin toward the centre of the patch may have partly recovered and appear normal. This gives the disease its characteristic ring-like form.

Persons with thin light hair are much more susceptible to ringworm of the scalp than are brunettes. This form of the disease usually only comes to children under the age of fourteen, and is frequently carried from one child to another by combs, brushes and hats.

Ringworm of the beard, or barber's itch, is frequently conveyed by means of the common lather used in barber shops. Many Boards of Health now insist on a thorough sterilization of all brushes and utensils used in barber shops. This ringworm of the beard produces great irritation, and each hair is surrounded by a small capsule of pus.

The fingernails are sometimes attacked by ringworm parasites and become discoloured, thin and brittle. When this parasite attacks scalp, beard and nails, it is much harder to eradicate than when the body is attacked, and a course of many months or years of treatment may be necessary. The hair should be cut short and the affected area treated carefully.

Children or children who have been fed improper combinations during their infancy, in cases where close physical contact with another child suffering from ringworm produces the disease, the ringworm on the child with healthy blood usually quickly disappears.

Unless the systemic condition is removed by diet, the disease, although cured in one place, will usually reappear in another.

BIRD CART MAN

Well-Known London Character Again Plies Trade on Public Thoroughfares

London has recently welcomed back an old friend in the shape of the Bird Cart Man who has made his appearance in the narrow streets of Soho, a part of the city which is relatively noted for its foreign restaurants. The man with the birds goes along with his pony cart piled high with small wooden cages occupied by canaries, Java sparrows or parrots. There was a time when he would barter his birds in small boys or even adults for a few pence, with a pair of old boots or an old coat thrown in; he has even been known to take a discordant gramophone in exchange, or some domestic article no longer of any use to its owner. Times have changed, however, and the bird man is not so ready to exchange his wares for anything but copper or silver.

CANADIAN NATIONAL RAILWAYS

Summer Train Service

"Confederation" leaves Vancouver 10.30 a.m. daily for Kamloops, Jasper, Edmonton, Saskatoon, Regina, Brandon, Winnipeg and Toronto, making close connections for all Ontario and Southern points.

Dan Moses' Crew Wins Flumerfelt Trophy for Senior Fours — Webster Wins Junior Singles

A smiling sun, smooth water, a flooding tide and what little breeze there was blowing fair, all contributed to making ideal rowing conditions at the Gorge yesterday afternoon, when the James Bay Athletic Association, the pioneer rowing organization of the Northwest, staged the big club event of the season for its members, the chief contests being for possession of the Flumerfelt Trophy, for senior four supremacy, and The Times Trophy, best in novice fours. Good sport was provided in all events.

The main feature was contested in heats, the first heat being won by the boat stroked by Moses, the other members of the crew being Oliver, Bull and Ditchburn. The losing crew was Wills (stroke), Norris, Heron and Scott. Both crews got away well together, the winning crew taking the lead shortly after, keeping it all the way, crossing the line half a length ahead of the losing boat.

SECOND HEAT

The second heat in this contest was won by McLachlan (stroke), Wright, Dunn and Smith, the losing boat being stroked by Craze, with Miller, Mann and Scourthwaite comprising the balance of the crew. This heat was as keen a go as one would want to witness. Both crews took the water at the pistol shot and went boat to boat for some distance, McLachlan and his crew gradually forging ahead and were a length in the lead at Curtis Point. Shortly after and his men reduced this slightly, the boats finishing with the winners only feet in the lead. The final between the McLachlan and Moses crews provided another hard-fought race for the spectators, the trophy going to Moses and his stalwarts. Getting a slight advantage at the start, the lead of the winning boat was increased to almost a length at Curtis Point, but this was reduced by the losers to half a length at the finishing line.

In the race for The Times Trophy, novice fours, the crew stroked by Hume, and comprising Ruttan, Randall and Webster, won over the crew stroked by Stancil, the other members being Stevenson, Campbell and Carey. The sixers steered a good course all the way, but were followed close by the losers, the boats finishing at the finish line with the Hume boat just a third of a length over the line.

The junior singles event brought out three starters, Webster being first, Stevenson second and Randall third. The junior doubles was won by Heron and Miller by two lengths, Mahood and King occupying the losing boat. In the novice doubles, Webster and Stancil were the winners, oarsmen by two and a half lengths, Spence and Drake being in the losing boat.

The officials who were responsible for the smooth-working arrangements at the regatta are to be congratulated for the manner in which everything was conducted. Starting the boys was the "Daddy" of Victoria oarsmen, Dan O'Sullivan, who, besides seeing that they got away right, endeavored to coach them in steering so the Bluebird followed the boats, ably skippered by Harry Eglin at the wheel. The referee was Mr. Bradley, of Winnipeg, and formerly a prominent sculler of the Prairie metropolis. Charles Mailandaine was the judge and F. D. Roberts the steward.

Foxes From Yukon—The first shipment of silver foxes arrived here from Dawson City Friday for Mr. D. B. Stewart, of Westaskiwin, Alberta, who disposed of them to a local fur farmer. The animals were ten days in transit.

Probates Granted—Probates and administrations issued in Supreme Court last week included the following estates: John Ross, who died at Victoria on May 6, 1929, estate $40,489. Alice Helen Hill, resaling of English probate, total estate $80,188; British Columbia estate $2,100.

Motor to South—Leighton McMillan and Cecil Hulme, of Victoria, are holidaying in the South. The Victoria youths motored to Los Angeles in less than forty-six hours notwithstanding an eight-hour stop on the way due to engine trouble. They will return to the city within the next week.

Visits Capital—Mr. Adam Bell, of Revelstoke, is in the city for a few days. Mr. Bell was recently appointed one of the members of the Male Minimum Wage Board for British Columbia. He is conferring with the chairman of the board, Mr. J. D. McMiven, Deputy Minister of Labor, during his visit to the capital.

Automobile Stolen—Mrs. R. W. White, 1354 Mitchell Street, reported to the police that her automobile, licence number 5742, had been stolen from the corner of Yates and Vancouver Streets some time before 11:15 o'clock last evening. Mr. Harold Hukila, 722 Discovery Street, reported that his bicycle, painted yellow and bearing the number C-1625, had been stolen from outside the Romano Theatre during the evening.

Hits Street Car—A Hindu driver named Baboo hit a Gorge Street car driven by Mr. Adam Elliott at the corner of Rock Bay Avenue and Bay Street at 10.40 o'clock last evening, with the result that the auto was reduced to a complete wreck, and the Hindu badly bruised about the chest. The street car lost one door. Constables John Blackstock, Donald McPherson and Perts Atkinson took Baboo to the police station, where police will prefer a charge.

VETERAN SHOT HEADS THE LIST

Major Fred Richardson, O.B.E., Scores 101 at Weekly Shoot of V. & D.M.R.A.

Major Fred Richardson, O.B.E., veteran marksman, headed the results at the weekly shoot of the Victoria and District Military Rifle Association held at Heals Rifle Ranges yesterday. A tricky wind and a bad mirage at the longer ranges made conditions somewhat difficult. However, despite these conditions, Major Richardson only dropped two points out of 105.

Scores follow:

CORDOVA BAY TO HAVE FINE AQUATIC MEET

Regatta Will Appeal to Lovers of Many Forms of Water Sports This Year —Everything Is Ready

LAND EVENTS TO OPEN PROGRAMME

Speed boats, runabouts, canoe and swimmers race will take a large attendance to Cordova Bay on Wednesday than in the thirteen preceding years that this popular event has marked the close of the Summer season at Victoria's most frequented resort. The committee announces everything is in readiness for the entertainment of visitors

RACING CRAFT EVENTS

Added to the long list of events, something new in the way of water sport, to Victorians, will be the hydroplane and runabout races, over an oval course of one, three and five miles. These small craft are capable of a speed of from thirty to fifty miles an hour, and great skill is needed in their handling. Entries include Jack Hutchison and Miss Dorothy L. Jack Smith with Berkley Motor Car Repairs, Dick Wilson with Miss De Soto II, Harry Jones with Miss Osprey, Ray Carlile with Sea Bird, and Bagley with Baby Sleeper. These represent local competitors, and a strong contingent of capable water speeders from Port Angeles will cross the Straits to try to win the honors under the leadership of Mike Hopkins.

In the runabout races of one, three and five miles, which will also prove exciting, Jack Smith and Norman Pindler will pilot Black Bottom, which is looked upon as a winner in this class. They will have a keen contestant in E. Burnside, with Lady Godiva, Peeping Tom, which will be driven by D. Newland; De Soto by Dick Wilson, and Osprey, which will be driven by H. A. Tomlin.

CANOE EVENTS

Other features of the regatta will be the Norris Perpetual Cup race, won last year by Albert Russell. This cup is the oldest trophy of the club, given by the Norris Brothers. In honor of their father, the late Fred Norris, who took much interest in the promotion of the regatta. Allan Pendray will be a close contestant in this race, it is expected.

The McMorran Cup, won last year by Dorothy Clark, for the ladies' single canoe, should be another exciting race.

Four-paddle canoe races will prove popular. The mixed four-paddle canoe races over a course of 200 yards and return always prove popular, and will be keenly contested.

FIELD EVENTS

Before the aquatic events take place, the land sports, which consists of novelty races for the tiny tots to novelty games for the older folks, start at 1 o'clock sharp.

WATER CARNIVAL

In the evening, starting at 8 o'clock, the water carnival will take place, with illuminated canoes and boats taking part. A large beach fire will be kindled and a community sing will be under way.

At the McMorran Pavilion, the regatta dance will hold sway, while at Uncle Tom's Cabin Roller Rink many skaters will take to the spacious floor.

Smiles—is the longest word in the English language because there is a mile between the first and last letter.

Lake Hill Card Party

The card party which was to have been held under the auspices of Lake Hill Women's Institute, Monday evening, has been postponed until Monday, September 9, on account of having to prepare the hall for the Ward One exhibition which is to be held on Wednesday.

SUMMER SWEATERS

Gay slip-ons of fine knit wool are made without sleeves for Summer comfort. These have bold and colorful stripes, often enhanced by tinsel threads. There are, of course, long sleeved models in the smart assortment of light-weight sweaters for sports wear.

News of Cumberland

Mr. C. Bennett, of Prince Rupert, and family, of Victoria, are at Nanaimo as guests of Miss Smith's aunt and uncle, Mr. and Mrs. W. Merrifield, at the Cumberland Hotel.

Mrs. Erlett and daughter, Margaret, of Victoria, are spending a few days holiday here, the guests of Mr. and Mrs. C. J. Richardson.

Mrs. Freaner, of Rustic Cottage, Willow Creek, is visiting her sister, Miss Harriet Horbury and brothers, Joe and Jack Horbury.

Mr. and Mrs. Anderson, of Haselton, are also visiting the sister and brothers of Mrs. Anderson, Miss H. Horbury, and Messrs. Joe and Jack Horbury.

Mr. W. Gough and family, of Calgary, arrived in Cumberland on Thursday on a visit to Mr. and Mrs. Samuel Gough. They motored from Calgary and reported a wonderful drive.

Messrs. J. Halliday, J. H. Robertson and Fraser Watson left on Thursday for a few days fishing trip at Upper Campbell Lakes.

Mr. and Mrs. J. Gilles and two A. Hall, and Mr. Patrick, of Vancouver, Miss Dorothy Gillespie and couver, are visiting Mr. and Mrs. T. E. Banks at Qualicum Beach.

Mrs. J. Smith and daughter, Dorothy, are leaving Cumberland this week-end and will make their home in Vancouver.

A very successful tea and whist party was held at the home of Mrs. J. Baird on Wednesday evening by the Lady Foresters, when six tables were in play. During the evening Mrs. Baird served dainty refreshments and the winners at cards were announced as follows: First, Mrs. Bell; second, Mrs. Blaughter.

Miss Phyllis Burford, of the nursing staff of the Cumberland General Hospital, has resigned her position and is staying with friends at Royston Beach.

At Elk Hotel

The list of guests registered at the Elk Hotel during the past week includes the following: Mr. and Mrs. A. H. Ford and daughter, Mr. T. G. Wilson, Mr. and Mrs. Guy Ford and family, Mr. and Mrs. E. L. Hussey, Mr. L. B. Tringm, Mr. B. B. Cicerl, Mr. and Mrs. L. G. Howard, Mrs. Blake Burrier, Mrs. R. W. Wood and son, Mr. R. L. Black, Mr. A. Balcom, Miss K. Moran, Miss Sheila Parr, all of Victoria; Mr. C. M. O'Brien, Mr. Ernest A. Earle, Mr. and Mrs. A. T. Love and son, Mr. and Mrs. Ritchie and child, Mr. and Mrs. M. Spouse, Miss L. M. Drysdale, Mr. Douglas Mackedie, Mr. and Mrs. Dowsston, Mr. and Mrs. W. E. Hodges, Mr. and Mrs. E. Adams, Dr. and Mrs. Neil McNeill, Mr. P. W. Ffarm, Mr. and Mrs. W. Brims and family, Mr. and Mrs. Robert Gray, Mrs. Lester White, Mrs. John R. Reid, Mr. and Mrs. G. B. Rothwell, Mr. David Rothwell, Rev. Harold C. King, Mr. Herbert D. King, Colonel and Mrs. William Grace, Mr. and Mrs. Gordon Black, Mrs. S. Powell, Mr. and Mrs. C. E. Anstie, all of Vancouver. Mr. and Mrs. McInerr and daughter, Los Angeles; Dr. and Mrs. H. B. Reynolds and Miss Reynolds, Pain Alto; Mr. and Mrs. Grant Smith, Seattle; Mr. and Mrs. Colin G. Smith, Los Angeles; Mr. and Mrs. C. A. Dunsmuir, Los Angeles; Miss Constance Weld, La Jolla; Miss Booth, Portland, Ore.; Mr. and Mrs. H. W. Morrison, Tacoma; Mrs. John W. Mitchell, Miss Pauline Clark, Mr. S. B. Reward, Jr., Mr. Harry Perrin, Palo Alto, Cal.; Dr. and Mrs. P. F. Howe, New York; Mr. and Mrs. L. C. Knocker, Cowichan; Mr. A. Thomas Kimberley, Miss Velma Beckley, Nanaimo; Mrs. R. C. Richardson, Campbell River; Mrs. H. M. Hunt and daughter, Nanaimo; Mr. and Mrs. F. H. Price, Mr. A. F. Price, Duncan; Mr. N. M. Patton, Nanaimo; Dr. J. W. F. Seaborn, Toronto; Mr. L. J. Crewn, Montreal; Mr. and Mrs. E. C. Wragge, Nelson; Mr. and Mrs. J. P. Morsn, London, England.

Bride Sought for 11 Years

LEFT, Mrs. Richard M. Butler, who, as Maureen Smith, nursed a British war hero back to health, and married him, after he had vainly tried to find her for eleven years. Richard M. Butler, right, is the rich Indian who fell in love with Miss Smith, who woke up in a London hospital one morning to find Miss Smith bending over him, when he was taken there suffering from injuries received in a motor car accident.

Women's Institutes of Vancouver Island

COLWOOD

A social evening will be held by the Women's Institute on Tuesday evening, August 27, at 8 o'clock in the Colwood Hall. The prizes will be presented to the pupil making the highest marks in entrance examination, and other grades. A farewell will also be accorded two young members of the community who are leaving to take up positions as teachers. A hearty welcome is extended to residents of the district, and cakes will be acceptable.

Weddings

CARTER—MERRITT

In the presence of a large gathering of friends at St. Aidan's Church, Mount Tolmie, on August 20, at 8:30 o'clock, Rev. P. T. Galbraith united in matrimony Lily Emmeline, only daughter of Mr. and Mrs. E. J. Merritt, of Cedar Hill Crossroad, and Mr. Leslie George Carter, second son of the late Mr. George Carter, "Woodley." The bride was given in marriage by her father, and wore a gown of white satin trimmed with rose point lace and rhinestones. Her wedding veil, which was held in place by a coronet of orange blossoms, which had been worn by her mother, fell softly over her gown and she carried a bouquet of Ophelia roses, sweet peas and carnations. Miss Clara Cruikshank, of Vancouver, was maid of honor and wore a frock of orchid georgette and picture hat of mohair to match. Miss Marion Carter, as bridesmaid, wore a frock of daffodil-yellow georgette and mohair hat to match. Miss Daphne Whitcomb, as flower girl, wore a frilled frock of pale blue organdie and a bandeau of silver leaves in her hair. The maid of honor and bridesmaid carried bouquets of yellow and mauve gladioli to match their dresses, and the flower girl carried a basket filled with pink sweet peas. Mr. William Carter was his brother's best man, and the ushers were Messrs. John Merritt, brother of the bride and Cyril Carter, brother of the groom. Mrs. F. Dawson played the wedding music and during the signing of the register Mrs. Arthur Dowell sang "O Promise Me." The church decorations were beautiful and were arranged by Mrs. H. Lindsay, assisted by Mrs. W. H. Mortimer and Mrs. J. Taylor. A reception was held at St. Luke's Hall, which was decorated by Mrs. Mildenhall. The guests, numbering about 200, were received by the bride and groom, assisted by Mrs. Merritt, who wore a gown of silver grey georgette, and by Mrs. Carter, who wore a gown of lavender crepe. Refreshments were in charge of Mrs. J. B. Hudson and Mrs. Petrie, who were assisted by several young ladies. Mrs. Arthur Dowell sang selections from the "Chocolate Soldier," and dancing was enjoyed after the departure of the bride and groom. Mr. and Mrs. Carter left for Portland for their honeymoon, and on their return will live at 2714 Blackwood Street. For traveling the bride wore a beige ensemble and hat to match. Among the many gifts was a standard lamp from the staff of the Bluth Canadian Company, where the groom is employed. Among the out-of-town guests at the wedding were Mrs. MacDougal, of Vancouver; Miss V. Kummer, of Vancouver and Mr. Imse, of Vancouver.

Port Alberni News

Mr. and Mrs. Fred Street are spending a two weeks' holiday at Tofino and other parts of the West Coast. Mr. Street is being relieved as customs officer by Mr. Percy Renwick, of Union Bay.

* * *

Capt. and Mrs. McLean Fry have returned to their home in Port Alberni after spending the Summer months at Qualicum Beach.

* * *

Mr. and Mrs. Jasper Robertson, of Los Angeles, are spending a few days in Port Alberni and district.

* * *

Among the guests registered at the Somass Hotel is Mr. C. B. Dayton, of Georgetown, Ont.

* * *

Miss Gladys Highbridge, of Vancouver, is visiting in Port Alberni for a short time.

* * *

Mr. A. McCann, of Seattle, is a guest at the Somass Hotel.

* * *

Miss Margaret Planet motored to Victoria on Tuesday morning to spend a short vacation with her sister, Miss Bess Planet.

* * *

Mr. and Mrs. Olvena, of Victoria, have returned to Victoria after spending the past two weeks as the guests of their daughter and son-in-law, Mr. and Mrs. James Bradley.

* * *

Mr. and Mrs. James Gray, of Victoria, will be the guests of Mr. and Mrs. Dawson Turner over the week-end.

* * *

Rev. Dr. Campbell returned to Victoria yesterday after a two weeks' vacation spent in Port Alberni district.

Mayne Island Personal

Mr. George Mitchell was one of the Premier's party on the occasion of the opening of the annual exhibition at Mayne.

Singer Returns Here

After a successful Summer season as contralto soloist at KJR radio station in Seattle, and soloist at Westminster Presbyterian Church, Miss Merle North, L.A.B., will return to Victoria on September 1 to reopen her studio for vocal, piano and theory lessons.

DANCE AT METCHOSIN

A successful dance was convened by Mr. Eric Walker, preceded by a short entertainment, on Friday evening in the Metchosin Hall. The dance was held in order to raise funds for a kitchen for the newly-erected Rest Books Hall, and the following items were given in the programme: Violin solo, Mr. Cartwright, comforting duet by Professor Williams, Mr. E. Walker; piano solo, Lady Emily Walker; song, Mr. E. Walker; violin solo, Mr. Cartwright. Mr. E. Walker was assisted by Mr. Eddie Williams. An excellent supper was served by Mrs. Brown and Mr. Rupert Walker; the tables being prettily decorated with sweet peas. The orchestra for the dancing was composed of Mr. E. Walker, piano, and Mr. E. Williams, drums.

Chemainus Personals

Mrs. R. V. Clute entertained at an informal afternoon on Friday in honor of Lady Thornton. Other guests were Mrs. Lyall Vincent, of Seattle, and Mrs. E. Bruce Irving, Chemainus.

* * *

Sir Henry Thornton and entourage were entertained by Mr. J. A. Humbird and other officials of the Victoria Lumber & Manufacturing Company for lunch at the Horseshoe Bay Inn, Sunday afternoon. Mrs. Lyall Vincent and Mr. Robert Parker, both of Seattle, were guests of Mr. and Mrs. R. V. Clute.

* * *

Mrs. H. A. Rhodes, of Cowichan Station, is the guest of Mrs. Jack Stewart and attended the Nanaimo Dog Show on Saturday in company with Mrs. Stewart.

* * *

Master Gerald Allister has returned from a delightful holiday in Victoria, the guest of Miss Dindale. Master Jimmy Allister is now spending a vacation in Victoria.

* * *

The many friends of Miss Elsie Jacobson will be interested to learn that she will leave on Monday for Seattle, where she intends entering the Virginia Mason Hospital to train.

* * *

Miss Duke, of Victoria, is staying with her sister, Mrs. Jack Stewart.

* * *

Chemainus residents were delighted to greet three former nurses of the Chemainus General Hospital at the baseball dance held here on Thursday night. The ladies were Mrs. Bagdall, of Nanaimo; Mrs. Leland Hallberg, Vancouver, and Mrs. Adam, San Diego.

* * *

Madame Sanderson-Mongin, who is renting Dr. H. Rogers' house from her sister, Mlle. Mongin, visiting her.

* * *

Mrs. Cloke has returned to her home in Cedar district after a holiday visiting Mrs. Lewis G. Hill.

* * *

A most successful dance was given in the Chemainus Recreation Hall on Thursday evening by the baseball club. The arrangements were all made by Mr. C. Johns, and from beginning to end the entertainment went without a hitch. The five-piece "Collegiate" orchestra from Nanaimo was excellent. The supper was in the capable hands of Mrs. O. Jacobson and Mrs. D. W. Murray and was most delicious, the tables being arranged with sweet peas in various colors. Two siittings had to be arranged for in the supper room to accommodate the 165 or so guests, and visitors were recognized from Duncan, Ladysmith and Nanaimo. When all expenses are paid the club expects to realize between thirty-five and forty dollars.

* * *

Among those registered at the Horseshoe Bay Inn were Mr. and Mrs. E. L. Bickford and children, Vancouver; Mr. Kennington, Vancouver; P. G. Walker, Victoria; A. J. Grover, Victoria; R. C. Sands, Vancouver; J. Walton, Vancouver; W. P. Roberts, Victoria; John Hadder, Hammond; O. Martin and wife, San Francisco; Mr. and Mrs. L. S. Vincent, Seattle; Robert C. Parker, Portland; Sir Henry Thornton and party.

ALLURING MILLINERY

Merchants seem engrossed in Summer sales, but there has been an arrival of a few significant new hats. One velvet ribbon turban flares out at the sides in the bi-corne manner with tab ends drooping over the ears. Another turban is a series of curving tiers in the brow line. A Rebouot felt cut up off the forehead is long in back and wide and irregular at the sides, the felt supple and draped becomingly to frame the face.

You Owe It to Your Child

Many children start the battle of life with a broken sword, because they have cross eyes, either permanently or periodically. Many thoughtful parents send their children to us as frequently as to the dentist. If glasses are needed, these mothers and fathers have the satisfaction of knowing that the loving watchfulness has performed a service for which their child will be everlastingly grateful.

Cross eyes, in the majority of cases, can be straightened, if the child is treated at an early age. The process of treating these defects is known as the development of the Fusion Faculty. It consists in corrective exercises which strengthen and build up the visual powers and muscles of the eyes, and finally the fusion sense in the brain, a most important factor in the act of all vision. No surgical operations are connected with this system. It is wholly a course of visual, muscular and mental training.

Do not allow your child to start the battle of life with a broken sword. Ungainly appearance and bashfulness are sure to result in the child a tendency to be backward and dull.

Let us examine his eyes; then, if necessary, we can prescribe corrective exercises or corrective lenses.

Bring your child to us for a thorough eyesight examination.

Spanish Slant in Hats

THE influence of Spanish modes is growing at a pace with which to be reckoned. Here is a fair sample of its progress from Summer to Autumn styles as in evidence there in the realm of millinery. Agnes of Paris, the creator of so many successes, is making the most of Castilian effects.

With her positive genius for introducing new ideas women accept with alacrity both in America and on the Continent. It is not amiss to expect a real vogue when this particular modiste adopts a new fancy.

Four of the hats shown are illustrative of the Agnes version of the Spanish adaptation. She has happily suggested gay Spain in the silhouettes of these, in her trimmings of feather brushes, and in her skillful use of the veil.

A small shallow cap of a hat created from black felt is the first veiled model at the left, the veil just covering the eyelashes and drooping toward the back.

An exaggeratedly long veil on the widened turban next, is very suggestive of Spain, the long lace veil draped and apparently only in front.

Agnes veils even a shallow beret, as shown at the right above—the chapeau is black velvet and the veil of tulle beaded with black satin.

The question is, will American women as a whole appreciate the veil to the extent of wearing it with the regularity of old? Already women in the city are appearing tantalizingly veiled. But they are far in the minority, as all habitués of new fashions usually are.

The veil is being used in every version in a draped affair, adding a definite charm of mystery with certain costumes.

The application of features of a hat trimming is being done very cleverly, and the effect accomplished is coy, as none the shallow crowned models that do not fall with a feather fancy tucked at the side.

Irregular lines lend their piquancy to the average face. And so they continue to evade millinery in designing new models. The matador beret shown at the bottom of the group is by Tiemann of Paris and takes a decided downward sweep at one side, resembling a draped hat rather than claiming kinship to the familiar beret.

Miscellaneous Shower

A delightful miscellaneous shower was held recently at the home of Miss Beth Campbell, in honor of her sister, Miss Margaret Campbell, whose marriage will take place tomorrow. The many gifts were concealed in a canoe. Mrs. Roy Copas, Miss Daisy Blackstock and Miss Peggy Campbell assisted in serving the tea. The invited guests included Mrs. H. Campbell, Mrs. D. F. Campbell, Mrs. Rimmonde, Mrs. H. Copas, Mrs. R. Copas, Mrs. J. Blackstock, Mrs. A. Campbell, Mrs. H. Blackstock, Mrs. H. Campbell, Mrs. Burton, Mrs. D. Campbell, Mrs. Goodman, Mrs. H. Wasson, Mrs. E. Hastings, Miss Margaret Campbell, Miss L. Stokes, Miss Robertson, Miss Marie Bodely, Miss Minnie Knight, Miss Ivy Knight, Miss Nan Campbell, Miss Jean Campbell, Miss Peggy Campbell, Miss Daisy Blackstock, Miss Bertha Campbell, Miss Doreen Copas, Miss Tuft and Miss M. Knight.

* * *

Miscellaneous Shower

Miss Doris and Gladys McKnight and Miss Margaret Kermode were joint hostesses on August 22, at Miss McKnight's home on Montreal Street, at a miscellaneous shower in honor of Miss Evelyn Wensley, a bride-elect. The room was decorated in pale green and pink. The many useful gifts were concealed under a shower umbrella. The evening was spent in games and then supper was served. The invited guests included Mrs. Wensley, Mrs. Hogarth, Mrs. P. Porter, Mrs. F. Kermode, Mrs. McKnight, Misses Doris Chambers, Ila Winkel, Phyllis Corbie, Edna Mathews, Winnifred Mc-Donald, Margaret Jubb, Doris Hooper, May Byrne, Grace Sweden, Jessie Watson, Betty Brogan, Doris Johnson, Florence Reid, Irene McAdams and Agnes Roger.

* * *

Jolly Dance Held

A most enjoyable dance was given by Miss Dorothy Wilson at the home of her parents, 1121 Collinson Street, on Friday evening. The invited guests were Misses Madeline and Lydia Lawder, Eva Smith, Marjorie Henderson, Clara Bradshaw, Jessie Christopher, Isabella Richards, Margaret Sayer, Edna Twagg, Isabelle Donald, Phyllis Pendray, Doreen Butler and Claudia Abrams of Vancouver, and Messrs Ashfield and Charlie Walker, Hugh Farquhar, Monty Christopher, George Dawley, Bill Harvey, Maurice Davis, Lorne Bradshaw, Rowland Moody, Rodney Hale, Lionel and D'Arcy Dale, Lionel Dickson, Eddie Warburton, Harold Simpson, Mervyn Fuller and Bob Fox.

* * *

Beach Picnic

A most enjoyable evening was spent on Thursday when a number of friends paid a surprise visit to Mrs. Owen O. Silk, who is at present camping with her daughter Miss Mary Silk, at Witty's Lagoon. The occasion was Mrs. Silk's birthday. All guests entered into a hearty sing-song around a huge bonfire. Those present included Mr. and Mrs. Owen O. Silk, Mr. and Mrs. J. S. Dunlop, Mrs. H. Hobbs (Winnipeg), Mrs. Gordon, Mrs. Bishop, Miss Nelson and Miss Smithers, all of Vancouver. Miss M. Silk, Mrs. Scott, Miss M. Scott, Mrs. W. Witty, Miss M. Hobbs, Messrs. F. Prettain, B. Bishop, B. Edwards, O. Dunlop, R. Dunlop and H. Hobbs.

* * *

Bridge Party Given

A miscellaneous shower and bridge party was given by Miss May Marie Amphlon Street, on Friday evening, in honor of Miss Irene Plowman, a bride-elect. The many pretty gifts were presented in a novelty hat box. The invited guests were Mrs. George Plowman, Mrs. J. Beeby, Mrs. Joseph Grant, Mrs. D. Miller, Mrs. C. Rose, Mrs. F. Morris and the Misses A. Marquart, W. Perriman, M. Taylor, M. Priestly, F. McDougall and B. Girdwood.

* * *

Returns to Seattle

Mr. Kenneth Bostock has returned to Seattle after spending a short holiday with his parents, Mr. and Mrs. A. M. Bostock, Battery Street. For the past year Mr. Bostock has been a student of the Cornish School, Seattle, studying ballet and classical dancing with Caird Leslie, also voice culture with Mrs. Boardman. Early in September he will resume his studies at Cornish for another year.

* * *

GLOVES FOR SUMMER

White, natural or light beige are the favored colors in gloves for Summer. Gloves are delightfully fitted to wear. These are very light in weight, of fabric and designed in slip-on style. Naturally they launder easily. Such a cotton glove is worth for all occasions of an informal nature in town or country.

This food keeps boys fit . . . and girls, too!

Girls and boys need nutritious food to build them up, to supply energy for growing—as well as for their work and their games—"Clark's" Pork & Beans is one of the most satisfactory dishes for younger people, and it is truly inexpensive.

Goes to Toronto

Mrs. Alan Robertson leaves today for Toronto, where she will visit her parents, Mr. and Mrs. Larratt Smith.

* * *

Returns Home

After visiting her sister, Mrs. Bruce Parrin, Mrs. John Pierce has left for Nanaimo where she will be joined by her husband, Mr. Pierce, and will later leave for their home in Olympia by motor.

Nanoose Bay News

Mr. Arthur Anthony, of Vancouver, is the guest of Red Cross at recent visitor at Nanoose, the guest of Mr. and Mrs. Beaudette.

* * *

Friends of Mr. J. B. Stewart will regret to hear he is ill and is a patient at a hospital in Vancouver.

* * *

Miss O. J. Rowe, who has been visiting her aunt of Mr. and Mrs. Robinson for the past month has returned to her home at Nanaimo.

* * *

Miss Clara Tippett spent a few days visiting in Vancouver during the week.

* * *

Miss Frances Nicklin, of Fernglen, was a recent visitor at Nanoose Bay, and was the guest of Mrs. A. McKenzie.

* * *

Mr. and Mrs. R. T. Miller, of Vancouver, were visitors at Nanoose during the week.

* * *

Mrs. A. R. Lane and children, Bobby and Gwen, are visiting at Nanoose and are the guests of Mr. and Mrs. N. Dickinson, at Powder Point.

Married Recently at First United Church

MRS. E. J. GLENDENNING

recently Miss Marguerite Hicks, whose marriage took place on August 15 at the First United Church Mr. and Mrs. Glendenning will live in their own home, corner of 4th Avenue and Fernwood Place, Vancouver, after October 1.

Metchosin Personals

Mrs. McCreight and her son Terry returned on Thursday, after spending a holiday in Victoria, the guests of Mrs. Harper.

* * *

Mr. and Mrs. Ross Peacock left on Thursday to spend a month visiting relatives in Vancouver.

* * *

Mr. and Mrs. Whitjamore and their little son, returned on Thursday to their home in Oak Bay, after spending August camping at Witty's Beach.

* * *

Mr. and Mrs. D. M. Jonas, of Vancouver, are visiting Mr. and Mrs. E. R. Johnson, on their return from a prize steam shrdiu. This a trip to Alaska.

* * *

Mr. and Mrs. Noel Wilkinson, of Oak Bay, have rented Mrs. Stanforth's house at William Head.

* * *

Mrs. Gordon and her daughter, Mrs. Bishop, and per granddaughters, Hazel Nelson and Margaret Smithers, left on Saturday for their homes in Vancouver after visiting Mrs. Witty for the past few weeks.

Colwood Personals

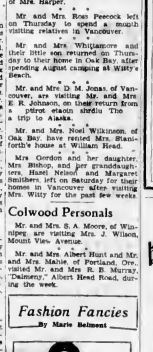
Mr. and Mrs. S. A. Moore, of Winnipeg, are visiting Mrs. J. Wilson, Mount View Avenue.

* * *

Mr. and Mrs. Albert Hunt and Mr. and Mrs. Mahie, of Portland, Ore., visited Mr. and Mrs. R. B. Murray, "Dalmany," Albert Head Road, during the week.

Fashion Fancies

By Marie Belmont



Black velvet solves a riddle—and answers an interesting question. At the outset it would seem an impossible feat for a heavy fabric to simulate butterfly gestures. But manipulated in the skillful hands of a French designer, black velvet has done just very thing. And at the same time it offers a solution to another problem. — Finding a trimming for a sheer Summer frock that would at once give a hint of Fall fashions. Of course it is no longer a secret that black velvet is bound to dominate the mode in the coming mode, so they we have it. Chance at the sketch above and note its achievement.

Fashioned of black velvet is the toque with its interesting brim, formed by the tied back effect which actually appears in the back as a bias butterfly. Then a bare following the same design appears in cream-colored lace with its high bodice waist and bolero-like lace panels. Black opera pumps complete the tailored idea, presented by the sheer frock.

Women Will Recognize the Importance of Mallek's Fur Values

Now Offered In Our August Sale

OUR buying power enables us to offer you extremely inviting prices during our August Fur Sale. Each coat is handsomely tailored of choice pelts, and each coat is a remarkable value. The three essentials of a fur coat purchase are there . . . style, quality and price. Come and see them today . . . you may use our credit privilege, which allows you *months to pay* for the coat you may enjoy now.

There Is No Need of Stinting and Saving for a Fur Coat When Mallek's Offer Liberal Terms

During this Fur Sale special arrangements are available. A payment will deliver the coat and you may pay the balance in convenient payments. It only takes a few moments to open an account.

FAITH WINS

EXAMPLE—The simple act of faith suggested below will quickly bring you most surprising results. You try it and see!

I am going to ask you to do a very simple thing. If you are the sort who cannot do even that much on faith, if you must have visible, tangible physical proof of something in advance, then I am afraid you are going to be left behind—leaving to this age of new metals and fluid discoveries.

But if you have faith enough in my word somewhat like someone now and then, good as I am going to show you what this latest development of science can do to restore your health through the Great Sympathetic Nervous System.

For example, I will show you how to create comfortable, effortless vision, without the use of glasses, or that eyesight, with its many relief, nervous disturbances, will be permanently cured.

Now to be off of all Foot Troubles, which rule the health of many sufferers. Corns, bunions, weak arches, as Various Kinds of Foot Pain, are a truly remarkable discovery in this new method of treatment.

The functioning of the Digestive Glands can be controlled through the Great Sympathetic Nervous System, and many other maladies, usually stubbornly and intractable, respond to this latest scientific discovery.

But that you must do that one little act of faith. All I ask is that you believe what I say now sufficiently to call at my office.

That is all. Surely that does not require much faith. What will happen? I will explain to you personally when the Great Discovery will be for you, the most amazingly interesting subject you have ever listened to. Hundreds of people are now enjoying freedom from their physical disabilities through just this little act of faith.

Don't Put Off Discovering Even One Hour More. ACT RIGHT NOW

W. B. HUSTON IS ENVY OF YOUTH

CANDIDATE SUCCESSFUL IN CELEBRATED EDISON COMPETITION VISITS CITY

On Way Homeward After Selection From Boys of All Parts of United States

For a brief period yesterday afternoon, returning home, Wilbur R. Huston, son of Dr. Huston, Bishop of Olympia, was in the city. Young Huston has received much newspaper publicity as having being selected by a committee headed by Thomas A. Edison, to study science with a view to following in the inventor's footsteps as one capable of applying scientific knowledge to industry.

Huston was chosen by the committee out of forty-nine young Americans to receive free college tuition.

Huston, who is sixteen, has long been interested in electricity and chemistry, and has the ambition to attend the Massachusetts Institute of Technology. He hopes to chemical engineering as his future profession.

One of the judges selected by Mr. Edison, George Eastman, of Kodak fame, is well known in Victoria. The others were Dr. S. W. Stratton, of the Massachusetts Institute of Technology, Henry Ford, Dr. Lewis Perry, of Phillips-Exter College, and Col. C. A. Lindbergh.

In addition to Huston four other boys will receive college tuition at the expense of the great inventor.

TWO CATHEDRALS FOR LIVERPOOL

Catholic to Build Diocesan Church —Anglican Cathedral to Be Finished in 1934

Liverpool is to have another new cathedral, to be built by the Catholic Church. It is noteworthy, writes Dr. Shillito in The Christian Century, that the architect of the Anglican cathedral, Sir Gilbert Scott, is a Catholic, while the architect of the Catholic cathedral is a Protestant, Sir Edwin Lutyens. The Anglican house of worship in a most noble example of Gothic, the Catholic will be in the Wren tradition.

The foundation stone of the Liverpool Cathedral was laid twenty-five years ago by King Edward and the consecration ceremonies of the one-third that is completed, which are the sanctuary, presbytery, choir and the eastern transepts were held five years ago, when King George assisted in the dedication of the eastern transept as a war memorial. It is expected that it will be finished by 1934.

A new building programme involving $3,000,000 is to be undertaken for Washington Cathedral, starting with a $750,000 contract for the north and south transepts of the cathedral. It is planned to complete the whole edifice in 1932 in time for the celebration of the 200th anniversary of the birth of George Washington.

TO KEEP MEMORIALS

Associations of Wesley, Burns and Livingstone Are to Be Preserved

What claims to be the oldest Methodist chapel in the world has reverted to its original owners. It is John Wesley's "room" in Bristol, founded by that great preacher in 1748, who had quarters in it and where conferences were held. It has been transferred from the Calvinistic Methodists to the Wesleyans.

The church at Alloway, Ayrshire, to which Burns refers in "Tam o' Shanter" as "Alloways auld haunted kirk," is to be scheduled as an ancient monument and to come under the care of the governmental department to preserve historic buildings.

The Livingstone Memorial at Blantyre, the birthplace, and workplace slum, of the African explorer and missionary will be opened by a Scottish lady, the Duchess of York, in October. In this connection it may be noted that two of the three trees associated with Livingstone are now threatened with death. One is the aimond, planted by Robert Moffatt in his garden at Kurnman, under which David courted Mary, his wife. On Livingstone Island, which stands on the edge of Zambesi Falls, there is a frail sour cherry tree, on which the explorer cut his initials "D. L." The third is the mango tree at Ujiji in Uganda, where Stanley met Livingstone, and which, in spite of protective expedients, is fast losing strength.

NEWFOUNDLAND WANTS ITS ODE

Word has been received from St. John's, Newfoundland, that plans for the Newfoundland Ode in the forthcoming hymn book of the United Church of Canada is being sought by the Presbytery of Bonavista and Grand Falls in recognition of this Dominion's relationship to the United Church. At the time of the Canadian union in 1925 the Newfoundland Methodist Conference, developed from a work begun by Lawrence Coughlan in 1765, became an integral part of the United Church.

SOCIALIST CHURCH

A proposal to establish a Christian Socialist Church is being mooted in Holland. This church would have no creed basis apart from its acknowledgement of Christ as the Light of the World of the primary of the Bible and its belief in Socialism as a movement to replace the present order of society by a more Christian system.

A goodwill pilgrimage of American Congregationalists to Great Britain next year, returning the visit of the 1,315 British Congregational pilgrims to America last year, is being planned by the executive committee of the National Council of Congregational Churches in connection with the fifth decennial meeting of the International Congregational Council at Bournemouth, England, in July, 1930.

Heather Day Marks Departure From City of First Contingent

Heather Day Commemorates Historic Event

The Lady Douglas Chapter, I.O.D.E., proposes to carry out its usual custom of commemorating the departure of the first contingent, Canadian Garrison Artillery, on August 26, 1914. On that day the men leaving for the front were presented with a sprig of heather by members of the chapter, and Heather Day was thereby established. Heather is supplied each year by Mr. George Fraser, of Uduniec, and the chapter organizes a tag day on the anniversary, which will fall tomorrow.

The personnel of the contingent was as follows: Captain, P. T. Stern, Captain R. P. Clark, Hon. Captain Rev. William Barton, Lieutenant K. H. Bovill, Lieutenant W. B. Shaw, Company Sergt.-Major R. Parker, Sergt. V. Zala, Acting Sergt. F. Young, Corporals R. W. Prior, E. Walter, W. B. Monteith, F. Fox, H. L. Robinson, W. G. Ellison; Acting Corporals G. Paradise, B. Keogh; Bombardier L. C. Hespeaker; Acting Bombardiers T. W. Gaunt, J. H. Burns, P. Rivers, Gunners F. W. Y. Alexander, P. Edmonds, R. H. Williams, S. A. R. Clark, V. W. Carter, J. C. Orr, John Ward, K. C. McCallum, S. O. Finlason, R. L. Price, A. G. Murch, J. A. Chisholm, F. H. Small, A. Page, J. E. Farmer, P. A. Thunder, H. C. Laundy, P. Foreman, St. J. Hodson, H. S. Foreman, H. O. Warren, H. Whalle, H. S. Carter, Erwin D. Hingh, A. S. Grice, M. P. Harrison, E. V. Robler, E. Dowling, H. J. Ramsay, K. McMillan, J. A. Watson, W. G. Watson, J. M. O. Bell, C. T. Balderston, O. Mulcahy, T. W. Bush, W. C. Clare, B. W. M. Compton, A. Corbett, A. Phillips, E. Harvey, Evelyn W. Dingle, T. Loader, Percy Beatis, Colin Morris, E. D. Carter, J. B. Armstrong and J. M. Armstrong.

ARMY PLANE CRASH

CAIRO, Egypt, Aug. 24.—A giant British army airplane, manned by a crew of seven, crashed today shortly after taking off from the Heliopolis airdrome. Three of the aviators were killed, including the pilot, and the other four badly injured.

SPARTON RADIO

"Radio's Richest Voice"

Another Amazing Sparton Development

Sparton has once more written a new chapter in radio history. Each year has seen a higher standard set, with Sparton in the lead; but now, in the 1930 Sparton Equasonne, all previous records are set at naught. Unsurpassed in quality or value, the new Sparton achievement stands out, a wonderful radio triumph. World-wide fame has led to such intensive production that now it is possible to offer this magnificent set at a price within the reach of millions.

THE NEW EQUASONNE
An exquisitely carved Highboy of pure Italian design, ultra powered and as gorgeously harmonious as an old 'cello..... **$261.50**

With this new Sparton Equasonne, fresh possibilities of radio enjoyment are opened up before you. Deep resonant tones of perfect reproduction, marvelous selective power and the elimination of all mechanical sound brings the scene before you. You may visualize the artist before your eyes. The thrill of the game is brought to your home. Events of world-wide importance become facts to you when reproduced in "face-to-face realism."

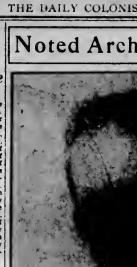
Canada Loses Artist of International Repute by Death of Mr. S. Maclure

A great gap has been left in the ranks of Canadian artists by the death recently of Mr. Sam Maclure. In his passing Canada has lost one of her most discerning critics and a fine creative genius, one whose generous sympathy with all that is implied in the very name of art was an inspiration to all who came in contact with him.

In tracing Mr. Maclure's history one is brought to a deeper realization of his unusual character; both as man and artist. His whole life expressed a sensitive, refined, and cultured mind. And although he never enjoyed robust health he had enormous energy, and his hand was continuously occupied with brush or pencil. Scattered about Victoria, Vancouver Island, British Columbia and the whole North American continent are many charming water-colors which he tossed off at one time or another while the impulse to paint was on him. In his architectural works he has left more solid monuments. Few who knew him did not at one time or another experience the value of his fine critical sense.

As a young man, born and reared in the Fraser River Valley, he half-determined to make art his career. He went to Philadelphia and studied at the Academy of Art for some time. The experience deepened his appreciation of art, and gave him some technical proficiency which was not without value when he took up painting as a hobby.

He returned to British Columbia. Not until his marriage when he was about thirty years of age did he definitely decide on architecture as a profession. Although he had the sensitive artistic temperament, he showed in the years that followed a remarkable gift for application. Joining a Mr. Sharp, a New Westminster architect, he set himself to the mastery of technique, and within a few years had come into the front rank of Canadian architects. Even his very earliest work in New Westminster had a special distinction. The first big house which he undertook in Victoria was for Mr. A. J. Flumerfelt. This occupied him to the capital, and here he remained for the rest of his life. Among the more notable houses for which he drew the designs were the residences of Mrs. Thornton Pell, Fort Bay Road; Mr. T. H. Blaiser, Lampson Street; the bungalow of Mr. Marsh; the country lodge of Mr. A. Moresby White; the homes of Mr. Gait, Mr. Adams, Mr. James Dunsmuir; Mrs. B. Wilson, Rockland Avenue; the late Mr. F. J. Shallcross, Foul Bay Road, and the late Mrs. Audain's, now owned by Mr. and Mrs. Arbuthnot. The Audain House on Foul Bay Road was the only notable example of Western architecture selected by Percy E. Nobbs to illustrate an article which appeared in Country Life early in 1929 on "Some Developments in Canadian Architecture."



MR. SAMUEL MACLURE

FRENCH TRIBUTE

Mr. Maclure's skill as an architect was acknowledged in France and England as well as Canada. In an issue of Revue Moderne, published in Paris, a very delightful appreciation two or three years ago in an article entitled "L'architecture," to which he is referred to as "this noteworthy artist, who carries out, in a far away country, work of the highest interest . . . work which shows him to be gifted with an original, inventive, pliable and trustworthy genius. Independent of their outside appearance, which is full of charm and originality, his houses are also noteworthy for their interior arrangement, where the practical purposes of commodity and usefulness are most happily allied to the beauty of decoration. He knows how to adapt most cleverly the style of his works to their purpose and surroundings. In this respect the severe austerity of the impressive residence of Mr. John H. deserves full praise as well as the graceful charm of the cottage of Mrs. Huntley Green. The well-studied details bear testimony to the constant solicitude of the artist to render the dwelling attractive and at the same time comfortable. The outlines of the chimneys, design of the hall, the staff and shape of the staircase, porches with balustrades, everything is conceived for the pleasure and sweet comfort of the inhabitants. It is impossible to meet one's way such villas or residences without envying the happy owners. He shows profound perception, perfect taste, expert knowledge of the thousand requirements of construction, requirements of the climate, the position, the character of the inhabitants, the influence of the ground."

LANDSCAPE AND BUILDING

In this last connection it may be added that Mr. Maclure in recent years developed a special interest in landscape gardening, not only in the personal sense, but in the professional. The most beautiful house, he contended, might be marred by the wrong kind of surroundings. Many of his clients, knowing his skill and good taste in this matter, left the laying out of the grounds to him when they entrusted him with the designing of their houses. He himself contended that an architect with any sense of the appropriateness of things should be able by instinct to lay out a garden to suit the house.

Very cordial is the tribute of a writer in The Studio, London, Eng., of a later date, who, to quote but a part of the article, says:

"Mr. Maclure's success as an architect is in no small degree attributable to his sense of the 'fitness of things.' Realizing that the conditions of Western life do not admit of ostentation or display, he aims to secure in his work an effect of once suggestive of refinement and sound workmanship, employing always the materials at hand. In planning interiors he invariably exercised considerable care and forethought to provide an arrangement of rooms and offices whereby the work of the household may be performed with a minimum expenditure of labor. This in a country where few servants are employed is, of course, very necessary, and Mr. Maclure's floor-plans show that this consideration is kept well in mind. The present high average standard attained in domestic architectural achievements in Western Canada is very largely due to the keenness and the influence exerted by Mr. Maclure, whose ability and success are the more marked in that he is entirely self-trained, and has enjoyed none of the usual advantages of acquiring professional proficiency."

LIKED GEORGIAN

Mr. Maclure favored the Georgian, half-timbered, and English-cottage styles as most suitable to this country. He was outspokenly opposed to the California bungalow as being inappropriate in a land of great forests and rugged hills. But he never became a slavish copyist. All his work is stamped with individuality, one of the best examples of his ability to incorporate an idea is found at Shawnigan, built at the instance of the late Hon. W. C. Nichol to represent what can be done with B.C. woods and a building designed and constructed entirely for

All the arts which he loved had their place in the houses which he designed. He was greatly interested in wood carving, and twenty years ago, during a visit to Holland, often went miles out of his way to see some bit by Grinling Gibbons or other master craftsman. He discovered and utilized the talents of one of British Columbia's greatest wood carvers, George Gibson, of Duncan, whose work is to be found in several of Mr. Maclure's houses.

THE ARTIST

As a boy, brought up on the edge of Matsqui Prairie in the Fraser Valley, he was a keen student of nature, and in later years got his observations on paper with the skill of a trained interpreter. No Western water colorist had the power to say more in a few strokes of the brush than did Mr. Maclure. He had the art of expressing the essential, and that he could say with his brush with lightning rapidity. The simplicity of his work is as striking as its sensitiveness. He never put on paper more than was pertinent to the picture. One of the things which he sought most to express was atmosphere. His pictures of the Olympics are notable for this, for they convey graphically the feeling of great distance between the artist and his subject without loss of brilliance in coloring or impression of magnificence.

As a critic he was acutely sensitive to his own artistic shortcomings. In Old World art he was a great admirer of the Barbizon school. In the New World circle he could, at the same time, appreciate and admire the work of the Toronto Group of Seven. To some this was reconciling the irreconcilable. But Mr. Maclure held that the New World required a different technique to express its individual quality. The pretty thatched-cottage style of picture might apply equally on English landscape, but to his mind it had no kinship with the vast and untamed ruggedness of Canada.

LOVED POETRY

As for the rest, Mr. Maclure had a mind capable of sharing and enjoying not only the world of art and culture, but that of science and progress. He was a great lover of poetry, a keen amateur photographer, a student of aviation and of engineering problems. Among the poets he loved Masefield best. Shortly before he died he held in his hand a copy of the Oxford Book of Verse. He never wearied of Shelley, Keats, Wordsworth or Robert Louis Stevenson. It was a characteristic of his to slip between the pages of his architectural notebooks, containing details of masonry and iron grills and balustrades, little fragments from his favorite poets. These have given a peculiarly touching interest to the task of those who have had to go through his papers. He also loved music, preferring the classics Beethoven and Brahms. In photography he strove chiefly for pictures rather than perfection of photographic detail. He left some charming camera studies. In the sense that he was a lover of the beautiful and reverenced all that went to make beauty, he was one of the city's most ardent propagandists as well as one of her most valiant champions who fought for the preservation of her natural charms.

Among the many who will miss him greatly are the members of the Island Arts and Crafts Society, of which he was a charter member. With the late Mr. J. J. Shallcross and one or two others he helped to lay the foundations of a group which is the pinwheel of all organized art activities on the Island at the present time. His recognized place as a critic made him invaluable to this organization, and it was this same quality which attracted to him artists from all parts of the world, as well as collectors in search of disinterested advice as to the merits or defects of a picture.

Among the special subjects which he painted, souvenirs of which he has left scattered among his friends here, were Victoria in bloom-time, the cherry-trees avenue of the Fraser, the Olympics, the San Juan Straits, the Rocky Hills, the Lions at Vancouver, and other Coast scenes. In life, as in his art, he had a generous breadth of viewpoint, high ideals and great sincerity, and a quality of reverence which was implicit in all his work.

CHESS NEWS AND NOTES

England—The British Championship was won at Ramsgate by the young Indian, Mizar Sultan Khan, who does not speak English and cannot read any books on chess, and when he was discovered recently by Sir Umar Khan Tiwana, the latter engaged a special tutor to teach him the English moves of the game, which differ somewhat from the Indian. Sir Umar also organized a special all-Indian tournament to test Sultan Khan's ability, and the young protege justified the confidence shown in him by winning. Sultan Khan is the first Indian to win a premier honor in Britain. He comes from a family of chess players in the Punjab, his nine brothers, as well as his father, all being adepts at the game.—Christian Science Monitor.

The victory of Sultan Khan will be a wonderful thing for chess, making the game more international than ever, the first occasion an Indian player has attained to such a pinnacle since the days when James Cochrane played with Ghulam Kassim. (Remember the beauties and the intricacies of the Ghulam Kassim attack in the Muzio).

Thus a chess player of note again comes from the land where chess in its earlier forms flourished in its infancy. Of course the British Championship this year was without the participation of Sir George Thomas and the recent champion, F. D. Yates, both of whom are at Ystent competing at Carlsbad.

Yet to win against a field comprising K. P. Mitchell, W. Winter, T. H. Tylor, H. E. Price, J. Drewitt, O. Abrahams and the veteran of Blackburne's time, the Rev. F. E. Raimond, is certainly a fine achievement.

The Major Open Tournament ended in a tie between Dr. Seitz (Bavaria) and Dr. Arpad Vajda (Budapest), a member of last year's victorious Olympic team. Both scored 8 points, Vukovics with 4½ and Notebomen with 4 won third and fourth prizes.—New York Evening Post.

In the first of the living chess displays Lord Dunsany, the poet, won a brilliant "Scotch" from Major Montague Jones.

The British Chess Problem Society, which conducted the International Team Solving Tourney in the three-cornered fight among Great Britain, Germany and Hungary, gives the result of the match between the latter two as a win for Hungary with 1,781 points to 1,638 credited to Germany. Each nation had eighteen solvers. The first three of the victors scored a maximum of 128 points each. Yet the score now 1 each to Great Britain and Hungary, the final round between these nations will be watched with keen interest and should prove a closely contested affair. It may be recalled that Great Britain scored only 84.5 per cent of the possible points against Germany, which compares badly with Hungary's 91.8 per cent.

For the final match, now in progress the British team has been considerably strengthened by the adhesion of new and strong solvers, a notable being Mr. B. G. Laws, problem editor of The British Chess Magazine. The management of the final Great Britain vs. Hungary is in the hands of Germany.

A return match between Belgium and Sweden is in prospect in the Autumn and a match Over Britain vs. India is proposed. The Soviet Republic withdrew for political reasons.

Germany—The final scores in the National Championship Tournament at Duisberg were as follows: Ahues, 8 points out of 10; Leonhardt, 6½; Bamlech, 6; Heilling, K. Richter, Dr. Seitz and Wagner, each, 7½; Anize and Mieses, each, 7; Blumich, 6½; Orbach, 6½; Heinhausen, 4½; Pincrer, 4; Babel, ½.—The Field.

Czechoslovakia—With the Carlsbad Tournament past the halfway mark, the chief interest of chess lovers the world over is centred in Rudolf Spielman, the Viennese grand master, who seems destined to repeat his great Semmering triumph. He may break, but the critics say that he is playing chess.

Capablanca, by drawing with Grunfeld, has a score of 10 to Spielman's 9½, but the latter with 3 adjourned games, still leads in percentage points. A game with Yates shows a position very favorable to the Viennese and another with Rubenstein should yield at least a draw. A win with Yates or draws in both games places the victor of Semmering again in the van. The scores follow: Capablanca won 10, lost 4; Spielman, 9½-2½; Nimzowitsch, 8-5; Vidmar, 8½-4½; Euwe, 8; Grunfeld, 7; Rubinstein, 7½-5½; Bogoljubow, 7½-6½; Becker, 7-6; Colle, 6½-6½; Canal, Maroczy, Mattison, Saintsch and Tartakower, 6½-7½ each; Gilg, Johner, Marshall, Treybal and Yates, 6-8 each; Sir George Thomas, 4-10; Max Lange, 3-10. The game lost by Spielman was to Canal, of Perti (a fitting end) in a fifty-move move, Q P opening.

The score shows the tournament is now taking on the spirited form in which the positions for place are as varying and exciting as in a horse race, only half a point separating ten of the players.

Blackburne, now in his eighth is not a comforting augury of success on the eve of his match in September.

THE PLOUGH HORSE

"I know my oats," the plough horse said,
"I treat the hoss just right
That's why he feeds me first each morn
And beds me down each night.

Contract Bidding			
1st Rd.		2nd Rd.	
South	3 N T	3 N T	
West	Pass	Pass	
North	4 N T	Pass	
East	Pass	Pass	

Mr. Harold S. Vanderbilt once said to me that it was very rare in Contract for a partnership to arrive at a soundly biddable slam at No Trumps.

No Trump bids are more or less general as to their specific inferences as to precisely wherein the fitting strength of the two hands may be. It is for this reason that a No Trump assist is regarded more as an invitation for the original bidder to rebid than as a demand that he do so.

One of two things must be present in the assisting hand to invite a slam contract by the original bidder, either a long suit that must be established by reason of the high card values held, plus those shown by the No Trumper, or, failing a long suit, strong intermediates that are clearly marked as winners. It is this latter holding that warranted North making an invitational assist of more than a game contract.

ASSIST POINTS OF THE RESERVE AUCTION. The Auction bidding of the above hand should please even the most timid player as it is simply one No Trump by South and all pass.

Contract: In Contract, however, timidity is a liability. Consequently, South must bid at least two No Trumps originally. He might even bid three No Trumps were it not for the fact that to do so would offend against one of the sound conventions of partnership bidding, that is, that a three No Trump bid shows all four suits doubly stopped. The fact however, that South elected to bid but two No Trumps permitted him to rebid his added value following a strong invitational four No Trump bid by North.

It should be noted that North not only holds 8 Quick Tricks, but that his intermediates must be sure trick winners when taken into conjunction with the inference to be drawn from South's original two No Trumps. North would be justified with but a fourth part of the high card values held in carrying South to three No Trumps, consequently he would be failing in his obligation to South should he fail to try for a possible slam with his holding.

THE PLAY

West leads initially the King of Diamonds, following this lead and the exposure of the Dummy, South stops to count the positive tricks in the two hands. Starting with the suit opened, he has one Diamond, four Hearts, four Clubs and two Spades or eleven in all, and one possible trick in a possible winning finesse of his Spade Jack. To attempt this finesse at once without first trying to obtain sound information as to the possible location of the Queen would be the height of folly. He therefore leads out four Club and four Heart tricks.

He observed that West followed three times to each of these suits and in the fourth lead of each discarded a Diamond. The normal indication of these discards would lead South to believe that West is either protecting the Queen of Spades or finally he not hold the Queen, is refusing to give any indication as to its location by a Spade discard.

Assuming that West held originally five Diamonds then West can hold but two Spades and if one is the Queen, then it must drop on the Ace and King thus establishing the Jack for the needed twelfth trick. Therefore, South when in his hand with the last Heart Trick, leads his 4 of Spades, the Ten dropping from West. South figures that West in all probability holds the Queen-Ten, he therefore wins the Ace in Dummy returning a small Spade going up with the King dropping the Queen.

South's Jack of Spades is now good for the needed twelfth trick.

It may be of interest to note that had South led the King of Spades and played thereon the 8 of Spades from Dummy and then a small Spade from his hand to the Ace the lead of the Five through East's Nine-Six would have enabled South to make a Grand Slam.

AMAZING CONTRASTS PALESTINE AFFORDS

Rev. Canon H. J. Cody Found Arabs and Jews Mingling With Age-Old Practices

TORONTO, Aug. 24.—A very curious mingling of the modern and very old in Palestine was the most striking experience of a wide European and Eastern tour just concluded by Rev. Canon H. J. Cody, pastor of St. Paul's Cathedral here, and former Minister of Education for Ontario. Dark-skinned Arabs in flowing robes fear through the streets in modern motor cars, and attend motion picture theatres to behold adventures of flappers or Wild West heroes of another hemisphere. Yet, in the quiet corners of the market places and the shadows of the age-old walls, the Palestine of 3,000 years ago still exists.

Palestine is undergoing a marvelous change, Canon Cody said. "The modern communities of Jews are introducing the customs and inventions of the West. Their introduction, however, has created a vivid contrast which grips the visitor to the Holy Land who finds himself peculiarly an outsider looking in.

"I passed fields in which modern threshing machines were working; he went on. "These were in the modern Jewish centres. Then a few short miles along the road I would behold the tramp of oxen walking round and round the threshing floor, trampling the sheaves as they did thirty centuries ago.

"The Arab farmers, numerically the largest group in Palestine, still use the modern plow. I watched them slowly plodding across their fields, one hand on the wooden plow that is sharpened at one end, and the other hand on the ox goad. A little further along modern reapers, plows and harrows would be seen.

"I was particularly impressed by the new modern university in Jerusalem, which is dealing scientifically with the problems of industry and agriculture. It evinces one of the most interesting phases of the new Palestine; the desire of the Jews to bring their country into the work with other nations. Jews migrating from other countries have brought all the languages of the world, so in order to have a common speech they are reviving the old classical Hebrew."

Aged Sixty-Two Man Is Chosen For Hard Job

There are two important object lessons in the recent elevation of Frederick H. Ecker to the presidency of the Metropolitan Life Insurance Company. He began life as an office boy at four dollars a week. His new position draws an annual salary of $300,000. He is sixty-two years old.

Mr. Ecker's appointment belies the oft-heard assertion that this is a young man's age. At a time when many men are thinking of leisure he assumes supreme control of one of the largest insurance companies in the world. The three score year mark is well behind him, but he is taking on the greatest responsibility of his career. Youth has its place, but the world of business is not yet ready to throw age and matured judgment into the discard. Ripe experience in business affairs of whatever kind is still considered a magnificent asset.

Guest (to waiter)—"Why do you serve the fish before the soup?"

Waiter—"Sah! I'll tell you—that fish absolutely couldn't wait any longer."

Vancouver Island News

RAILWAY HEAD ON INSPECTION

SIR HENRY THORNTON PAYS VISITS TO UP-ISLAND CENTRES

Interviews Members of Boards of Trade in Connection With Questions of Transportation

NANAIMO, Aug. 24.—Nanaimo was honored yesterday afternoon by a visit from Sir Henry Thornton, president of the Canadian National Railways, who is at present touring Vancouver Island in the interests of his company. Sir Henry arrived in Nanaimo from Victoria and met a number of members of the Nanaimo Board of Trade and discussed with them the matters of general interest affecting the transportation question in connection with Nanaimo and the rest of Vancouver Island.

COURTENAY, Aug. 24.—Sir Henry Thornton met the president and secretary of the Courtenay-Comox Board of Trade at Bentley's House, Cumberland, this morning. In discussing the possibilities for tourist business on Vancouver Island, Sir Henry stated that while he had expected much from his trip north over the Island Highway he had convinced him that Vancouver Island has possibilities for tourist trade which far exceeded his expectations.

He also stated that Colonel Stead will be stationed at Vancouver with instructions to thoroughly investigate all the possibilities for new business on the Coast. The strategic advantage of making Comox a centre for the tourist business, owing to the proximity of that port to Strathcona Park, the Forbidden Plateau and other parts of the Island was pointed out to Sir Henry.

Tennis Tournament Played at Langford

LANGFORD, Aug. 24.—The first round of open mixed doubles for the Wenger Cup in the local tennis tournament resulted as follows:

MIXED DOUBLES

Mr. and Mrs. Sparks won from J. Wilkinson and Miss Pike, 6-0, 6-1.

Mr. A. P. Bayles and Miss C. Seichfield won from Mrs. Wilkinson and Cyril Wilkinson, 6-0, 2-6, 6-1.

Mr. H. C. C. Bennett and Mrs. Bayles won from Mr. and Mrs. K. A. Hincks, 6-2, 6-2.

E. Le Quesne and Miss Simpson had a bye.

MANDICAP LADIES' DOUBLES

Mrs. Bayles and Mrs. Sparks (minus 30) won from Miss Pike and Miss Simpson (plus 15), 6-2, 6-1.

Mrs. Hincks and Miss Seichfield (minus 4) won from Mrs. Cooney and Mrs. Wilkinson (plus 15½), 5-6, 7-5.

HANDICAP MIXED DOUBLES

Mr. E. Le Quesne and Miss Simpson (scr.) won from Mr. and Mrs. Hincks (scr.), 5-7, 6-2, 6-3.

Mr. H. Bennett and Mrs. Sparks (minus 30) won from Cyril Wilkinson and Mrs. Cooney (plus 15), 1-6, 6-2, 6-1.

John Wilkinson and Miss Pike (plus 15) won from C. A. Cooney and C. Brotherston (plus 15), 6-3, 6-2.

Mr. and Mrs. Bayles won from R. Turner and Miss Seichfield, 6-4, 6-0.

Men's doubles will be played on Sunday afternoon.

The men's singles for Langford Garage Cup are still to be played.

BRECHIN MILL IS DESTROYED

SPECTACULAR FIRE WIPES OUT PLANT IN LATE EVENING BLAZE

Sehan & Motlishaw Sawmill Completely Razed With Estimated Loss of $75,000

NANAIMO, Aug. 24.—Lighting the sky with a ruddy glow, visible for miles around, which drew hundreds of spectators at 9:30 o'clock last evening, the Sehan & Motlishaw sawmill, located on the point at Brechin, went up in smoke. The mill had only been in operation for a few weeks, following a shutdown of several months. It is not known how the fire started, but in a short time the mill was completely wiped out.

Only by mere luck was the dwelling house inhabited by Mr. and Mrs. William Richards and family saved when willing workers covered the roof with wet sacks.

In the meantime, the fire continued to rage and roar in the mill yard, and the flames soon spread to the sawn lumber that was piled around. Attracted by the tremendous glow in the sky, hundreds of cars were on the way to the scene, and the spectacle was one worth seeing. The Point, the waters of the channel and Departure Bay, and the wooded shores and hills of Protection Island were revealed in a bright and ruddy light.

The spectacle was, however, a costly one. The mill and all the equipment and plant were completely destroyed, together with a considerable amount of sawn lumber, and it is estimated that the damage will approximate $75,000.

It is thought that the fire originated almost in the middle of the mill. The watchman had made his first round and punched his clock when he discovered the fire in the middle of the mill building which, in spite of all he could do, got out of control. The watchman could give no idea of the cause of the fire.

The fire wardens, although they were unable to save the mill, did good work with the pumps with which they are now equipped, and they got a line from the waters of the bay against the burning lumber. It was a difficult job, owing to the fact that the lumber was piled in piles, which allowed the flames to get in from the ground. However, the fire was got under control and a considerable amount of lumber will be saved.

On Canadian Legation Staff at Tokio

MISS A. M. BAIRD

Of Ottawa, who has been appointed to the staff of the Canadian Legation in Japan with headquarters at Tokio.

Rare Orchids Brought From South America

MR. A. EARNSHAW LAWRENCE

Who has brought southwards a number of orchids from South American forests said to be the finest ever to reach this country.

MR. HENRY NEALE IS LAID TO REST

Veterans of Port Alberni Pay Last Respects to Popular Former Comrade

PORT ALBERNI, Aug. 24.—One of the largest attended funerals which has ever taken place in this city was that of Mr. Henry Neale, popular city employee who died on Wednesday morning as a result of an accident. The funeral took place yesterday from St. Alban's Church.

Mr. Neale during the past ten years has been the backbone of the local Canadian Legion, and has aided many returned men in securing proper medical attention and pensions. To show with what respect he was held by the returned soldiers, those veterans attended in a body, a number coming from outside points to pay their last respects to their former comrade in arms.

The Elks Lodge, of which he was a prominent member, took charge of the funeral at the graveside.

Pioneers Renew Old Friendships At Cowichan

DUNCAN, Aug. 24.—About seventy pioneer residents and their families gathered at the Agricultural Hall on Thursday afternoon and had a most enjoyable time renewing old friendships. The Cowichan Historical Society sponsored the idea. The original plan was to have had a picnic on the grounds of the Cowichan Cricket and Sports Club which had kindly been sent, this being the old recreation grounds and the scene of many a picnic in the early days. But the weather man interfered and owing to the rain the gathering had to be held indoors.

Mr. W. M. Dwyer is president of the society and with a committee consisting of Miss Ruby Evans, Messrs. H. W. McKenzie and H. P. Prevost, had charge of the arrangements. The register of those attending, giving the date of their arrival, includes the following names: David Evans, April, 1861; John N. Evans, March, 1876; Henry Bonsall, November, 1866; Richard Forrest, March, 1884; Donald McPherson, November, 1873; Mrs. Henry Bonsall, 1866; Mrs. Mary E. Maitland-Dougall, 1886; Mrs. E. Wilson, 1885; Arthur Evans, 1877; R. H. Whidden, October, 1880; Mrs. R. H. Whidden, 1880; C. H. Dickie, January, 1890; Mrs. J. N. Evans, February, 1872; Mrs. W. C. Duncan, 1876; James Jones, 1876; D. R. Hattie, June, 1891; Mark Green, March, 1884; W. H. Richards (native born); Ormond T. Smythe (native born); Kenneth Duncan (native born); Mrs. Isabel Thatcher (native born); Miss Maud Wilson, 1885; H. W. McKenzie (native born); Walter S. Robinson, August, 1887; Mrs. Hattie V. Evans, April, 1888; Mrs. Winifred Van Norman (native born); Mrs. Renie Castley (native born); Mrs. Andrew Dixon, November, 1884; Mrs. W. M. Dwyer (native born); Mrs. Armond Leakey, August, 1910; Mrs. E. B. Fry (native born); Marjorie Bonsall (native born); Mary E. Edgson (native born); Caroline Edgson (native born); Mrs. Sarah McPherson, 1885; John Livingston, 1890; Mrs. D. R. Hattie, 1890; Annie Forrest, 1873; Harry D. Evans, 1879; Mrs. Alice Malbon, 1886; Hattie Kier, 1890; O. C. Brown, 1887; J. Brown, 1889; A. Dixon, 1884; E. Tarlton-Storey, 1890; Dr. V. W. Taylor, 1902; David Ford, 1890; A. Hill, August, 1887; J. N. Campbell, 1891; Kate Robertson (native born); Walter E. Evans, April, 1888; W. M. Dwyer, 1884; Nellie Lemming, 1887; Mrs. A. Minnes, 1887; Mrs. J. M. Campbell, 1887; W. E. Lemming, 1892; Mrs. W. R. Smythe with children Doreen and Ormond D. (native born); W. R. Smythe (Victoria, 1877); A. H. Lomas (native born), 1892; Mrs. Hilda Lomas, 1892 and children, Anna, Constable and Norman (native born); Lisem T. Smythe and Eric Smythe (native born); J. Maitland-Dougall, 1886; Edwin Cone, 1861; R. O. Evans (native born). A number of those present failed to register.

Died at Cumberland

CUMBERLAND, Aug. 24. — Mrs. Mary Jane Dewar, of Cumberland, wife of Mr. William Dewar, passed to her rest in the Cumberland General Hospital on Thursday, after being a patient in the local institution for the past three weeks. The deceased, who was in her forty-fifth year, leaves besides her sorrowing husband, a family of young children. The funeral will take place on Sunday from the T. S. Parks Undertaking Parlors, interment to be made in the Cumberland Cemetery, with the Rev. J. R. Hewitt officiating. The deceased was a native of Scotland and had been in Canada for the past twenty years. With her husband and family she had been a resident of Cumberland for a number of years.

Softball at Chemainus

CHEMAINUS, Aug. 24.—The second of the series of softball games was played on Friday evening. The White Range, captained by R. Jarrett, playing the Sys-Openers, captained by C. Johns, resulting in a score of 13-12 in favor of the White Range. The games are proving a great success, and are creating any amount of fun for the onlookers as well as the players.

Name Is Changed

MAYNE, Aug. 24.—The Plumper's Pass Branch, No. 84, of the Canadian Legion, has been notified that the change of name to that of The Gulf Islands Branch 3-a been authorized. The Gulf Islands Branch will hold its next monthly meeting on Saturna Island, the home of Comrade A. Ralph, on August 30, at 2 p.m.

Summer Novelties for Matron and Maid

Girls' Trim Togs for Days of Rain

RAINCOATS accepted with such alacrity by the older generation the past few seasons are now part of the school equipment of the small girl. They are cleverly designed, decidedly durable, and are within a moderate price range.

There are several raincoats considered as staples of fashion and consistently part of the mode. Yet it is the novelty that makes an appeal to the miss experienced in the matter of storm coats.

Leatherette has new grains simulating sharkskin, tweeds have been rubberized to good effect, double texture jerseys with rubber between are comfortable when the weather is chill. These are especially nice, as the wool material is next to the wearer and there is no feeling of dampness.

One of these jersey raincoats is illustrated at the very left. It is plaid lined and is ensembled with a small hat to match and a school bag, zipper fastened.

Yet another novelty for days of rain is the ensemble of snakeskin (grained leatherette), having a plaided back and fashioned into a trim little belted coat, a cloche hat and umbrella, the handle and tips of which are of amber-like composition. This ensemble is in tones of brown.

For the young miss with a disposition to scorn a rain slick, the trench coat with matching hat is one of the most practical types to select. The model at right centre is smartly sophisticated, cut in double-breasted style and made of waterproofed suede cloth in soft colors.

Tweeds retaining their vogue have been given a rubberized treatment for effective storm coats. The clever hat and coat at the right is of this fabric and is in various colors. Solid colored leatherette trims the pocket and cuffs.

Back-to-School Fashions

MOTHERS with small daughters soon to return to the classroom can-not loiter at vacation resorts when the assembling of smart youthful wardrobes is one of the most urgent duties confronting them. The shops have prepared displays of appealing garments, with a view to ironing out some of the complexities of choosing fashions which incorporate the practical and the correct.

Two fabrics are prominent in dresses for Autumn schooldays, namely woolens and cottons, the former ranking first in style value. Sheer weaves are very alluring in plain and fancy patterns and also there are many attractive frocks made of the coverts and jerseys.

Many of the new cottons show a resemblance to woolens in their designs to fit the seasons with even more chic than heretofore. And Paris is advocating larger, bolder prints for children's outer garments.

Checks and plaids in shadow and woven suggestions give the appearance of tweeds and silver basket weaves in cotton materials. Effective color combinations such as red, blue and white; yellow, grey and white, and yellow and brown mixtures have a new and Autumnal look.

Woolen coats follow the adult mode in colors, tailored details and the elaboration of furs. In models of dressy mien the flare is greatest.

Felt hats, velvet berets, umbrellas and raincoats, as well as a few garments of real sports persuasion are among the requisites of the younger male.

Wool Frocks for Schoolgirls

THE smartest youthful frocks are the most unpretentious. Tailoring adds to their charm. The same side faces; neckline treatments, color combinations and general fashion ideas seen in adult wear are embodied in costumes for the small maid.

Sheer woolens are prominent in diminutive models. And chalis, once the standby of the schoolgirl, has returned to the mode. Patterns in this material are seen in bright, small prints.

Correct for daytime wearing is the dress at the left, very alluring in its tailored details. This in light weight covert in any of the preferred colors of the season is finished at the neck and wrists by a piping of white piqué.

Jersey jacket suits offer variety to the wardrobe and many of these show harmonious color contrast. A suit typical in line of the preferred type for the girl too yet in her teens is shown centre, where brown jersey fashions and pleated skirt and cardigan with a blouse of orange trimmed in crochet bands of brown and lighter orange.

Differing from the usual genre of dresses for the wee miss is the dress at the right of brown jersey trimmed in bands of chartreuse and wool embroidery.

Formal Coats Show a Subtle Flare

From left to right—Brown broadcloth, brown reindeer colored skunk. Soft red woolen banded in black carneal. Green broadcloth and natural lynx.

There is an endless succession of interpretations of the flare in formal coats for the Fall. They are given the form of low-placed circular cuts, godets, or tunic suggestions with the fullness posed pay toward the hem and usually concentrated at one or two points, the emphasis of this at the centre back or at either side.

Of another order is the flare following the princess line with the fullness starting higher in this case. The figure that is given a smooth contour that is young and smart with nothing of the one-time matronly picture one is apt to conjure up at the word princess.

Two of the coats illustrated demonstrate the chic fullness and flares handled in the first method described above. In the centre coat this fullness is introduced by wide sleeves and a gathered section in the back. The wide shaped tunic of black caracul used on the skirt portion receives the same detail of fullness as the sleeves where in reality flaring cuffs of fur are joined to a close-fitting sleeve. The collar on this red cloth coat of formal mien is high, wide and upstanding.

Proceeding from its body lines is the face on the coat at the right, a type which many women will prefer, since it is less conspicuous and extreme. Merely it is low placed side fullness held by a pointed insert under the arm. Natural lynx forms a full-length collar and generous cuffs against green broadcloth, making a handsome color combination.

The application of two colors in fur forms a stunning collar. Brown skunk is faced with the same fur in an eggshell shade for the collar on the coat of brown broadcloth at the left, this model being an instance of the princess type of flaring lines.

It will be noted that the hemlines in these three representative coats are not extreme in their irregularity, yet there is a very obvious trend toward the longer coat with drooping hem.

New Impressions of Autumn Fashions

THE approaching Autumn season will be a most colorful one from evidences seen at a recent showing of New York garment creators, American designers and adapters of French models, favor a variety of color ranging from brown, the nasturtium tint, spirite green, sulphur yellow and bright navy to turquoise.

Certain fabrics in these colors are conspicuous and prove to be the selection of the majority. Velvet will reach its peak for day wear and evening. This material outnumbers all others for normal attire, although there is versatility shown in the use of dull crepes, metals, moire and satin. Perhaps because of the contemporary vogue and injection into midsummer evening fashions, satin will be rather absent from day wear. French couturiers use it, but as yet it has not seemed to merit an inclusion in daytime materials on this side of the Atlantic.

Bluete-like fabrics and tweeds share alike in their popularity for coats, although tweeds take the sports trend.

The svelte evening gown of velvet or other rich media follows the moulded contour and attains a marked flare at the hemline after the Spanish manner.

Velvet in black or some magnificent color is sponsored for the smartest of wraps, designed to be held closely about the figure. Lengths vary, but that shown is quite in favor. Collars are of the shawl genre, used slightly away from the neck.

The new length coat in suits is indicated in the illustration, and whether in tweed or other material is heavily furred as to collar. The suit more often than not is worn with a tuck-in blouse similar to the modish one sketched.

Skirts show a well designed and ingenious flare, and a minor detail is the short jacket for waistline.

The way of the Fall scarf, the note of applique in color or contrast at the neckline of a frock, the fur-trimmed morning velvet dresses, and the sponsored length in necklaces are all shown. The monogrammed glove has an affinity for the new mode.

Time and evening attire. Necklaces of small white beads in many strands take several forms, hanging in two long loops of almost two dozen strands, or are single, in shadow effect, or massed in graduated length.

Necklaces of pearls are worn twined about the arm six or seven times in lieu of a bracelet. The sixty-inch necklace of a single string of beads or from twelve to twenty has attained a marked popularity.

Points on New Hats

BY its points is the hat of Autumn distinguished from all its predecessors. Models of French creation all show jutting drapes, angles, flanges, the ends, bows to frame the face irregularly and piquantly. What once was the Dutch cap of Antwerp now has the ear lape turned partly upward onto and away from the shallow crown with a modified flare. Hats that droop toward the neck are the back usually have sections of brim draped back onto the crown, presenting vert much of a picturesque appearance in framing the face.

White Jewelry

SNOWY white jewelry against the sun-tanned neck is one of the fancies of mid-Summer for day-time and evening attire. Necklaces of small white beads in many strands take several forms, hanging in two long loops of almost two dozen strands, or are single, in shadow effect, or massed in graduated length.

Necklaces of pearls are worn twined about the arm six or seven times in lieu of a bracelet. The sixty-inch necklace of a single string of beads or from twelve to twenty has attained a marked popularity.

Elegance in Sports Coats for Autumn

A REVIVAL of the romantic period in dress is near, according to some stylists. And they predict with the passing of a few years the modern world will be the stage for a display of gorgeous color in raiment, for the expression of individuality above all else. And interest will be rife in clothes wherein luxury is keyed to comfort, which was not true of a bygone romantic day.

All signs indicate this change in feminine fashions. When luxury invades even the realm of sportdom, the possibility of greater magnificence becomes more of less of a settled fact.

There is, at any rate, a new elegance in sports fabrics from which Autumn coats are made. Coupled with this is the use of furs not commonly seen previously. More skillful tailoring and a straining after unique detail on the part of designers rather revolutionizes this phase of the sports mode.

Tweeds have a firm grasp on the hearts of women. The red brown tweeds sound the new note as do black rough surfaces flecked with white.

Diagonal tweeds as well as the bit and miss horizontal weave and bright colored nubs on neutral backgrounds are favored by almost all coat makers.

Chartreuse brown tweeds follow the browns and reds in style value. Then black and white effects, terra cotta, a few blues and some dull purples.

Long and short-haired furs are seen. The former is undeniably flattering and the latter strikes the note of sophistication.

A fur seldom used, but now coming into its own, is panther, which is a reddish brown tone makes the collar and cuffs of interesting shape on the coat of dark brown tweed at the right.

Straight lines take precedence over flares in numbers although you can see the effectiveness of subtly designed flares which really do have the edge as to style. The coat in the centre is youthful in its low flare and cuffs placed almost to the elbow to accentuate the circular lines.

A versatile collar of brown ombre carcul is shown in two ways of adjusting on the coat at the left, the model having unusually designed sleeves.

Fur Collars Elaborate

DETAILS of coat fashions consider in reality fashions itself for the smartest coat is as smart as its smallest detail and most minor points.

Collars have been expressed in no universal terms. They are high, stand-uppish affairs, many times resting upon the shoulders and starting their rise to chic from that point instead from the neckline.

Many collars, too, include revers in their generous and ample dimensions. Massive they have become, framing the face alluringly in their soft luxuriousness.

The smartest of all fur is fox, especially silver fox on a black coat, but other long haired furs now in vogue are cross and dyed foxes, lynx and badger. Flat furs such as caracul, Persian lamb and beaver, are used for huge collars and inclinations as well as cuffs.

The diversity in collars is to be noted from the various types sketched, showing the possibilities within the means of the furrier for creating many novelties with flat-furs elsewhere.

In any case the extensive collar demands a very small hat, which aids in preserving the sleek molded line fashion is employing to the last limits of attractiveness.

PRINT UNDERTHINGS

Spirited georgette, crepe de Chine, as well as washable taffeta nightrobes are displayed in lingerie departments of the large shops at very moderate prices. These usually are cut with the V-shaped neckline and the pointed shoulders held by a knot of ribbon, the hemline picoted in points to correspond. The waistline is defined by a ribbon, held by straps or encased in lace which trims the edges.

LARGE HANDKERCHIEFS

Paris as usual, gives the cue and the world heeds. The latest in handkerchiefs for sports costumes is the very large one of fine linen, almost half a yard square. One shirt is showing these in many patterns, bright colors, monotones, in plaids, checks and modernistic designs. The hems are rolled and stitched by hand.

OCCASION BAGS

Charming handbags for late Summer are shown in very tailored shapes of the pouch type and more often than not have wooden frames. For town they are in leathers such as lizard or calf. For country and sports wear they include Shantung and linen in natural color or white. Just now the envelope is pushed a bit to the background.

Forest Fires Continue to Menace Interior

The Southern Interior of the Province appears still to continue as the point of chief danger from attacks from forest fires. The report of the situation for the week-end, given by the Forest Branch, says: "The situation is very critical, and without considerable and general rain, will continue so."

While this is the condition of affairs in the Southern Interior, the situation elsewhere in the province has decidedly improved from the standpoint of fire hazard. A break in the weather conditions occurred. With this one exception, it is set out that showers to considerable extent have been reported from the Coast, Central and Northern Interior. In the Southern Interior high winds with only scattered light showers, aggravated the conditions there and existing fires spread rapidly. At the same time seventy-five new fires occurred and 100 fires are now burning.

EXTRAORDINARY VALUE IN DRESSES OF LATEST STYLING

$15.75

Fall styles are most adequately portrayed in this new showing. Smart frocks at this low price. Fall Dresses in Crepes have their representation in this group, which is straight from the whirlpool of fashion, and is weeks ahead of the coming trade.

CHINESE NAVY HAS OLD SHIPS

COLLECTION OF ANCIENT WARCRAFT DEFENDS COAST OF LARGE NATION

Second Class Cruiser, Three Destroyers and Small Craft Now in Service

The Chinese navy of recent years has fallen into the background, never having fully recovered from the disasters of the war with Japan in 1895, according to The Daily Telegraph.

At that time the Chinese had two battleships built in Germany and five other armoured vessels of various types. It had been built up to some state of efficiency under a British naval officer, Captain W. M. Lang, but peculation and bribery set in, and it is on record that at the outbreak of the China-Japanese war there was hardly any ammunition. At the battle of the Yalu there were only fourteen rounds per heavy gun on board the big ship.

Before the outbreak of the world war in 1914 a start was made with rebuilding a navy for China. Two cruisers were constructed at Elswick in 1912, the Chao-Ho and the Ying-Jui, and some destroyers were also added to the force.

The present Chinese Navy is commanded by Admiral Chen, who received his training in the British Navy. The navy today consists of a 1912 second-class cruiser and three destroyers built at the same time. To these must be added seven torpedo boats over twenty years of age and twelve gunboats as old. China's most recent ship is one for coast defence, which was built in 1918.

AT BRENTA LODGE

Guests registered at Brenta Lodge last week included: Miss H. C. L. Hooker, Miss Adelin Thompson, Miss M. Kathleen Thompson, Vancouver; Mr. and Mrs. F. J. Hawkins, Monteith, Cal.; Mr. J. B. E. Wheeler, Mr. W. E. Kirkpatrick, Calgary; Mr. and Mrs. B. E. Schubert, Miami, Fla.; Mr. E. Schubert, Mr. and Mrs. O. V. Foulds, Berkeley, Cal.; Mr. and Mrs. T. A. Moore, Miss Helen Moore, Victoria; Mr. Charles H. Hastings, New York City; Mr. Ralph B. Wilson, Mr. R. B. Wilson, Jr., and Miss Mary Jane Wilson, Los Angeles.

advance Styles COATS

$69.75

NO TWO THE SAME

This season the straight slim wrapround coat is as taboo as the leg-of-mutton sleeve. And every coat in the smart mode have its curving lines, its darts, flicks and flares, to see nothing of very luxurious fur trimming. Most favored are the rich browns that use the beaver fur, and the blacks with red fox. Here is a most remarkable suffle (season adjusted, modestly priced)

VANCOUVER VICTORIA NANAIMO CALGARY

Where All Crops Thrive

Curing Rye, Wheat and Vetches for Hay on Hon. S. F. Tolmie's Farm

Premier Tolmie's Farm Produces Record Crops

Visitors to Exhibition Had Chance to See Evidence of Efficient Farming Methods—Manager Explains Results Obtained

Those who have the impression that the farm lands in the vicinity of Victoria are not productive had their opinions altered when they inspected the display made by Mr. A. H. McPherson at the Fall exhibition in this city. The exhibit which he placed on display in the main building was taken from the farm of Premier Tolmie, on Cedar Hill Crossroad, of which Mr. McPherson, an Old Country farmer from Aberdeen, is the efficient manager.

The crops on this farm attracted a great deal of attention during the growing and harvesting season in consequence of the tremendous yields that were to be found there.

This was particularly true of the fodder crop, which was cut for hay, and which was composed of vetches, rye and wheat. Among those who examined the crops during the ripening season was Hon. W. Atkinson, Minister of Agriculture for the province, who has had the opportunity of seeing many heavy crops, and who agreed with others who had had similar opportunities to judge, of heavy crops, in pronouncing it among the heaviest that has ever been produced in Western Canada.

DETAILS OF CROPS

At the exhibition, in connection with the exhibit, information was given as to the crops produced. Vetches had grown to a length of 11 feet 4 inches; rye 8 feet 7 inches; sweet clover 8 feet 8 inches; field peas 6 feet 2 inches; Timothy hay over 6 feet. There were magnificent exhibits of Winter and Spring wheat, of Winter and Spring oats, and of alfalfa and clover hay. The information is given by Mr. McPherson that while a part of the combination crops were cut and cured as hay, that some eight acres of wheat and vetches combined were ripened and twelve tons of grain was threshed from the out. In this part that was cured as hay a yield of from six to seven tons an acre was produced.

Wheat raised on the farm produced as high as fifty-five bushels to the acre.

FOR DAIRY STOCK

The great feature in connection with the crops which are being produced on the farm of the Premier is that they are not being grown as show crops under specially favored conditions. These crops were grown under ordinary field crop conditions, without specially favored features being introduced.

The farm is being devoted quite largely to dairying and the crops that were produced in it this year were for the purpose of providing for the dairy cattle maintained on it.

As those who know the early history of this city and district the farm is one that has been producing for a very long time. Parts of the farm producing this extraordinary growth of field products have been cleared and subjected to cropping under a rotation of crops for forty years.

The production shows what can be done on Vancouver Island under proper management, and reveals the fact that nowhere else in Canada can better crops be produced on the land than can be grown here.

AT Y.W.C.A.

Guests registered at the Y.W.C.A. include: Mrs. Florence Johnson, Hawaii; Miss R. Iles, London, England; Misses Annie and Maude McNunn; Miss Jessie Lugate, Pittsburgh, Pa.; Miss Eva Burnett, Mrs. E. M. Quinn, Mrs. L. J. Reeve, Miss E. M. Hasell, Winnipeg; Miss Laura Smith, Miss Alexander, Kaslo, B.C.; Misses Beaty, St. Catherines, Ont.; Mrs. S. J. Saunder, Everett, Wash.; Miss Malloy, Miss Jean Rowland, Miss Aatie, Edmonton, Alta.; Misses Armstrong, Metchosin; Miss Joan Dixon, Montreal; Mrs. R. M. Pratt, Mrs. Cullinge, New Westminster; Miss Clarke, Nanaimo; Mrs. B. R. Bews, Miss M. J. Bews, Milton, Ont.; Mrs. W. A. Emsley, Miss Elizabeth Emsley, Oshawa, Ont.; Mrs. W. J. Jamieson, Miss Winnifred Jamieson, Miss Lina Woods, Seattle; Miss Margaret Plant, Detroit; Mrs. P. H. Johnson, Miss F. Lyle, Pt. Townsend; Mrs. H. L. Strohm, Miss Phyllis Strohm, Denver, Col.; Miss Ruth Walden, Lindsay, Ont.; Mrs. G. P. Jones, Miss Jones, Vancouver; Mrs. R. H. Clark, Miss Ruth Clark, Moose Jaw.

Annie Elizabeth had a lover who had been courting her for fifteen years, to the irritation of her father, who thought "it wer' time things wer' moving."

At his instigation the girl put a shy question: "Don't you think, lad, it's time you and me were thinking about getting wed?"

"Aye," agreed her swain heartily, "but whod have us?"

Prudence Says So

Some Seasonable Recipes for Restocking the Jam Cupboard —Rabbit Makes a Savory Dish

Marrow Jam

Cut marrow into cubes, remove pulp, allow one pound of sugar to every pound of marrow. Lay the marrow and sugar in a pan, add to every pound of sugar, two ounces of preserved ginger and the grated peel and juice of three lemons. Leave all night and boil for four hours.

* * *

Pineapple and Rhubarb Jam

To every three pounds of rhubarb add one pound of pineapple. To every pound of the above, add one pound of sugar. Boil for about an hour, or until clear and rather thick.

* * *

Plum Chutney

Three pounds of plums, one pound apples, one pound brown sugar, one quart of vinegar, two ounces green ginger, two ounces garlic, one teaspoon cayenne, one teaspoon salt, one teaspoon cloves, one large onion. Boil for three hours.

* * *

Fish Pudding

One and a half cups of cooked fish, one and a half cups milk, two eggs, two tablespoons butter, two tablespoons flour, one-third cup mild grated cheese, salt and cayenne to taste. Heat the milk, add flour and butter blended together, add cheese, fish, salt and cayenne, stir well together and remove from fire. Add the beaten yolks and fold in the beaten whites. Bake in a moderate oven until slightly browned.

The following is contributed by the B.C. Rabbit Breeders' Association:

Savory Rabbit

Wash the rabbit and cut into pieces. Dredge with four tablespoons of flour, two teaspoons of salt and one-eighth teaspoon of pepper. Brown in four tablespoons of bacon or other fat. Remove meat to stew pan and cover with boiling water, and add one-medium sized onion cut in small pieces and two bay leaves. Cook slowly until nearly tender. To the fat that was used to brown the rabbit add two tablespoons of flour, mix thoroughly and add one cup of vinegar. Pour this sauce over the meat and simmer until it is very tender. Serve with dumplings. This makes an excellent meal served with fresh or canned string beans and with a dessert of baked apples.

Bag and Shoe Ensemble

EVERY shoe shop of repute in the city is gay and colorful with bag and shoe ensembles in leathers and in fabrics. There are cool greens, orchid tints, mauve, all white, pale blue or deeper tones, as well as the sturdier colors.

These of course are designed to complement the diaphanous frocks of chiffon for formal wear when the medium is thin kid in pale shades.

Sports accessories being much to the fore for Summer, the most attractive of the ensemble duos is the white kid strap shoe with building leather heel and trimming note artfully carried out in brown so as not to decrease from the light tone of the shoe.

The bag to match tiverlainly is made of white kid—very delicate for a purse but the vogue none the less. It is made more practical by having the upper part, where the hand comes in contact with it, of brown calf, sometimes in plaided brown and white effect and with trimming motif of appliques in the white kid.

Such brown and white leather accessories have become classic and were seen at the most fashionable Eastern beaches during the last week-end.

The Way of the World Is Our Way

Our methods are truly cosmopolitan, impregnated with the most modern results of scientific research. No process is offered to the public until it has passed the most severe tests that ingenuity can subject it to.

We number amongst our clients those, who through taste and environment, are satisfied with nothing short of perfect work. We have built up a reputation for prompt and reliable service that stands behind every claim we lay to public favor.

We have in our plant machinery capable of handling the daintiest lingerie and the heaviest rug, with equal success. Our patrons are protected from loss by fire or damage at every turn. Call us on the phone and allow us to demonstrate the satisfaction we give.

Early Pioneer Days Revived Over KOMO

Professor Edmond S. Meany will take listeners to the University of Washington Radio Hour at 7 o'clock on Monday evening back to the days when strong fortifications were necessary for the safety of the early pioneers.

This great authority on the history of the Puget Sound territory will speak upon "When the Early Settlers Built Blockhouse Forts." Music particularly fitting will furnish the setting for Dr. Meany's talk, which will be heard over station KOMO.

"Immediately after he married my daughter the boundar touched me for five hundred."

"And have you anything back from him?"

"Yes, my daughter."

TWO POPULAR SONG WRITERS TO BROADCAST

Fred Coots and Benny Davis Will Sing Their Favorite Song Hits of "Today" and "Yesterday"

JUDGE RUTHERFORD TO SPEAK OVER KJR

Judge J. F. Rutherford, internationally famous figure, will be the principal attraction in a Watchtower programme sponsored by the International Bible Students Association this morning, beginning at 6 o'clock Pacific standard time, which will be released over station KJR.

Judge Rutherford's subject will be "Health and Life for the People." and he will draw upon his noteworthy and interesting life experiences for his subject matter. The Tour de Garde singers" and an orchestra, under the famous Omero Castellucci will provide the musical highlights of this programme which will continue for one hour.

The elegiac cantata to words from the Lamentations of Jeremiah, Thalia, by Charles Gounod, will be a feature of the Cathedral Hour, beginning at 2.30 p.m. Pacific standard time, with Agatha Turley, soprano, as the soloist.

Another feature of the programme will be the rendition by Sydney Dixon, tenor, of Handel's "Jephta," including the aria "Waft Her, Angel, to the Skies" and the recitative "Deeper and Deeper, Still." The Cathedral Choir forming a vocal background to each solo will also present Stainer's "O Beautiful Jesus."

"Over the Bounding Main" will be the title of the latest episode in "The Pursuits of Pamela" to be heard at 3 o'clock this afternoon.

FAVORITE SONGS

Two of America's outstanding writers of popular songs, J. Fred Coots and Benny Davis, will sing many of their past and present song hits when they are presented by Wendell Hall on the Majestic Theatre of the Air tonight at 8 o'clock.

J. Fred Coots was a Brooklyn boy who ran away at the age of thirteen with the Barnum and Bailey Circus. He got as far as Chicago, where he quit carrying water to the elephants, became a bus-boy in the Coconut Restaurant, learned to play the piano, got a job as substitute pianist two years later, then drifted back East, wrote his first song in 1918, and sold it for $5.00. Three years later, with Eddie Dowling, he wrote "Sally, Irene and Mary," and with the money he made on this production he paid off the mortgage on the old homestead.

Benny Davis, famous as a vaudeville headliner and writer of songs, wrote his first song when he was twenty years old. While riding in a taxi cab through New York's Central Park he said to the friend who was with him: "I'm going to write a song and sell it for $50. Here's how it goes." He began to hum a tune. Next day he sold it to Joe Morris for $27.50. The same publisher brought out Benny's latest great success, "Carolina Moon." Other famous Benny Davis songs are, "Margie," "Angel Child," "Baby Face," "Sweetheart," and "Yearning."

Charles Saint-Saens, pre-eminent French composer whose compositions were accepted in Germany years before his own native land recognized his genius, will be honored today in a programme by the American Artistic Ensemble dedicated to his work. The programme which begins at 7 p.m. opens with his First Movement from "Trio E Minor," played by the ensemble. A vocal selection, "Nightingale," by Agatha Turley, soprano, follows. Rolla Levienne eminent cellist, next presents Ric "Allegro Apassionate." Two selections by the trio, the Second Movement from "Trio B Minor" and the Scherzo from "Trio F Major" and a violin solo by Peter Mercadillum, "Rondo Capricciosa," completes this programme.

DEFICT MAIN STREET LIFE

Life along Main Street as depicted in Mitchell Sutherland's sketch, "Harper's Corner," will amuse dialers this evening, beginning at 7.30 o'clock, when the affairs of this either village will be discussed by Jeff Larrabee, town barber, Budge Talbot, postmaster, Grandpa Prouty, Civil War veteran, and Chet Rochester, town constable. Harold Jothanut, director of the sketch appears also as Grandpa Prouty.

A thirty minute programme of popular appeal known as Blacks, Whites and Blues, utilizing the light and frolic type of melody will be heard at 12 noon, Pacific standard time. Mabel Mickman, Pinkie Jepson and Marjorie Robillard, pianist, will take care of the black and white keys or three pianos while each well-known singers as Bobbie Roberts, Betty Bailey, Glen Eaton and others will furnish the blues.

"The French blame all their troubles on Woodrow Wilson. They say they worshipped him, and he let them down."

Novelist Carl Van Vechten was talking about the thorny three-sided question of reparations, Rhineland evacuation and debt settlement.

"Yes," he added, "the French have named streets after Wilson in all the towns of France. Everywhere you go it's Rue Wilson—and they're beginning to rue it all right."

THE NEW TRIUMPH MARCONI RADIO

MARCONI TRIUMPHS

PERFECTED THROUGH YEARS OF RESEARCH

MARCONI Radio

DR. SOCKMAN OPENS WEEKLY N.B.C. SERVICE

Operettas and Musical Hits Will Be Presentation by Studebaker Champion's 30-Piece Orchestra

HARRY ROBERTSON IS GUEST SOLOIST

"The temper of our time is to look more for the finger prints of the guilty than the footprints of the good," Dr. Ralph W. Sockman will declare in his weekly sermon to the radio congregation during the National Sunday Forum broadcast through the N.B.C. coast-to-coast system today from 12 to 1:30 o'clock, Pacific standard time.

"We are inclined to suspect the motives of men," says Dr. Sockman. "Many people cannot understand unselfish service and think there must be some ulterior design back of the seemingly noble and kind deeds."

Music for the service will be provided by the Crafton Choristers under George Dilworth's direction and by Hart Oddfellow, organist. Dr. Sockman's "Question Box" will complete the religious programme.

GUEST SOLOIST

With Harry Robertson, tenor, as guest soloist, Charles Hart as orchestral conductor, and a quartette of feminine vocalists to sing gospel hymns, the Sunday afternoon concert will be broadcast this afternoon from 1:30 to 2:30 and from 3 to 4:15 o'clock.

Robertson, who sings during the first hour, is a musician by hobby and a publisher by profession. The grandson of a "49er" and one of the first Americans to be born in the town of Tombstone, Arizona, Robertson came to the Pacific Coast with his parents as a child. He served his apprenticeship as a journeyman machinist before entering Stanford University, and following his graduation he engaged himself in a variety of occupations. He went to Milan, Italy, to study for two years with Sabatini, father of the famous operatic and historian and teacher of John MacCormack. Robertson was Sabatini's last pupil. He joined the aviation service during the war and was stationed at Kelly Field. Since then he has been a publisher.

For his solos Robertson has chosen six classics, the first of which will be Beethoven's "Adelaide," a song of charming melody composed when Beethoven was twenty-five years old. Two Spanish songs which he will sing with lute accompaniment will conclude his offerings.

The second part of the concert will begin with the overture to Rossini's "La Gazza Ladra," produced in 1817. Pierne's "March of the Tin Soldiers," a fanciful humoresque, and Morton's delightful "Enchanted Hour" are other orchestral numbers. The quartette, consisting of Barbara Blanchard and Ethel Waterfall, soprano, and Eva Grunbauer Atkinson and Margaret O'Dea, contralto, will present two groups of gospel hymns and songs.

ORCHESTRA NUMBERS

A dancing figure in the sunlit Bohemian mountains is pictured in the colorful music of Saint-Saens' "Danse de la Gypsy," the opening selection to be played by the Wilfall Anglo-Persians during their broadcast today from 2:30 to 3 o'clock, Pacific standard time.

This number and the second, "Cigue et Finale," are taken from the French composer's ballet divertissement, "Henry VIII." Louis Kaufman will direct the Wilfallians in Hindemann as they play these and six other selections.

Alix's descriptive piece, "Ball Room Chatter," and a salon arrangement of "Chloe" are two additional numbers of especial interest.

Presenting William Simmons, distinguished American baritone as guest artist, the Atwater Kent programme will be broadcast from coast to coast tonight from 8:15 to 9:45 o'clock, Pacific standard time.

Simmons, who advocates songs in English for American audiences will sing a group of songs by American composers during the half-hour. He has been heard for several seasons in the Atwater Kent radio hour programmes and has appeared also in various parts of the country in oratorios, concert performances of opera and with orchestras.

Born in Troy, New York, Simmons looked upon the bollet trade as a proper line of activity for any ambitious person. He did order that business, but discovered that he had a voice with potentialities and determined to train it. He won a scholarship admitting him to a school of opera in New York and his career was started.

MUSICAL HITS

Musical comedy, operetta and motion picture song successes will compose half of the eight numbers of the Studebaker Champions will play during their coast-to-coast broadcast tonight from 8 to 8:45 o'clock, Pacific standard time.

"Baby Awake Now," from the recent Broadway show, "Spring in Here," introduces the thirty-piece orchestra under Jean Goldkette's direction. The popular musical hit, "Only a Rose," from Friml's "The Vagabond King," and "Welcome Home," from the screen production, "On With the Show," are also scheduled.

A song which first won favor during the world war, "Roses of Picardy," will be heard with other choruses by Fred Waldner, tenor. To complete the half-hour of music, Buryl Retting and Dick Platt, the piano team, will contribute an duet.

These programmes will be heard through Pacific Coast stations KHQ Spokane; KOMO Seattle; KGW Portland; KGO Oakland; KPO San Francisco, and KFI Los Angeles.

BUENOS AYRES. — A decree recently passed have requires that all broadcasting stations in Argentina be located outside of city limits, which have been given nine months to make the change.

One of the most popular features appearing over KGB San Diego, is the KGB Ko-Kets, who appear every Wednesday evening on the Vaberan of Foreign Wars programme, and over the same KGB Profiles every Saturday night.

He—You say that woman who moved into the best apartment is a widow?

She—Yes, but I haven't been able to discover yet whether she is living on life insurance money or alimony.

RADIO NEWS

Clarence Hayes, billed in N.B.C. System programmes as the "Voice of the South," is an enthusiastic student of the tricks of broadcasting. "Microphone presence," some technicians call it. Hayes has discovered very interesting results of position and diction by listening to himself broadcast. He uses earphones attached to a speaker in the monitor's room just outside the studio.

Serious inroads are being made upon the radio microphone stocks, as more and more singers are being drafted into talking pictures. Recently a large film booking office in Hollywood sent out a call for registrations from vocalists and instrumentalists, stars and the Paramount-Express station KNX had rails for seven of its leading artists.

Gladys M. Fetch, champion woman broadcaster, who is making a world-wide tour of radio stations, is now at Oslo, Norway. She puts KOO, at Oakland, California, where she has been heard as follows: "The most striking feature in European broadcasting compared to yours is the variety of foreign languages one can hear every night. Tuning from one station to another one hears an entirely new language. A drawback, of course, but interesting."

DANVILLE, Va.—Most reception interference troubles can be traced to grounded high voltage lines coming in contact with trees, according to W. Van Nostrand of the Radio Supervision Service of the Department of Commerce.

R. M. Coburn has been appointed to the staff of the Sterling Radio Corporation of Toronto, according to Irving Barnoff, president. He will assist in the direction of sales and promotion activities of Majestic receiving sets.

WELLINGTON.—The growing acceptance of radio throughout New Zealand is indicated in the increased number of receiving licences issued in the last year.

The Breakfast Philosophers over KLEIN will hold very interesting programme from 7 to 8 a.m. daily, except Sunday. Announcements of current events and inspirational topics are conducted by Allan M. Wilson, Harry A. Earnshaw, Clarence U. Young and Lew Hahns.

The Sapistrano Beach programmes being presented over KHJ every Tuesday at 4 p.m. and Friday from 7:30 to 8 p.m. are exceptionally fast moving and entertaining musical programmes which feature the Capistranian Orchestra, which is directed by Dan Wilson.

"Tex" O'Reilly, who has fought in more revolutions than he can count on his fingers and who is now telling of his experiences in weekly programmes over the National Broadcasting Company System, is a soldier of fortune of the old school, but also he is much more. O'Reilly received a classical education and at one time was city editor of a Chicago newspaper.

SWEDISH MUSIC SUNDAY FEATURE AT STATION KOMO

SEATTLE, Aug. 24.—The Moonlight Hour brings to its listeners over KOMO an hour of Swedish song at 8 o'clock Sunday evening. To this hour of Scandinavian tunes Agnes Jacobson, soprano, will contribute a group of songs which gave Jenny Lind the name for which she was world famous, "The Swedish Nightingale."

Miss Swenson is a Tacoma girl who is visiting her home town after three years of successful study in New York with two of the most celebrated singing masters of the present time. Isidore Luckstone and Oscar Seluger. She will be remembered by Seattle musical circles as having starred with the Seattle Grand Opera Company three or four years ago.

During the Moonlight Hour Miss Swenson will be heard in "Ach Varmeland, du Skona," by Hugo; "Plusha Vill Jag Sinagrad," by Arjou, and "Norrlandtogens Hamlingsan," by Rosenius. She will be supported by the Concert Orchestra.

Music characteristically Scandinavian, is the contribution of the Concert Orchestra.

Friend—Tell me your secret of success. How have you obtained so many patrons in such a short time?

Dyspepsia Merchant—"I got a parrot and trained it to cry out, 'Oh, I feel so long from home!' every time a lady entered the store."

Cole: "Who's that fellow you just threw out of your house?"

Scuttle: "He's my first cousin once removed."

CFCT Programme

Tomorrow evening will mark the commencement of another week of highly "Busset" programmes over the local station, CFCT when the Sunset Concert Orchestra will be presented from the studio at 8:15. The orchestra has selected a highly diversified programme to offer to radio devotees. The Merry Widow by Franz Lehar, was first performed in Vienna in 1905, and has since proved an international success, thrilling the whole world with its charm. The Sunset Concert Orchestra has chosen a selection of gems from "The Merry Widow" to open tomorrow evening's hour with the Sunset Broadcasters. "La Dame Blanche," or "The Lady in White," was the culminating point in Boieldieu's career as a composer, and the orchestra will present the overture to that comic opera as the second number on tomorrow night's hour of orchestral music. Emil Chagin's "Moorish Serenade" will give way to Pasarall's "Andalouse," which precedes a concert waltz by Waldteufel, "Pomone." Radio listeners will then enjoy the "Intermezzo" from Georges Bizet's "L'Arlienne Suite," while a selection from Vincent Young's musical comedy, "Wildflower," will draw tomorrow evening's orchestral hour over the local station to a close.

A bulletin board outside a church announced Sunday's sermon: "Do You Know What Hell Is?"

Underneath was printed in smaller letters: "Come and hear our new organist."

First Movie Actress—Why the tears, dearie?

Second (sobbing) — I-I-I don't bub-bub-believe your husband loves me any more.

Plays and Players

Brilliant Operetta of "The Desert Song" at Dominion All Week

Vitaphone's Wonder Production of First Musical Play Translated to Silver Screen, Including "The Riff Song" and Title Air, Heard All This Week at Yates Street Theatre

Galaxy of Artists Heard In All Important Roles

ALL this week the wonders of Vitaphone are presented in new guise in "The Desert Song," the brilliant operetta which takes place as the first musical play ever transferred to the screen in its entirety. Warner Brothers, pioneers of the talking picture, have taken another step forward in the production of this famous stage play accompanied by all the tuneful melodies of Sigmund Romberg, its composer, played by the Vitaphone Symphony Orchestra, and with a magnificent chorus of one hundred voices.

The use of such a large number of people brought up new problems in voice recording, but the difficulties were surmounted with complete and astonishing success, and the result was a Vitaphone production which far excels all previous efforts.

"The Riff Song" and all the other inspiring choruses of "The Desert Song" come to the audience in volume as melodious as it is remarkable. The desert settings are exceptionally beautiful.

Important roles in this epoch-making production are played by John Boles, Carlotta King, Louise Pazenda, Johnny Arthur, John Miljan, Marie Wells, Jack Pratt, Myrna Loy, Edward Martindel, Otto Hoffman, Robert E. Guzman and Dei Elliott. "The Desert Song" was directed by Roy Del Ruth, and Harvey Gates made the screen adaptation. It will be the attraction all this week at the Dominion Theatre, beginning tomorrow.

A Scene From "The Desert Song," the Screen's First Operetta, Which Is Showing All This Week at the Dominion Theatre.

AMUSEMENTS

Capitol—Laura La Plante in "Scandal."

Columbia—"The Shady Lady," starring Phyllis Haver.

Dominion — "The Desert Song."

Playhouse—Belle Bennett in "The Power of Silence."

On the Stage

Coliseum—Mildred Page Players present "Gossips."

Mr. Churchill Makes Tour of Turner Valley

CALGARY, Aug. 24.—"The four speeches I had decided to make in Canada has grown to ten, so I am looking forward to a quiet few days in the hills and valleys of Southern Alberta," said Winston Churchill, former Chancellor of the British Exchequer, following a civic welcome here Saturday morning.

After being welcomed by Mayor P. E. Osborne and other civic officials, Mr. Churchill and party left for a tour of the Turner Valley and the British visitors will spend Saturday night and part of Sunday at the Prince of Wales ranch. After addressing a civic luncheon on Monday the party will leave for Banff during the afternoon.

POWER OF SILENCE ON LOCAL SCREEN

Belle Bennett's Beautiful Drama Opens at Playhouse Tomorrow

Wallace Worsley, the director whose "Hunchback of Notre Dame" was called the "greatest achievement of the American screen," was selected by Tiffany-Stahl to direct Belle Bennett's new picture drama, "The Power of Silence, which is the feature at the Playhouse Theatre this week.

Worsley is a graduate of Brown College at Providence, R.I., and gained his stage experience under Charles Frohman's management as the leading juvenile in "Mrs. Dane's Defence," which ran for more than a year in New York alone.

Pictures fascinated him from thefy first wavering beginnings, and his devotion to his chosen form of art brought him a flattering offer from a delegation of French authors to settle in France and screen the Hugo classics. Following that contract Worsley went to Australia to direct a series of American productions.

A gentleman who was expecting a consignment of grouse from Scotland telephoned the station. He was answered by a girl who had a charming voice. "Is that the passenger department?" he inquired. "No, sir," she returned sweetly. "This is the goods."

MILDRED PAGE AND TROUPE FEATURED

Popular Players Return for Fall and Winter Season at Coliseum

Returning to Victoria with her own company of nine players, Miss Mildred Page will open the Fall and Winter stage season in Victoria at the Coliseum Theatre tomorrow evening with a stage production entitled "Gossips." There will be performances every evening during the week with matinee presentations on Wednesday and Saturday afternoons.

Miss Page was here several years ago at the old Princess Theatre on Yates Street. Since leaving Victoria she has been playing in Pacific Coast cities, and has added much to her former ability and charm. Her many friends and admirers in this city will no doubt welcome back to Victoria one who for so long held such a high place in their esteem.

The leading man of the new company will be Horace Linta. Mr. Linta has appeared on Broadway in a number of productions and also appeared with both wives of the late Rudolph Valentino in motion pictures.

On the screen is Charles Rogers and Marian Nixon, two of the screens most vibrant youthful players, teamed together for "Red Lips," a new and original picture of college life.

College, with its young loves, heartbreaks and joys, has been the theme, but "Red Lips" treats of them in an entirely new way and depicts the glamorous as well as intimate side of the life of a collegian. The story of the film was adapted from a story by Percy Marks.

HAVANA LOCALE OF "THE SHADY LADY"

Columbia's Attraction Tomorrow Tells Story Dealing With Underworld

Although Cuba is historically the most interesting part of the Western continent, as the land first discovered by Columbus, the visitors who throng to that delightful island are not generally lured by a desire to steep themselves in its legends, according to popular reports.

The beautiful gambling casinos, unique cafes and other pleasure resorts are the irresistible magnets which draw the largest percentage of visitors, it is said.

This phase of Havana plays a prominent part in the exciting sequences of Phyllis Haver's new Pathe star feature, "The Shady Lady," now showing at the Columbia Theatre, in which she is shown as a habitue of the palaces of chance, and an intimate of the adventurers whose number is legion in the Cuban city.

Robert Armstrong plays the leading masculine role opposite Miss Haver.

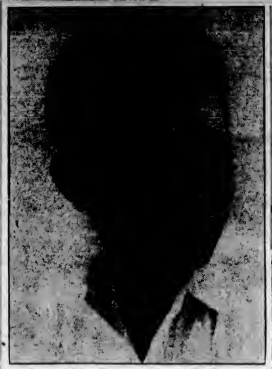
Laura La Plante and John Boles in "Scandal," the sound and talking feature showing Monday, Tuesday and Wednesday at the Capitol Theatre.

NINE NUMBERS IN CONCERT AT BEACON HILL PARK

The band of the Fifth B.C. Coast Brigade, C.O.A., will give a concert arranged for by the city at Beacon Hill Park today. Nine numbers will be played on a programme arranged for the event.

Conductor C. A. Raine is well known in musical circles in the city, and has assembled a first-class aggregation under the control of his baton. The programme to be given is as follows:

Grand march, "Spirit of Pageantry," Percy Fletcher; selection, "Beethoven's Works," arranged by W. Reynolds; waltz, "The Skater," Waldteufel; selection, "The Pirates of Penzance," Sullivan; "Unfinished Symphony," Schubert, first allegro moderato, second andante con moto; selection, "The Firefly," arranged by Otto Langey; chorus, "Kyrie and Gloria," from twelfth mass, Mozart; selection, Songs of Wales, Rosser; "War March From Athalie," Mendelssohn; "God Save The King."



HORACE Linta, who will be the leading male performer with the Mildred Page Players at the Coliseum Theatre for the Fall and Winter months. Mr. Linta will be seen at the Coliseum in the opening performance of the season tomorrow night.

A Scotsman made a present of a knew he'd get it all back again.—lipstick to his best girl, because he "Tunes of India.

GRIPPING SOCIETY DRAMA FILMED

Laura La Plante Stars in "Scandal," Sound and Talking Feature, at Dominion

Laura La Plahte will be seen at the Capitol Theatre beginning tomorrow for a three-day run in a dramatic "sound" and talking picture entitled "Scandal." It is based on "The Haunted Lady," a gripping society scandal story by Adela Rogers St. Johns, which appeared in the Cosmopolitan Magazine. Universal has made it into a talk-film of unusual intensity, with Hunsly Gordon, John Boles and Jane Winton among the leading principals.

The story tells how a girl of adopte circumstances rises above her station and marries a wealthy society favorite. Then comes a hand from the past to drag her back and she finally is forced to risk her husband's respect by baring a scandalous situation, or see a third party go to prison unjustly. How she faces this decision makes one of the strongest scenes ever screened.

The dialogue sequences are considered perfect. Miss La Plante has a wistful voice of great appeal. John Boles, former musical comedy favorite, is ideal as a speaking and singing screen star.

N.B.—This is not an "all-talking" production.

Another dip into Mr. H. Cecil Hunt's collection of "howlers" has revealed these thoughts on the circle:

A circle is a line of no depth running round a dot forever.

A circle is a round straight line with a hole in the middle.

A circle is a round line with no kinks in it, joined up so as not to show where it began.

One more: The process of turning steam into water is called conversation. Conversation, on the other hand has been described—sometimes with kettles—as hot air.

THIEVES RUN AMOK

LOS ANGELES, Aug. 24.—Two robbers firing at pedestrians and bank employees to frighten them, forced their way into a branch of the United States National Bank here today shortly after it opened, and escaped with $4,500 in cash after handcuffing the cashier to a vault door.

SCOTCH COMEDIAN BILLED OVER AIR

Sir Harry Lauder Scheduled to Broadcast for First Time on September 1

Sir Harry Lauder has finally signed a radio broadcasting contract. Announcement by the National Broadcasting Company today states that the world's foremost Scotch comedian has consented to appear before a microphone in Winnipeg, Canada, on Sunday evening, September 1.

His famous voice and hearty chuckle will be heard throughout the United States and Canada through a coast-to-coast network of thirty-six stations associated with the N.B.C. and three stations in Canada during the "Enna Jettick Melodies" programme from 8 to 8:30 Eastern Daylight time, that evening.

The famous comedian has appeared before a microphone in Europe but has never been heard throughout the North American continent. For his North American debut, Sir Harry has chosen three songs which have endeared him to hundreds of thousands who have attended his concerts. They are, "I Love a Lassie," "We Hoose Mang the Heather," and "Roamin' in the Gloamin'." He is scheduled to close his part of the programme with his favorite hymn, as yet unannounced.

For years programme builders have dreamed of presenting Sir Harry to a vast American radio audience, but, until now, it has been only a dream. It remained for the sponsors of "Enna Jettick Melodies" to induce the canny Scotchman to appear on their programme. Several radiograms trailed the comedian from Australia to New Zealand and back again before it was learned that Sir Harry did not plan to tour the United States this year. Word finally came that he did plan to open his concert season in Winnipeg, Canada, on September 2. Unbeknown to this apparent upset, the programme sponsors immediately set about to have the comedian-singer appear before the microphone daunted by this apparent upset, the programme sponsors immediately set about to have the comedian-singer appear before the microphone successful and, for this programme, thirty-six coast-to-coast stations associated with the National Broadcasting Company will be linked with CKY, Winnipeg. In addition, two other Canadian stations, CKCW Toronto, and CFCF, Montreal, will join CKY for the programme of songs by Sir Harry.

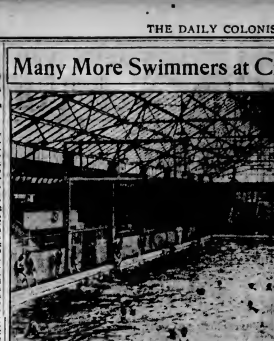
Programme directors of the National Broadcasting Company are preparing to meet Sir Harry in Winnipeg several days before the broadcast in order to initiate him in Daniel, twenty-nine, announcer for to acquaint him with the methods by which to obtain the best microphone results.

DEATH CLAIMS N.B.C. ANNOUNCER

NEW YORK, Aug. 24.—John B. Daniel, twenty-nine announcer for the National Broadcasting Company since 1928, died last Monday. He became ill in the studio two weeks ago and was operated on for pernicious a few days later.

Daniel, who was born in England, joined the N.B.C. in Washington. He was credited with introducing the President to the radio audiences of the nation. He was a Canadian station. This was successful and, for this programme, associated with the National Broadcasting Company will be linked with CKY, Winnipeg. In addition, two other Canadian stations, CKCW Toronto, and CFCF, Montreal, will join CKY for the programme of songs by Sir Harry.

Many More Swimmers at Crystal Garden



THE nation-wide popularity of swimming is reflected in the increased attendance figures shown by the Crystal Garden. Each month this Summer greater numbers have availed themselves of the swimming facilities at the Crystal Garden, the increase being made up almost equally of visitors and residents of Victoria. The issuing of season tickets has proved a popular means of increasing the number of local swimmers. The spacious pool is shown in the photograph here reproduced.

Music and Stage

Comment on Current Events

By BEATRIX F. CAMERON.

To speak of Hungarian music is to think at once of gipsy music, as the two have always been so closely associated in the minds of people generally. And yet, according to Rose-von Ramsay, who is the foremost composer of Hungary, the music of the last century took its origin to many other sources.

That is, the Asiatic nomadic negro is able to take an ordinary tune and so propounce it that it takes on a new character, so the gipsies have identified themselves with certain melodies of not only Hungary, but of Spain as well.

Hungary owes a great deal to the gipsies, however, because they have wandered all over the world and have taken the music of Hungary with them. Not only Liszt, but also Haydn, Schubert, Brahms and other composers were influenced by these wandering tribes.

Hungary has produced many great men who have been well known in various phases of music, literature and art, among them being Rudolph Joseffy, Joachim, Remenyi, Auer, Flesch, Nikisch, Hans Richter, Fritz Reiner, and among the moderns Bela Bartok and Kodaly have rendered a real service to their country by taking phonograph records of great numbers of folk songs, which have been carefully stored away in the National Museum at Budapest.

Fellow members of a St. Louis motion picture theatre orchestra and a movie audience which liked Gruen music, conspired to give a fourteen-year-old pianist his first chance. This youth was Jerome Grunn, who has made a name for himself. He was playing in the movie orchestra to earn money for lessons. The manager of the orchestra, who was a good musician himself, thought of a plan for helping the boy. Each night when the score to a new picture had to be read at sight, there would be a blank space with Grunn's name on it.

Grunn was told to fill in the space with his own choice of soul, and each night the boy played as he would to great audiences in New York or Europe. The audience began paying more attention to him than to the picture, and the applause would often last for several minutes. This experience still gives the pianist a well-remembered thrill.

Probable revivals and novelties for the Metropolitan Opera Company's next season are rumoured to be Verdi's "Luisa Miller," Puccini's "Girl of the Golden West," and a first showing of Montemezzi's "La Naya." Mme. Jeritza, who will most likely be "The Girl," has been presented with a complete company for the part, the gift of a Californian.

According to The Literary Digest there have been a great many criticisms from members of the theatrical profession because actors were omitted from the ceremonies incident to the laying of the corner stone of the new Shakespeare Theatre at Stratford-on-Avon. "Strat-ford-on-Avon," says The Stage, "is disposed to 'run' Shakespeare for the commercial benefit of the town. The quarter of a million of money, or more that has been collected from all parts of the country, and from the United States ought to be placed under national rather than local control.

The corner stone of the theatre was laid on July 2 with full Masonic rites, and never has the grand lodge paid such a tribute to a dramatist. Lord Amphill, in laying the stone, hoped the peg thus fixed would be a temple sacred to Shakespeare and a temple of concord between nations. There was a noticeable absence of actors at the ceremony, as it seemed to be the feeling generally that the stone should have been laid by such distinguished Shakespeareans as Sir Ben Greet, Sir Frank Benson, Matheson Lang and Lady Tree among many others who have acted in Shakespeare plays.

The early history of the Chauve-Souris, which translated into English means "a bat in a filter mouse" is very interesting. The Chauve-Souris was not at first an organized theatre, but a meeting place and an exclusive club to which artists came for relaxation. Having no audience, they did as they pleased, and did things which they could not do in public, but which satisfied some artistic instinct of their own.

"Every prominent artist or writer who visited Moscow was glad of an invitation to come to the Chauve-Souris and spend a jolly evening," says Nikita Balieff, the director. There was always some little joke perpetrated, such as having Arthur Nikisch conduct the Chauve-Souris orchestra, which consisted of about half a dozen antiquated brass instruments, and which Mr. Nikisch did after a ten minutes' practice.

When K. S. Wells came to take this club Balieff was asked to make a speech of welcome in English. The director had no knowledge of the English language, and only one publication—a printed price list. Balieff read this through, and thanks to his pronunciation, Mr. Wells had no idea of what had been read. Upon being asked what it was all about, an English-speaking Russian entered into the spirit of the occasion and told Mr. Wells that what he had listened to was a speech of welcome.

In time the Chauve-Souris became known all over Russia, and its fame having reached the ears of the Czar, Nicholas II, Balieff was commanded to give a performance in St. Petersburg at the Military Club at which the Czar was present. The Czar had expressed his desire to see the show just as it was ordinarily given, and he enjoyed it thoroughly, from beginning to end.

Balieff tells many amusing anecdotes about his experiences during the seven years he has been, as he says, "a wanderer." When Mr. Coolidge took him to pay a call on President Coolidge he was amused by Coolidge's remarks about his and Balieff's wives. When he finally came and Balieff was introduced, Mr. Coolidge simply nodded, grasped Balieff by the hand, and said, "Good-bye."

CHAIRMAN OF CONCERT: "W-what do you want?"
GEORGE CONSTANZA: "Telephone the station to say that a man named Schubert is been murdered in here."
—From The Passing Show, London.

Refused Service at Royal York Hotel

MR. EDWARD KARRS

The actor, who was refused service in the head waiters of Canadian Pacific hotels in Canada, Mr. Karrs, Hollywood representative of Paramount, was refused service at the Royal York Hotel in Toronto, because he was attired in dress in sandals, shorts and sweater.

JINX FOLLOWS SHIP CAPTAIN

Captain Ives Thomas, of French Liner, Paris, Forced Into Retirement After Thirty Years at Sea

THREE TIMES SHIP FIGURED IN NEWS

NEW YORK, Aug. 24.—A series of misfortunes, in which he was blameless, has forced Captain Ives Thomas, master of the French liner Paris, into retirement after a distinguished career of thirty years at sea, during which time he worked himself up to second in command and was the next in line for the commandership of the French Line fleet.

The misfortunes which overtook this navigator at the height of his career were three in number and began last year when the Paris, outward bound from New York, rammed and sunk the Norwegian freighter Bessegen which, while riding at another near the ship chanced off Liberty, had swung out into the fairway. Captain Thomas was exonerated of blame in connection with this accident, but ill luck followed him and early this Summer, when again outward bound from this port, a miscalculation on the part of the pilot in charge put the Paris on the mudflats of Bay Ridge without, however, any serious damage to the ship.

Again held blameless for the grounding, Captain Thomas thought that he had endured his full share of ill luck but his jinx still pursued him as only a few weeks after the grounding off Bay Ridge, the Paris while groping her way through a heavy fog in Plymouth, ran onto the rocks. Investigation revealed the Captain Thomas was not at fault as the radio direction-finding station, which he attempted to get up to get his bearings, was out of order. The jinxdoo, however, had done his worst and the French liner was reluctantly forced to satisfy the mercantile law of the sea and the superstitions of the traveling public by relieving him of his command and appointing him to an important shore position.

The first intimation that Captain Thomas had been retired from sea duty came with the announcement by Jean Tuller, assistant general representative of the French Line, that Captain Rene Pugnet, relief captain of the line, had been appointed master of the Paris. Pugnet is succeeded as relief captain by Captain Georges Brunse.

The old Scotch "commercial" was listening patiently to the shopkeeper's tale of woe. "I wouldn't worry," was his sympathetic advice to the aggrieved one. "Worry!" ejaculated the shopkeeper. "Why, man, what would worry you more than knowing that people were telling lies about you?" The knight of the road looked thoughtful for a moment, then with a sly smile replied, "I wouldn't worry about lies, but I said he gay annoyed it they told the truth."

Jones (to constable who is taking down description of missing wife)—"And-er-two very pronounced dimples."

Constable (with poised pencil)—"Chin or knees?"—Punch.

Furniture Is a Gauge Of Personal Character

Today the modern housewife chooses her furniture with care for she realizes that home furnishings are accepted indications of their owner's standing and good taste.

Furniture is often an accurate gauge of personal character. It speaks clearly and impressively to every caller in the home—leaving an indelible impression of the room.

The chamber is an intimate room that reflects more accurately than other parts of the home the taste of the owner. It should always be decorated with care and the furnishings should be in keeping.

If it is a daughter's chamber, let her select not only the design of the chamber but the colors and decoration as well. If her favorite color is the pale pink, tangerine or mulberry or rust, let her bedroom furniture be in any of these colors. Today furniture is finished to order and the colors of the rainbow are yours to select.

When a decorative motif has been selected for the furniture, the same design may be often carried through the room. The wallpaper design, the figures in the cretonne drapes and the rugs may be in harmony with the main theme in mind.

Often the furniture is finished in flat colors and a decorative design such as a spray of mulberry leaves is placed by means of decalcomania transfers. Often the house-wife can modernize her own furniture. The paint and varnish stores are always glad to give advice as to the application of lacquers and varnish. Many of them carry the transfers in stock.

Finding a lady reading "Twelfth Night," a facetious doctor asked, "Madam, Shakespeare wrote about Patience on a Monument, did he mean doctors' patients?"

"No," said the lady. "You will find them under the monuments, not on them."

BUREAUCRACY IS AFFLICTION IN MID-EUROPE

Abuses Numerous, Cost Heavy, Official Privileges Many and Vexatious—Progress Retarded

RUMANIA ACHIEVES SWEEPING CHANGE

VIENNA, Aug. 16.—One of the most notable reforms introduced by Premier Julius Maniu during the session of the Rumanian Parliament just ended was the reorganization of the Rumanian State Administration and a radical reduction in the number of state employees. To carry through his plan almost one M. Maniu a revolution, but it was worth it. In cutting off a few thousand heads of the hydra of bureaucracy he attacked a monster whose coils were not only suffocating Rumania but the whole of Middle Europe.

Bureaucracy has cost this part of the world more than war. This bold statement becomes a sober fact in the light of the situation in Rumania alone, where, on M. Maniu's advent to power, absorbed 68 per cent of the public revenues being expended in civil service salaries and every adult citizen requiring practically the support of one civil servant or soldier.

ABUSES ARE NUMEROUS

Bureaucracy alone is a heavy burden to bear, but bureaucracy multiplied and multiplied by corruption becomes a visitation. One of the first acts of the Maniu Administration was to dispose of state automobiles used and misused by former ministers and their friends. An investigation of hospital conditions disclosed a sick ward of beds even for urgent cases, while in medical depots 100,000 thermometers and a greater number of hypodermic needles, ordered from Germany at double the usual price, were discovered.

But the evils of bureaucracy are not limited to Rumania. Salary payments for innumerable swarms of officials burden the budgets of Middle Europe to such an extent that useful public works and other productive expenditures must be financed by foreign loans or be postponed indefinitely. Bureaucracy not only impoverishes production by its direct salary demands but hinders it by the multitude of acts, regulations and requirements which it spins like a spider's web across every field.

It took a Hungarian business man two years to obtain the approval of competent public authorities for opening a new stone quarry. A proprietor of open air musical concerts in Vienna had to obtain the consent of twenty-one different officials, for his revolutionary proposal.

The Austrian and German bureaucracies of pre-war days had their merits, but they have left a legacy of distrust and fear. The State in this part of the world is always over the citizen, always round him. It is regarded by him as a strange, hostile power to be evaded, which is merely a natural act of self-defence.

The State is represented in the popular mind by a drafting committee and a tax collector, or at best by a court. The activities of this Moloch are met with stubborn hostility and distrust. Policemen and gendarmes are not soldiers of society engaged in a struggle against crime, but mercenaries of a foreign power.

EMPLOYEES UNDERPAID

The State's servants, on the other hand, receive small salaries but enjoy a preferred position in society and before the late Metternich, who was the father of Austro-German bureaucracy, was the first to sound the alarm on Bavaria at the expense of the rights of ordinary citizens. The State servant is still protected by antiquated laws concerning "Amtsehrdidigung," which literally means that if you offend him while he is "in the service," you will be sentenced by any court in this part of the world without receiving even an opportunity to defend yourself.

Let a policeman, for Rumania, declare on his oath as a public officer that his dignity has been offended and his statement will be taken in preference to seven evidence by a dozen lay witnesses. And not only are ministers and policemen accredited, but also telephone girls, street car conductors, railroad officials, the smallest clerk in public bureaus, yes, even the doorkeeper when he is gathering his wages. To call that official "lethlinger" instead of "Wagenschieber," although the English translation of both words is the same, is punishable as an offence.

A judge in a Budapest court said to a defendant recently:

"State employees are taboo, for you, for me and for everybody. While they are in service."

Then he sentenced the man to some weeks in prison for shouting at a railway official to open the gate of a platform.

Efficient bureaucracy may be a necessary evil in Middle European countries these two words are contradictory terms. The telegraph service is a State function in Austria. Despite this, or perhaps because of it, there is no night delivery of telegrams in Vienna except in one quarter, and for this whole quarter only two messengers are employed, which means that telegrams even there stand a poor chance of arriving the day they are sent.

EVEN NOTICES ARE REFUSED

Newspaper organizations willing to send their own messengers, and asking only that they be notified of the receipt of telegrams so that they may send for them, find even this service denied them. As a result they frequently have to pay for the transmission of news a day old, which means that it is no longer news. This, because the telegraph service belongs to the State, they must pay, and because the telegraph officials are State employees, they must not tell them what they think of this "nothing for something" policy. They must pay "and like it."

The reason why Austria's telegraph service, like some other of its public activities, has become a byword for inefficiency is the fact that when the Austrian civil service was reorganized after the war, the reductions were all made at the bottom. All high-salaried officials were kept, while messenger boys, post-office clerks, railway conductors, telephone operators, museum attendants, court stenographers—in short, that class of public servants who directly serve the public—were decimated. Hence the telegram delivery scandals and the long queues which must form before the registered letter wickets of the post-offices. Since curators and clerks of art museums would not light fires and there was no one else to do it, pictures were damaged by frost. And yet the Ministries are still crowded with expensive figureheads, holding impotent like to their sinecures, and their number even grows.

The Austrian province of Vorarlberg, with 130,000 inhabitants, which in pre-war times was governed by a few administrative officials, now has a Parliament of thirty members, a Government with twelve highly paid functionaries, a Governor, Lieutenant-Governor and all the other attributes of a Federal State.

SIMILAR CONDITIONS

The situation is not peculiar to Austria, however. Hungary maintains a gorgeous mediaeval bodyguard for its Governor, corsets fairy-like Summer resorts at State expense, builds apartment houses for its high State officials, buys palaces for its legislators and judges and pays its judges starvation salaries.

Dictators like General Zivkovitch and reformers like Premier Maniu make brave attempts to rid the Ship of State of bureaucratic barnacles. But for every canceled public office two others appear.

Dictators may come and go, but the dictatorship of bureaucracy is perpetual. Even Government changes mean nothing where whole Ministries have become properly political parties. In the Austrian Ministry of Justice the employees are Pan-Germans, in the Ministry of Public Instruction all are Christian Socialists. In Rumania the whole bureaucracy is Liberal, and is now preparing to oppose its passive resistance to Premier Maniu's scheme of decentralization and reform.

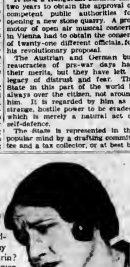
That is Middle European bureaucracy. Tell an inhabitant of this part of the world that there are countries where the State belongs to and defends its citizens instead of owning and oppressing them, and where State employees are employees of everybody, and he will smile indulgently as one who hearkens to a fairy tale. Assure him that a citizen of such a country, believing himself to be overtaxed, might call a tax collector a robber and risk nothing worse than a reprimand, and he will say, as his ancestors would have, you should as tax his grandfather. We know better, for he is an inhabitant of a country one of whose citizens, when he observed an unhonored acquaintance struggling with a Government cigarette machine which refused either to produce cigarettes or return his money, counseled: "Whatever you do, don't curse it, or you will commit 'Amtsehrendeleidigung.'"

"Father" said a young man, "I have decided not to enter the business, but to go in for an artistic career. I shall study in Paris, Rome, and other great capitals. You don't object, I suppose, to my becoming an artist?" "Object? No, no!" the father replied. "Why, my boy, I'm delighted to have an artist, provided, of course, that you don't draw on me!"

Mother—"Willie, I told you to wash your neck real clean."

Willie—"Well, mother, ain't I going to wear a collar?"

HEAD ACHES



NEVER wait to see if a headache will "wear off." Why suffer when you can take Aspirin? The millions of men and women who use it in increasing quantities every year prove that it does relieve such pain. The medical profession pronounces it without effect on the heart, so use it as often as it can spare you the least pain. Aspirin promptly relieves headaches, colds, neuralgia, neuritis, lumbago, etc. Women find these tablets a great comfort in cases of regular, systemic suffering. Familiarize yourself with the proven directions in every package.

September Will Bring Autumn Planting Time

It is unpleasant to think about, but the beginning of Fall is almost here, and with it the commencement of the year's busiest planting time in the garden. If you intend to plant any Perennial, Shrub, Tree, Rose, Rock Plant or Alpine, the Fall is the ideal time to do it, and will produce far better results than Spring planting. This Fall we shall offer a greatly enlarged stock of all these things with many additions which will delight you. Ask for our catalogue now or visit our nurseries.

NO. 221—SEVENTY-FIRST YEAR VICTORIA, BRITISH COLUMBIA, SUNDAY, AUGUST 25, 1929

EDDIE HELD CAPTURES DOMINION GOLF CROWN

Lowe Horth Leads Field in Vancouver Island Trapshoot Singles Event

Sidney Marksman Has One Point Margin in Championship Meet

Leads Max Lohbrunner, of Victoria, in First Half of Wilkerson Cup Match—Bert Hoy Captures Island Doubles

Lowe Horth, holder of the Colonial trapshoot Cup, and one of the best marksmen throughout the Pacific northwest, got away to a good start in the opening round of the Vancouver Island trapshoot championship, held yesterday at the Colwood clay trap. Horth, who hails from Sidney, B.C., led the field at the end of the day in the first half of a single championship for the silver cup donated by the late W. H. Wilkerson, by breaking ninety-six sky birds out of a possible hundred.

Sidney's lone representative was ably followed by Max Lohbrunner, of Victoria, who brought down ninety-five of the 100 clays that were tossed in the air. Only one set separated Lohbrunner and Horth in the 150 that were shot by a young lad at the lever, and again Sidney's crack shot was high man using B. Baker, an invader from Seattle, had his shooting eye with him and brought down 144 birds, while Harry Bush, of Vancouver, and Cup McGarr, of Victoria, were tied for third position with scores of 139.

HOY WINS HONORS

Bert Hoy, of Vancouver, shot remarkably well and romped off with a silverware and medal, and also a Vancouver Island doubles championship, when he finished a good old by breaking twenty-one pairs of the possible twenty-four. Dr. Hopkinson was runner-up for the honors by checking in with eighteen birds to his credit. Hoy was sending his run with uncanny accuracy and was given a great handicap by the spectators when he handed his card. He his showing the singlander is expected to be heard on in future meets not only on the Island but all over the Northwest.

High professional honors went to J. O. Reibiger, of Seattle, who scored a total of 144 out of 150. H. Wood, representative of the Eastern Cartridge Company of Vancouver, was a close second, and C. Snell, representative of the Dominion Cartridge Company of Canada, was third.

With a large number of visitors coming from Vancouver and Port Angeles, the second leg of the singles championship will get under way this morning at 9 o'clock, and another great day of trapshooting will undoubtedly take place.

D. V. McGary, president of the Victoria Gun Club, under whose auspices the tournament is being carried out, and J. P. Sylvester, the genial secretary, were complimented by the many visitors on the able manner the shoot was managed, and the club extended thanks to W. R. Wood and C. K. Snell for the capable assistance they gave during the day.

SOME RESULTS

Scores registered yesterday are as follows: A. E. Hasenfratz, Victoria, 72; D. V. McGary, Victoria, 39; L. Horth, Sidney, 36; M. Hahlbrunner, Victoria, 34; Dr. Templeton, Seattle, 36; D. W. Harris, Seattle, 31; J. H. Hasenfratz, Victoria, 27; A. R. Hoy, Vancouver, 42; A. Ruckle, Beaver Point, 40.

C. W. MacLean, of Vancouver, British Columbia singles champion, is expected to make his appearance at the trap today and Harry Crabbe, from the same city, British Columbia doubles champion, will also be there. The appearance of these two crack shots will add great interest to today's programme and some wonderful scores are expected to be chalked up.

Lowe Horth, who won the handicap and all-round championship in the province on the Mainland on July 1, will be presented with the silverware.

TODAY'S PROGRAMME

Some special events on today's programme follow:

Handicap event—Seventeen to twenty-five yards, fifty targets, with entrance of $5. Prize, Hudson Bay blanket valued at $20.

Mixed-and-shot event—Entrance $1. Prize, silver cup donated by Holey's Restaurant.

Gun down event—Entrance $2. Twenty-five targets. Prize donated by McLennan, McFeely & Price Limited.

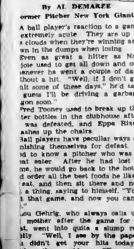
Special events for visitors only—Twenty-five targets, entrance $5. Prize, one package (half dozen) of Imported Headaches.

Professional special—Twenty-five targets, entry $5. Prize, Hudson Bay blanket.

Team shoot—Entrance $3. Twenty-five targets. Prize, one silver cup, donated by Hawkins & Hayward, Electrician. Cup to become permanent property of team winner once.

High average V. I. gun will be awarded silver cup or blanket.

Starves Himself After Playing Poor Game



By AL DEMAREE
(Former Pitcher New York Giants)

A ball player's reaction to a game is extremely acute. They are up in a cloud when they're winning and on in the dumps when losing. Even as great a hitter as Napoleon used to get all gloomy and out of sorts if he lost a couple of days about a hit. "Well, if I don't get hit some of these days I'd'd wager I'll be driving a garbage wagon soon."

Fred Toomey used to break up the beer bottles in the clubhouse after was defeated, and Eppa Rixey ashes up the chairs.

Ball players have peculiar ways of chatting themselves for battle. Ruth used to know a pitcher who was a bad sniper. After he had had one, he would go back to the hotel in order all the best foods he liked eat, and then sit there and not a thing, saying to himself, "You a bad game, and now you catch

Lou Gehrig, who always calls up mother after the game for a chat, went into quite a slump recently. "Well, I see by the paper I didn't get your bills today." It's mother would say. "You can't tonight."

Then one day Lou snapped out of slump with a double that won game. "I'm eating a big meal tonight, mother," he said over the

KARL EITEL WINS BLUE-RIBBON EVENT AT HAWTHORNE

CHICAGO, Aug. 24.—Karl Eitel, of Alderman John J. Bakhouse's Coughlin's big thoroughbred ran true to the form that carried him to victory in the Fairmount Derby in May, and today won the $16,000 Fort Dearborn handicap, blue ribbon event of the closing day of the Hawthorne track meeting. The sleek son of Polymelian-Pinkie not only won the feature but made a show of a field which included Montanan, which was second three lengths back, and Easter Stockings, which finished a length behind Montanan. The race was worth $12,000 gross, of which $8475 went to Carl Eitel's owner. He was the favorite and rewarded his backers with $5.04 to win, $4.08 to place and $3.24 to show. Montanan was worth $2.70 to place and $1.50 to show while Easter Stockings show price was $2.34.

Victoria Goes Under 10-2 in Lacrosse Tilt

VANCOUVER, B.C., Aug. 24.—Richmond gained an eight-goal lead in the series for the senior "B" lacrosse championship of British Columbia today when they defeated Oaklands of Victoria 10 to 2. The second game will be played at Victoria next week. The game was fast and clean, although scoring was somewhat one-sided. Richmond scored within half a minute of the first face-off. Chapman scored Victoria's first and made the score 3 to 1 after Richmond's first offensives had subsided. Darl Bissell went from his own goal to make the score 3 to 3 when Victoria scored the tenth tally. But the Islanders were stopped there.

Well-Known Ball Player to Leave Bachelor Ranks

FALCONER Campbell, popular second baseman of the Sons of Canada, has played his last game of ball as a bachelor. Tomorrow night "Kenny" as he is known to ball fans and players alike, will join the ranks of the married men when he marries Miss Margaret Campbell, 638 Broughton Street. The ceremony will be performed in the Harmony Hall, Port Street. Colin Campbell, left fielder of the Sons of Canada, and a brother, will be the best man. Following the reception the bride and groom will leave for San Francisco for their honeymoon.

SONS OF CANADA TO BATTLE THE JOKERS TUESDAY

Ball Teams Will Clash in Final Game of City Play-Offs—Noble and Stickney to Heave

WINNERS TO MEET NEW WESTMINSTER

WITH a victory for either club meaning the championship of the Victoria Senior Amateur Baseball League and the right to take on New Westminster in the British Columbia play-offs, the Sons of Canada and the Jokers, champions of Senior and Commercial Leagues respectively in 1928, will clash at the Royal Athletic Park on Tuesday at 6 o'clock in the final game of the city play-off series.

Jack Noble, who let the Jokers down with six scattered bingles on Friday, will go to the mound again on Tuesday in this crucial struggle. West Ritchey, star southpaw, will do the heavy work for the Jokers.

The present play-off series is breaking all attendance records and with the championship at stake in Tuesday night's game it is expected that all previous records for paid admission will go by the board.

Is Favored to Capture Island Net Title

HOPE LEEMING

Leading local tennis player, who will meet Ken Fraser for the title in the final of the junior singles at Queens today. The local flash is favored to win the title.

O. C. CRICKET

LONDON, Aug. 24.—Friday cricket. Warwick won a first innings victory against Worcestershire at Edgbaston. Warwick amassed 453 runs, of which Wolf got 132 and Elmer sixty-seven today. Worcestershire scored 275 runs, and Northamptonshire secured the points for a first innings lead from Somerset at Northampton. They scored 306 and 128 and Somerset got 317 and seventy-four for five.

Other scores

Sussex 262 and 237 for six wickets declared. Leicestershire 230 and 87 for six. Wales 340 and 225. M.C.C. 301 and 268 for eight wickets. Match left drawn.

"Poker Face" Wins Again

MISS Helen Wills, who yesterday defeated Mrs. Phoebe Watson, of England, in the finals for the Pacific Northwest women's tennis championship, before a crowd of 6,000 lovers of the game, 6-4, 6-2, at Forest Hills. By her victory little "Poker Face" chalks up her sixth National championship title. At present she is the holder of practically all the major titles there are to hold and is expected to keep on winning them until she is unable to wield a racquet.

Ester Clark Comes Home in Sixth and Pays Off Big Price

Returns $72.90 for Two-Dollar Pasteboard—Highest Returns on Local Tracks This Season—Favorites Off on Get-Away Day

Featured by three things: a good crowd; brisk betting, and last, but by no means least, the $72.90 straight paid by Ester Clark, the belle on local tracks this season, when she won the sixth race, getaway day at the Willows yesterday afternoon. Together with the punters carrying many fond memories of seven days of good racing. The wise ones who picked the little sixyear-old mare from the Point Grey Stable to surprise in the sixth, will remember her efforts for many a day, while the other punters, the ones that were always going to bet her, but for some unknown reason left her alone, are probably still talking about what they should have done. However, the fact remains that they did not do it, and that's that.

In addition to Ester Clark's price of $72.90 straight, $32.60 place and $12.70 show, other double figure returns were paid. These included: $17.50 by Carlisle, when he won the third race; $14.80 by Little Cop for a two-dollar straight price in the second event, and $11.80 by Sylvanian, when he came home in front in the fourth.

It was a get-away day right enough, and a case of the favorites failing to get in front in any of the seven races.

MOVE TO BRIGHOUSE

Following the last race a number of the thoroughbreds were being prepared for shipment to Brighouse Park where the final meet on Mainland tracks opens tomorrow. The majority of the ponies will return to Colwood, where the last racing meeting in British Columbia for the 1929 season will be held from September 7 to September 14.

Willow Branskin, with Owens up, went to the front just as soon as the barrier was sprung and made every pole a winner. Shorebird chased the winner all of the route Tatters outgamed Mary Dear for the show position. Williamette, the favorite, was at the end of the procession passing the judges' stand.

Little Cop, hugging the rail all of the way, outlasted Parlon and won the second easily. The winner went to the front early and stayed there and won by two lengths. Sinbeys came fast in the home stretch to finish third in the clear. Starwhim, hustled all of the way, could not catch the winner. North Shore followed the place home to the judges' stand.

SYLVANIAN SURPRISES

Sylvanian, from Leo Bancroft's stable, with Blake up, took the major share of the pot in the fourth race when he came home to the judges' stand two and a half lengths in front of Contribution, the favorite. Trailing the field in the early running the winner closed fast and won going away. Contribution held off the challenge of Uzan. The Jury came fast going home and finished third.

Closing fast on his field after running three quarters, Ginger Pyle won the fifth event easily up Hero-oakelan ran second throughout. War Sabian moved up going home and finished in the show slot. Flashy showed good early speed, but tired Coeur de Lion out in front to the twelfth-pole post, slowed up when one of his bandages came loose.

Running behind the leaders in the early going, Ester Clark came to the front entering the stretch and lasted long enough to hold off the fast-closing Normile by a nose. Hodge Podge, sixth at the three-quarter, moved up fast and finished third.

Coming through on the back of the stretch, Yeanie Sue displaced Spearshod, the previous leader, and won the last event by a length. The latter held on well when outran Frank Gallor, the favorite, closed fast and took the show money.

Results follow

First race—Claiming purse, $300. Six-three-year-olds and up, about five furlongs.

Little Cop—Rodriguez—$14.80 $7.70 $4.40
Pasquill—Trasfield— 4.20 2.40
Sunday Shearwater—
Time, 1:1.5. Also ran: Frank B., Bada Bing, Ashbourne, Pine.

Third race—Claiming purse, $300. Six-three-year-olds and up, six and a half furlongs.

Carlisle—Trasfield—$17.50 $7.50 $4.00
Brighton—Drakiewicz— 4.00 3.00
Sally Brown—Richard—
Time, 1:19.4. Also ran: The Pick, Mimosa, Bubble Girl, Juno, M. Amaro.

Fourth race—Claiming purse, $300. Six-three-year-olds and up, six and a half furlongs.

Sylvanian—Blake— $11.30 $4.80 $2.50
Contribution—Rodriguez— 3.60 2.40
Irish Jury—Dufford— 2.50
Time, 1:20.2-5. Also ran: Uzan, Vision, Ruby Ann, Ruby Ann, Ruby Ann.

Fifth race—Claiming purse, $400. Five furlongs.

Ginger Pyle—Dufford—$7.20 $3.40 $2.40
Hero Pole (Owens)— 17.10 3.40

Time, 1:48.2-5. Also ran: Starwhim, Tatters, Sinbeys, Sinbeys, Mary Dear, Tatters.

Seventh race—Claiming purse, $400. Six-three-year-olds and up, mile and seventy yards.

Yeanie Sue (Trasfield)—$6.60 $3.60 $2.20
Gallor (Dufford)— 3.60 2.20
Bailey (Owens)— 2.20
Time, 1:48. Also ran: Chimeneda, Mega, Cut, Gaiety.

Charles F. Todd Presents Award For Best Gross

THIS morning at 8 o'clock the first pair will tee away from the first tee in the qualifying round of the city golf championship. With an entry list of eight-four golfers from the various clubs throughout the city the links will be crowded all day. Captain J. Y. Perks, secretary of the club, announced yesterday that in addition to the prizes to be awarded there would be a special one for the best gross score, donated by Mr. Charles F. Todd, president of Victoria Golf Club.

KERMODE WINS CADDIES' GOLF CHAMPIONSHIP

Youngster Turns in Gross of 90, Handicap 15, and Net of 75, to Capture Colwood Honors

WALTER SPAYEN IS RUNNER-UP

D. Kermode, young bag toter at the Colwood Golf and Country Club, started off on his golfing career in an earnest and unostentatious manner when he carried the bag of trusty clubs to the club yesterday and then proceeded to capture the caddies' championship for the ensuing year by traveling the lengthy layout in 90, his 15 handicap reducing it to a net total of 75. By capturing the title the youngster will proudly keep in his possession the coveted Colwood championship cup, emblematic of the honors.

The performance of Walter Spayen, runner-up, was equally as good as the champion's as this twenty-year-old was playing against great odds, as he was one of the four scratch lads on the list. Spayen checked in with a fine 85 to score second place from a field of thirty-five caddies. D. Dermen, with a gross score of 93, handicap 7, was third with an 86, while G. Ash, with 102, 15—87, was third. Other scratch scores follow: O. Goy, 92; S. Hemlon, 90; R. Cunningham, 108.

Spayen was presented with a cup for turning in the best gross score of the day.

Alex Marling, popular professional at the club, got the boys on their way and looked after them for the remainder of the day.

Scores follow:

	Gross	H'cap	Net
W. Spayen	85	10	75
D. Kermode	90	15	75
D. Dermen	93	7	86
G. Ash	102	15	87
A. Brotherton	102	15	87
O. Goy	92	Scr.	92
S. Hemlon	120	30	90
B. Cock	105	8	98
R. Hemlon	98	8	90
J. Howard	102	5	89
R. Cunningham	108	8	100
J. Hoy	102	5	97
D. Todd	108	8	100
J. Kelly	113	15	98
A. Jones	114	15	104
J. Cunningham	111	6	105
R. Cummings	108	Scr.	108
R. Keefe	120	24	96

Victoria West To Journey to Nanaimo Today

Victoria West, Westholme League softball champions and winners of the city championship, will journey to Nanaimo this morning to engage in an exhibition game with Shell Oil Company. The game is scheduled to commence at 1 o'clock, and Laurie Wooster, vice-president of the Westholme League, will act as umpire.

Further exhibition games will be accepted by the Vics within a reasonable traveling distance as they wish to call the practices they possibly can before the provincial playoffs start. The games can be arranged by communicating with Mr. Wooster, of the Ladies' Sample Shoe Store, Yates Street.

DEFEATS GARDINER WHITE 3 AND 2 IN THRILLING FINAL

Slim New Yorker Is First American to Carry Canadian Golf Championship Across the Border Since Inception of Meet—Showed Brilliant Form

Champion Three Up at the Turn: Veteran Opponent Shows Stamina

JASPER, Alta., Aug. 24.—Slim, young Eddie Held, of New York City, is amateur golf champion of Canada, the first American to capture it, winning today over the Jasper Park Lodge golf course by defeating Gardiner White, a fellow resident here for several weeks and had stubbed every foot of the ground.

Held's final score of three and two was the same which he finished the morning round of eighteen holes. Twice during the afternoon he increased it only to have White whittle it down again. He won the twenty-third but lost the twenty-fifth. He went five up by taking the twenty-eighth and thirtieth, only to lose the thirty-second and thirty-third. They were all even on the afternoon round.

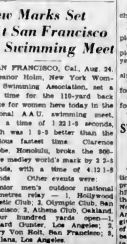
Held's final score of three and two was the same which he finished the morning round of eighteen holes. Twice during the afternoon he increased it only to have White whittle it down again. He won the twenty-third but lost the twenty-fifth. He went five up by taking the twenty-eighth and thirtieth, only to lose the thirty-second and thirty-third. They were all even on the afternoon round.

Held eliminated one of them, Frank Thompson, as well as Monty Hill, of Vancouver, Freddy Wood, of the same city, and today. White.

The New Yorker, a golf stylist of the first order, overcame a valuable familiarity with the course when he defeated White, who has been a resident here for several weeks and had stubbed every foot of the ground.

Held's final score of three and two was the same which he finished the morning round of eighteen holes. Twice during the afternoon he increased it only to have White whittle it down again. He won the twenty-third but lost the twenty-fifth. He went five up by taking the twenty-eighth and thirtieth, only to lose the thirty-second and thirty-third. They were all even on the afternoon round.

Finished Second in Wrigley Marathon



ETHEL HERTLE

Of the Bronx Park Club, New York's winner of the Wrigley ten-mile swim for women, finished second in the Wrigley Marathon, Martha Norelius, star of the American contingent.

New Marks Set At San Francisco Swimming Meet

SAN FRANCISCO, Cal., Aug. 24.—Eleanor Holm, New York Women's Swimming Association, set a new time for the 110-yard backstroke for women here today in the National A.A.U. swimming meet, with a time of 1:22.1-5 seconds, which was 1 2-5 better than the previous fastest time. Clarenore Crabbe, Honolulu, broke the 900-metre medley world's mark by 2 2-5 seconds with a time of 12:1-5 seconds. Other events were:

Senior men's outdoor national championship—Jack Medica, Olympic Athletic Club; 2, Olympic Club, San Francisco; 3, Alameda Club, Oakland. Four Hundred yards open—1, Richard Cleaver, Los Angeles; 2, Henry Von Kolb, San Francisco; 3, C. Kiana, Los Angeles.

One hundred and ten yards back stroke, women's—1, Eleanor Holm; 2, Joan McGlashey, Whitesentile, Mass.; 3, Lina Lindstrom, New York. Three hundred metre—1, Clarence Crabbe; 2, Walter Spence, Pennsylvania; 3, Austin Clapp, Hollywood.

PEDAL PUSHERS HAVE PLENTY IN STORE FOR THEM

Moody Cup and British Columbia Championships Scheduled for Labor Day on Local Tracks

STAN JACKSON IS HOLDER OF TROPHY

Pedal pushers from Vancouver and Victoria will have plenty of calling in store for them on Labor Day. First, there is the fifth annual Moody Cup race, from Beacon Hill and secondly, is the British Columbia championship under the auspices of the Victoria Cycling Club, at the Royal Athletic Park.

The coveted Moody Cup race will draw a large contingent of riders from the Mainland besides the big local entry. The trophy was donated five years ago by Dr. T. Glendion Moody, famous old-time rider, and is at present held by Stan Jackson, a former teammate of Bill Dyke, who is now a honored rider in the fleet, and winner of the event in 1926.

Fifteen laps around Beacon Hill, which each lap a mile in the distance that is in store for the large group of bicycle racers.

Entries for the British Columbia championships are registered to be sent into G. W. Robinson, secretary of the Victoria Cycling Club, by Saturday, August 31. All competitors over the age of sixteen must have amateur cards and also are requested to have their parent's or guardian's signature to their entry forms.

List of events follow:

Quarter mile British Columbia championship.

One mile novice.

Two-mile British Columbia championship.

Half-mile British Columbia championship (junior, under seventeen years).

One mile handicap, boys under sixteen years.

Half-mile handicap, boys under fourteen years.

Quarter-mile open, boys under fourteen years.

One mile handicap.

SWIMMER WHO FAILED TO FINISH WILL GET $10,000 CONSOLATION

TORONTO, Aug. 24.—A consolation prize equal to that of the first place in the Canadian National Exhibition Wrigley marathon was yesterday by Martha Norelius of New York, to be given Anna Benott, who was forced to give in after covering eight miles of the ten-mile course, by her backer, Miss Grace Lyons, according to The Daily Star today.

The Star quotes Miss Lyons in making the announcement of the $10,000 prize, as saying:

"Anna trained hard and religiously and I thought the least I could do was to reward her for her pluck."

HELEN WILLS WINS NINTH TITLE AT FOREST HILLS

Local Tennis Stars Fight Way to Finals in Vancouver Island Championships

Bud Hocking Springs Upset by Defeating Nordstrom, Seattle

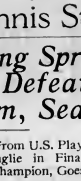
Wins in Straight Sets From U.S. Player—Will Battle "Windie" Langlie in Final—Marsh Gordon, Defending Champion, Goes Under

DUNCAN, Aug. 24.—Tomorrow's finals in the men's singles to decide the Vancouver Island lawn tennis championship will be an international affair, in which Bud Hocking, of Victoria, will face "Windie" Langlie, of Seattle. Langlie eliminated Marsh Gordon, who held the title last year, in an excellent three-set match in which the Vancouver boy appeared to hold a safe lead, but the Seattlite came from behind to win the odd set. In the other semi-final, Hocking supplied the great upset of the tournament by downing Lloyd Nordstrom, of Seattle, who was regarded as a certain finalist and probable winner, in straight sets. The American stages a great comeback in the second set when he was trailing 5-1. He needed but a single point to square the count at five-all, but faltered and lost chance at the title was gone.

The ladies' title event will be an Island vs. Mainland battle, when Miss Hope Leeming plays Miss Porter, of Vancouver. Miss McNab, also of Vancouver, extended her overawesome in her fight to enter the finals, but Miss Leeming has found the going easy in the tournament thus far.

The best tennis ever seen on the Duncan courts was undoubtedly the men's doubles semi-finals, in which Hocking and Cunningham paired perfectly to turn back Langlie and Nordstrom, of Seattle. The score was 6-4, 6-2, but the play was much more even than the figures would indicate, and kept a gallery of 400 spectators enthused throughout.

The finals in the ladies' doubles will be between Miss Kier and Miss Jones, of the local club, and Mrs. and Miss M. Leeming. Miss Kier and Miss Jones provided an upset when they eliminated Miss H. Leeming and Miss Dawson-Thomas.



"BUD" HOCKING

Local tennis ace, who defeated Lloyd Nordstrom, Seattle, in the semi-finals of the men's singles of the Vancouver Island championship at Duncan yesterday. Due to his victory, Hocking is given an even chance to win the title he lost last year to Marsh Gordon.

MEN'S SINGLES

Windie Langlie, Seattle, defeated Cunningham, Nanaimo, 6-3, 6-2. Lloyd Nordstrom, Seattle, defeated W. E. Corfield, 6-3, 6-1.

Semi-finals — Hocking defeated Nordstrom, 6-3, 6-4. Langlie defeated D. M. Gordon, Victoria, 2-6, 6-4, 6-4.

LADIES' SINGLES

Mrs. Broome, Vancouver, defeated Miss Miller, Victoria, 6-2, 6-4. T-b Miss Hope Leeming, Victoria, defeated Miss Porter, Vancouver, 6-4, 3-6, 6-4. Miss Hope Leeming defeated Mrs. Broome, 6-1, 6-2.

Semi-finals—Miss Porter defeated Miss McNab, Vancouver, 6-4, 6-3. Miss Hope Leeming defeated Mrs. Broome, 6-1, 6-2.

MEN'S DOUBLES

Gordon and McCallum, Victoria, defeated Trench and Huntingdon, 6-2, 6-3. Corfield and Corfield defeated McLean and Bramall, 3-6, 6-4, 6-3. Langlie and Nordstrom, Seattle, defeated Williams and Lawman, 6-3, 3-6, 6-1.

Semi-finals — Cunningham and Hocking defeated Langlie and Nordstrom, 6-4, 6-2. Gordon and McCallum defeated Corfield and Corfield, 6-3, 6-2.

LADIES' DOUBLES

Miss McNab and Miss Porter, Vancouver, defeated Mrs and Miss Sharpe, Vancouver, 6-0, 6-0. Mrs. and Miss M. Leeming, Victoria, defeated Miss Bond and Miss Geoghegan, 6-3, 6-1. Miss Kier and Miss Jones defeated Miss H. Leeming and Miss Dawson-Thomas, 3-6, 7-5. Miss Hope Leeming, Victoria, defeated Miss Robertson and Mrs. Lauder, 4-6, 9-7, 6-2.

Semi-finals—Mrs. and Miss M. Leeming defeated Miss McNab and Miss Porter, 6-3, 6-8. Miss Kier and Miss Jones defeated Miss Miller and Miss Ritchie, 6-4, 6-4.

MIXED DOUBLES

Hocking and Miss M. Leeming, Victoria, defeated Lawman and Miss Taylour, Vancouver, 6-2, 6-3. Cunningham and Miss Kier defeated Bramall and Mrs. Broome, Vancouver, 7-5, 6-3. McCallum and Miss H. Leeming defeated Mrs. E. Corfield and Miss Miller, 8-2, 8-3.

Atlanta Wizard Makes Showing At Los Angeles

LOS ANGELES, Aug. 24.—"Bobby" Jones, national amateur champion, making his public appearance in the West as a golfer, paired with Charles Evans, of Chicago, to whip George Von Elm, of the Texas Cancer Club, Detroit, and Jack Neville, of Del Monte, Cal., by the decisive margin of six and five, in an eighteen-hole exhibition match today.

Finished Third In Swim

MRS. Evelyn Pehr Armstrong, Hollywood pro swimmer, who finished third in the Wrigley ten-mile marathon on Thursday, is pictured above with her daughter, Edith, who will be three years old next month.

"Babe" Esplen Is Hero as Gasmen Win From V.A.C.

VANCOUVER, B.C., Aug. 24.—"Babe" Esplen made a hero of himself when he stepped up to the plate in the tenth inning with the score 1 to 1, two men out and runners on first and third, and cracked out a clean single over third base to bring home a run and give the Generals a victory which carried with it the Senior City Amateur Baseball League title. Gasmen won the series three games to one against the V.A.C. They must now play South Hill, winners of the Twilight League, to decide who will meet the winners of the New Westminster-Victoria play-offs for the British Columbia title.

Defeats Mrs. Watson English Net Star in Hard-Fought Battle

Californian Ace Wins in Two Straight Sets—Mrs. Watson and Mrs. Michell Capture Ladies Doubles Honors

FOREST HILLS, N.Y., Aug. 24.—In the hardest final round battle she has had since the English star, Kitty McKane, forced her to an extra set in 1925, Helen Wills won the Women's National tennis championship for the sixth time before a gallery of 8,000 at the Westside Stadium this afternoon.

Once again the stubborn challenge came from the hard-driving racquet of an English player, and it was only after forty minutes of hotly fought and thrilling tennis that the queen of the court overcame the gallant Mrs. Phoebe Watson, of England's Wightman Cup team, by scores of 8-4, 6-2.

With this final victory went unopposed singles supremacy over the feminine players of the world for the third time, in as many years as the Berkeley, Calif., tennis marvel previously this season has won the open championships of England and France.

ENGLISH PAIR WINS

Mrs. Watson's sterling tennis and sportsmanship endeared her forward in the all-English final for the National Women's doubles championships as she and Mrs. Peggy Saunders Mitchell, the British title holders, came from behind to beat out their compatriots, Mrs. Phoebe Covell and Mrs. Dorothy Shepherd-Barron by scores of 2-6, 6-1, 6-4. The match was well played and held the fans in their seats until the final shot.

Earlier, Mrs. Watson and Mrs. Michell had won their way into the final by defeating the Anglo-American combination of Betty Nuthall and Helen Jacobs by scores of 6-11, 6-2, 6-4. Although partial partner to her third hard match a day, Mrs. Watson was a dominating factor in the doubles too, her well-aimed drives causing a much needed and outright cheer. Her every winning shot was hailed with prolonged acclaim, while those at Mrs. Wills were met with polite hands and vociferous cheers. Her defeat at the foreign player against the American Championship, frankly did not overjoy the crowd, which is the foreign player against the American Idolmolder.

Yanks Whitewashed For Third Straight Time by St. Louis

Al Crowder Lets Champions Down With But Two Hits—A's Break Losing Streak—Giants Take Twin Bill From Pirates

AMERICAN LEAGUE

ST. LOUIS, Aug. 24.—Crowder pitched a two-hit game against the Yankees in the third game of the series today to win by 4 to 0. The defeat was the third shutout in succession for the champions.

	R.	H.	E.
New York	0	2	0
St. Louis	4	8	0

Batteries—Sherid and Dickey, Crowder and Manion.

Break Losing Streak

CHICAGO, Aug. 24.—The Athletics broke their losing streak of four games by pounding "Red" Faber for thirteen hits and a 5 to 2 decision here today, while Rube Walberg held the White Sox to seven well scattered hits.

	R.	H.	E.
Philadelphia	5	13	0
Chicago	2	7	1

Batteries—Walberg, Cvengros and Cochrane, Gonzales; Faber and Berg.

Senators Win Again

DETROIT, Aug. 24.—The Washington Senators continued their winning streak at the expense of the Tigers, taking the third game of the series today 5-4.

	R.	H.	E.
Washington	5	14	3
Detroit	4	11	1

Batteries—Thomas, Marberry and Tate; Sorrell, Uhle and Shea.

Split Double-Header

CLEVELAND, Aug. 24.—Keep Holloway gave Cleveland an even break with the Boston Red Sox today by defeating the Sox 6-2 in the second game of a double-header after Morrison had subdued the tribe in the opener 5-3.

First game—	R.	H.	E.
Boston	3	8	1
Cleveland	5	14	0

Batteries — Morris and Heving, Miller, Mitjus, Shoffner and Myatt.

Second game—	R.	H.	E.
Boston	2	10	0
Cleveland	6	12	1

Batteries—Gaston and Berry; Holloway and L. Sewell.

NATIONAL LEAGUE

NEW YORK, Aug. 24.—The Giants defeated the Pirates in both games of a double-header here today 1-4 and 7-6. Despite the hard hitting, two Giants pitchers turned in complete games. Fitzsimmons in the opener and Hubbell in the nightcap. Ed Rousch's homer with one out in the ninth decided the second game. The Giants outslugged the Pirates in the first game.

First game—	R.	H.	E.
Pittsburgh	4	12	1
New York	14	16	1

Batteries—Kremer, Fussell, Hill and Grimes; Fitzsimmons and Hogan, Schalk.

Second game—	R.	H.	E.
Pittsburgh	6	13	2
New York	7	8	0

Batteries — Grimes and Hargrave; Hubbell and O'Farrell.

Ninth Rally Wins

PHILADELPHIA, Aug. 24.—A rally in the ninth for four runs enabled the Cubs to nose out the Phillies 6-5 here today, giving the leaders a sweep of their three games and a record of thirty-one victories and only thirteen defeats in the East this season.

	R.	H.	E.
Chicago	6	11	2
Philadelphia	5	12	1

Batteries—Nehf and Taylor; Knupel, Smythe, Willoughby and Lerian.

Johnson in Form

BOSTON, Aug. 24.—Sylvester Johnson held the Braves to four hits here today and St. Louis won 3-1.

	R.	H.	E.
St. Louis	3	7	1
Boston	1	4	0

Batteries—Johnson and Wilson; Sebold, Cantwell and Spohrer.

Divide Pair

BROOKLYN, Aug. 24.—Brooklyn divided a double-header with Cincinnati here today, winning the second game 5-0 and losing the first, 5-2. Ray Moss allowed six scattered hits in the nightcap.

First game—	R.	H.	E.
Cincinnati	5	8	2
Brooklyn	2	4	1

Batteries—May and Lindstrom; Vance and Deberry.

Second game—	R.	H.	E.
Cincinnati	0	6	1
Brooklyn	5	9	0

Batteries—Ash and Gooch; Moss and Deberry.

COAST LEAGUE

SEATTLE, Aug. 24.—Lamanski, Indian hurler, kept the Angels' nine hits well scattered today, and Seattle scored a 8 to 3 victory over the visitors. Los Angeles used three moundsmen in an attempt to stop the Indians' hitting attack.

	R.	H.	E.
Los Angeles	3	9	2
Seattle	8	13	1

Batteries—Roberts, Pitt, Holling and Sandberg, Hannah; Lamanski and Bottarini.

Vergez Hits Hard

LOS ANGELES, Aug. 24.—Oakland hung the Hollywood Stars with a tenth-inning rally in the fifth game of their series here today, winning by an 8 to 5 score and grabbing a one-game advantage. Johnny Vergez was the hero of the Oaks, getting hit two doubles and two homers for a perfect day at bat. His home run in the tenth broke a five-all tie. Two other runs, however, were scored by the Oaks after Johnny crossed the plate to clinch the game.

	R.	H.	E.
Oakland	8	12	2
Hollywood	5	8	1

(Ten innings.)

Batteries—Edwards and Lombardi; Johns, Hulvey and Beverelo.

Rally Not Good Enough

SAN FRANCISCO, Aug. 24.—A ninth-inning rally today failed to win the game for the Sacramento Senators, who lost to the Missions 4 to 3. The Senators evened it in the ninth, but the Missions came back with the winning run in the final half. Finn and Boone, for the home team, and Hraz, for the visitors, all made homers.

	R.	H.	E.
Sacramento	7	14	1
Missions	8	11	0

Batteries—Bryan, Gould, Cano and Koehler; Sandberg, Mitchell and Baldwin.

Thirteenth Straight Win

PORTLAND, Aug. 24.—Wallace Walters, the revenged fat man, refused to allow his former teammates, the San Francisco Seals, to win a game for the third time in succession today and the Portland Ducks romped home on the long end of a 8-5 score. Walters' homer in the fifth with two men on base turned defeat into victory for the Ducks and the visitors could do no better than come within one run of tying the score in the first half of the ninth. Today's victory marked a thirteenth straight.

	R.	H.	E.
San Francisco	5	9	1
Portland	8	8	0

Batteries—Jacobs and Haworth, Fullerton and Woodall.

HIGH SCHOOL ATHLETES TO RUN AT BANFF

British Columbia Youths Will Compete in Track and Field Events in Alberta

BOB GILL WILL TOSS WEIGHTS

VANCOUVER, B.C., Aug. 24.—Young British Columbia athletes who, despite a heavy track, at the recent British Columbia high school Glympiad, managed to clip precious seconds off provincial records, will be represented at Banff, where the Canadian Rocky Mountain Union's annual championship meet will be held between August 30 and September 2.

Among British Columbia youths who will challenge the speed kings of the East, notably the strong delegation which is coming to the mountain playground from Manitoba, Ont., Que., are nothing of other sprinters from other parts of the country will be the lad who busted Fred Large, of Cranbrook, who ran the 100 yards in 10 2-5 secs and the 220-yard dash in 23 2-5 secs at the high school meet here. Large, making this time on a track usually used for horse racing and considered by no means best adapted for human high speed travel, is looked to by backers here to make a creditable showing on the smooth track where the Banff championships will be run off.

Vancouver's big boy weight tossers will be conspicuous among entries for the field events, it appears, with Bob Gill, husky city policeman and all-round champion of the Caledonian Games, heading the limelight. Gill will be backed in his bid for field honors by Archie McDermid, Tommy Flanagan and John Cameron, chief of police in New Westminster, formerly Canada's best all-around athlete and champion of police games on the Pacific Coast for the past twenty years. Glen H. Leadingham, local high school lad, is another bet for weight events. He hurled the 12-lb. 12 ft. 7 ins. threw the twelve-pound hammer 127 ft. and put the twelve-pound shot 40 ft. at the school Glympiad here.

OSHAWA DEFEATS OTTAWA 15 TO 1

TORONTO, Aug. 24 — Smooth working attack, backed by an almost impregnable defence, carried Oshawa, Ont., amateur lacrosse association senior champions, to the Eastern Canada lacrosse championship here. They defeated Ottawa Maldacia Greens, goals to one. Oshawa will travel west to play Winnipeg Argos in the elimination series for the Mann Cup sinbleneine of the Dominion championship.

"Yankee Doodle" Is Hero Of Fight Fans

Max Schmeling

NEW YORK, Aug. 24.—Downhearted and dejected, Max Schmeling sailed today on a ten-day boat for his native Germany. The man who might have been heavyweight champion is going home to fast and think things over after a decision which robbed him of a title in two matches with Phil Scott and Jack Sharkey. And a golden chance at the coveted title. "I am tired and sick of the Boxing Commission," he said. "I am in the shape to fight, but anyone else right now." He has completed a tour of twenty-six cities in which I boxed a total of 196 rounds and got most of my rest between sleeper jumps. I've had enough, now." Schmeling, born in October, 1905, is straightest out his trouble with the commission.

Schmeling's refusal to fulfill a contract made by Arthur Bulow, German newspaper man, who brought him to this country but was later ousted by Max, to box Phil Scott for Premier Humbert Fugazy, caused the trouble which resulted in the commission withholding the license of Schmeling and the managerial licenses of Bulow and William McCartney, two of his managers.

MADE MISTAKE

Schmeling made plenty of mistakes, but he is not entirely to blame for everything that happened. Bulow insisted that the first match by selling "little pieces" of Schmeling's contract to an American group. It turned out that soon afterwards the Jewish group had schmeling under their wing and the Teuton cast out Bulow. Bulow fought for his rights and everybody—Schmeling, Bulow, Jacobs and the others lost.

Schmeling has a lot of friends by his actions. After he whipped Paulino Uzcudun in June, the black-haired German was easily the most popular figure in the heavyweight division. He was only a jump from his heavyweight title.

Going home, he is just another foreign fighter and one who is going to have a hard time getting breaks he received in his first journey here. If he returns.

Jacobs, who is up to the eyebrows in trouble with the commission, now says that he has under consideration offers from several promoters for Schmeling to fight in the United States on the German's return. According to Jacobs, Tuffy Harvey, of Chicago, has offered $60,000 for Schmeling to meet either Otto Von Porat or "Tuffy" Griffiths at Chicago in November or December.

SOCCER CLUBS TO MEET TOMORROW

The annual general meeting of the Senior Football League of the city will be held tomorrow night at the Y.M.C.A., at 8 o'clock. As election of officers for the ensuing year will take place, representatives are requested from all senior clubs.

INVITATION MEET WON BY BIG BILL

Tilden Shows Old-Time Form in Winning Newport Title From George Lott in Four Sets

NEWPORT, R.I., Aug. 24.—Playing before a hostile crowd, Big Bill Tilden displayed enough of his great fighting spirit to overcome George M. Lott, Jr., of Chicago, in a long five-set match here today in the final of the thirteenth Newport Casino invitation tournament. This victory gave the "Old Master" permanent possession of the Cushman trophy, as he won his first two legs in 1926 and 1927. The scores were 6-2, 3-6, 4-6, 8-6, 6-3. The doubles final was won by Lott and Johnny Doeg of Santa Monica, Cal., when they won thirty-four of the sixty-four games played. They played with Fritz Mercur, of Bethlehem, and his brilliant partner, J. Gilbert Hall of Orange, N.J. The winning figures were 6-4, 7-5, 4-6, 1-6, 6-2.

Tilden made a furious start against Lott, winning the first four games, three by love. The young Davis Cup player started on a comeback which continued a large slipper area and he was worried by the unsafe footing. After slipping several times he changed to spikes and "when these failed to keep him upright he removed them and played in his socks until the sun dried the court. Several times during the second set Tilden was displeased by unfavorable decisions made by linesmen and he delayed the play to chide them.

Bill Tilden

CHALLONER AND ELLIS CAPTURE GOLF SILVERWARE

Bert Challoner and Gordon Ellis captured the Ribbon-Rose Cup at the Uplands Golf Club when the defeated D. Findlay and J. A. Cameron, in the final 5 1-2 to 3. The winners played consistent golf throughout and set aside some strong opposition. Before they won awarded the trophy.

Island Team Wins Final Tournament Game With Ease

F. Meredith Runs Up Score of 74, Including Nine Boundaries, Against Mainland Eleven—G. S. Holt Is Injured by Fast Ball

The Island team selected from Victoria, Five O's, and University rocqs, readily disposed of the mainland team selected from Vancouver and Okanagan in the final wicket game of the Pacific Coast tournament yesterday.

The Victoria eleven was not at all strength of a representative de, while only about two of the mainland players usually figure in prestly representative cricket. The scores were: Island 197 for ght wickets declared, Mainland 126 The Mainland was unfortunate to ose G. S. Holt hurt by a fast ill, forcing his retirement.

For the home team J. P. Meredith of the Victoria team, was top ower with 74, when he was wled by Reed. Useful contributions to the Victoria innings were llen 23 and Comley 31. Meredith ade nine boundaries, including e six.

The best partnership of the mainland eleven was that of W. O. avis and W. H. Johnson, with 27 id 36 runs respectively.

Full scores follow:

ALLY WINS GAME FOR FORDS, 14-13

von Runs in Last Frame Spoils Defeat for Pilmley's in Garage League Ball Play-Off

Staging a seven-run rally in the n inning, just as darkness was eping in, Fords need out Pilmley's in the first of a three-game ies for the Garage Baseball ague championship, 14-13, at the yal Athletic Park last night.

With the game apparently tucked ay, Pilmley's took the field in the t frame with six runs to the od, but Henry's heavy artillery got n action and before they were tled seven runs had crossed the ber, enough to win the game.

Joe Todd, who started on the und for the winners was slightled to the dugout in the fourth ing when Pilmley's knocked him for several hits and runs. However, Doug Meyers, skipper of the losers, was driven to same place of abode during Ford's terrific rally.

The second game is carded for Wednesday night on the same diamond at 6 o'clock.

SIMMONS HITS HARD TO GAIN

Athletic's Outfielder Returns to Game and Monopolizes Big Six With Three Hits

Al Simmons returned to action yesterday and monopolized the Big Six spotlight with three hits in four times at bat in Chicago in an afternoon game generally marked by light hitting. Simmons lifted his average four points. Babe Herman got two hits in a double-header at Brooklyn, but Brooklyn and Pittsburgh were the horse collar "Chuck" Klein, heavy-hitting right-fielder of the Phillies, remained out of the game.

AL SIMMONS

THE STANDING

	W.	L.	Pct.
Herman, Robins	114	40	.740

Jimmy Foxx Still Leads American League Batting

A's First Sacker Continues to Hit Heavy to Keep Top Place—O'Doul Steadily Gaining on Herman—Grimes Leads N.L. Twirlers

CHICAGO, Aug. 24.—The familiar figure of Jimmy Foxx, Philadelphia's first baseman, remains in the van of the American League batting parade. Foxx's position Connie Mack's all-round slugger has owned runs "Kid" Cuyler, of Chicago, is out in front with thirty-one stolen bases.

LEFTY GROVE

Cleveland first baseman, finished the week in second place, thirteen points behind Foxx, having passed Al Simmons. The latter dropped to third position through a loss of nine points during the week.

Regulars following Foxx and Simmons were Simmons, Philadelphia, .365; Manush, St. Louis, .362; Gehrig, New York, .362; Lazzeri, New York, .356; Ruth, New York, .354; Fothergill, Detroit, .354; Hellmann, Detroit, .348; and Dickey, New York, .345.

Babe Ruth retained his recently acquired lead in the home run column, driving out two circuit smashes during the week to bring his total to thirty-three. Foxx also got two and was second with thirty. Al Simmons batted in but two runs, but held on to the leadership with 130, nine more than his Ruth's collection of runs. Yankees, with four men in the first ten, stuck to their place in team batting with an average of .394, while the Athletics just a point and dropped to a tie for second place with Detroit at .359.

TEAM FIELDING

Some changes in the team fielding race was enhanced Philadelphia continued to handle the ball at a .976 clip, with New York second at .974. Cleveland, which led the league in double plays all season, remained in front with 128, but Boston was only one behind.

Bob Grove, the Athletics' lefty one southpaw, was beaten in his Sunday start, but has a record of eighteen victories and three defeats. George Earnshaw of the Athletics, is one and lost one for a mark of nineteen triumphs and six defeats. Old Tom Zachary has nine straight to his credit.

Other leaders—Team home runs, New York, 111; runs scored, Philadelphia, 740; fewest opponent runs, Philadelphia, 480; hits, Manush, St. Louis, 170; runs, Goslin, Detroit, 107; stolen bases, Gehringer, Detroit, 30; strike outs, Grove, Philadelphia, 140.

Hornsby leads in runs scored with 112, and Ott, of New York, in runs batted in with 117. O'Doul has the greatest total of hits, 146, and Frederick, of Brooklyn, the largest array of doubles, forty-one. L. Waner sets the pace with fifteen triples. Klein, with thirty-three home runs, only two but for .888. The Pirate star has worked only once since his injury, and that once was in a game already lost.

Philadelphia leads in team hitting with .307, and has two rivals in the .300 club, New York and Chicago, which rest just even with the .300 mark. New York is only three points away.

The Giants lead in team fielding with .973, one point more than the Pirates can show. Philadelphia is one point behind New York.

WRIGLEY WINNER WILL QUIT GAME

TORONTO, Aug. 24.—Possessor of $10,000 as the result of her victory in the Wrigley ten-mile swim at the Canadian National Exhibition yesterday, Martha Norelius, of New York, was to be finished with long-distance swimming, even at $2,000 an hour.

Asked if she would compete again next year, the new world's champion said emphatically she would not. Her racing stroke takes too much out of her, she added, and was not worth "punishing herself" for.

Miss Norelius and the other four prize winners of yesterday's marathon are all entitled to compete next Wednesday in the fifteen-mile marathon for men, when prize money totaling $15,000 will be split: a cheque for $25,000 going to the winner. If Miss Norelius means what she says, she will not start, for will defend her title in New York, the defending champion yesterday, who finished fifth.

"I've had enough swims for a while, I am sure," Miss Herta said.

OTHER WINNERS

The other prize winners were Ruth Tower, of Toronto, formerly of Denver; Mrs. Evelyn Armstrong, of Detroit, and Leah Riley of Keansburg, N.J., who were second, third and fourth respectively.

Three others completed the distance, but were nothing more than sponsors of the swim for their efforts. Gertrude Wilson, of Seattle, Mrs. Daisy Shaw, of Shawinigan Falls, Que., and Anita Lonsbrough, of New York, all crossed the finish line, bringing the number of finishers up to eight out of a starting field of forty-five women.

A light rain that drained the muscles at the back of her neck caused the collapse of Gertrude Ederle, famous Channel swimmer, in the last hour. Miss Ederle was the only one to be taken out of the water while still in the race.

Capt. George Corson, Jr., husband of Miss Tower, who swam under her maiden name, predicted that his wife, whom he trained, would be first next year. Last year she was third, winning $1,000, and yesterday advanced another step.

Nanaimo Softball

NANAIMO, Aug. 24.—On the Central Sports Grounds last evening the Motor Line secured 12 runs and the Laundry 3 runs in the knockout softball match. Ladysmith team secured 18 runs and the Autos thirteen.

Reporter—"Could I speak to Mr. Brown, the boxer?"

Boxer's Wife (acidly)—"Well, he is not up yet. Since he became a professional pugilist he hasn't ever got up before the stroke of ten."

Espinosa Plays at 73 7-10 Pace Since 1926, but Wins Only Twice

Lady Luck Smiles Not On Unfortunate Al, Though He Is One of the Greatest Medalists

By J. P. DLAMS

It must be admitted that Al Espinosa and Lady Luck don't get on well together. Indeed had fortune been as persistently if in Al's shoulder ever since he became nationally prominent as a golfer.

I first met him at French Lick Springs, where the P.G.A. championship was played in 1924. He was playing beautiful golf and the wise money backed him down to reach the semi-finals, at least.

In the third round, Al encountered Ray Derr, a gentleman whose putter was giving him trouble. Derr took three strokes to get on a green, while Al would be on in two, certain of par. Then Derr would sink a thirty-foot putt to halve. Or, both would get on in two, with Al's ball nearer the cup and Derr would hole a thirty-five-footer to a birdie.

In this way they came to the thirty-third hole, with Al one down, when, with any sort of break in luck, Al should have been five or six up. Both reached the green in two, but while Al was fifteen feet from the cup, Derr was thirty feet away. Al had favorable terrain for putting while Derr had to conquer a nasty side-roll. It looked very much as though the match would go to the final green, though whether it would be squared, or Al would still be one down was uncertain.

Al stood at one side, an expression of hopeless resignation dominated on his face.

"Are I sink this ball," he muttered.

Which was exactly what Derr did, and Al was left holding the bag for Al couldn't quite get his fifteen-footer down.

Al frittered along for a couple of years, finally in the 1927 Summer cut as one of the country's greatest medalists. Nevertheless he got nowhere.

In one open event of 1927 he scored 287, in two others his score was 286, and in a fourth he managed to get to 285. Nevertheless in three of these tournaments he finished in second place. In the other he was third.

The following season Al broke 300 in seven tournaments. But he only won two of them. In one—the Florida West Coast Open—he had to turn in a 302 to grab first money. A 289 was sufficient to cop the Mid-America Open.

Meantime, his brother Abe, who isn't quite as good a golfer as Al, became Western Open champion and Chicago District Open champion.

A jinx has pursued Al in the P.G.A. championship. He had Hagen beaten in the semi-finals at Dallas in 1927 but took three putts on the final green, allowed Walter to square the match, and lost on the thirty-seventh hole.

Last year at Baltimore, he started off the finals in great style against Joseph Turnesa, and at the end of the ninth he had Leo two down and it began to look as though the strain was telling on the Hagen.

It was, too. At that point, Leo told me afterward, he scarcely knew what to do.

All week he had been holding himself in check, instead of playing his usual excitable rushing game. This had enabled him to conquer Sarazen and Hagen but it wasn't working against Espinosa.

Leo suddenly decided to be himself.

"I'm going to shoot for birdies," he muttered.

Now it is one thing to shoot for birdies and quite another to make them. But two deadly pitch shots on the seventh and eighth holes brought Diegel, exactly what he wanted. His brace of threes, while Espinosa was collecting two par fours, squared the match.

There was no stopping Leo after that. From the seventh hole through the seventeenth he was a wonder.

He chipped dead from off the edge of the green repeatedly. Meanwhile Espinosa had all sorts of bad luck. Once with a wide tee shot to Hagen he found his ball with a bunk of mud glued to it. Again he skied a drive among thick trees. It wasn't in the cards for him to be P.G.A. champion in 1928.

It was tough luck for Espinosa to have to go through his bitter disappointment against Bobby Jones. But it wasn't Espinosa who was in that playoff, any more than it was Walter Hagen who was in the playoff up and 17 to go by Archie Compston.

The real Espinosa was he who has played 302 tournaments outside since December, 1926, at an average of 73 7-10 strokes per round.

A great record, yet in that period Al has won only two events and lost for the lead in a third.

Without a doubt, Lady Luck loves him not, even though he is one of the ten greatest medalists in the United States.

A. B. DARLING WINS WESTERN CHAMPIONSHIP

Montreal Golfer Captures Title With Easy Victory Over Harry Shaw, of Edmonton

ALBERTA PLAYER OFF HIS GAME

JASPER, Alta., Aug. 24.—A. B. Darling, of Willbrook, Montreal, won the Western Canada Amateur golf Championship from Harry Shaw, Jr., of Edmonton, Alta., over the Jasper Park Lodge golf course this afternoon nine holes up and seven to play. Finishing the first eighteen two up, Darling terminated the match on the fourth green, with a par four to Shaw's five. It was the first time an Easterner had won the championship. The Edmonton city champion was off his game today and made a comparatively poor showing. He went around in the morning in eighty-five strokes and took forty-four ten ever par, for the first nine this afternoon.

Darling took three holes in succession starting out after luncheon with four, while Shaw was taking five, six and seven strokes. They halved the fourth, Darling made it six up on the next. He took the seventh with a four, one over, and the eighth with a par four and the ninth with a par four, making him nine up and nine to go. Shaw bashed for a moment on the tenth with a birdie four, which gave him the hole. But Darling came back with a win on the eleventh, which gave him the match.

British Premier Is Compelled to Halt on Flight

LONDON, Aug. 24.—Premier MacDonald, who had expected to make a direct flight from Scotland to London, was forced to make two unscheduled landings because of poor visibility. The plane unexpectedly appeared at the Cramlington aerodrome about lunch time and put off again after a short halt. Encountering bad visibility again in the vicinity of Durham, the pilot returned to Cramlington, where the Premier had lunch.

Another pilot, was then assigned to act as pathfinder in another plane, and the two machines set off for London, arriving at 6 p.m.

Mac Smith May Finish Among First Ten Players

McCarthy Becomes Increasingly an Object of Interest Among the Amateurs—George Von Elm and Voigt in Tight Races

Macdonald Smith's victory in the Long Island Open, which he won with a score of 286, lifted him from nineteenth to eleventh place in the seasonal golf averages, and the veteran would be in a good position to force his way into the first ten among the country's medalists if he were to play any more tournament golf. The chances are however, that he will not be seen in many more events, if any, and his chances for further elevation depend upon some of those ahead of him slipping back.

Gene Sarazen's 288 assisted him in slightly bettering his average, but did not raise him in the standings.

Among the amateurs, the race between George Voigt and George Von Elm is particularly interesting. They are running about strokes for stroke and while Voigt has a fractional lead, it is so small as scarcely to be discernible.

Perhaps the most pertinent circumstance is the steady advance of Maurice McCarthy. This youngster grows better and better as the season progresses. While he is not yet among the topnotchers, he is constantly lowering his medal average and his showing in the New York State amateur championship, in which he won both the qualifying medal and the title, has put him into the select class of amateur medalists, ahead of many prominent professionals, too. The amateurs who are leading him are Bobby Jones, Von Elm, Voigt, Dr. O. F. Willing and Jess Sweetser.

McCarthy becomes increasingly an object of interest in the world of golf.

THE AVERAGES

Player	18-hole Rounds Played	Total Strokes	Average Per Round
1. Bobby Jones	25	3,625	72-1-5

(Records of all tournament individual medal play only for season starting November, 1928, and ending November, 1929.)

JIM DANDY COPS MAJOR SHARE OF POT AT SARATOGA

NEW YORK, Aug. 24.—A Western colt, Jim Dandy, owned by C. Carl, outran a crack field of two-year-olds to win the Grand Union Hotel stakes over a muddy track at Saratoga today. The winner, an odds-on favorite, paid thirty to one in the betting and won by half a length in a driving finish with the Rancocas stable Mokaiam, another odds-on favorite, and Wm. Woodward's Caruso, winner of the United States Hotel stakes, finishing straights back. The race carried a net value of $13,720.

Out of the money were such juvenciles as Mrs. Graham Fair Vanderbilt's Sunstreak, 11, the John P. Grier colt, Hi Jack, and W. T. Waggoner's $50,000 Man o' War colt Broadway Limited.

The co-feature, the $5,000 added Merchants and Citizens handicap went to Peter Wrack, the even money choice with Ben Machine second and Hot Toddy third. Peter Wrack ran his mile and three-sixteenths in 2:52 3-5.

Motors & Motoring

Colonel Lindbergh Goes 112 Miles Per Hour in Automobile

Author of "We" Hits Up Good Pace Driving Packard Special Roadster of 120 H.P. Over Track Surrounding Aviation Field—Streamlined Car Has 126-Inch Wheelbase.

Speed Deceptive as to Distance From Posts

DETROIT, Aug. 24.—Colonel Lindbergh enjoyed his experience a few days ago, when he drove a car 112 miles an hour—a whole lot faster than I have ever traveled in a motor car before"—but he would have been easier in his mind if the roadster had had wings. "If there had been wings such as an airplane has," he remarked, as he got out of the car, "I would have known the exact distance I was from those posts marking the quarters. Going as fast as I was I couldn't tell how close I was coming to them. They looked only two or three feet away."

As a matter of fact the Colonel built for individuals by special order, and ordinarily on the highway, is was never closer than eight feet to capable of 100 miles an hour or the posts, according to Charles better.

Vincent, supervisor of the Packard proving ground, who, as passenger and mechanic, rode with Lindbergh.

It is a straight sight, of course, The flyer had come here to try with a wheelbase of 126 inches. The out a Packard-Diesel plane. After body is streamlined and freed from he had climbed out of the ship, a certain amount of wind resistance Alvin Macauley, president of the by removal of fenders and running Packard Motor Car Company, asked boards.

him if he would like to drive a fairly fast car. Lindbergh said he would, so they went to the two-and-a-half mile track which surrounds the 500-acre aviation field at the proving grounds.

A pair of goggles and a leather coat were given the Colonel, and he climbed into a Packard special roadster of 120 horsepower. The car is one of about 100 the factory has

Away went the roadster, and entering the first turn Colonel Lindbergh guided right up into the top "groove" of the saucered incline, indicating that he was doing more than 100 miles. The banking of the track provides for speed. The first or inner one is for speeds up to seventy miles an hour. The second requires at least seventy-five miles and the top one needs more than 100 miles an hour to hold a car on it.

For seven laps Lindbergh and his passenger, Mr. Vincent, whirled around the concrete stretches. Stop watches at the starting line caught him averaging one hundred and six and a half miles an hour for one of the laps. Between quarter posts on the stretch another watch recorded his rate at 112 miles.

When the drive was over Colonel Lindbergh brought the roadster to a stop in front of Mr. Macauley, Colonel Jesse O. Vincent, Packard vice-president of engineering, and the small group with them. It was then that he spoke of his uncertainty about his distance from the posts.

The fastest lap ever made on the track was a year ago, when Leon Duray, one of the Indianapolis speedway pilots, drove 148 miles an hour. This was declared an official record by the contest board of the American Automobile Association, members of which saw the trial.

Before he left the field Colonel Lindbergh invited former Major O. Langhier, who used to be commandant of Selfridge Field, U.S. army airport for the Detroit area, to ride in the car with him, but his offer was declined.

"I will ride anywhere with you in an airplane," Major Langhier said, "but in a car that fast—no."

Major Langhier is now a business associate of Colonel Lindbergh, and has flown with him many times.

SPEEDS ALLOWED

Thirty-six states of the Union permitted cars to travel at speeds as great as thirty-five and forty-five miles an hour in 1928, while three states placed no fixed limit on the speed of motor cars. In 1918 only three states allowed cars to travel thirty-five or forty miles an hour.

COST $3,000,000,000

Keeping the United States supplied with automobiles and replacing worn-out parts on cars already in service adds almost $3,000,000,000 a year to America's production of wealth. The wholesale value of the 4,620,000 new automobiles produced in the United States in 1928 is estimated at $3,045,820,000.

TINY MODEL TESTS BRIDGE

Nine-Foot Brass Miniature Used to Determine Stresses in New York Bridge

LINK STATEN ISLE WITH NEW JERSEY

NEW YORK, Aug. 24.—Tests carried out on a nine-foot brass model prove the theory of design of the Kill van Kull bridge to be correct and give renewed assurance of the structure's safety, according to a research report just issued by The Engineering Foundation.

The remarkable model having served its primary purposes, has been committed to the care of the Museums of the Peaceful Arts in the Scientific American Building, where it can be examined and operated by engineers and the public," says the report. Both the bridge and the model were designed by the engineers of the bridge department of the Port of New York authority.

The Kill van Kull bridge linking Staten Island to New Jersey, will, when its approaches have a total length of about eight thousand and seventy-five feet and will cost $12,000,000. Its arch will have a span of 1,675 feet and will be the longest arch span in the world.

The bridge, exclusive of approaches, will contain 84,500,000 pounds of steel, of which approximately half will be manganese and silicon steel, the report continues. "The clearance for vessels will be 150 feet above the water. The rise of the arch is one-seventh of the span, or 239 feet and seventy-five feet. This rise is to be a trussed structure, its depth at the crown of the arch will be thirty-seven and one-half feet. The two arch trusses will be seventy-four feet apart.

"The bridge has been designed to carry four lanes of vehicular traffic, two rapid transit tracks and two sidewalks, all on one deck. The dead load of the main arch, that is the weight of the structure itself, averages 28,000 pounds a linear foot of bridge. The live load that is, the weight of vehicles, trains and people for which the bridge has been calculated, is equivalent to 6,000 pounds a linear foot of the whole bridge.

"The Kill van Kull bridge being of unprecedented magnitude and involving the safety of many lives together with property of great value, the engineers sought every means of confirming their design based on mathematical computations. In recent years progress has been made in the use of small-scale models for such purposes. Therefore the engineers of this bridge invented a special model which would be tested very much as if it were the real bridge.

"The model is of engravers' brass, nine feet long. Every inch of length in it is equivalent to sixteen feet in the bridge. Stating it the other way, the dimensions of the bridge will be 192 times those of the model. This model is equipped with instruments of great precision for measuring strains and distortions. Tests were made simulating the bridge unloaded or loaded in various ways. Effects of cold and of change of temperature also were simulated and the strains and distortions caused by them have been measured.

"By these means not only were the computations based on mathematical theories checked, but additional information also was obtained. A complete mathematical analysis of the model was made. By all these means assurance was gained that the sizes and shapes of the parts of the bridge and their arrangement are adequate."

TO AVOID ACCIDENTS

To the motorist who is seeking to avoid a collision it is well to remember that when driving on a weak front tire it should be placed on the right wheel. Thus, if a blowout occurs the car will be turned away from oncoming traffic.

New Robot's Brains Supplied by Science Replaces Traffic Cop

Operation of Mechanical Device on Streets of New Haven Declared by Writer to Have Proved Itself Superior to Trained Men in Way of Automatic Adaptability

Control Was Invented By College Professor

NEW HAVEN, Conn., Aug. 24.—Science has stepped into the field of traffic regulation, and her latest and most extraordinary offering is a new traffic robot or mechanical policeman who is now directing traffic in several large Eastern cities. Recently a group of young Yale engineers brought forth a mechanical "brain" that actually accomplishes the useful function of directing traffic. It is not a hit and miss proposition; it is a "mechanical policeman" that directs traffic more efficiently than a highly trained traffic officer and operates a standard signal light in exact accordance with the varying volume and flow of traffic in the streets.

To fulfill the claims made by these inventors, the device necessarily had to possess a "brain" that would make it superior to that of the human being. It seemed highly improbable that any mechanism could be devised which would be capable of "remembering," "thinking," "seeing" and "receiving instructions," and skepticism therefore prevailed.

IS CREATION OF PROFESSOR

The "electro-matic" traffic control was conceived in New Haven, Conn., when a young Yale professor, Henry A. Haugh, Jr., hurrying home late one night, was stopped at a pre-timed traffic signal which was giving the right of way to an empty street. Chafing at the unnecessary delay, Professor Haugh began to ruminate upon the possibilities of regulating traffic by mechanical means in its own volume and flow in other words, allowing traffic to run itself. In collaboration with three Yale associates, Eugene D. Stirlen, Charles D. Geer and Wallace G. Garland, the new mechanical "brain" was developed.

The system is said to be directing traffic far more efficiently than it ever has been directed before by other means, either human or mechanical. The entire downtown business area of the city of Wilmington, Del., is controlled by the robot, and since the installation of this robot, traffic control has been dispensed with.

So much interest has been generated by this recent development that traffic experts from all over the country have journeyed to the Delaware city to watch the mechanical policeman in actual operation.

CONTROL HAS EYES AND BRAIN

The control is composed of two major units—the "eyes" and "brain." The "eyes" are sensitive units placed in the pavement of all the streets approaching the intersection. They "see" the arrival and movement of all vehicles that pass over them and transmit this information to the "brain."

The "brain" is a control mechanism which is the true marvel of the entire system, exhibiting sheer intelligence and memory far beyond the human capacity. It is capable of "thinking," "seeing," and "receiving instructions." The "brain" is able to tell at all times what demands are being made upon it and from what direction, and it actuates traffic through the intersection, according to its volume and flow, yet it never neglects the individual car approaching the intersection.

The mechanical bluecoat does not operate according to any set rule, nor does it adhere to any particular schedule. Thoroughfare traffic is "remembered" and sent along at the earliest moment consistent with safety.

Drivers who pass frequently are amazed when they discover that the lights blink differently under what appear to them, to be similar conditions, yet using more than human intelligence.

The secret lies in "vehicle-sensitive" units in the pavement of the streets adjacent to the intersection. Automobiles passing over these sensitive units in the pavement govern the changing of signals.

These units are the "eyes" of the mechanical policeman. They "see" the presence and movement of traffic and transmit this information to a control mechanism. The control mechanism or "brain" receives this information, "remembers" the arrival and presence of the vehicles, and with real intelligence operates the traffic signal to meet the exact situation existing at that moment.

MR. LINWOOD A. MILLER

Who succeeds John N. Willys as president of the Willys-Overland Company, Toledo, Ohio. Mr. Willys now becomes chairman of the board. Mr. Miller for the past year has been vice-president in charge of sales, and during that time established a close personal contact with Mr. Willys. He is especially well equipped for his higher responsibilities having been an active factor in the growth of the Willys-Overland. He is recognized as an efficient of intense, aggressive and forceful. His approachability and intimate have made him extremely popular in Toledo, and in his adopted city he is known as a strong friend throughout the organization.

MOTORING TO MALIGNE LAKE

LOOK FOR COMPLETION NEXT SUMMER OF ROAD IN CANADIAN ROCKIES

Minister of Interior Promises to Seek Appropriation to Carry Out Needed Work

JASPER, Alta., Aug. 24.—Maligne Lake, the most magnificent region in the Canadian Rockies, accessible now to trail riders and hikers, may be reached by auto next Summer.

Hon. Charles Stewart, Minister of the Interior, who spent several days in the national park, stated before he left that he would ask for an appropriation for the building of a motor road.

At present there is a fine highway over the six miles between the lodge and Maligne Canyon and a motor road nine miles on to Medicine Lake, with a trail around Medicine Lake to the chalet at its upper end and power boat service across the lake to the chalet. There is also a trail of twelve miles from Medicine to Maligne.

After a trip to Medicine with R. P. Knight, superintendent of the park, Mr. Stewart announced the plan which would include improvement and in some places reconstruction of the trail from the canyon to Medicine Lake, and the building of an other eighteen miles of highway.

The minister expressed himself as pleased with what he saw of the maintenance of the park.

A good start, he said, had been made on the motor road to the Marie Rot Springs, and it would be completed this year.

WEEK-END AUTO TRIPS

One of the most popular forms of week-end enjoyment, especially for persons living in cities, where more than half of the total population in the United States now resides, is to ride out into the open country and spend a week-end at the home of some friend.

MAINTENANCE COSTS

Road maintenance costs are increasing in proportion to construction costs, due to growing mileage of improved highways, according to the California State Automobile Association.

BRITISH CAR TAX BASIS

More than 65 per cent of all cars registered in Great Britain are less than fourteen-horsepower rating because of the heavy taxation a horsepower.

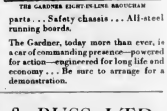
GARDNER 8-IN-LINE

Dollar for dollar
Feature for feature . . .

The Greatest Value in Eight-in-line Cars

Gardner value is the greatest value in the Eight-in-line field. You get *more* without having to pay more.

In the Gardner Series 130 Eight-in-line you get a 125-horsepower Eight-in-line motor with Bohnalite pistons and Invar struts . . . Duplex carburetion . . . New Ross cam and lever steering gear—feather-light steering! . . . 130-inch wheelbase . . . Lovejoy hydraulic shock absorbers . . . Enclosed hydraulic four-wheel brakes . . . Automatic centralized chassis lubrication—oils as you ride . . . Magnetic Starter—starts the motor by simply pushing a button on the dash . . . Chromium plating on all exposed nickel parts . . . Safety chassis . . . All-steel running boards.



THE GARDNER EIGHT-IN-LINE BROUGHAM

The Gardner, today more than ever, is a car of commanding presence—powered for action—engineered for long life and economy . . . Be sure to arrange for a demonstration.

HUTCHINSON & BUSS, LTD.
Cor. Blanshard and Broughton Streets Phone 5529

The Gardner Eight-in-line can be purchased in Victoria for as low as $2300 to $3600. There are 10 body styles, 40 color combinations. Three series: Wheelbase lengths: 108, 115 and 130 inches. Priced from—

$2300 to $3600

Why the New Dodge Six is eclipsing its entire field

The backbone of Dodge Six dependability, ruggedness, strength and long life is a structure of modern mechanical features that are bigger, stronger, more advanced and efficient than those found in other cars of equal price. Nothing that you hear or read about the new Dodge Six could be more impressive than the facts and figures you will find in a Table of Comparative Specifications. For here is concrete evidence that in real value this car totally eclipses all others in its field.

The Magic of Gum Cushions

A MAGIC that dispels the fear of rough roads—that takes the "kick" out of shocks and jolts—that removes all thought of repair shops and leaves the mind clear and carefree. Practical magic, too. For the price you pay for "G.P." Gum Cushion Tires is no higher than that of ordinary tires. Go to Gum Cushion Tire Stations—they'll show you.

MOTOR PEOPLE SPEND MUCH

MERICAN MOTORISTS DISTRIBUTE NEARLY $500,000,000 A YEAR IN CANADA

ood Conditions in Dominion Subject of Study by Manager of Touring Bureau

WASHINGTON, D.C., Aug. 24—merican motor tourists are now sending close to $500,000,000 a year Canada and the flow of travel between the two countries will be really facilitated as the result of n intensive survey of motoring onditions to be made in Ontario, uebec and the Maritime Provinces f the Dominion, the American utomobile Association announced ere today.

The national motoring body stated at Elmer Jenkins, manager of the A.A. National Touring Bureau, hich annually routes in excess of m million motor cars, will spend month in Eastern Canada studying road conditions, tourist accommodations and travel needs generally.

On the eve of his departure for the Dominion, Mr. Jenkins pointed out that the growing importance of Canada as a motor tourist objective can easily be seen from the fact that 3,840,585 American automobiles crossed the Canadian frontier in 1928 for "touring purposes." The manager of the A.A.A. National Touring Bureau, who has driven through every section of the United States in the interest of improved motoring conditions, will make the entire trip by automobile.

"When it is considered that millions of Americans each year visit Canada," said Mr. Jenkins, "it can be seen that it is essential to provide adequate motoring facilities in the Dominion. A.A.A. affiliations in Canada are already doing a great deal in this direction and are receiving the active support of the more than 1,000 motor clubs comprising the A.A.A. chain.

Mr. Jenkins will enter Canada at Niagara Falls and return to the United States by way of Calais, Me. During his visit to the Dominion, he will give careful study to all of the factors contributing to the welfare of American motorists entering that country. This will extend to road conditions, map needs, motoring services, hotels, resorts and many other features.

In his capacity as one of America's touring experts, Mr. Jenkins will confer with Canadians interested in the American travel with the view of facilitating the movement of the motor touring army, both at the border line and in Canada. At the same time, he announced that upon returning to the United States conferences will be held with leaders in the States bordering Canada on the American side.

SPEED BOATS TO TRY CONCLUSIONS

One Hundred Miles an Hour Expected at International Races at Detroit

Freely made predictions that a speed of 100 miles an hour on the water will be seen at the International Harmsworth race in September on the Detroit River, coupled with the keen competition for speed honors between two great transatlantic liners have aroused new interest in marine speed records.

While the great liners, Bremen and Mauretania are fighting it out on the Atlantic to determine which is the faster, their speed records, shuttling back and forth from one to the other, remain in the neighborhood of thirty-one miles an hour. They travel slowly as compared with diminutive racing boats now holding the world's speed records.

The world's fastest boat is Miss America VII, designed, built and driven by Gar Wood, millionaire sportsman. She has an official record of 92.123 miles an hour. Miss Syndicate, owned, built and driven by Horace Dodge, holds the official world's speed record for displacement boats at 54.71 miles an hour. The fastest cruiser in the world is Caleb Bragg's new Rascal, fifty-seven miles an hour. Newly owned by Carl Fisher and destroyed by fire a year ago on Long Island, held the unofficial record for all displacement boats at 64.7 miles an hour. Packard Chrisracft, owned by Col. J. G. Vincent, holds the official American record for displacement boats for 150 miles with an average speed of 52.85 miles an hour. Nuisance holds the American records for speed in the Gold Cup displacement boat racing class at 49.1 miles an hour. The fastest pleasure boat in the world is Jayee II, recently completed by Gar Wood for W. A. Corby Washington, D.C. In her official trial runs she made 88.5 miles an hour with seven passengers.

Of interest to the automobile industry is the fact that each of these boats is powered with a motor designed and built by the Packard Motor Car Company.

HOLIDAY END ADDS HAZARD

Return of Thousands of Children to School Calls for Extra Care in Use of Highways

SPECIAL APPEAL MADE TO DRIVERS

WASHINGTON, D.C. Aug. 24—On the eve of the re-opening of public, private and parochial schools throughout the country, the American Automobile Association today broadcast a warning to motorists that the return of millions of children to the schoolroom will create new traffic hazards and urged careful driving on the part of every car owner.

The national motoring body pointed out that the prevention of accidents involving school children is largely within the province of the motorist, and the exercise of caution will go far to reducing the number of deaths and injuries.

GUARD LITTLE ONES

"School days are just ahead," says the statement, "and millions of children will be upon the streets and highways. In this vast army will be little ones of four, five and six years of age, who, for the first time are leaving the protection and safety of their homes to enter an entirely new world. There will be problems enough without that of the reckless driver.

"While there is no doubt that teaching of safety in the schools throughout the country, safety posters and the effective work of the schoolboy patrols has done much to protect these youngsters, the problem will still remain as a challenge to the nation.

"Every motorist should feel obligated to have a part in this great humanitarian work, and they should realize the enormous difference their care and consideration would mean in keeping these children safe from physical harm as well as from a fear that may mar the rest of their lives. Such a spirit on the part of the car owners will do more than anything else to make for safety." The A.A.A. declared that while safety is now a part of the curriculum in many States, and children who have had one or several years in school have been taught the rudiments of safety, they cannot always be expected to exercise the utmost care. After opening the vacation period on safe playgrounds, there is always a tendency toward a let-down in these safety sense when they first return to the streets. "Unless the drivers of all motor vehicles are on their guard at all times, this let-down will result in many fatalities and injuries," says the statement. It continues:

PATROLS ASSISTED

"The reduction of accidents that is traceable to the establishment of schoolboy patrols in hundreds of schools throughout the country is evidence that the solicitous helpfulness of motor car drivers has been extended to these youngsters whose white belts and arm bands identify them as safety guardians. There is every reason to believe that still greater co-operation will be given during this school year.

"The motor car operators have learned that when the boy patrolman holds up his hand or sets the stop sign against him that it is not an order but a plea for assistance. Who could resist such a plea when behind it is the calm, confident trust of a child?"

Many more schools will have patrols this year, the A.A.A. leaders declare. There is no question but that they will result in the saving of many lives because the patrolman is respected not only by the motorist but by the children whom he is trying to aid.

CAUSES "MISSING"

Moisture or grease on the surface of the distributor housing is one cause of "missing." The high tension current skips across the surface of this coating instead of going through its regular channels. To remedy this condition merely clean the surface thoroughly with a clean, dry cloth.

NEW MILEAGES

There were approximately 170 new motor vehicles registered in 1928 for every mile of highway constructed on the Federal aid system of important interstate highways and thirty-three for every mile of road surfaced throughout the United States.

CHAMPION

holds World's Records in every field

CHAMPION has for six years, every quality of racing, except quality of importance. Champion stuck to the twenty-nine records for works, speed and automobiles. CHAMPION SPARK PLUG CO. of Canada, Ltd. Windsor, Ont.

CANADIAN-MADE PRODUCT

HEADLIGHTS FOR LIGHTHEADS

My idea of the only way to make a clean-up in Wall Street is to get a job at pushing a broom on that thoroughfare.

A woman never forgives a man for believing some of the things she tells him.

"Don't kiss me, dear, the taxi driver may see you."

"Well, what of it; he doesn't give a whoop!"

"The one does; he's my dad."

That insurance expert who says our girls are becoming taller may have measured only from the ground to the skirt hem.

"Life," solemnly remarked the professor of biology, "is the metabolic activity of highly complex protoplasm."

"It offers seems worse than that to the traffic cop," remarked the wise one in the rear row.

REVENUES FROM AUTOS

Automobiles shipped by rail brought a revenue of $193,798,956 to railroads in 1928, according to the National Automobile Chamber of Commerce.

Introducing

THE NEW **WILLYS-KNIGHT GREAT SIX** *for 1930*

Beautifully expressive of all the new and advanced tendencies in fine motor car design, the Willys-Knight Great Six for 1930 is now presented for your approval.

Making its debut at a time when thoughts are turning naturally to the activities of the social season to come, the Great Six, with its gloriously regal beauty, its tasteful elegance of appointment and its rich harmony of color, will find ready response from those who wish their equipage to truly reflect their position.

In engineering as in artistry, the new 1930 Model of the Willys-Knight Great Six is advanced to a degree which few of the most costly automobiles ever attain. The patented Willys-Knightdouble sleeve-valve engine reaches its highest development—faster, more powerful and more efficient than ever before. Other important advantages include heavy seven-bearing crankshaft, one-shot lubrication system, extra strong frame, full internal four-wheel brakes, manual heat control and automatic radiator shutters.

Yet with all its artistic and mechanical improvements, the price of the new Willys-Knight Great Six for 1930 is so reasonable as to make it the foremost value among modern fine cars.

Great Six Sedan, Touring, 4-passenger Coupe, Roadster, all at the same price, 6 wire wheels, trunk rack included.

All Willys-Knight prices delivered at Victoria, fully equipped. Special equipment extra. **$3265**

"70-B" The Companion Car

The Willys-Knight "70B" is the largest, most beautiful and most powerful Willys-Knight ever to be offered at such a low price. It is distinguished by a grace of line, harmony of color and special interior refinements hitherto obtainable only in more expensive cars. It is powered, of course, by the same type of sleeve-valve motor as the Great Six. Coach $1870; Coupe $1870; Roadster $1870; Sedan $1995; Touring $1775. "70B" Sedan Special 115-inch wheelbase $2095. All prices fully equipped delivered Victoria.

NEXT YEAR'S MODEL SHOWN

WILLYS — OVERLAND NEW WHIPPET SIX DE LUXE WILL APPEAR

Latest Addition to Famous Line Proves Very Attractive and Excellently Appointed

It is notable this year that many manufacturers are again introducing next year's models at this year's Canadian National Exhibition. For a few years the trend seemed to be to introduce the new cars at the motor shows held in January. This year, however, has proven an exception and many manufacturers are bringing out their 1930 models and displaying them for the first time at the Canadian National Exhibition. Among them is Willys-Overland, who have presented to date the Willys-Knight Great Six line for 1930, a new Whippet Six Truck and now the Whippet Six De Luxe Sedan. This sedan is worthy of considerable praise. It is among the very finest offerings in its price class.

Outwardly it is impressive. It boasts size, finish and many extraordinary refinements. Although retaining the lines of the Whippet Six introduced in the Spring of this year, it is a larger automobile and the new colors in which it is presented are very smart. According to officials at the factory, the new Whippet Six De Luxe Sedan is being presented with two-color options and wheels and top deck—the other, a very rich black and tan striping.

There is considerable difference in the body construction between the standard Whippet Six Sedan and the De Luxe model. In the Standard Sedan there are but two windows, while the De Luxe model has three. It is also equipped with six wire wheels, the two spares being carried in fender wells at the front. All nickel parts, including the radiator, headlamps, parking lights, door handles and the large hub caps are of chromium plate, while the rear is set off by a smart trunk rack.

The refinements as noted on the Whippet Six De Luxe Sedan are not confined to outward appearance. You are surprised and greatly pleased when you open the spacious doors and examine the interior. The upholstery is of a high class mohair that blends perfectly with the car's striking exterior.

Since its introduction the Whippet Six has established an enviable reputation for performance and officials of Willys-Overland unhesitatingly assure those interested in this model that this splendid performance has been carried into the De Luxe model. The Whippet Six motor is equipped, of course, with a heavy seven-bearing crankshaft. Four wheel brakes are standard equipment and finger tip control is also one of the features of this automobile, while the windshield is operated by remote-control. Simply by turning a crank on the windshield, it is either lowered or raised as the occasion calls for.

After a long taxi ride, the Scotsman gave the taxi driver a nickle for a tip.

"Here, wots that?" said the driver, glaring angrily at the coin in his hand.

"Ay, ye're a real sport," replied MacTavish, "I'll say 'tails.'"

CHRYSLER NEW MODEL HAILED

TECHNICAL REFINEMENTS OF LATEST MODELS ATTRACT KEEN INTEREST

Many Body and Power Plant Features Seen in "77," "70," and "66" of Sixes

No announcement of new Chrysler cars has ever created such wide interest as did the debut last week of three new lines of Chrysler sixes, the Chrysler "77," Chrysler "70" and Chrysler "66." These new models are now on display in the showrooms of Thos. Plimley, Ltd., local Chrysler dealers.

Perhaps the first thing noticed about the new cars is that they are distinctively new, yet not radically different from last year's models, it is declared. The Chrysler narrow profile radiator has been retained and the general body contour remains the same. Last year's Chrysler owners are pleased that their cars have not, by any means, been made obsolete.

New features which particularly attracted favorable comment are the dashing Pennsylvania Lourrine, the modernistic interior hardware and instrument board executed in leather, of New York and Paris, the flowing type parking lights, the finger-thin three spoked steering wheel, the chromium architraves, and chromium girdle on the "77" models, and the Zero-Ivyl shutters. The new Chryslers appeal to the eye as something distinctively fine and different.

WOMEN LIKE APPEARANCE

These items of construction particularly appeal to the female observers. Aside from its visual distinction, the new Chryslers are particularly outstanding in their constructural and engineering innovations. Chrysler's two most startling innovations are its multi-range gear shift. This new gear shift has five speed ranges—reverse, heavy duty, starting, accelerating and speed. The possibility of gear clashing has been totally eliminated and the new transmission makes gear shifting almost an effortless gesture. Chrysler's second big innovation is its down-draft carburetor, which is the first passenger car application of this new principle of fuelling by which the gas is drawn down into the carburetor rather than sucked up, as in the old method. The down-draft carburetor makes for additional power and economy.

In its Architonic body, Chrysler has applied an entirely new principle of body building. The word Architonic, according to the dictionary, is used to describe a structure that is the essence of master craftmanship. It has been applied to the new Chrysler bodies because they represent the zenith in body building, the supreme effort of Chrysler designers and engineers.

I lost another friend yesterday when I quit lending him money. You know how it goes: "He was a good fellow when I had it."

The seven wonders of the world are great sights, but the favorite wonder in America is: "Wonder how he gets away with it?"

Lady Luck has a way of highhatting those who put all their dependence on her.

TIME BUYING NOT GAINING

REPORT OF INCREASE IN AMOUNT OF MOTOR SALES ON TIME DISPROVED

Automobile Association of America Gives Results of Survey Into Financing of Cars

WASHINGTON, D.C. Aug 24—The prevailing belief that a greater percentage of motorists are buying their cars on the installment plan is disproved by statistics furnished by finance companies, according to a survey by the American Motorists' Association.

"Credit sales of new cars last year were ten per cent smaller than in 1928," the association declares. "In 1928, a total of 68.2 per cent of all new cars sold were bought on time payments, extending over periods of from six to eighteen months. Last year, reports of finance companies show, only 58.1 per cent of all new cars purchased were sold on the installment plan."

There has been a smaller decrease in the percentage of used cars purchased on the installment plan when 1928 figures are compared with those of 1928. Of all used cars sold in 1928 62.8 per cent were bought on time payments, while last year 56.6 per cent were bought on the installment plan, a decrease, during the four-year period of two per cent.

There were 3,220,000 new cars sold last year and of this number 1,870,000 were financed by different companies engaged in that business. Of the 3,760,000 used cars that changed hands during the same year, 2,205,000 were sold on the time payment plan.

Another interesting feature of the finance figures is the fact that the percentage of "trade-ins" on new car sales decreased from seventy-two per cent in 1927 to 64.4 per cent last year. On the other hand "trade-ins" were involved in 39.4 per cent of the total number of used car transactions last year as compared with 37.1 per cent in 1927.

"The reason underlying the reduced percentage of cars sold on the installment plan is the more careful investigation of credit risks, stricter financial terms, and the lower prices of automobiles," said J. Norton Weeks, president of the American Motorists' Association, in commenting upon automobile finance reports. "The time payment plan has materially aided America in growing automobile-wise and reports of finance companies show that the average American motorist is honest and lives up to the obligations he undertakes."

LOW GEAR NEEDED

Low gear is the best procedure in descending sloping driveways to garages. This is a safety measure, especially on wet days.

Friends and alarm clocks seldom get any thanks for timely warnings.

THE GREAT QUESTION

Mrs. Foster Welch, Mayor of Southampton, said in New York at the end of her American visit:

"Prohibition turns your keenest statesmen into cowards, and that seems to be what the constituents of these men want.

"A famous statesman was addressing a vast concourse of people when a heckler broke in to ask if he was in favor of prohibition.

"'I am,' he answered, and the hall shook with applause and cheers—not he went on, and the enthusiasm was redoubled—going to the root of the matter.

"'The quite brought down the house.'"

Little Clara had been reprimanded, said her mother declared, that instead of punishing the child she would get a good little girl in her place. But the daughter was not the least upset. "You couldn't," she said. Her mother asked the reason. "Because," explained the girl wisely, "nobody would be silly enough to give you a good girl in exchange for a bad one."

TO SURPASS and thereby render obsolete the transportation standards established by more than a quarter-century of motor car building—that is the extraordinary achievement of Chrysler engineers in these newest products of their science. In the new Chrysler "77" and "70", equipped with MULTI-RANGE GEAR SHIFT, Chrysler again transcends all experiences and ideals of power, of riding ease, of roomy luxury, of quality and value.

These automobiles are new in the true sense of the word—new in design, new in construction and new in performance. Chrysler, in these three cars—the "77", "70" and "66"—sets an entirely new standard.

The new six-cylinder Chrysler "66"—at the lowest price of any six to bear the name of Chrysler—takes its place in this newest and greatest group of Chrysler cars as a typical Chrysler value. In its own field, it achieves results as revolutionary as the "77" and "70" achieve in theirs.

We invite you to an early inspection and demonstration of Chrysler's most remarkable cars.

NEW CHRYSLER "77" AND "70" FEATURES

MULTI-RANGE GEAR SHIFT—Makes gear-shifting a joy even to the inexperienced; widens the power range; shift gears as always, but with new ease, new quickness, new quiet.

DOWN-DRAFT CARBURETOR—Not merely a gravity manifold but a new principle of fuelizing; complete carburetion; smoother power; higher mileage; quicker operation. Extra-large mechanical fuel pump.

SYNCHRONIZED POWER SYSTEM—Engineered as a unit; new flexibility, smoothness and economy still longer life.

LARGER ENGINES—Greater piston displacement, greater horsepower, torque and operating economy; seven-bearing counter-balanced crankshaft; Invar Strut pistons; oil filter.

ARCHITONIC BODIES—Absolutely new in principle, non-squeaking, non-rumbling diaphragm construction; new strength and safety; new slanting non-glare windshield.

NEW SPACIOUSNESS—All bodies 3 inches wider; 3 to 5 inches longer according to type; greater head room; adjustable front seat and steering column.

NEW BEAUTY—Dynamic symmetry; chromium girdle moldings; arched windows with chromium architraves. Wide color choice with optional contrasts.

NEW INTERIOR LUXURY—Newly-designed seat cushions; metalware executed by Cartier, of New York and Paris.

NEW RIDING COMFORT—New Parallex springs; new chimney-type rubber shock insulators; extra-depth girder-type double-drop frame; hydraulic shock absorbers.

NEW DRIVING EASE—Chrysler light-pressure weatherproof internal-expanding 4-wheel hydraulic brakes; non-clashing gear control; new cam and lever positive action steering gear.

ALL WORKMEN COMPENSATED FOR INJURIES

Report of Provincial Board Shows That 175,000 Workers Were Protected Against Accidents

RESERVE FUND IS MAINTAINED

Provision Is Made for 10,000 People, Including Dependents, Under Provision of Statute

The report of the Workmen's Compensation Board for the Province of British Columbia, covering the calendar year 1928, being the twelfth issued by the board, is now available. The activities of the Board cover all industrial accidents in the Province and in part is as follows.

The protection of the act extends to over 175,000 employees and covers the workmen in practically all industries in the Province. During the twelve years it has been in effect 282,340 accidents have been reported. Fatal accidents for the same period numbered 2,570, while 8,601 injured persons were left either totally or partially incapacitated from work for life. On the pension list at the end of 1928 there were 1,[illegible] widows, 867 children (under sixteen), 1,118 dependent mothers, 108 dependent fathers, 80 other dependents, 29 and permanently disabled workmen, 1,277; or a total of 3,377 in receipt of regular pensions. In addition there are temporarily disabled workmen to the number of nearly 3,000 at any given time receiving time-loss compensation and medical attention. With their dependents it will be seen that more than 10,000 people are relying for their maintenance, in whole or in part, at all times on the benefits provided by the act.

Section 32 of the act provides in part that "the board shall every year assess and levy upon and collect from the employers in each class by an assessment or by assessments made from time to time raised upon the pay roll, or in such manner as the board may deem proper, sufficient funds . . . to provide in each year capitalized reserves sufficient to meet the periodical payments of compensation accruing in future years in respect of all accidents which occur during the year."

PROCEDURE ADOPTED

The accidents of any given year are required by that section to be paid for in full out of funds collected from employers operating in that year. Employers commencing business in the years to come are not required to pay for any accumulation of accidents disposed of in the years prior to their engaging in industry. The employers' position is that their financial obligation in respect of a fatal or disabling accident is satisfied fully when the "capitalized reserve" is set up and taken out in full from the current year's assessments. Employers are then satisfied with that accident and its cost as if a court judgment were rendered against them and the judgment paid in full. It is true that the amount of the award under the act is not forthwith paid in a lump sum to the dependent widow and children or to a workman badly crippled for life. Section 16 of the act provides that it shall be paid out to the widow in monthly payments, and Section 30 provides that permanent partial disability awards shall be disbursed in periodical payments. In the meantime the unexpended portion of awards are invested, in compliance with the requirements of Section 32, in securities permitted under the Trustee Act, e.g., Dominion, Provincial and municipal bonds. The investments of trust funds so made in the name of the board and the Minister of Finance jointly. These trust funds or "capitalized reserves" are used in the payment of pension awards during the months and years to come in respect of accidents which have already occurred.

To illustrate the law as it applies to a fatal case, let us take the case of a workman who meets his death by accident at work on November 1, 1928, leaving a widow and four children under sixteen years of age, all in Canada. The widow is entitled to a pension of $35 per month till her death or remarriage and each child gets $7.50 per month until it reaches the age of sixteen years, or previously dies, regardless of the remarriage of the mother. The award in respect of the widow is calculated on reliable actuarial tables to be exactly sufficient, using both principal and accumulating interest, to give her $35 per month during a period equal to her expectancy of life and takes into account probabilities of remarriage. That sum, let us say, works out to $4,611.76. Similarly an award is calculated for each child. These awards for the widow and children are totaled at, say, $8,046.17. The sum is forthwith taken out of assessments collected from employers operating in 1928 and invested in accordance with the law and goes to make up the "capitalized reserve." During 1928 that widow and her children actually receive $60 for the months of November and December, 1928, or $120 for that year. The remainder of their awards is safely invested for them to take care of the monthly payments. Present and future employers have no further financial obligation in the dependents. The awards, as they are made, place the market, so far as employers are financially concerned, in the category of finished business. The practice followed in this Province is the same as is followed by all the boards and commissions on this continent where such a "capitalized reserve" constitute the balance of a award already made to widows, children, other dependents, and stringent workmen, and are set up in accordance with the provisions of the act. They do not contain one cent of "undivided profits" or "surpluses." Those reserves do not include any operational amount for anticipated claims arising out of future accidents.

SAFETY FIRST

Throughout the years since the Workmen's Compensation Act came into effect a persistent campaign has been waged to keep before employers and workmen the vital importance of an adequate accident-prevention programme. By placards, circular letters, public addresses, safety literature, conferences and correspondence, accident prevention measures have been advocated and advanced as the soundest and surest way to reduce human wastage in industry and curtail the heavy drain on industry resulting from the cost of avoidable accidents. That there has been a quickening of interest in this important matter is evidenced by the large number of employers as well as the employers' associations that have taken the question and met the problem by putting on educational campaigns among their employees. Notable instances of work along these lines has been done by the B.C. Lumber and Shingle Manufacturers, the Shipping Federation of British Columbia, the Shingle Manufacturers Association of British Columbia, and the B.C. Loggers' Association.

A study of accidents—their causes and elimination—is one of importance to all thoughtful employers and workmen. (The prevention of accidents improves morale, decreases labor turnover, and saves compensation cost. The actual compensation paid does not cover the full cost of an accident. There is delay in retraining afresh a new man to the point of efficiency attained by the regular workman. Labor turnover is costly. Recruiting and retraining runs into substantial cost every year. The physical suffering to the workman and reduced income during a period of lay-off due to accident are evidence enough that accidents are something which employer and workman alike should join in eliminating so far as is humanly possible. The most effective educational campaigns in this field are sponsored and carried through jointly by committees of the management and workmen co-operating and co-ordinating the directed efforts of those striving for greater safety in industry. The added inspection service made possible by utilizing the better inspectors and electrical-energy inspectors in a broader field than heretofore gives promise of beneficial results.

Employers are required to provide first aid equipment in accordance with the First Aid Regulations. These facilities have been made possible so that workmen may receive prompt, and efficient treatment for minor injuries. That service is being maintained at a substantial annual cost to employers and they have every right to expect that their workmen should avail themselves of it to the fullest extent. By a persistent educational programme workmen are realizing more fully the necessity of having scratches and other minor injuries treated at once. Neglected punctures, slight cuts, slivers in hands and fingers, foreign bodies in the eyes lead to infection, and trifling injuries run into costly claims. Handling things that are sharp or rough, stepping on or striking against objects and using hand tools cause the largest number of injuries that eventually become infected. These usually are very slight in the beginning and too often in the past have received little or no prompt attention. Many workmen go through life with permanent defects in fingers, arms or feet, which are the direct result of neglected lacerations, which when they occurred were considered to be too trifling to warrant a visit to the first aid kit. Workmen whose duties require them to handle rusty, dirty, or oily things soon realize the importance of keeping small cuts clean. While great improvements has been made in the general attitude toward first aid treatment, the statistical record of accidents contained in this report is ample evidence that much still remains to be done before maximum results are obtained from the service now made available.

ACCIDENT FUND

The accident fund shows receipts and disbursements. At the beginning of the year there was a credit to the various departments in cash of $368,176. The sum of $2,867,368 was received from employers in assessments and interest; $400,997 from employers for medical aid; $294,325 from interest on reserve investments; and $283,628 from workmen, being medical aid dues. The total of these accounts was $4,[illegible]. Compensation paid to workmen was $1,701,339; refund to employers, $8,946; medical aid, $488,446; and invested, $97,130. From the reserves, pensions paid were $867,253, and payments to dependents, $36,783. The value of future payments of claims approved took $452,898 for investments, and cash available for pensions, $81,250. Disbursements for expense were $49,977, leaving a balance to credit of classes of $390,254, and to credit of medical aid, $16,206.

The balance sheet shows assets of reserve investments $6,277,479; current fund investments, $290,384; cash for medical aid, $16,206; and cash for reserve, $91,230.

The reserve value at the end of the year, and interest, less pensions and bonus, was $6,368,709, and current fund investments, $126,046. The credit to classes of $390,254, and credit for medical aid of $16,209, the same as brought forward on the 1928 accounts, give assets and liabilities of $6,904,211.

ESSEX SECURES FRENCH TROPHIES

Annual Reliability Prize Awarded to the Challenger by Motor Club of France

The Apaulo Trophy, most coveted prize in the annual reliability tour organized by the Motor Club of France, was won this year by an Essex—the Challenger—against the largest field of competitors ever entered. This field included many of the most expensive cars built.

The tour consisted of nine days' run of approximately 310 miles each, with intermediate days in the various French provinces devoted to speed contests, hill climbs, starts with cold motors, brake tests and other events designed to bring out the real qualities of the cars. Other trophies won by Essex in France are the Lemonde Cup, the Pyrenees Cup, the Atlantic Cup, the Cup of Brittany and the Cup of the North.

This trophy is one of the many won by Essex—the Challenger—this year. Recently an Essex established a new endurance record in South Africa. Among the many records set by Essex in the United States were the runs made, with sealed motors, from San Francisco to the Mexican border and back, a new six-day reliability and speed record set at Lake Muroc, and the winning of the climb to the summit of Mount Diablo.

HOMAGE TO BEAUTY PAID BY EUROPE

Great Admiration of Studebaker Motor Cars Expressed by People "Across the Pond"

Motoring aristocracy of Europe paid homage to American motor car beauty at the annual International Automobile Tournament held in Wiesbaden, Germany, recently. The handiwork of practically every coach-builder of note on the Continent, and eleven leading American automobile manufacturers were present among the 400 entrants at the famous watering place.

Studebaker gained the distinction of being the only make of car to receive an award for each model entered in the "Schonheitskonkurrenz," or beauty parade, held on the second day of the journey. Eight Studebaker cars were awarded prizes following the presentation in review before the resort's noted "Kurhaus."

The Studebaker President Eight State Brougham entry received a gold medal when it was adjudged the most beautiful car in its class. Other Studebaker models awarded prizes were a President Eight Limousine, President Eight State Roadster, Commander Eight Convertible Cabriolet, Commander Eight Brougham, Commander Eight Victoria, Dictator Royal Sedan and Erskine Six Cabriolet.

The Wiesbaden Automobile Tournament is organized and conducted each year by the Automobile Club von Deutschland and the Allgemeiner Automobile Club, leading motor clubs of Germany.

"Say Sambo, that certainly am some tear yo' give yo' britches when yo' slid into second base."

"You is right, bo. Came mighty nigh to calling da game on 'counta darkness."

Judge—"You attacked this man on the street. Can you deny it?"

Accused—"Yes I can, your honor, if you think it will help me any."

United States Tourist (at English night club, to friend)—Well, this is a proper swindle. I ordered lemonade, and, confound it, if they haven't brought lemonade!

—Passing Show, London.

ENJOY LABOR DAY

Get That New Set of

Firestone

Gum-Dipped Tires NOW!

LABOR Day—the last three-day week-end for the season—enjoy it to the utmost on Firestone Gum-Dipped tires.

Firestone tires will take you there and bring you back. Manufacturing features such as the patented Gum-Dipping process by which every fibre is insulated with rubber to eliminate internal friction, mean complete freedom from tire troubles.

Before the holiday rush starts, drive around to your nearest Firestone Dealer and have him equip your car with a new set of Firestones. You, like thousands of others, will find "that they give the utmost in mileage, safety and economy.

Every Record Smashed—

81,065 De Soto Sixes

Sold the First Year!

The Greatest Climb in motor car history

Only a year has passed since the advent of the Chrysler-built De Soto Six. In that twelvemonth, the De Soto Six has broken all previous sales records for any first-year car at any price with the smashing total of 81,065 cars.

Now it is not too rash to prophesy that nothing can stop this car's ascendancy—the greatest climb in all motor car history. Firmly entrenched in popular favor, becoming better and better known with every day, winning new friendships with new owners, De Soto Six is so far ahead of rivals that a continuously triumphant future can be predicted. For the wise will continue to buy where the value is; and there is no other value like De Soto Six!

VICTORIA, LIMITED

Lord Dufferin's Welcome to Victoria in 1876

An Account of Reception of the Governor-General and His Countess Taken From the Files of The Colonist.

Interest having been created in the visit to Victoria in 1876 of the Earl of Dufferin, then Governor-General of Canada, and the Countess Dufferin, and as a somewhat remarkable divergence of opinion as to what actually took place has been manifest on the part of those alleged to have taken part in the festivities marking that event, the following essential portions of the account of the welcome given Their Excellencies, taken from The Colonist of Friday, August 18, 1876, no doubt will prove interesting.

With reference to the incident of the so-called Separation Arch it may be mentioned that this arch is referred to in The Colonist of the day as a "private arch" and was erected by a small clique of hotheads, well known in the city in those days as local firebrands. What actually happened was that Frank Saunders, a "live wire" of those remote days, who was one of the mounted escort in evidence when he observed the head of the procession failing to make the turn up Port Street from Government, seized the bread of the lead horse of the Governor-General's carriage and attempted to turn it into Port Street, but was prevented by the driver. In the same issue of The Colonist from which the following extract are taken appears an advertisement signed by some hundreds of the leading citizens of Victoria, protesting against the presence of the motto which decorated the Separation Arch.

THE COLONIST'S ACCOUNT

"The news of the arrival of H.M.S. Amethyst at Esquimalt on Tuesday evening (August 15, 1876), from San Francisco with the Governor-General and suite on board took the people of this city somewhat by surprise, as the advent of the distinguished party was not expected until the following day.

"By careful forethought on the part of the committee it was ascertained that His Excellency would land at Esquimalt at such hour on Wednesday as would best suit the convenience of the people and after due consideration it was decided His Excellency should be invited to land at Esquimalt at 1 p.m. on Wednesday (August 16).

"At an early hour on that day the city was therefore alive with the bustle and stir which bespeak the coming of some great event and as the hours passed by the signs of completion in decorations of the most beautiful and costly description became apparent.

"At 11 o'clock His Honor the Lieutenant-Governor, accompanied by the Premier and Captain Layard (the Governor's private secretary), visited H.M.S Amethyst to pay their respects to the Earl and Countess of Dufferin. His Honor being received with a Lieutenant-Governor's salute.

"The Governor-General and the Countess of Dufferin were received upon the wharf by Sir James Douglas, K.C.B., formerly for thirteen years one of the most successful governors of this colony, and now an honoured resident amongst us.

"All the decorations of Esquimalt were effective and in most excellent taste.

"On reaching the wharf the Governor-General at once advanced to Sir James Douglas and shook him very cordially by the hand, and expressed the great pleasure he had in meeting him and in introducing him to Lady Dufferin. His Excellency then inspected the guard of honor of Royal Marines and again approached Sir James Douglas, who addressed him as follows:

"Your Excellency, I have been requested by the mayor and citizens of Victoria to present to you their kind and cordial congratulations on your safe arrival in this province. We all hope that Your Excellency's stay will be rendered in all respects pleasant and agreeable to you.

"His Excellency said, in reply, that it gave him great pleasure, after his long journey, to find himself in this interesting province of the Dominion. He had heard of the beauty of the scenery in British Columbia.

DRIVES FROM ESQUIMALT

"His Excellency the Governor-General and the Countess of Dufferin, Lieut.-Governor Richards, Sir James Douglas and the officers and members of the suite then walked to the end of the wharf and entered their carriages and drove up towards Victoria. Near the road which leads to the Naval Club, five Foresters, Messrs. Frank Saunders (standard bearer), Thistleton, Phillips Dodd and Smith, appeared in full costume from the forest and took up their positions as a mounted escort to the Governor-General's carriage, the idea being that they should escort the carriage through the forest country between Esquimalt and Victoria until His Excellency was placed in charge of the Mayor and Council who, as previously arranged, accompanied by the militia, awaited the carriage at the end of the bridge Point Ellice, near Mr. Drake's.

"His Excellency inspected the guard of honor and the procession moved on towards Discovery Street, proceeded up Discovery Street, wheeled to the right (at Government), and passed down Cormorant Street and under the beautiful triumphal arch erected by the Chinese inhabitants of the district. At the foot of Cormorant Street, wheeling to the left, the procession was soon on Johnson Street, up which it passed until Government was once more entered amid the cheers of the now fast swelling throng. The most important and perhaps the most interesting portion of the ceremony was soon to be enacted. The street presented, as far as the eye could reach, a strong drawn up on each side of the street, and on reaching the by grandstand (built under the arch and across Yates Street), occupied by ladies, the viceregal carriage again halted. His Excellency rose in his carriage and Mayor Drummond read the civic address.

THE PRIVATE ARCH

"His Excellency's reply was heartily received as the carriage moved a few feet further until it came directly under the great arch in the midst of which there were a number of young girls from the public schools under the charge of Mrs. (Chas.) Hayward, who sang with excellent effect portions of the National Anthem. The procession proceeded along Government Street. The route had originally been declared up Fort Street, and by that thoroughfare to Government House, but an arch had been erected by several private citizens on triumphal combination arch at the intersection of Government and Yates Streets. To approach this beautiful structure the procession passed through the Lady Dufferin Guard, composed of young lads. Fort Street is short distance east of Broad Street with a motto "Innuendo Terms of Separation" placed conspicuously on it, under which His Excellency did not consider that he could pass consistently with his position as Governor-General, though he had no objection to do so as a private individual. A short detour via Broughton and Douglas Street was rendered necessary, until Fort Street was entered again. The procession then proceeded to Moss Street. His Excellency and the Countess of Dufferin being cheered almost without cessation. From Moss Street the vast concourse wended its way to Cary Castle."

After reviewing in detail the various elaborate arches and beautiful decorations, as well as quoting the many mottoes displayed all along the line of march from Esquimalt to Moss Street, The Colonist publishes under the subhead "Incidents" the following among several other items:

"On the Esquimalt crossroad were drawn up in line some 300 Indians of the following tribes: Songhees, Sooke, Saanich, Quamichan, Cowichanlatas, Soueua, Clemiskem, Quatsinkla, Halalt, Penelecuts, Byackaun and Chemainus. Each band was headed by its chief, and as His Excellency passed flags were displayed and hats dropped and three hearty cheers given. His Excellency bowing in recognition of the welcome given him.

At the bridge eighteen canoes manned by about 180 Indians from the Northwest Coast and Northern end of Vancouver Island, with innumerable flags and streamers, paddled in front of the Governor-General, singing a song of welcome and keeping time with their paddles.

"Isaac, you are cheating. Just like your family. Your father has been in prison, your brother was sentenced for fraud and now you are cheating—

"Look here, are we here to gossip or to play cards?"

Candidates Received Into Carmelite Order

SIXTEEN young men were received into the Carmelite Order, and, for the first time in history, the press was invited to view the sacred ceremony of College of Mount Carmel, Niagara Falls, Ont. The photos here show. No. 1—Officiating priests, Rev. J. J. Leo J. Walter, president of Mount Carmel College, and Rev. Simon Schmitt. No. 2—Scene of interior and chapel, showing new window. No. 3—Father Lawrence C. Dunber, provincial of Chicago, who received the candidates. No. 4—Young men who entered the order. They come from all parts of the continent.

HABITS OF DRIVERS STUDIED AT PROBE

Pittsburg Scientists Go Into Earlier History of Car Operators Concerned

PITTSBURGH, Aug. 24.—Pittsburgh is to be the laboratory for a scientific investigation of the cause of automobile accidents.

The National Safety Council, the City Department of Public Welfare and the University of Pittsburgh recently announced they had organized the Accident Research Association, and that a corps of specialists would come here to make a study of auto accidents.

Special attention will be given to drivers who become involved in accidents. The specialists will inquire into their mental alertness, eyesight, hearing co-ordination, reaction time and right and left handedness.

Psychologists and psychiatrists will inquire into the habits and state of mind of the subjects to determine just what they eat, what exercise they take, what is done for recreation, and if they are worried by financial matters, family affairs, employment or health.

Those co-operating in the research work also to learn as far as possible the cause of each accident, together with contributing factors. Among the first subjects to be examined are truck drivers, whose employers have instructed them to undergo the examination in event they become involved in accidents.

END OF WORLD MAY BE RESULT OF COLLISION

Accidents Happen in Space as Well as on Earth, Astronomer Says — Stars Known to Have Collided

MANY CELESTIAL BODIES RUN WILD

The period during which life, in one form or another, has existed upon the earth is more than a thousand million years. Man with a human form and human attributes, historic and prehistoric, can be traced back for about half a million years, and if we accept his anthropoid origin, the roots of his genealogical tree will be found in rocks two million years old, Sir Richard Gregory is quoted as stating.

These numbers are so vast in comparison with the span of man's life of three score years and ten that they seem to most people to approach the infinite. Throughout the universe, however, things are continually changing, and every star in the sky is either rising to maturity or sinking to decay.

So it is with the earth, one of the children of the sun. It was born with the other planets of the solar system through a catastrophe experienced by the sun in the long distant past; it may go on for some millions of years yet, but the end will surely come, whether it be due to natural causes or by accident.

COLLIDING STARS

Accidents do happen in the heavens as well as upon the earth. From time to time, for example, new stars blaze out in the sky, and though the cause of their sudden appearance is not definitely known, the most probable explanation is that they represent the result of collisions in space.

Eleven years ago, on June 8, 1918, a new star of this kind appeared in the constellation of the Eagle. What has previously been a star so faint that a good telescope was required to see it at all became in four days as bright as the most brilliant star in the sky.

In this time its brightness increased about fifty thousand times, and then the star faded again in a few months to its former obscurity.

What happened to that star might happen to the sun, which is the star of our solar system, and such a cataclysm would without doubt utterly destroy all life upon the earth.

DANGEROUS DUST

The sun with the earth and the other planets is travelling towards unexplored regions of space at the rate of about eight hundred thousand miles a day. We know the point towards which it is moving, but we do not know what is between us and the apex of the sun's way.

In certain parts of the sky there are black patches which seem to be immense clouds of cosmic matter obscuring stars or other luminous bodies. In comparison with our solar system these clouds are so large that they are like the whole earth by the side of a pea.

It is possible that in the course of time we shall meet one of these clouds or a dark star, of which there are many, in our journey with the sun through space, and if we do, other worlds will see a new star appear, and our world will come to an end.

Long before the actual collision the influence of the mass we were approaching would be shown by disturbances in the movements of the planets, and at these accumulated year by year it would be realized that the fate of the earth was sealed.

The chances of such a meeting are small, but are real nevertheless. Just as are the chances of being killed on a railway journey. Who can say what is before us when we are being taken into the blackness of space day by day at a rate of more than 600 times that of the swiftest express train?

We may not have to wait, however, until we are carried into a cosmic cloud in outer space or collide with a dark star. From time to time the sun pulls into our system solid masses of matter, some of which might eventually cross the earth's track at the same time as the earth.

ENCOUNTERS WITH COMETS

Most of the large comets which have appeared have been captured in this way by the attraction of the sun and the planet Jupiter. Exactly what the nucleus of the head of a comet is cannot definitely be said, but in all probability it consists of a collection of solid particles which may be the size of small marbles or of footballs, or even larger.

The total mass of a comet can be anything from one hundred-thousandth to one ten-thousandth the mass of the earth.

Nearly all of a comet's substance is concentrated in the nucleus, and this may have a diameter of about a couple of thousand miles—say a quarter the diameter of the earth —or, as in Halley's periodic comet, five hundred miles.

An encounter of the earth with the nucleus of a comet would mean the end of the world. Such a collision is not probable, but it is not impossible. We passed through the tail of Halley's comet in 1910, and also through the tail of another comet in 1861, but that is a very different thing from passing through the head.

The tail of a large comet, though it looks very alarming, really consists of extremely attenuated gas and has effect whatever is noticed when it envelope the earth.

If however, we hit the nucleus of a comet the friction and collision with the solid material in it would probably produce so much heat that all forms of life would be destroyed, and our world would be transformed into a barren rock.

By the laws of probability or chance the earth must have had collisions with comets in the course of its history and others will occur in the future.

There is a close relationship between comets and swarms of meteors or shooting stars. Brilliant displays of shooting stars occur at definite periods, the most noteworthy of which in recent years was in 1866.

A shooting star is usually a particle of cosmic dust which enters the atmosphere surrounding the earth, and is burnt up by the heat due to friction against the air. The bright streak across the sky records its own destruction.

There are, however, many fireballs or meteors which are large enough to penetrate the torpedo net of our atmosphere, and they fall upon the earth as stony or metallic masses known as meteorites, hundreds of which are preserved in museums all over the world.

CELESTIAL BOMBS

In the year 1908 a swarm of solid celestial bombs of this kind, weighing altogether thousands of tons, swept down upon the primeval forest of Siberia, in the Province of Yenisei, and devastated an area many miles in diameter. Had it struck a city instead of a sparsely populated district the fate of the inhabitants would have been that of Sodom and Gomorrah.

Another example of such a bombardment is afforded by a remarkable crater three-quarters of a mile across and 300 yards deep in Northeastern Arizona.

There is little doubt that this cavity marks the place where a large meteorite struck the earth, probably in historic time, and if we had some into contact with a large collection of such solid masses instead of one or a few, the earth would have been reduced to the dead condition of the moon, upon which thousands of similar vast craters are visible.

There are other bodies in the solar system with which the earth could have an accidental but a disastrous meeting.

In January, 1931, for example, an asteroid called Eros—one of a group of some thousands which circulate around the sun between the planets Mars and Jupiter—will come within a distance of sixteen million miles of the earth, that is, about two thousand times the earth's diameter.

IF WE WERE HIT

It is only fifteen miles across and there is no need to fear that it will come into contact with the earth, but on the other hand, no one can say it is impossible for this or another asteroid to strike the earth and thus bring about the actual destruction of life upon the world.

Even if there was no end-on collision, the near approach of any such object to the earth would cause tidal and other effects on the surface and in the interior which would bring disaster to most parts of the world.

The moon itself was once part of the earth and was separated from it by tidal action caused by the sun. The depression of the earth's crust now covered by the Pacific Ocean was probably its birthplace.

At that time the earth and the moon rotated as one body in a day of less than six hours. The moon then slowly receded from its parent, and with its increasing distance there was a corresponding increase in the length of the day.

RETURN OF THE MOON

Looking into the future, the moon will eventually come back close to the earth and, according to Dr. Jeffreys, will then break up to form a ring of fragments around the earth like those encircling the planet Saturn.

While this tidal evolution is going on the sun itself will be slowly changing and will finally cease to shine. If it runs through its life's course steadily it may be expected to light up the earth for a period at least as long in the future as it has done in the past.

An old gentleman arranged to have lessons in boxing. After the first, the professor said to him: "Well, what do you think of your first lesson?" "Very good," replied the old gentleman. "I'll have the remainder sent to me by post, please."

ANSWER TO YESTERDAY'S PUZZLE

World-famous physician prescribes

BEER

LORD DAWSON of Penn, Physician of H. M. the King stated in the House of Lords, July 19, 1923: "There are a number of people who at the end of a fatiguing day are quite unable to digest their food, because their nervous system is too tired. A small quantity of alcohol (such as is contained in BEER) makes them happy with themselves and happy with the world." Alcohol properly taken in proper quantities in moderation serves a useful purpose, by aiding digestion. BEER spells moderation. GOOD BEERS such as the brands named below are good for your health. For sale at all Government stores and beer parlors. Delivery free.

Game Is Scarce In Forest North Of Middle Canada

TORONTO, Ont., Aug. 24.—Ernest Parrington, Game and Fishery Overseer at Island Lake, west of Trout Lake, the most northerly post of the Ontario Department of Game and Fisheries who is in this city at present making his annual report to the department, says game is scarce in the northern areas this year. Fish is plentiful, but owing to the distance of the country from means of transportation no commercial fishing is carried on at Island Lake.

Mr. Parrington, who is a brother of James Parrington, assistant to the Deputy Minister of Game and Fisheries, comes out of the far northern wilds to civilization once a year to report to the Government, and his sojourn in Toronto usually is short. The nearest outpost to Island Lake is Fort Hope, about 200 miles southeast of Island Lake. Prior to going to Island Lake he was stationed at Sioux Lookout and Red Lake.

During the year Mr. Parrington travels over a vast area by canoe and dog team, checking up on the few inhabitants. His chief concern is watching for illegal purchases of furs by traders, and, though as a rule abids fairly close to the law they often continue him long trips through the Far North.

David Belasco said in an interview on his seventieth birthday:

"Poor Ellen Terry had a caustic tongue. I knew a thousand stories about her. Here is one.

"Congratulate me, dear," an actress said to her. "Young Lord Lavalend proposed to me yesterday afternoon, and I accepted him.

"And you congratulate me," said Miss Terry. "Young Lord Lavalend proposed to me yesterday morning and I refused him!"

Churches and Their World-Wide Work

"Whensoever I take my journey into Spain, I will come to you."—*Romans xv, 24.*

PULPIT WORK TAKEN TODAY

Rev. F. A. P. Chadwick to Continue Series on the Scripture Lessons at St. John's Church

DUET OFFERED FROM "ELIJAH"

Rev F. A P Chadwick, the rector of St. John's, will conduct the services in his church, after a brief vacation, and preach both morning and evening. The sermons will be based upon the Scripture lessons for the day, the morning subject being "The Parable of the Vineyard," while the evening theme will be "The Galilean Fishermen and Their Master."

At the evening service Miss Ada Wise and Mr. A. W. Palmer will sing the duet, "What Have I to Do With Thee?" from Mendelssohn's "Elijah." Mr. O. J. Burnett will give an organ recital just before the evening service, commencing at 7 o'clock. The services at St. John's will consist of Holy Communion at 8 a.m., Morning Prayer at 11, and Evensong at 7:30 o'clock.

PADRE PRINGLE TO START SERIES OF SUNDAY STORIES

Occasionally at the evening services of Centennial Church this Padre Wouter, Rev. G. C. F. Pringle is planning to have what he will call a "Story Night." Instead of a regular sermon he will relate some interesting incident out of his varied experiences during ten years as pioneer Yukon missionary, padre overseas, and as sky pilot for nine years in logging camps. This evening will be the first of these anecdote evenings, when he will tell a story entitled "The Quitter."

This morning Mr Pringle will have as his subject "The God of Jacob." His text will be taken from Isaiah xli, 14, "Fear Not, Thou Worm Jacob."

REV. T. KEYWORTH TO PREACH TODAY AFTER VACATION

Rev. Thomas Keyworth has returned to the city after a vacation spent in the Comox district. Whilst there, Mr Keyworth supplied the pulpits of the Courtenay circuit for three Sundays. Rev W. A. Alexander taking the James Bay Church pulpit for a portion of the same period. Mr Keyworth will resume his ministry as James Bay United today, preaching at both morning and evening services. He will also be the officiating minister at the service in the afternoon at the Aged Women's Home.

The pastor's morning theme at Garden City at 10 o'clock, and at Wilkinson Road at 11 18 o'clock, will be "The Generous Eye," Matt. vi, 22 (Moffatt). The evening subject will be, "Too Swift a Pace." Job vii, 6. The Young People's Club will hold a camp fire and corn roast at Clover Point on Monday evening.

First Church of Christ, Scientist

Chambers and Pandora

All Are Welcome

African Leader Is Coming to East

REV. ROBERT LAWS, D.D.

Of Livingstonia, for fifty years a missionary, is coming from Scotland to Toronto to address United Church gatherings at Toronto, Hamilton, London and Montreal. He is also a member of the United Free Church of Scotland.

AUSTRALIAN WILL ADDRESS CENTRAL

Dr. L. Sale-Harrison Will Speak on "Remarkable Signs of the Times"

This evening the special speaker at the Central Baptist Church will be Dr. L. Sale-Harrison, a noted prophetic teacher from Australia, who will speak on the important theme, "Remarkable Signs of the Times. Have we Unmistakable Evidence That the Lord's Coming Is Close at Hand?" Dr. L. Sale-Harrison will emphasize his message by many world events in relation to Bible prophecy.

In the morning, the pastor, Rev. J. B. Rowell, who has returned from vacation, will preach on "My Conversion Test," giving the account of his conversion and call to the ministry.

FINAL SERMONS OF REV. CHAS. BALLARD; PASTOR RETURNING

Rev. Charles Ballard, of Port Moody, will conduct services in Victoria West United Church today. At 11 o'clock the subject of his sermon will be "The Reading of the Veil of the Temple. This evening at 7:30 he will have as his topic "A Great Test Question." This will be the last appointment of bearing Mr. Ballard, as he will return to Port Moody this week. Special music will be given by the girls' choir in the morning and by the senior choir in the evening. The Sunday school will meet at 12 15 o'clock.

The pastor of the church, Rev. H. J. Armitage and Mrs. Armitage, are expected home on Tuesday from their trip overseas

CHINESE CHILDREN HAD BIBLE SCHOOL

Demonstration Given on Wednesday After Two Weeks' Vacation Exercises

Forty-three Chinese children were enrolled at the Bible Vacation School of the Chinese Mission on Pleasant Street, which closed over two weeks' session with a demonstration gathering on Wednesday. Very successful work had been done by the children under the direction of Miss Kronsen, Mrs Mossop and Miss Kelchen. The handwork was especially praised by Rev A. L. Elliot, of Wetaskiwin, Alberta, who himself has conducted several such schools in that province. Scrapbooks for Jubilee Hospital had been prepared. Rev K. T Love, the United Church Chinese pastor, presented the certificates of attendance.

CENTRAL WILL DEDICATE NEW HOME AUG. 31

Revs. F. A Baker, J. B. Rowell and Other Will Speak—Dr. Lamb, Australia, to Hold Conference

LECTURES ON PROPHECY SET

The new church home of the Central Baptist Church, which is being erected on Pandora Avenue, between Blanshard and Quadra, is nearing completion, and the opening services are being anticipated with considerable interest. Mr. G. D. Davis, who is superintending the building operations, expects to be up in the main auditorium ready by Saturday, August 31, when the formal opening of dedication will take place. The key will be turned in the lock at 7 40 o'clock and at 8 the first public service will be held.

The dedicatory message will be given by Rev. A. F Baker, of Vancouver, and several other visiting ministers will take part. The pastor, Rev J. B. Rowell, will give some interesting facts about the work and the progress of the building.

The opening services will be continued the following day, Sunday September 1, and on through the week, when Rev. Wilkins Lamb, a noted Bible teacher from Australia, will conduct a prophetic Bible conference under the title "The Divine Prophecies and the Coming Again of the Lord Jesus Christ Wonderfully Illustrated." Dr Lamb will be the speaker at three services on Monday, September 1, and also each evening at 8 o'clock from September 2 to September 6.

TOC H PADRE AT ST. AIDAN'S

Rev. Leslie Beckley Will Preach for Local Legion at Service This Evening

Previous to leaving on Monday, Rev. Leslie Beckley, of Toc H headquarters, and deputy vicar of All Hallows, London, will preach in St. Aidan's United Church at the evening service at 7:30 o'clock today. The pastor of St. Aidan's, Rev. R. T. Galbraith, is a local padre and organized a Toc H group at Prince George where he was pastor. Visitors are advised to take the Mount Tolmie car.

SOCIAL WORKERS TO GO TO WINNIPEG

Commandant and Mrs. Fullerton Leave Sunday—Adjutant Back at Work Today

Adjutant and Mrs. Merrett, who have been spending their holiday furlough in the Okanagan, left for Poland, have returned to the city, and had the morning holiday at the Salvation Army Citadel. Broad Street. The adjutant is in charge at 11 o'clock, a holiness meeting at 11, a praise meeting at 3 p.m. and a salvation meeting at 7:15 o'clock. Sunday school commences at 2 o'clock, in the citadel, and new officers are being appointed, as that hour are always welcome.

Commandant and Mrs. Fullerton, who have been the resident social workers at the Citadel for the past three years, have received farewell orders, and will be leaving shortly for their new appointment, Winnipeg's Social Institution.

WILL AFFIRM THAT CHRISTIANITY IS TO BE PRACTISED

Rev Henry Knox will conduct both services in Emmanuel Baptist Church today. During the morning hour of worship Mrs. C. W Templeton will sing "The Holy City." The morning hymn of the day will be a message in support of the demand for the practice of Christianity, his theme will be "Say If With Service." The subject of the evening service will be "Cherished Possessions."

REV. H. NIXON TO TURN TO GREAT MEN FOR TOPIC

Helpful and inspiring services await the interested worshipper at Fairfield United Church today, when the pastor, Rev. Hugh Nixon, will speak in the morning on "The Great Christian and His Critics" and at 7:30 o'clock on "Crucial Moments in the Lives of Great Men."

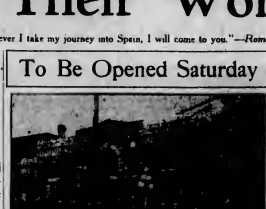
The regular music will be supplemented by two special soloists, Miss Grace Kelly, who will sing in the morning, and Mrs. O M. McClelan in the evening.

VISITOR TO SPEAK

Rev. L. Sale Harrison, of Australia, Morning Speaker at Church of Our Lord

Rev. L. Sale Harrison, of Australia, will preach at this morning's service in the Reformed Episcopal Church, his subject being "Intrigue in a Persian Court." This is an excellent opportunity to hear a preacher of exceptional power. At the evening service Rev Thos. W Gladstone will preach on "Christ Heals the Sick," and before the sermon will read a beautiful poem, entitled, "Jesus Christ of Nazareth."

To Be Opened Saturday



Central Baptist Church, on Pandora Avenue, the Foundation Stone of Which Was Laid on Good Friday, Will be Dedicated on Saturday, August 31.

LIFE THAT LEADS TO HAPPINESS

Rev. J. Strachan Has Hopeful Topic at First Baptist Church Services

"Life's Decisive Battle" will be the subject of the sermon this evening at 7:30 o'clock, at the First Baptist Church. The life that leads to victory, happiness and satisfaction will be discussed. The choir will sing Bullwin's "Pastor, Keep Us in Thy Care." "The Reality of the Unseen" will be the preacher's theme at the morning service, at 11 o'clock. Rev. R. McIntosh and Mr. H. E. Batt will sing Smart's "The Lord Is My Shepherd."

Mr. Strachan will preach morning and evening. The church school will meet at 11 o'clock. The midweek meeting of the church will be held on Wednesday evening at 8 o'clock.

CHRISTIAN SCIENCE CHURCHES TO DEAL WITH THEME "MIND"

All churches and societies of Christ, Scientist, branches of the Mother Church, the First Church of Christ, Scientist, in Boston, will use the lesson-sermon subject "Mind" for their lesson-sermon today, with the following golden text from Romans, xii, 2: "Be not conformed to this world, but be ye transformed by the renewing of your mind, that be may prove what is that good and acceptable and perfect will of God."

Sunday morning services at First Church of Christ, Scientist, Victoria, are held at 11 o'clock. Evening services are at 7:30 o'clock. Wednesday evening services, which include testimonies of healing, are held at 8 o'clock. A free reading-room for the public is maintained in the Bayward Building.

REV. O. L. JULL WILL TELL HOW TO THINK

St. Mark's Vicar to Speak on "Scientific Thinking"—Baptism in Morning

The following services will be held at St. Mark's Church, Cloverdale, today: Holy Communion at 8 o'clock, Matins and sermon at 11 and Evensong at 7 o'clock. Rev. O. L. Jull, vicar of the church, will preach for his morning subject, "The Finding of the Boy," and at Evensong he will preach upon "Scientific Thinking." The sacrament of Baptism will be administered at the morning service.

Mrs. Wiffen Closes Evangelistic Period At First Spiritual

Lilly P Wiffen, Spiritualist evangelist, who has been conducting the rostrum at First Spiritual Church, Harmony Hall, 724 Fort Street, during the month of August, will conclude her closing service at 7:30 o'clock this evening, the theme of her address being a continuation of "Spirit Teachings." Mrs Wiffen, who has been engaged in evangelistic work in the State of Washington during the past few months is both a very gifted and forceful speaker. There will be healing at the close of the service.

UNITY CENTRE TOPIC IS PATH TO GREATNESS

This morning at 11 o'clock the services at Unity Centre, 724 Yates Street, will be in charge of Mrs. Gordon Grant will speak as usual to the children and talks will be followed by a chorus given by the children. The address to the adults will be on "The Woman of Sychar." Miss Harding will sing a solo. In the evening Mrs. Grant will discuss "The Path That Leads to Greatness."

On Tuesday afternoon at 3:45 o'clock there will be a study class, after which there will be a healing meeting. On Thursday evening, at 8 o'clock, the correspondence school class will be held. The final study will be taken on prosperity and the law which overcomes lack. Anyone interested is invited to attend these study classes. Admission is free.

BRITISH-ISRAEL LECTURE

Mr. W H Blackaller will continue his lecture on "The House of David and the Throne of David" on Monday at 8 p.m. in the Board of Trade Building, 731 Station Street. The public is invited.

GRACE SCHOOL CLOSED TODAY

Children Gave Demonstration of Good Work Done During Past Fortnight

Reporting to a good company of mothers and average attendance of thirty-five children at the Bible Vacation School held by Grace Lutheran Church during the last two weeks, Rev. T. Lawson conducted on Friday afternoon a demonstration of the regular daily session, including Scripture memorisation, hymns, worship and handwork.

A special feature was the highly creditable work of a class of eight girls in the place under Miss Catherine Brown. The primary children entered with zest into a dramatization of Noah's Ark and the books of the Bible. Miss Anna Miller, who has conducted the intermediate section, gave the attendance cards. Mrs. Janssen and Misses Albertine Miller and Effie Janssen assisted in the regular school work.

Rev. D. A. Foulie at Erskine Church on "Excess Baggage"

Divine service will be conducted today in the Tillicum Road Presbyterian Church, the Gorge, at 11 o'clock, and at Erskine Presbyterian Church, corner of Harriet and Lubbe Road, at 7 o'clock. Rev. D. A. Foulie, B.A., of Penticton, who is supplying the pulpit during August, will take for his subject at the Gorge, "The Print of the Nails," and in the evening will preach at Erskine Church on "Excess Baggage." The usual weekday services will be held at the Gorge on Tuesday evening and at Erskine Church on Thursday.

PRESBYTERY TO MEET TUESDAY

Dr. Stevenson Will Lecture on "Scottish Covenanters" on Wednesday

The Presbytery of Victoria will meet in St. Andrew's Church on Tuesday, August 27, and will consider a number of important matters. Representatives from the outlying districts, as well as ministers and elders in the city, will be in attendance. This will be the semi-annual meeting when reports of the various standing committees will be presented. There will also be the election of Moderator. The present incumbent is Rev. Samuel Lundie B.A., of Sooke.

On Wednesday evening next a public meeting under the auspices of the Presbytery will be held in St. Andrew's Church, when the Rev. R. M. Stevenson, M.A., D.D., F.R.G.S., will give a lecture on the "Scottish Covenanters." This meeting will commence at eight o'clock and is open to the public. Dr Stevenson is not a stranger in Victoria, as he has been supplying St. Andrew's pulpit for several weeks past. He is recognized not only as an eminent preacher, but also as an outstanding speaker. There will doubtless be a large gathering to greet him on Wednesday evening.

Local Minister to Supply Douglas St. In Absence of Pastor

Services will be conducted today at the Douglas Street Baptist Church, Cloverdale, at 11 o'clock and in the evening at 7:30. Rev. F. W McKinnon, the pastor, is taking his vacation and the Rev. William Stevenson, of Victoria, will be the speaker. Sunday school at 3 o'clock and prayer meeting Wednesday evening and the B.Y.P.U. will hold its weekly meeting on Tuesday evening.

St. Alban's, Oaklands

Rev Leslie Beckley will preach at the church service at St. Alban's, Oaklands, today. Mr. Beckley, who is on leave in this country, has been for the past year intimately associated with Rev P. B Clayton, better known as "Tubby," the founder of Toc H, and vicar of the church of All Hallows, Barking by the Tower. Holy Communion will be at usual at 8 o'clock, and Evensong at 7 o'clock.

There has not been a president of the United States in the last sixty years who has not been a church member. Of the present cabinet every member is a member of a church. Five are Presbyterians, two are Congregationalists, there is one Unitarian, one Methodist, one Baptist and the president is a Quaker.

METROPOLITAN ORGAN RECITAL FOR TOURISTS

Mr. A. L. Bates, of Saskatoon, to Render Programme at Close of Evening Service

DR. SIPPRELL TO PREACH TWICE

By way of hospitality to tourists and visitors, a special after-service will be given today at the Metropolitan Church at the close of the public service. A few words of welcome and appreciation will be offered by the pastor, followed by an organ recital to be given by Mr. Arthur L. Bates, a talented organist from Third Avenue United Church, Saskatoon.

Mr. Bates' programme is exceptionally attractive to all music lovers and will include the following numbers. "Intermezzo" (from the Third Symphony—Widor); choral prelude by Brahms, Karg-Elert, and Harvey Grace; "May Night" (Palmgren); "Vivace Molto" (from Pugnos on "Ad Nos—Lasst"; Mrs Bales will sing "Hear My Prayer" (Dvorak).

The theme for study at 11 o'clock will be "The Life Abundant," and at Hour 1, Bates a talented organist. Inspiration and instruction will be provided in the religious addresses by the pastor, Dr. Sipprell.

On Wednesday evening at 8 o'clock a fully midweek service will be held in the auditorium conducted by the pastor of the church.

TO STATE WHY GO TO CHURCH

Dean Quainton to Show Need of Corporate Devotion—Last Sermon of Series

"Under the title of "Why Go to Church," Dean Quainton will preach this evening at Christ Church Cathedral on the place of corporate devotion in the religious life. This is the last of a series dealing with difficulties confronting the modern mind. There will be Morning Prayer and Sermon at 11 o'clock, and Holy Communion at 8 and 8:30.

DR. BARTON ON "GETTING RICH"

Dr A P Barton will occupy the pulpit of the Progressive Thought Temple, 848 Pandora Avenue, today. He will take for his theme "Getting Rich." In sermon he will explain the New Thought philosophy pertaining to the accumulation of wealth. Dr. Barton is a recognized authority on the power of mind. He has been on "Mental Power" having formed the Mind Power Institute, with conferences. On Wednesday evening at 8 o'clock Dr. Barton will continue his series of health lectures on biochemistry, the subject on this occasion to be "Potassium in the Body—Potassium: Dr. Barton's Full Study Classes will commence on September 26 and the enrolment will take place on September 23. The season's classes will be on "Foods and Chemicals According to Biochemistry."

TO DEAL WITH LIVE QUESTION

"Is Modernism Christianity?" St. Dr. Stevenson's Evening Topic at St. Andrew's

Rev. Dr. R. M. Stevenson will preach at both services today in St. Andrew's Presbyterian Church, corner of Douglas and Broughton Streets. His morning subject will be "The Bible Put to the Test," and in the evening he will answer the question, "Is Modernism Christianity?"

The choir music for the day will be as follows: Morning solo, "The Voice in the Wilderness" (Prindle Scott); Mr. J. Matheson, anthem, "Jesus, Gentlest Saviour" (Marks); solo, Mrs. Bowman, "Morning Star"; Mr. Gower, "My God, to Thee" (Casey); Mrs. Le Pevre, anthem, "The Lamb Shall Lead Them" (Bunger, solo, Mrs. Grant).

New Thought Temple

Mrs Davis will discuss the inner meaning of "The Third Commandment" as the subject for her morning service at the New Thought Temple, 842 North Park Street. The evening topic will be a continuation of a study of the Commandments, is Sunday the Sabbath Day? What is the inner meaning of the Fourth Commandment? Does man require one day? A special solo will be given. Mrs J B Shaw will act as soloist.

On Wednesday evening Mrs. Davis will talk upon "Complaints, and their effect upon health and the spiritual unfoldment of man. Everyone is invited.

St. Paul's, Presbyterian

The Rev. J. S. Patterson, minister of St. Paul's Presbyterian Church, having returned from a tour abroad, will occupy his own pulpit morning and evening today. At the morning service he will deliver one in a series on "The Inspiration of the Holy Scriptures," and in the evening his subject will be "Truth and Love." A bright music service will commence at 7:15 p.m.

Anglican Diocese Of Gibraltar Is 3,000 Miles Long

Bishop's Jurisdiction Stretches From Gates of Mediterranean to Central Asia.—Spanish-Speaking Christians Around Caribbean Sea Unite in Hispanic Evangelical Congress

New Pioneer Presbytery On Hudson Bay Railway

PERHAPS the longest diocese in the world is that which comes under the care of Dr. F. C. N. Hicks, the Anglican Bishop of Gibraltar. It stretches from the Mediterranean on the west to the Caspian Sea, on the borders of Central Asia, and is about 3,000 miles in length. This outrivals any of the farflung Canadian bishoprics, and embraces much more historic territory than theirs, including, as it does, the places that were famous in one of the greatest periods of the world's history—Athens, Rome, Constantinople; and it also is the scene of what was at one time an undivided church.

Of necessity meeting at long intervals, the Synod recently held in London its second meeting after an interval of twenty-four years. Here were gathered about fifty clergymen from spheres as distant and diverse as Smyrna and Madrid, Bucharest and Tunis—poles apart in climate and environment, and problems. It may be remembered by a report in The Guardian in church papers, that the Bishop of Gibraltar Acting as chaplains at esperanto, multilingual in business men, scattered families, governesses, nurses, and secretaries the clergymen of this widespread diocese give to them the services of their church.

Special interest was attached to the meeting because it was held upon the eve of the 19th century and a quarter anniversary of the occupation of Gibraltar by the British on July 18, 1704. The Archbishop of Canterbury referred also to the close points of contact that were given through the diocese with the Eastern Orthodox Churches within whose bounds the Anglican services are maintained. The present hopeful relations now existing between the British and the Eastern communions should be, the Archbishop said, assiduously cultivated.

A missionary presbytery and liberty to remain one for many years, the Prince Rupert Presbytery of the United Church, is distinguished for having within its bounds the farthest inland and farthest north preaching station of this church, that of the Queen Charlotte Islands and Dawson in the Yukon. It was the pioneer field both of British Columbia missions to the Indians and of the marine missions, and is not exceeded by any presbytery of the church in the number of Indian missions and hospitals.

Another frontier presbytery of the United Church, that of Hudson Bay will be set up next month. This is interested as a free gesture towards the country's future as it will embrace the new settlements along the railway line, and will comprise of eleven pastoral charges, the main one being Le Pas will be the meeting point.

Indicative of the attitude of solidarity existing in regard to the Spanish speaking peoples of the West Indies and South America was the recent meeting of the third of the Hispanic Evangelical Congress at which, due regard to the occasion was given for the first time to a Protestant gathering by the Government of Cuba. The Congress included delegates from Protestants in the Caribbean Sea, almost all of the Latin race and ethnic origin, with Spain as their common mother, and colonies, states, Indians and negroes have mingled their blood and tem-

perament. Mexico, Venezuela, Santa Dominica, Haiti, Cuba, Porto Rico and others were represented by earnest and highly capable Christian delegates, who established still closer contact with each other and arranged greater co-operation in their missionary work. Protestantism is woefully weak throughout this area, and must also struggle against the prevailing secularistic tradition and influence of the Latin mind on the side of the Atlantic. One observer found that the Christians there seem to have been shut off from the world currents in theological thinking, and such movements as those of Stockholm, Lausanne and Jerusalem.

KNOX PASTOR ON "HEROES OF FAITH"

The pastor, Rev. T. Haven Davies, M.A., will conduct both services today at Knox Presbyterian Church, corner of Gladstone and Stanley Avenue. "Heroes of Faith" (Rom. xi, 14) will be the theme of the sermon at 11 o'clock. The subject of the address at 7:30 will be, "An Irreducible Fact" (1 Tim. iv 9).

The Sunday school will meet as usual at 9.45 o'clock.

Discovery May Set Welsh Christianity 200 Years Earlier

An antiefts—a kind of tile—bearing the sign of the Cross, and dating back to the third century of old era, has been found during excavations on the side of the Roman fortress at Caerleon, Monmouthshire Mr Nash-Williams, of the National Museum of Wales, who is in charge of the work, has expressed his belief that this is the first piece of interest as a free gesture towards Christianity in Roman Wales that has yet been discovered, and that it would seem to show that Christianity reached Wales at least two hundred years earlier than was commonly supposed.

By way of fraternal exchange Rev. R. Gower, of the Methodist Church, of this city, and Rev. R. E. Wood, of Victoria, of the Anglican Church, took each other's duty on August 11 and 18, returning home for the services on August 25.

It was announced at the celebration in Westminster Abbey of the eighty-fifth anniversary of the founding of the YMCA by Mr George (afterwards Sir George) Williams that this organization had 10,000 centres in fifty-four countries

SUNROOM PROVES PERMANENT JOY

Enclosed Porch Adds to Beauty and Usefulness of Home—Cost Is Not Great

Years ago open porches were considered to be quite essential to a home and the well-appointed house was always constructed with roomy porches. Of recent years, however, the open porch seems to be on the wane, its place being taken by the sunroom or sun parlor, as it is variously called.

This change in design may be due to the influence of the city where the home owner preferred to do his lounging in privacy, or to a lack of space to spread out the structure.

The enclosed sunroom has a distinct advantage over the open porch in that it can be used during the entire year. The use of the open porch is largely restricted to the hot weather of Summer when the family can sit out of doors in comfort. At most the open porch was used three months of the year, the rest of the time being practically useless.

By enclosing the porch and filling its walls with many windows, the usefulness of the space becomes increased to a marked degree. During the hot Summer months the windows may be opened and screened, serving as effectively as an open porch. Later, when the temperature drops, the windows are closed and the sun porch becomes a comfortable, enclosed room. By installing a radiator or warm air duct the sunroom is available during the coldest days. It virtually becomes another room of the house.

The advantages of the sunroom over the open porch are immediately apparent to the home owner who finds when remodeling that the cost of enclosing the porch is not excessive.

Its advantages far outweigh the additional expenditure. Thus the cost of enclosing the porch becomes an investment that pays big returns in use and comfort.

A Modern Sun Parlor Proves Great Comfort

The Sunroom Becomes One of the Most Popular Rooms of the House, and the Wise Home-Owner When Modernizing Should Consider Thoughtfully the Advantage of Such a Room.

At a meeting of the Esquimalt to construct a tarvia driveway and Municipal Council a motion was cement sidewalks. Cost of the work passed to commence work on the including excavations of rock, was grounds of the Municipal Hall and estimated at $1,686.

Have you an *old fashioned* Kitchen?

Would you like your kitchen to have all the built-in conveniences found in the new, modern homes?

Then

let us plan and modernize your kitchen for you. The cost will be surprisingly small. Ask us to submit an estimate and convenient plan of payment.

When Remodeling, the Open Porch Was Turned Into a Sun Parlor (Above). Open Porches Are Often Enclosed When the Home Is Remodeled, as the Sunroom With Open Windows Is as Airy as the Average Porch.

Modern Exterior Calls For Modern Interior

When the question of modernization arises emphasis should not be placed on the exterior lines of the dwelling to the disadvantage of the interior.

Too often care is taken with the exterior because this is the part that is seen by strangers. True, the casual passer-by judges the residence by the appearance of the outside, yet the house is made to live in and the modernization is complete only when the interior has been improved in a satisfactory manner.

COMFORT AND BEAUTY

It is vitally important that the interior of the house give both comfort and beauty—comfort to meet the bodily needs of the occupants and beauty to feed their mental enjoyment.

When remodeling the interior of the house the arrangement of the rooms is of prime importance. The floor plans should be thoughtfully studied and alterations made to make convenient the various parts of the dwelling.

The kitchen and dining room form a unit of their own. So do the bedroom and bath. Often these may be placed on the second floor of a house, but in the case of a bungalow or cottage, they should be grouped together on the first floor. The living room forms a unit of its own, as do the entry, the hall and the staircase.

Design your dwelling with the rooms of each group together. The bathroom, for instance, should be placed in its proper group and never as a part of another unit—off the kitchen, perhaps, as is often the case with makeshift alterations.

The arrangement by groups adds to the convenience of the occupants of the home. It increases their bodily comforts.

STUDY EACH ROOM

Each room in its turn deserves careful study. The windows, their number and location must be considered. Have plenty of natural light, but let the windows effectively balance the wall space. Too many windows are as bad as not enough.

The floors of the interior will usually be of hard wood, although in rooms of occasional or unimportant use, such as the attic, soft woods may be employed. Hard wood costs but little more than soft wood and when remodeling a wise plan is to use hardwood, because of its durability, handsome appearance and true economy.

Electrical fixtures should be so placed in each room as to afford the best lighting. Plenty of electrical outlets are necessary, as floor lamps are scattered here and there in many rooms.

The kitchen—the workshop of the home—requires a special study. The sink, the built-in cupboards, the stove and the refrigerator must be placed to save steps. Each must dovetail with the others in aiding the housewife with her work.

THE DECORATIVE SCHEME

The interior decorative scheme is still another problem. Each room requires its own treatment, and only a study of the room can determine the most effective design in wall fints, window and door trim, floor furnishings and furniture.

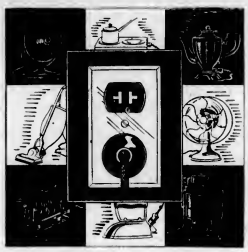
Yet the decorative scheme strikes the keynote of the home. Its treatment reflects the character of its occupants. It is vitally important that it be correct.

The basement is still another unit of the house where convenience is paramount. The heating plant and coal bins (if coal be the fuel) must be located with relation to the stairs from the main floor, overhead and to the drive on which the coal truck will stand when unloading.

The laundry and drying room are important to the housewife and must be laid out with labor saving in mind. Here also will be found the workshop of the man of the house if he is handy with tools and the children's playroom.

The basement can be made into a habitable group of well-lighted, cheerful rooms if thought and care are used.

Modernize the interior of the house, by all means, for neglect may mean lack of home comfort, conveniences and beauty. These are necessary to complete the fullness of life.



Electrical Convenience—

never beyond a woman's MEANS but often beyond her REACH

What a vast difference between the home that is adequately wired for electrical convenience and one that lacks proper wiring facilities!

CONVENIENCE OUTLETS

tell the story. Your present home can be modernized for quick, convenient electric service by the installation of convenience outlets. Consult your electrical dealer or contractor.

Hand-Fashioned Woven Furniture

Gives a "Homey" Atmosphere to a Room

Hand-Fashioned Woven Furniture, finished to match the color scheme of sunroom, living-room or veranda, gives that effect that well be termed "Homey Atmosphere." Particularly is it recommended for the sunroom, as in the average home this is the cheerliest of all rooms. The development of Stick Reed Furniture has brought our types and designs of furniture both luxurious and comfortable—allowing for many striking color combinations. Our stocks include almost every type, many handsomely upholstered three-piece suites, and all moderately priced.

Cameron Lumber Company, Ltd.

Watch Humidity—
Health Demands It

The air in a house will evaporate from ten to fifteen gallons of water a day under normal conditions.

Very often dry air in heated houses is conceded to be responsible for lower resistance during the Winter and humidifiers do a great deal to remedy this condition. With the requisite amount of moisture the rooms may be kept in the neighborhood of 68 degrees without the occupants complaining of cold.

Proper humidity is important in the home and the home owner should install some sort of equipment to provide the needed moisture. It is necessary not only for the sake of good health but also to safeguard furniture, oil paintings, rugs, pianos and house plants.

N.Y. MARKET CLOSED FIRM AT WEEK-END

Bull Activity Persisted and Prices Remained High—General List Strong at Closing

GOOD VOLUME OF TRADE IS DONE

NEW YORK, Aug 24—The concentrated bull campaign in selected stocks was pushed forward with unremitting vigor in today's two-hour session of the stock market, but several of the recent favorites appeared to tire and sold off moderately.

Week-end profit taking was for the most part readily absorbed, however, and the general list closed fairly firm. Trading was in good volume the day's turnover exceeding 2,100,000 shares. Operations for the advance again centred in the communication Steel and Chemical shares.

American Telephone rose 5 1-2 points, to reach the 300 mark for the first time, and International Telephone continued its upward climb, rising more than 8 points to another new high for the present stock at 145.

Foreign exchanges were quiet; sterling holding at $4.84 13-16. The convertible bond issues were the bright spots today in an otherwise dull market. Record high for all time were estimated by American Telephone convertible 4 1-2's, and

FEW SIGNS OF ACTIVITY SEEN

SATURDAY A DULL MORNING ON TORONTO STOCK EXCHANGE

Stock of Ajax No. 5 Goes to New All-Time High—Most Others Dormant

TORONTO, Aug 24.—With the exception of Ajax, Amulet and Big Missouri, the Standard Stock Exchange showed few signs of activity this morning.

News that Ajax No. 5 was expected by officials to blow in within the next week, drove the stock up twenty-three points to a new all-time high of $2.62 with a firm close at $2.60. Considerable reports from the property resulted in renewed public confidence in Amulet and the stock appreciated twenty-two points from last night's close.

Big Missouri continued to display marked weakness and closed six points down.

Acme Oil and Gas showed strength and moved four points to 86 cents. This company's holdings adjacent to Ajax make it extremely interesting at the present time.

The balance of the market was dormant, with Sudbury Basin fluctuating between $8.35 and $8.40 closing at $8.35 on a fair turnover of sales.

Going Higher During Week Says Whitney

(Brason, Brown & Co., Ltd.)

NEW YORK, Aug 24.—Whitney, of the Wall Street Financial Service, says: Profit-taking in Saturday's session was somewhat accentuated by the fact that so many issues have advanced radically in the last week or so that there was a good deal of temptation to do some cashing in. The market, however, made a good enough job of absorbing these profits to warrant the assertion that there was nothing in Saturday's market which would in any way interfere with or minimize the position taken here that the market is going higher.

As we approach the end of the month we might well get a firming up of call money. But I believe that whatever tendency we are to see in the market will be more apparent than any of the month-ends for some time past. As about the close time as the end influence is exerting itself, we will have the next brokers' loan statement, and, while this will undoubtedly show a sizeable increase, I think the market will exhibit the same disregard to it as it did last week. The correct procedure, therefore, is to use every trading day rally as a means of acquiring recommended issues for further advance.

The copper group lost little time in fulfilling predictions; it is in the renewed upsetting in anticipation of both an increase in the metal prices and a general increase in the dividends of copper stocks. In the group Anaconda is now approaching as one as a prospective $8 dividend payer and Kennecott looks to be bought as a future $6 dividend payer, as well as Kennecott, which is already too low as a $4 stock, and particularly so when it is about to be placed on a $5 basis. Expect that the new high for the year in American S. & R. when it was recommended around 70 yesterday morning, the day was temporarily being held back simply by the fact that so many substantial trading profits were available in them at the close of the week that have to wait for moderate recessions.

From a major aspect, I think the 1929 move has barely, in our estimation, run half way to all the minor setbacks for buying the Standard of New York and New Jersey as well as Pan American, General Asphalt and Tidewater.

The rails are in a corresponding position, and while, perhaps, there is no general advance scheduled for the group this week, there are plenty of individual issues ready to go higher, particularly Atchison, Western Pacific, Lackawanna, Erie & St. Paul preferred, the last mentioned of which is running ahead of the group by recording a new high in advance of last, in food products group While Rock is a new candidate. All or part of the preferred will be retired and the stock placed on a $4 basis. Whether it will end up in Standard Brands or United Food Products we do not know, but we do know that before acquisition by either, it will be 10 to 12 points advance. Railways, continue to favor American Industrial, Worthington Pump, Remington Rand and Grigsby Grunow for new advances.

WHEAT PRICES AVERAGE LOWER

FAIR SUPPORT DEVELOPS ON DECLINE IN CHICAGO MARKET

Favorable Harvesting Weather in Spring Wheat Area With Movement Increasing

(B.C. Bond Corporation, Ltd.)

CHICAGO, Aug. 24.—Wheat prices averaged lower, due to a decline of 1½ to 1½ in Liverpool and on weekend evening up, fair support developed on the decline. Nothing was heard on export business, but the fact that American markets declined during the day while Buenos Aires finished unchanged, was taken by some bearish operators as suggesting that there might be a good business done overnight.

Favorable weather prevailed in the Spring wheat area for harvesting, and the movement is increasing, with ninety-five cars of new at Winnipeg.

Dry weather and crop deterioration reports from the corn belt advanced prices early, with December touching 100, the best figure since August 2, but the weekly forecast included a rather general showery period later in the week, and when it had rained, corn reacted from the best figures. September was easy on the in-season move of old grain.

Oats and rye were influenced mainly by the action of other grains.

WINNIPEG MART VERY ERRATIC

TRADE FAIRLY LARGE DURING SESSION, TAKEN AS A WHOLE

Only Temporary Upturn After Early Offering Absorption—Coarse Grains Dull

(Brason, Brown & Co., Ltd.)

WINNIPEG, Aug 24.—Wheat: Market was again extremely erratic today, trade being fairly large during the entire period, but there was very little doing during the latter part. Opening prices were 1 1-8 to 1-4 lower, with buying of yesterday's liquidation being in evidence in Liverpool, that market closing 1 1-8 to 1-4 higher, when due 1 1-8 higher. After the early offering had been absorbed, there was not much pressure, and local bulls forced prices up 2 1-2 to 2 3-4 cents from the opening low mark without taking much wheat.

This upturn was only temporary, as offerings again increased and with Chicago Sheets weakness, prices eased off quickly, reaching new lows for the day, from which point slight reactions were recorded.

A small export business was worked overnight to the U.K., but figures were not available, as it was worked from seaboard stocks. Local shippers and millers were doing practically nothing. Offerings were again light and spreads about unchanged. There was some seasonal inquiry.

Weather in Western Canada continues fine and temperatures were high. Harvesting is proceeding under favorable conditions and country marketings are beginning to increase, being 813,794 bushels on Friday, against 153,196 on the same day last year.

Threshing yields are up to expectations, and is proceeding rather better than was anticipated, and the new crop undoubtedly will be high in protein. A direct cable from Argentina stated the weather was dry, but the market was overbought. With the tremendous supplies of wheat in North America, we look for the market to work up, regularly lower until such time as the foreigner comes in and takes good quantities. Winnipeg futures closed 3 1-8 to 3 1-8 lower.

Coarse grains: There was no feature to these markets again today; offerings were light, but competitive demand was very ordinary, and no export business could be traced. Oats closed 1-2 to 3-4 off; barley 1-2 lower to unchanged and rye 1 7-8 to 7-8 lower.

Flax: This market showed some strength, closing 3 to 3 1-2 higher However, there was very little doing but there was practically nothing for sale.

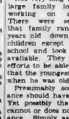
Nanaimo Mines to Resume Operation

The B.C. Bond Corporation wish to announce that, owing to a change in the rules of the New York Stock Exchange, the time of the broadcasting of the morning stock quotations given by them over CFCT will be changed. These quotations will be given over the air from 9 to 9 o'clock each morning, instead of from 8 to 8:30, while the time of the evening broadcast will remain the same, that is, from 6 to 6:20.

Money at Work

Earning—Saving—Investing



If a Quebec workman is killed on the job his children are assisted in getting an education.

A section of the Workmen's Compensation Act in Quebec provides for assisting children of workmen killed while on the job to get an education.

Not very long ago the father of a large family lost his life while working on a new building. There were seven children in the family ranging from sixteen years old down to two. The children except the youngest left school and took some job if available. They hoped by combined efforts to be able to save enough so that the youngest could go to school when he was old enough.

Presumably some sort of insurance should have covered the case. Yet possibly the average workman cannot or does not afford life insurance. Simply as a result of an accident, then, his children are cut adrift before they have had a chance for any schooling.

Perhaps this section in the Workmen's Compensation Act of Quebec providing for educational assistance to children whose fathers were killed while working would help do away with such cases.

The Bond Market

We would draw the attention of investors to the present undervalued position of the Security Market.

In the opinion of leading economists and market students the trend of bond prices will be towards steadily higher levels.

The "firming up" of Government Bond prices, particularly long term issues, is significant, and often foreshadows important movements in the general bond market. There are many seasoned bonds at very low levels.

OIL STOCKS TRUST SHARES

An Investment Trust Established and Managed by United States Shares Corporation

Reports of leading oil companies as they are published are showing increased earnings for the current year and these improved conditions are turning public attention to leading oil stocks.

An especially opportune time to buy stock in any industry is when it is recovering from a period of depression and the best way for an investor to share the prosperity of the industry in to buy into the best of the group. Reference to our circular on Oil Stock Trust Shares shows that the best companies were included in the original portfolio and that they are still held.

A telegram from the United States Shares Corpn. states that its research and statistical department forecasts present indications that the net earnings of leading oil companies will show not less than 18% higher in 1929 than 1928.

FINANCE — COMMERCE — MARKETS

BUYING IS ON FAIRLY BIG SCALE

Has Persisted During Past Week at Toronto—Purchases of Selective Character—Interest on Move

FAVORITES CHOSEN ARE SOUND ISSUES

All but Four Stocks on Toronto Exchange Record Advantages—Distillery Stocks Shake Off Doubt

(Brannon, Brown & Co., Ltd.)

TORONTO, Aug. 24.—Buying of stocks over a fairly large scale has persisted during the past week. Purchases have been of a selective character. Interest has moved over the list from one stock to another and those favored particularly are sound issues which have not recovered from the May decline to any extent, while at the same time they have made good progress in business and profits. Very few companies listed can be found that have not made headway in earnings this year and, in not a few cases, gains in profits have been pronounced.

Out of forty-five stocks traded in on the Toronto Stock Exchange during the past week, all but four recorded advances.

Among the shares to make the most pronounced gains have been Famous Players, Building Products, City Dairy, Intl. Nickel, Hunts "A" Shares, Canada Cement, Mason-Risch, Imperial, Standard Steel, Page Hersey, Canadian Oilproducts, Bathurst Crawley, Imperial Oil, Service Stations and Tombyline. In every case mentioned official or semi-official reports are that appreciable increases in earnings have been entered this year to date.

Moore Corporation, Canadian Gypsum, DePonest and Imperial Oil each gained over 5 points, while Durant, Service Stations, Cement, Hunts "A" and Intl. Nickel were up 4 points up.

The Distillery stocks appear to have shaken off the uneasiness that has attached to them for some time owing to the propaganda against exports of liquor. Confidence is expressed that the annual statements of Walker and Distillers Seagram, which will appear later this year, will make a favorable showing. The advance of 1-1-2 points in Hiram Walk reflects improved operating results this year.

IGNORE BROKER LOAN INCREASE

EVEN AMATEUR TRADES RELUCTANT TO PLACE SELLING ORDERS

Week-End Profit-Taking of Normal Dimensions—Many Old-Timers Still Pessimistic

(B.C. Bond Corporation, Ltd.)

NEW YORK, Aug. 24.—Our anticipation that the market would ignore the increase in brokers' loans was fully justified. Even the amateur traders, who usually rush to sell at the opening when the broker loans figures are rising, were reluctant in placing selling orders yesterday morning and within hours saw the strength in the pivotal issues, they rushed to buy instead of selling. The week-end profit taking was of normal dimensions, and should also be in evidence today but only in moderate degree.

Many old-timers are still wondering where the market is headed for and insist that a crash is imminent. Their predictions now over, are one new. We have heard them saying the same thing many times before, and whenever the corrective reaction develops, they always come forward saying "we told you so." What they were really predicting was a protracted reaction but what actually developed was one of the normal movements which are characteristic of all markets in progressive times.

As long as prosperity continues, the stock market will show gains. The present situation is satisfactory for one particular reason, and that is that the advance was not general. Individual issues and individual groups have been gains, and all who follow events know the reason why. Westinghouse is a typical example. This stock made tremendous gains this year-end. On the heels of the gains came the announcement of a very large order placed with this company by the Soviet Government. Here we see a good reason why Westinghouse should be worth-while points more this week than it sold a week ago. Similar is the condition in many other issues and those who have spectacular gains in individual stocks must realize that their advance was warranted. We believe that many more issues will move into higher territory, but the whole structure of the market requires careful correction of commitments. Even more important is time as a factor, and we again recommend profit taking here and there in order to be in a position to take advantage of new opportunities as they develop.

MOVING UPWARD

General Motors is gradually moving upward, and, though it always encounters large offerings, the volume of the stock has been improved greatly in the recent weeks. Very few are now willing to sell out at these levels and the movement of the last few days was mistakenly shown that the buying is much better than the selling. The enormous expansion into various foreign countries in the twelve months promises new sources of revenue, which should offset any loss that may develop through a decline in depreciation, or any other of its models. We recommend further accumulation in General Motors.

Central Alloy Steel has not followed the general trend in the steel group. A close check-up of the movement of the Curtiss issues show that "CEE" usually catches up with the group gain when everybody is completely disappointed with its action. With all the other issues now at their top, "CEE" should catch

1 BIRTHS

CLARKSON—At St. Joseph's Hospital, on Friday, August 23, 1929, to Mr. and Mrs. Clarkson, 1212 Beckley Street, a son.

KENT—At St. Joseph's Hospital, on August 24, 1929, to Mr. and Mrs. J. Kent, 2034 Cook Street, a son.

4 CARD OF THANKS

Mr. Joseph Dowell and family wish to thank all those who sent flowers and expressed sympathy in their recent bereavement. Also the kind of a human side and weather.

Mr. Archie McNeill and relatives of the late William McNeill desire to express their sincerely thanks for the kindness shown to him and words of consolation and the beautiful flowers sent during their recent bereavement. Also thanks for the attendance service, and for the cars sent across at St. Joseph's Hospital for Mrs. Mildred Stevens during her illness. Especially Bill and Miss Gunn, his fiancé and friend.

Mr. and Mrs. A. S. Orlando and family desire this opportunity of thanking their many friends for kind words of sympathy and for the beautiful floral tributes, also for the kind friend and loyal friend, also to Dr. A. C. Bentley and staff and nurses of the Jubilee Hospital for their untiring efforts.

Mr. A. Tuddy and family wish to thank their many friends for their kind words of sympathy and for the beautiful floral tributes and expressions of sympathy in the loss of their loving wife and mother.

5 IN MEMORIAM

In memory of
LEWIS CARRICK
Drowned in Victoria Harbour, August 26, 1924.
Age 20 Years.

Placed on to a higher life

SMITH—In ever loving memory of Isaac Harris Smith, who passed away August 26, 1924.

O that God blessed is our soul.
And sweet and fair.
And all is right that seems most wrong.
If it be his will.

Inserted by his widow and family.
Oakwood Street, corner Bay.

HOUSES FOR SALE (Continued)

CRAIGDARROCH BARGAIN

WE have been favored with the listing of a house in this high class residential district, which we can offer at a REMARKABLY SACRIFICE, WITH FULL CONVENIENCES, and on terms that will appeal to the most cautious. There are two good-sized bedrooms, also maid's room, bath, and lavatory upstairs; on the main floor, living room, dining room, kitchen and inlet, also enclosed verandah; full basement, with furnace, laundry tubs, which is a bedroom if required, and graville fireplace and hot water radiator. The exterior is stucco, and the grounds are kept in beauty, and combine to make the house for reception or entertainment. Wash tubs and electric water heater are included in the price, which has been reduced for a reasonable figure. This house is in excellent condition, and the rooms are lofty and airy. Early inspection is advised, as we are able to offer it at very reasonable terms for immediate sale. REVISION, ONE MILE FROM CITY BOUNDARY, on Lansdowne drive, and Cedar Hill Road, MAKE this property a very attractive purchase at the greatly reduced price of

The Canadian Service Shipping Company has been in operation since 1920. It is regarded as one of the largest deposits of iron mineralization in the Dominion, but, due to its low grade character, requires expensive treatment. It is reported that strong Duluth interests have sent a party of geologists to make a complete survey of the workings. The mine consists of 1,500 acres, and approximately 40,000,000 tons of ore have been indicated by a diamond drilling programme carried out some years ago. The property has only been partially explored.

HOMESTEAD IS NEAR THE LIME

WELL BE INDICATION OF QUICKER DRILLING IN THE SECTION

Operations at Sherritt-Gordon Going Full Speed Ahead—Lake Shore Dividend

(H. S. Rumbaugh in Ch. Lat.)

THE WELL-PRODUCING AT 1,458 feet and is reported as being in what appears to be pay-bearing shales immediately above the lime. If this will strike the lime at this shallow depth it will mean quicker drilling in this section than near the Home walls.

Sunlight is drilling in very hard formation at 2,610 feet. Mercury No. 1 is drilling and under-reaming at about 2,735 feet or nearly back to the original depth of 2,790 feet. Mercury No. 2 is drilling at 540 feet, after cementing off surface water. Hillside No. 1 is drilling at 2,652 feet.

Outwest, in the new Black Diamond district, is drilling at 2,900 feet and reaming at 2,800 feet. Outwest No. 2, near the Home wells, is making good time and has at 3,220 feet, and drilling. Freehold No. 1, in north end of Turner Valley, is 3,070 feet and going well. Hudson of Alberta, in Highwood structure, spudded in this week and is reported as very hard drilling, running 100 bags of cement in No. 1 well at 100 feet to offset caving shale. Company officials believe they have struck a very hard bed at the lime. Probably resume drilling in under Kananaskis No. 2 recording surface water at 250 feet. Calmont No. 5, in the south end, drilling at 2,435 feet. Calmont No. 2 drilling at 3,240 feet. Calmont No. 6, on Dallas lease, at 2,807 feet. Calmont No. 3 reaming at 3,111 feet. Dalhousie, being drilled on Calmont lease, at about 2,5, reported at 495 feet and drilling.

Illinois Alberta No. 2 is making steady but rather slow progress in a very hard formation, between sixty and seventy feet in Southern Turner Valley and vindicated the judgment of those who believed it close to the time when drilling was halted to install a powerful engine to drill a few weeks ago. Casing is now being reinserted seventeen feet in the lime and will be cemented to the top. About a week or ten days will be allowed for the cement to harden thoroughly before drilling into production is commenced.

Sherritt-Gordon—Reported operations at Sherritt-Gordon are going full speed ahead now that deliveries of the necessary machinery and material by rail are being met. Work is being done from Hudson Bay Mining & Smelting power plant, which will supply the mine with power.

Pawnee Kirkland, which has been closed for some time owing to lack of funds, has plans for recommencing under way. It is likely that the assets will be sold to a new company and the present company will share out either two or four to one. Trick Eagles Tree Farm—Reported price of Trick stock has got every indication of a bullish move. Lake Kirkland Lake field man, who added that the president's report is fully reassuring. The new shaft is down to the vicinity of 1,400 feet.

Lake Shore—Structural steel for the new office building is being erected. The blacksmith shop and machine shop are up. The trestle for the railway spur to the lake is being prepared.

Cut Rooyn man says "apparently Amulet has it again. Amulet operations have been so secretive it would seemingly explain today's market. It is known that Amulet the additional drill holes have been completed and the results announced comes the report that both cut ore, Amulet and Rouyn, are now being split their payment on new $1.25 dividend. Rouyn has paid 1.00 annually. Mr. T. H. Kea has been named the new president. Mr. A. B. Gordon, last year's president, has resigned as president to fully reassuring. The new shaft is down to the vicinity of 1,400 feet.

Wife—Aren't you going to take a snapshot of me at all today, George?

Husband—Yes, but wait till we get closer to the windmill. That will give a certain amount of interest to the picture. —London Opinion.

GOOD BUSINESS MARKS TRADING

IN SPITE OF SUMMER ANSENTEE CITY MARKET IS WELL PATRONIZED

Prevailing Prices in Representative Commodities Are Given—Many Flowers Offered

While reporting extremely good business for the Summer months, when a large number of businessmen are out of town on holidays, individual stallholders at the Public Market are looking forward to a much brighter prospect for the coming Fall months, while Market Superintendent A. E. Sangster indicated that all available space was taken up and with a waiting list of more proportions, a lot more room would be utilized to excellent advantage.

Yesterday morning, the stalls were well stocked with every item and a steady business most of the day, with rush hours between 10 and 12. Everything that the housewife could desire in more than 75 per cent so that the tendency in the United States has been towards an increase in stock financing at the expense of bonds. Another feature of the market for bonds is that large percentage of the new bonds offered in the United States is convertible, so that in a sense they are buying of such bonds is tantamount to purchasing a stock. In addition, many bonds carry stock purchase privileges, which also tend to increase the amount of stock sales.

Recent experience in the United States has shown that the only time when bonds are purchased instead of stocks is when the stock market is passing through a period of uncertainty or when reactions in the stocks of prosperous concerns. During the past few months the Canadian bond market has come to lean less heavily on Wall Street. Many Canadian Corporations and municipalities have been able to sell their bonds at home and the movement of bonds held by United States investors has been less in Canada.

It is felt that, in view of the increased prosperity in Canada much less Canadian financing will be done in the United States. The ability of the Canadian Government to refire maturing issues when due is evidence of the reduction in the volume of new bond issues outside the country.

The housewife views with feline nerve
Preserving time's proximity;
She fears she can't be once preserve
Her fruits and equanimity.

BOND MART IS ON QUIET SIDE

FIRMNESS IN HIGHEST GRADE SECURITIES NOTEWORTHY AUGUST DEVELOPMENT

Every Indication That Bond Market Is in Good Technical Position At Present Time

(Hanson, Brown & Co., Ltd.)

TORONTO, Aug. 24.—A noteworthy development in the August quiet Canadian bond market has been the firmness in highest grade securities. The New Ontario and Canadian National Railway bonds each have advanced one-quarter of a point in the past week. The Ontario issue due 1936, are selling at 101 ½ as against an offering price of 100, while the Canadian National Railway issue, due 1960, are at 101 ½ as against an issue price of 100.

In the general list of bonds the market continues on the quiet side while prices remain about steady. The supply of bonds on the shelves of investment houses is reported to be moderate and there is every indication that the bond market is in a good technical position.

Data covering net offerings of securities in Canada, in the first six months of 1929, show that of the total of $554,000,000 of securities marketed 65 per cent represented bonds and only 21 per cent stocks. These figures compare with figures for American issues for the same period, showing a total of $3,823,334,224, of which 54 per cent represented bonds and 46 per cent stocks. In 1928 there was a total of a total of $4,322,821,072 bond financing, which is more than 25 per cent so that the tendency in the United States has been towards an increase in stock financing at the expense of bonds. Another feature of the market for bonds is that large percentage of the new bonds offered in the United States is convertible, so that in a sense the buying of such bonds is tantamount to purchasing a stock. In addition, many bonds carry stock purchase privileges, which also tend to increase the amount of stock sales.

Recent experience in the United States has shown that the only time when bonds are purchased instead of stocks is when the stock market is passing through a period of uncertainty or when reactions in the stocks of prosperous concerns. During the past few months the Canadian bond market has come to lean less heavily on Wall Street. Many Canadian Corporations and municipalities have been able to sell their bonds at home and the movement of bonds held by United States investors has been less in Canada.

It is felt that, in view of the increased prosperity in Canada much less Canadian financing will be done in the United States. The ability of the Canadian Government to refire maturing issues when due is evidence of the reduction in the volume of new bond issues outside the country.

BUILDING TO BE WORLD'S FINEST

National Research Building to Be Erected in Ottawa Will Be Tribunph of Architectural Art

OTTAWA, Aug. 24.—Plans, recently completed, for the National Research Laboratories to be erected on Sussex Street, indicate a triumph of the architectural art and the prospect of a structure that will feature in the beautification plans of the capital city.

Tenders for construction are soon to be called and the work started as soon as the contract is awarded.

Faced with a light colored stone the building will stand sixty feet high, 418 feet long and 176 feet deep in a natural setting that will match its architectural attractions. From the rear the view will be not over the Ottawa River, and in the northwest distance the Gatineau Valley and the Laurentides.

Immediately to the northeast will be the Rideau River where it joins the Ottawa, and to the southwest will be "Bannscliffe," the historic residence of the late Sir John A. Macdonald. Spacious lawns covering ten acres will surround it, stretching down 125 feet to Sussex Street in front.

Into the plans for the building and equipment has gone knowledge gained from all the advanced scientific countries of the world. Officers of the National Research Council have personally inspected the research institutions of Great Britain, Germany, Japan, France and the United States. Advantage has been taken of the experience of many leading Canadian scientists, including those recently appointed to direct laboratory divisions.

Sixteen pillars will decorate the Sussex Street front, eight on either side of the main entrance pavilion. Inscribed at their base will be names renowned in the scientific world. Atop the central section will be the words in large letters: "National Research Laboratories," and directly under them the words of some motto yet to be definitely selected.

Built in the form of a squared figure "T" the building will have two inner courts similar to those in the famous Hart House, University of Toronto. Eventually they will be used for research museums and exhibitions halls.

In that section of the building between the courts will be housed, running from front to rear, the scientific research library and an assembly hall that is expected to become the gathering place of scientific men from all parts of Canada. Likewise the library will be stocked with a centre of scientific information available to all Canadian scientists, whether directly associated with the National Research Laboratories or not.

A chap was arrested for assault and battery and brought before the judge.

Judge (to prisoner)—"What is your name, occupation, and what are you charged with?"

Prisoner—"My name is Sparks. I am an electrician, and I am charged with battery."

Judge (after recovering his equilibrium)—"Officer, put this guy in a dry cell."

Ellen: How many times did you refuse Bert before you accepted him?

Winnie: Only once. He seemed so discouraged that I was afraid to try it again."

ILL FORTUNE MARKS TRIP OF GREGALIA

Twenty - One - Year - Old Fourth Engineer Becomes Ill With Appendicitis, Which Causes Death

MAIDEN VOYAGE IS FULL OF INCIDENT

21-Year-Old Fourth Engineer Becomes Ill With Appendicitis, Which Causes Death

Hard luck followed the Donaldson liner Gregalia on her maiden voyage from Glasgow and Liverpool. It was learned when she docked at Rithet piers at 10 o'clock yesterday morning.

Three days out of England the assistant steward jumped off the ship's rail with a loud shout. Although the Gregalia was turned about no trace could be found of the man, who is thought to have been suffering from injuries received during the war.

Four days later, the fourth engineer, a youth of twenty-one, became critically ill with appendicitis which turned to peritonitis. Although everything possible was done he died and was buried at sea.

After discharging the general cargo, a portion of which consisted of 800 cases of oranges and grapefruit from Los Angeles for local dealers, the Gregalia proceeded to Vancouver at 5 o'clock yesterday afternoon and from there will go to Puget Sound ports for discharging and taking on cargo. Calling at Colon, the ship carried 18,100 stems of bananas to Los Angeles for the United Fruit Company.

The Gregalia is one of two new vessels recently added to the Donaldson Line fleet especially for the Pacific trade, the other boat to reach the Coast later on. These ships are completely found and up-to-the-minute in general design and construction. The gross tonnage of the Gregalia is 8,802; she is 426 feet in length and has a beam of fifty-six feet, her speed being fourteen knots. She has no passenger accommodation. The hull was built by Lithgow, of Port Glasgow, the engines, of the quadruple type, being constructed by David Rowan & Company, Limited, of Glasgow.

A feature in the equipment of the Gregalia is the refrigerating system. The very latest methods of cold-air refrigeration have been employed, an innovation being a mechanical contrivance which makes the fans adjustable so that the flow of air can be reversed at desire. This system was installed and built by Haslk, Limited, refrigerator machinery specialists of London. The refrigerating space consists of four compartments, one of which will be used for veg storage solely, food shipments being already secured, an initial consignment to be loaded in Vancouver. The capacity of the four air-cooled refrigerating chambers represents 72,452 cubic feet.

The officers of the Gregalia are Captain Bell, first officer, Mr. Pollock, second officer, Mr. Thomson, chief engineer, Mr. Young, and second engineer, Mr. Hector.

The Door of Death

by John Estevery

Copyright, 1929, by John Estevery. Distributed by Publishers Syndicate.

CHAPTER VI

To Eleanor and Carl Ballion, whom we explained outside, Norse volunteered but scant information. He stated merely that his investigations at Greyhouse were over for the present, that no arrest had been made, that he would return tomorrow for the coroner's inquest, and that meanwhile the house would be under surveillance. And he spoke in a manner that precluded questions.

"I assume," he went on, "that you, Miss Graham, will wish to leave the house. In that case, please send your new address to my office."

But in this he was mistaken, for she expressed her intention of remaining near the body of her sister until the burial.

"I could not think of her alone here," she said. "Cella would have wanted me near her. And it's the last and only thing I can do."

The idea of her spending another night at Greyhouse in the vicinity of a man like Francis Ballion seemed to me outrageous, and even Norse's reading, for the volumes on his shelves looked worn and intimate, and were not there for show. Outside of his books and works on criminology, which might have been expected to form the professional part of his collection, he seemed, at one time or another, to have gained some familiarity with most fields of knowledge. There were works on medicine, chemistry, and mathematics, on history and art; but I was, above all, impressed by the number of volumes dealing with philosophy, folk-lore, and psychology. All these were in addition to reference encyclopedias and the usual classics, I noticed, moreover, books in French, German, Italian, and Spanish.

"Where," I exclaimed, "do you find time—"

"I don't," he interrupted. "I take it. That's the only way to get anything done."

"But I don't understand, Norse, how this work, for instance, on taboo in the South Sea Islands, or Hachettes' Also Sprach Zarathustra' had any bearing on your problem."

"That," he answered, "depends on what you think my profession is. He lit his pipe, a rare indulgence with him, for he had a horror of tobacco, and, tossing aside the match, added, "If it were simply a matter of catching crooks, I'd have resigned. The police, as a whole, do their business depends on luck, and I've been reasonably lucky in that respect, as you don't. What interests me really, is the fact that certain crimes are the causes underlying, crime, and that is merely the external manifestation of life, with all its foibles, superstitions, and weaknesses. This leads one anywhere—to Nietzsche's Superman or the primitive conceptions of religion.

"But I am not theoretical as it sounds. For example, there is Ballion's book. Suppose a doctor had built for himself in his own library, that does not lead to him. As far as my studies go, you might call them psychoanalytic, perhaps. I've read nothing that hasn't at one time or another cropped up in a police investigation; and every investigation in turn throws light on some department of social science. The value of reading is that it adds new facets to the mind for the reflection of truths—even improbable truth. And that results this present case.

"Of Ballion?"

"Yes. Because I have a decided feeling that here, if ever, we must beware of the obvious. It all looks crystal-clear, and yet, from another angle, I am under the impression that it is wrapped up in only seemingly transparent cobweb."

"I wish you'd tell me how."

"I will when Carl Ballion comes." And he changed the subject until a half-hour later, when Carl arrived.

"I can't tell you," said the latter directly, "how grateful both Francis and I are. I'd rather in fear that accidental circumstances made it look black for him."

We were seated in Norse's comfortable reading-room. He rolls his pipe before answering.

"And they are," he confessed. "But there are only two that I take seriously. The relations with his wife and his collection of headsmanly. The first implies a motive, the second morbidity."

"But the glove?" I exclaimed.

"That was a precious find. And its value consists in the fact that it was not worn last night."

Carl Ballion leaned forward excitedly.

"What do you mean?"

"Simply that, if, was of about, his leather and fairly new. Not being pliable, it had been worn recently. Ones would have been one rounding of the fingers, but the leather was almost flat. Moreover, it was slightly wrinkled, as not to slip easily from a pocket. I spoke of the thing as a ruffling glove and it is one—Francis Ballion's, which was left, I believe by some accident."

"Good!" acclaimed Carl, beneath his breath, "good work!"

Norse shook his head.

"No, it's not conclusive. I can't prove, after all, that your brother didn't have it with him. But there's another thing of like character, the strangling-cords, equally fine and equally found in a conspicuous place. Two accidents of the same kind, two damaging clues just near at hand by a person who otherwise showed great ability, begin to look peculiar. They begin to look as if they were not accidental. And the shadow of his hat, seen by Miss Graham, might be in the same category."

"You ascribe his absence from the club, then—" I began, but he interrupted me.

"Yes, I'm coming to that. What earthly reason should Ballion have in going to town except to establish an alibi? If, then, he relied on give one—though what his reasons are I don't know—it would seem a point in his favor. Besides, I don't believe he's clever at pretext. It seems to me unusually impulsive, and I think his fear with regard to the Greyhouse mystery called for a Door of Death is genuine."

"Why should he fear?" asked Carl.

"Because, if there's anything certain, it is that he is the man who derrer passed out that way. He did not see it." And Norse explained to Carl the matter of the dust-pan.

"But he could not enter." I interjected.

"He could, if someone on the inside opened the door or left it ajar, or, if you prefer, I'm inclined to believe that his accomplice closed the door after him."

"Why?" asked Carl.

"That's a point that I'll show you tomorrow at Greyhouse, but I think the evidence satisfactory. Of course, if circumstances the presence of a confederate within the house itself seems rather against him. In favor of Mr. Ballion. There is, however, a counterbalancing indication, which I won't discuss at present, simply because I haven't had time to consider it thoroughly."

"Quite right," agreed Carl. "But may I ask whom you suspect in the house?"

"In answer that with another question. What do you know about Jacob Harris?"

"Merely that he has always seemed perfectly reliable. Nothing more."

Norse replied the ashes from his pipe

"I intend to investigate that gentleman—as well as everyone else at Greyhouse." He looked at me queerly. "Including Eleanor Graham," he added. "We mustn't forget that she also would have profited by Mrs. Ballion's death."

But when I protested, he reminded me, as Francis Ballion had done that I also was in the house, and, from what he said, that had been discussion, was past. I got up and put on my hat.

"I'll be respect to Carl, here," I said, "your deductions about his sister seem less convincing than the apparent facts."

"Perhaps," admitted Norse soberly. "If he could only tell us where he was last night!"

Carl, who had sat for a moment in deep thought, suddenly spoke.

"This evening I'll go to Greyhouse and try to persuade him."

But though, I hoped Norse was right, I should have wagered he was wrong. As it turned out, the decision came sooner than either of us expected.

(To Be Continued)

Next excursion to Seattle this season will be on Thursday, August 29. Princess Patricia.

Cuticura Heals Face Disfigured With Itchy Pimples

"I had pimples all over my face. They were hard, sore and red and some of them were large and others small. Some of them formed a scaled over, and itched and burned causing me to scratch. Scratching caused impulsive and the irritation spread to the skin sleeping. They disfigured my face for many weeks.

"I tried different remedies without any success. I began using Cuticura Soap and one box of Cuticura Ointment. (Signed) Miss Harriet Hamilton, Box 772, Yarmouth, N. S.

Make Cuticura Soap and Ointment your every-day toilet preparations and have a clear, sweet skin, soft, smooth hands and a healthy scalp with good hair.

Sold by Druggists and the Trade. Soap 25c. Ointment 25c and 50c. Talcum 25c. Cuticura Shaving Stick 25c. Sample free if you write Cuticura Laboratories, Dept. 22, Malden, Mass.

Ready for School!

Hello! Boys and Girls! How's you're old man? Tell him he will be healthy and wealthy by studying these prices.

JUST LIKE THE PICTURE
Children's Sandals, famous "Life-Buoy" Brand. Sizes 11 to 2 — 59c
Sizes 6 to 10 — 69c

BOYS' KNICKERS, 79c
Here's a bunch of knickers. All kinds of dark tweeds and fine stripes to fit kids from 7 to 10 years. Regular price $1.00 — 79c

BOYS' FLANNEL KNICKERS, 98c
These are swell knickers, made from English grey flannel. They have strong loops and big pocket. All sizes up to 10-years. Regular price $1.50 — 98c

BOYS' BLUE KNICKERS, 98c
Real Good Blue Serge Knickers. Made from heavy serge with good linings and pockets. All sizes up to 12 years. Regular price $1.50. — 98c

BOYS' CORD KNICKERS, $1.15
Oh, Boy! They are strong—I don't mean the smell. They have very strong linings and big strong pockets. Sizes up to 10 years. Regular price $1.50. — $1.15

BOYS' LONG PANTS, 98c
Sure we make them. They are only 98c. Made from strong dark cloth, but there are only sizes 26 and 28. Regular price $2.00 — 98c

BOYS' LONG PANTS, $1.98
Tweed and Serge Long Pants. Lots of kinds, lots of different patterns, made just like a tailor's, with turned up cuff. Regular $3.00 — $1.98

BOYS' CORD LONG PANTS
Nice shades of brown and blue side, hip and fob pockets, belt loops and cuff bottoms. Sizes 26 to 34 aged 12 to 18 years. Regular price $3.00. — $2.49

BOYS' LONG PANTS, $2.49
Special lot of real dandy pants, made from the latest up-to-date tweeds, fancy faces and grey patterns. There are all sizes up to 32, and almost big enough to fit "pops." Regular price $4.00 — $2.49

BOYS' SUITS, $2.98
Navy Blue and Grey Flannel Suits. Cute little suits to fit kids from 6 to 12 years. Snappy styles and well made. Regular price $4.00 — $2.98

BOYS' SUITS, $5.49
Real snappy suits in double-breasted styles. Made in tweeds and serges. Can't tell you what a bargain! Sizes 24 to 28. Regular price $8.00 — $5.49

BOYS' LONG PANT SUITS
These are snappy suits made in double-breasted styles in good tweeds and blue serges. They are a mixed lot. Sizes 26 to 30. Regular $9.00 — $6.95 to $8.95

BOYS' SCOUT KNIVES
Made by Sheffield Steel Products, Ltd. Regular price 50c — 19c

VACUUM BOTTLES
Pint Size — 35c

When a kid I went to school,
It cost me fourpence a week,
If I didn't bring it Monday
Home again I'd break.
We had no pens and paper
But pencil and a slate,
We were fetched for being absent,
We were licked for being late!
The teacher was no nursemaid,
He made it very clear
If we didn't get it in our head,
Wet got it in the rear!

Burgess Bedtime Stories

Peter Startles Danny Meadow Mouse

—By THORNTON W. BURGESS—

If gossip says a thing is so,
Then doubt it till you really know
—Old Mother Nature

Peter Rabbit was hopping across the Green Meadows on his way to the dear Old Briar-patch when he met Danny Meadow Mouse. "Hello, Danny!" exclaimed Peter. "It is some time since I have seen you. How are you and Nanny Meadow Mouse getting along?"

"Fine," squeaked Danny. "Fine, I don't know how we could get along any better. This is great weather, Peter, great weather."

"I think we need rain," said Peter.

"Yes," replied Danny, "a little rain wouldn't do any harm and it would do a whole lot of good. What's the news, Peter?"

Peter brightened up at once. Here was a chance to tell someone about what he had seen over at the Laughing Brook. So he made himself comfortable and told Danny Meadow Mouse all about the Hellgrammite or Dobson. Danny listened politely, though he did not act particularly interested. Every now and then Peter would sit up very straight for a look around to see that all was well. You know, it doesn't do to be careless, even for a few minutes. It was while he was sitting up that he noticed that on a great many stalks of grass were little frothy masses. It seemed to be made of clear bubbles like soapsuds. Peter tried to remember what he had heard about those little frothy masses, but for a while he couldn't remember. Then it suddenly occurred to him that he had heard it called "Mock-spit."

"Have you seen Mr. Blackmake lately?" asked Peter suddenly.

Danny Meadow Mouse stopped chewing the bit of grass he was nibbling. "No, and I don't want to see him," said he. "Why do you ask?"

"Oh," replied Peter. "I just thought it looked as if he had been around here considerably."

Danny Meadow Mouse sat up abruptly. "What do you mean by it looks as if Mr. Blackmake had been around here considerably?" he demanded. Danny was getting quite excited.

"Oh," said Peter, "I just noticed that there was a lot of his spit around here on the grass."

Danny Meadow Mouse began to look very scared. When Mr. Blackmake is around Danny wants to be somewhere else. He was startled. He was very much startled. "I haven't seen any," said he in that funny squeaky little voice of his. "In fact, I never have seen any of Mr. Blackmake's spit. I wouldn't know it if I saw it. Are you sure it is his, Peter? Are you sure?"

"Well, of course, I'm not sure it is his," replied Peter, "but it is snake's spit. Perhaps it is little Mr. Garternaka's.

Danny was growing more and more anxious. All the joy of the beautiful day was gone for Danny Meadow Mouse. "Come out, Peter," he begged. "Show me some. I'll know it when I see it."

"Why, there's some right on that piece of grass above your head," said Peter.

Danny looked up. Sure enough, up near the top of that stalk was a little mass of frothy stuff. Danny took one good look at it and then began to laugh. He laughed and he laughed. Peter couldn't see any thing to laugh at. He became peeved. "What are you laughing at?" he demanded crossly.

"Snake-spit," replied Danny. "Snake-spit." And then he laughed harder than ever.

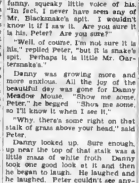
The next story "Danny Meadow Mouse Shows Peter Rabbit Something"



"I think we need rain," said Peter

STARTED LIFE AGAIN AT 45

Now Drives own Automobile

EX-SOLDIER THANKS KRUSCHEN FOR HIS SUCCESS

This is the story of Mr. Chas. F. Kemp, released from the Army in 1918, at the age of 45, without friends, money or influence. A difficult proposition for any man, but Mr. Kemp had the will to succeed. He also had Kruschen Salts. He letter shows how Kruschen helped him to success.

"When I got out of the Army and restarted my business here in 1918, I was, at the age of 45, I must put up THE fight of my life if I was to come back, and I did not get one penny from Government or anyone else to get back. I am most delighted to tell you that I am well back. Ever since I started this business I have had to keep 'Fighting Fit' and I have done so. I open this shop at 7 a.m., never after, and, as a rule, it is 6-45, and I come a few miles to do it. I have a very nice car and I keep it nice myself. Well, perhaps even YOU will say 'How do you do it?' My answer is, 'Well, if one's liver is not right, one is not real fit,' and I have a very slow liver, so every morning I use Kruschen Salts. I am 53 years of age and I am without fear of contradiction, that I owe my fitness to Kruschen Salts, taken every morning, year in and year out, year after year, first thing in the morning."

Kruschen carries the liver to release the natural stream of enterprise fluid, which is generated and fermented in the intestines by countless millions of the microbes, and thus, time and time this fluid stimulates the system to gentle, regular action, so preventing constipation and the serious conditions that follow in its wake. Start taking the tiny pinch of Kruschen Salts yourself. In a week's time you will wonder how you have felt upon the vigor and and sweet of vigorous, vital health.

Kruschen Salts is obtainable at Drug Stores at 75c and 50c per bottle, and guaranteed by F. Crutchley Hughes, Ltd., Manchester Road, Manchester, Eng. Imperial Buildings, Wellington Street, Leeds, Yorkshire.

Theatre Owners Abandon Attack On Quebec Law

Admitting the loss of their case against the Provincial Government in the matter of permitting children under the age of eight years to attend motion picture palaces in the Province of Quebec, the Provincial Secretary of Toronto and Dominion has forwarded a resolution to Premier Taschereau and the Minister of Attorney-General, asserting that they have no intention to appeal from a higher court of justice, and emphasing all proprietors of movie houses to fall in line with the law as it now stands.

This law which was passed in the Provincial House in the 1929 session, was enacted following the terrible tragedy at a Montreal theatre when dozens of children of tender years were burned to death when the building caught fire and its exits were blocked by panic-stricken crowds.

On the day when the new theatre and motion-picture house legislation came into effect, the theatre owners attempted to nullify it by writs of prohibition, but both in the Superior Court and in the Court of Appeal the Judges's decision was favorable to the Provincial Government. Hence at the general meeting of the Theatre and Cinema Owners association held in Montreal recently, it was resolved that the case be dropped, that all theatre owners be advised of the unanimous decision of the representatives of the trade that they be enjoined to follow the letter of the law in providing children under sixteen years to attend performances, and a certified copy of the resolution sent to Premier Taschereau

A copy of the minutes of the meeting at which these decisions were ratified has been received from Mr. Joseph Cardinin, president, and Mr. D. A. Burpee, secretary of the Theatre and Cinema Owners Association, as the Premier's office, and it is understood that no further proposition will be made to the existing law.

Young America is precocious, remarked a prominent clubwoman the other day. Not so very long ago a dear, old-fashioned lady was trying to teach her little grandchild to pray say his toys when he was through playing with them.

"Bobby," she said, "let me tell you a story. Once upon a time there was a little boy who never put his toys away, so one day, etc., etc.,—"

When she had finished, little Bobby said: "Now, grandma, I'll tell one. Once upon a time there was a cat—and it barked."

Wife (to husband who has his thumb with a hammer): Not in front of the canary, Herbert!

Gained 10 Pounds in 22 Days

That's going some—but skinny men, women and children are glad to help putting on good healthy flesh when they take Scott's Cod Liver Extract Tablets.

Full of tissue and weight-building substances—the proven and successful kind—the kind that gives real help to frail, rundown, skinny men and women.

Try three supremely efficient sugar-coated tablets before the thirty days—if they don't help greatly your money will be refunded. One woman gained ten pounds in twenty-two days. Sixty tablets sixty cents—Economy Size $1.00. Ask MacParlane Drug Co., Vancouver Drug Co., Owl Drug Co., or any druggist for McCoy's Cod Liver Extract Tablets. Directions and formula on each box. (Advt.)

CAUSE and EFFECT

Everybody decries the frequency of the Forest Fire—even the people who cause them. Too much time is spent in bewailing the effect, not enough in analyzing the cause. PLAIN CARELESSNESS was the cause of Eighty Per Cent of our Fire Losses last year.

WORLD'S MAIN SEA HOSTESS BUILDS DOCKS

Great Britain's Principal Shipping Centres Launch Huge Schemes in Preparation for Future

SOUTHAMPTON HAS $65,000,000 PLAN

London's Dock Improvement Scheme at Tilbury Will Cost $9,500,000 When Completed

BRITAIN, so long the mistress of the seas, is now busily at work strengthening her claim to the supreme hostess of the seas.

Liverpool, at a cost of many millions of pounds sterling, has her fine new Gladstone Dock, while Bristol and the Tyne ports, also, have recently added to and improved their port facilities, says a writer in The London Daily Chronicle.

It is at Southampton and Tilbury, where London proposes to spend $9,500,000, however, where enterprise is taking its strongest shoulderings of difficulties. At both places engineers are altering the map, by fashioning useless mudlands and marshes that the great game of competing for the ocean liner traffic can be carried on the better.

Although a comparatively small seaport, Southampton is the premier passenger port for Britain. That position is determined to strengthen, and the ultimate effect of the Southern Railway scheme, which cost about $65,000,000, will be that twenty vessels of the size of the Aquitania can be accommodated at one time at 6,600 feet of additional berth space.

Looking ahead, Southampton has determined that whatever bulk and corpulence the Atlantic greyhound of the future develops there will be ample room for her. In the Southampton of 1938 the silt of the mudlands in the bay of the River Test, two miles long and extending from the Royal Pier to Millbrook Point, will have been reclaimed.

In about two years' time 1,500 feet of quay, with a dredged depth of forty-five feet at low tide, will be available.

At the moment 185 acres of mudland, between the Royal Pier and the West Station, is being reclaimed. Of this 116 acres will be handed back to the corporation, ten acres of which, adjoining the pier, will be made into a recreation ground.

COAL DISTILLATION IN FULL SWING

Active Operations on Large Scale Starts in Scotland Under Promising Conditions

The starting of active operations by the Busey Coal Distillation Company, Ltd., Glenboig, heralds a new era in utilization of coal and foreshadows extensive developments in industrial enterprise.

Hitherto coal has been used almost solely as a fuel but with the Glenboig process it is to be utilized purely as a raw material from which a number of other products will be extracted. The new plant, one of the tallest edifices of industry in the north, is supplied with fourteen gigantic towering retorts.

Contracts have been completed for the sale of these products, and, it is stated, the company intends to double the capacity of the plant. There is every possibility that additional plants will be erected in other Scottish centres, with the Fife coalfield probably the next area of distillation.

Among the claims made for the Busey Company's works at Glenboig are that it will make coal mining profitable, provide a cheaper domestic fuel free from smoke, make available cheaper industrial power, and increase employment in the coal mines and make better wages possible.

PRINCIPAL RETIRES

Head of Glasgow University to Retire After Twenty-Two Years' Service

Sir Donald Macalister, principal of Glasgow University since February, 1907, has decided to retire from October 15 next. Although no official confirmation has been given from the crown authorities, it is learned that Sir Donald has intimated his decision to the Government. He was educated at Aberdeen and Liverpool, where it was recorded that he won every distinction within a schoolboy's reach by winning scholarships at Balliol and Worcester Colleges, Oxford, and St. John's College, Cambridge, where he went. At St. John's he gained all the honors available, distinguished himself as Senior Wrangler and first Smith's Prizeman. He crowned his work as an undergraduate with a fellowship, and his triumphal Cambridge career stands out in academic records. He speaks fourteen languages.

Hindu Baron's Successor Unable To Sit in Lords

ALTHOUGH about sixteen months have elapsed since the death of the first Lord Sinha of Raipur, his son, who is now in London, has not taken his seat in the House of Lords owing to an unprecedented legal difficulty, says The Sunday Times.

While strict reticence is being observed in connexion with the matter, it is understood that the present ineligibility of Lord Sinha to sit in the Lords is due to the fact that Indian custom runs counter to the law in England.

There is no question that Lord Sinha is his father's rightful successor, but the first Baron, a Hindu, married in accordance with the rites of his religion, and it is believed that his marriage certificate, as such as is required by the law in England, exists.

OVER MILLION KIDDIES SAVE

General Seely Tells Nation Savings Assembly of Hosts of Boys and Girls in Great Movement

SELL 52,000,000 SCRIPS IN YEAR

"Saving is really spending," Rt. Hon. Philip Snowden, Chancellor of the Exchequer, declared in a speech to the National Savings Assembly which was opened at Bournemouth recently. Continuing, Mr. Snowden declared that he appreciated thrift not merely from a personal point of view, but because the practice of thrift had a social value. "One of the great benefits which this movement confers," he said "is that it gives security to savings for those who cannot afford to take risks."

The National Savings Assembly opened by the Duke of York, was attended by 130 delegates from all over the country. In his report on the progress of the National Savings Movement for the last year Major-General Sir Charles Harris, of the National Savings Committee, said "The movement had progressed in all respects. The number of new accounts is 28,184, an increase during one year of 166. More than 52,000,000 certificates were sold during the year, an increase of 3,600,000. Average sales each week throughout the year reached just over 1,000,000. Well over 1,000,000 children contributed week by week to the cause of national thrift, in addition to people of small incomes. More than 21,000,000 sixpenny saving stamps were sold during the first three months of this year, an increase of 16,000,000 over last year."

Major-General Seely said that employers were attending better terms than those suggested by the National Savings Committee, and instead of giving employees one certificate for eight, as suggested, they were in many cases giving one for one, two or three.

COURTESY LACKING

London Newspaper Offers Explanations for Men's Seeming Want of Politeness

One of the things which have impressed an American woman visiting London is that superficially Englishmen are less polite by the rail sex than are her own countrymen. But when it comes to real chivalry the Englishman wins. She gave to The Daily Sketch an instance wherein the men of London were definitely outclassed. She said, "when a man meets a woman friend he invariably lifts his hat from his head and holds it in his hand while he addresses her. In London quite a number of men do not take the hat at all, but merely touch it and then leave it on the head do the conversation."

In reply to this explanations have been put forward to account for Englishmen's seeming want in regard to hat-raising. Many men, got so accustomed to keeping their hats on and merely touching them in salute during the war that they find it difficult to get out of the habit.

The modern girl in England today, who puts equality before courtesy, would scorn have a friendly salute than an opportunity of observing the man friend's courtesy. Besides, in England's climate she thinks he might catch cold.

SEEK RECREATION

The London business girl has changed her luncheon hour habits of late. She is seeking more fresh air—sometimes in the office, sometimes in a restaurant, only instead of dawdling, grasping over the food, paying out the time she devotes the bulk of it to recreation. Tennis and swimming lead the lunchtime sports. One will find any of the courts at Lincoln's Inn and other busy districts filled with enthusiasts from business places round about. So, too, will the swimming baths. Luncheon swims are a regular habit with many girls, and the number of official and informal office clubs is legion.

NEW WEAPON FOR LONDON'S POLICE TRIED

Scotland Yard Investigates Merits of Color Bomb for Use Against "Smash and Grab" City Thieves

IS BOTH VIVID AND ODORIFEROUS

Bandits' Car Spattered With Enamel Would Prove Mark for Officers as Well as Public in General

THE arming of London's "hobbies" again is being agitated—but this proposal is not with pistols, but with bombs, which contain a most furious and vivid enamel for the specific purpose of assisting in checking the growing activities of the motor bandits, in the course of the burglar army.

This great infernal machine, which it is thought, will enable the police to deal more effectively with thieves in automobiles, is being examined by Scotland Yard authorities.

If this proposal is acted on, the policeman of the future will have the appearance of an assassin for he would wear attached to his belt a small black patch containing a thin metal ball resembling the "orthodox cricket ball" which figures in most reports of bomb outrages.

The ball could be thrown and on striking the bandit's car it would burst, screaming a penetrating odor and spattering the car with a vivid enamel.

Culprits would be marked until the paint could be removed.

This is how the plan would work. A policeman is just around the corner when motor bandits throw a brick through a jeweler's window, snatch a tray of rings and make back to their car. The policeman, hearing the noise, drops the bomb out of the pouch by drawing a spring clip, dashes up and bursts it. The dilemma of a marked car in a traffic jam can be imagined. Not only would it enumerate itself to every policeman for arrest, but the public could join in a new road game—spotting the bandit.

It is suggested, too, that these bombs would prove a very valuable addition in the stocks of jawsiers of the West End.

What would happen when the color bomb hits the wrong car remains to be seen.

MR. BALDWIN SPEAKS

Ex-Premier Emphasizes Need of Open Mind in Use of Leisure

Speaking at Gray's Inn when opening the extension to its famous library, Mr. Baldwin said in part: There are libraries and libraries. In the National Library of Egypt in the days of King Ptolemy, over that library there was the inscription, "Nourishment of the Soul," or, as some prefer it, "Out Of Sickness of the Mind"—extraordinarily apt. A man should be a fool into which you can be flung at any time and find your nourishment. It should be to one as the briarpatch to Br'er Rabbit, and, I think, this library is variety. It is the checking of one thing in a man's life that may ward yourself with Stubbs, you may know all there is to know about the rise of the British constitution, but you may be thrown by a familiar with Piers Plowman, and you will know that the man of today with his mind is no more alive in the same in his strength, in his heroism, in his humor—the man immutable and eternal.

WOULD WELCOME FOREIGN CAPITAL

British Guiana Colonists Protest Attempt to Exclude Capital From Aiding Oil Development

A mass meeting of officials and other people in British Guiana, British Guiana, has made a vigorous protest against the action of the British Government on foreign capital that might be used in developing the oil industry in British Guiana.

The struggle for the opening up of the new oil fields is proceeding, and efforts have been made to raise foreign capital invested in order to develop the oil fields on the banks of the Corentyne River in that colony, but up to now, there is large quantities. Three hundred tons of machinery is now lying on the British side of the river have arrived at Georgetown. It is reported that an American is now on his way here with ample capital for exploration in the same district.

If the American company finds the conditions favorable a local corporation will be formed and registered in the colony and local holders of blocks of oil lands will receive a share for each block, besides being reimbursed for their expense in obtaining their claim.

Historic Sussex Castle Comes on Market

Norman Forbes-Robertson, executor of the late Colonial Claude Lowther, informed a reporter recently that private offers have already been received for the purchase of the castle.

Colonel Lowther received an offer of $500,000 just before his death, said Mr. Forbes-Robertson. Colonel Lowther bought the castle in 1910 and expended $1,000,000 on its repairs, renovations.

It was only natural that a castle which was built in the time of King Henry VI, by Sir Roger de Pleynes, a hero of Agincourt, should show the ravage of time and possibly the neglect of successive owners. The castle is constructed entirely of brick, and is believed to have been the largest post-Roman building of the material in England. It has been described as practically a little town. Within its rough square were to be found four courts, larders, laundries, a bakehouse, a dairy, a grandroom, and a chapel of course, a dungeon. Upstairs there were lords and ladies' apartments "capable of quartering an army," the Bird Gallery, the Armor Gallery and the Green Gallery.

Entrance to the castle was by a main gateway, with flanking towers eighty-four feet high, and entrance was not easy, for the whole place was built for defense, six battlements, turrets and loopholes galore, though in all its five centuries, it has never had to resist a siege.

EMPLOYERS UNITE

Bombay Industrial Interests Start Mutual Protection General Organization

The beginning of the modern development of a new era in trade accompanied not only by strikes and labor unions, but also by efforts on the part of the rising industrial and commercial interests to organize to promote their common action on the economic and political fields. According to a report received from Bombay by the Geneva Bureau of the International Labor Organization of the League of Nations, attended by many representatives of Indian industry and trade and presided over by Sir Dinshaw Petit, it was decided to appoint a big committee to organize an association with its headquarters.

To promote, protect and safeguard the manufacturing industries of the country and generally to support trade and commerce of India and advance the economic interests of the country by all legitimate means, and to support and promote all measures calculated to foster and stimulate the manufacturing industries and trade and commerce of the country for the economic growth and well-being of India.

AMERICAN WANTS ABBEY WINDOW

Offer Made to Buy Westminster's Famous 14th Century Art in Lieu Alternative Proposal

An offer from the United States to purchase the famous Sixteenth Century window of the Jelly Chapel in Westminster Abbey is being considered by the Dean, it is stated, and his decision is being awaited with keen interest in many quarters.

The offer comes from Raymond Pitcairn-Hanna, art adviser in Europe to the Art Museum of Worcester, Mass., who was aware that the proposal to erect a modern memorial on the north side of the Abbey would involve the removal of the window.

The plan to make the chapel a vestibule to the new memorial has caused a controversy between the Dean and the council for the protection of Westminster Abbey.

MASKELYNE'S TEST

Newest Tricks of London's Famous Magician Declared Most Baffling

Maskelyne's mysteries, in their new programme, have grown more mysterious than ever, small and subtle tricks more subtle still. The magic lamp has gone, the small unknown does not by any means seem to have disappeared, but Nevil Maskelyne Williams is adept at palming. His quiet assumption that things never actually disappear and reappear in his hands is extremely effective. He moves easily and quietly, the attentive conjuror is always the most impressive. Mr. Jasper Maskelyne has a number of excellent new tricks. Instead of the conventional and puzzling form of thought-reading and a guess on an instinct plane which runs up or down and performs many amazing feats of memory. But perhaps the most intricate and curious of his tricks is the mystery of the sands. Three kinds of colored sands are mixed in a bowl of water till they become a dingy mud, but in a moment a handful of each color is taken from the bowl bright and clean. One knows that more sensational tricks must depend on mechanism, and in a mechanical age one expects anything of mechanism, but this trick is really baffling. So is a startling feat of levitation.

HER BEST MEAL IN 20 YEARS

Poor Women Weep With Joy When Invited to Take Part in Free Holiday Outing

AGED FINERY ADDS HISTORIC INTEREST

Often, when an invitation is extended to a mean street mother for a holiday, tears fall in her eyes. The poor woman weeps with joy, says a correspondent of the London Daily Mail. "Mothers' Holiday Fund" is the name of the fairy wand the recipient is, it is her very first holiday.

At a recent outing to the seaside for holidays were women one hunt into tears at the dinner table. She had, she said, never sat down to such a meal for twenty years, at which time she was a domestic in the employ of a well-known baronet.

The majority of women invited to these outings are old age pensioners and elderly spinsters, the former waking out a miserable existence on 18s a week and the latter earning on an average 1s per day.

"These, the poorest of London's aged sisterhood, make the afternoon of a day crammed with good things. The parlor invariably resolve cripled and blind women, and it is very affecting to see the tender solicitude displayed for them by their fellow-guests.

Most of them set out on the journey in borrowed plumes—gaudy hats that first did duty in the Victorian period—flounced dresses, bonnets, long beaded capes which were the fashion forty years ago. These have been laid up for nine years than the owners care to count.

Other seaside visitors are surprised to see on the promenade the fashions of the dim and distant past, and kindly inquiries result in a warm interest being taken in the many activities of the Free Holiday Fund.

QUEENSLAND SETS HOUSE IN ORDER

New Premier Stresses Need of Economy in Solution of Problems Bequeathed by Predecessor

The Labor party in Queensland, Australia, lately suffered defeat after having been in power for nine years. The new Premier, Mr. Moore, in reviewing the situation, said Queensland's State enterprises, which have made such great strides toward the millennium, has proved an uproarious failure and had resulted in a loss of nearly $20,000,000 in the last year. He implied, the management of private enterprise had been characted to an unknown extent, and the number of unemployed had been constantly increasing. He said, in part:

"Australia must," said the Premier, "realize that the bitter truth that a reduction in costs is essential to industrial revival, or weekly ignore the facts and continue on a path which must lead to industrial stragulation.

State enterprise will be sold with the exception of the State insurance department and the railway refreshment rooms. The latter will be handed back to the railway authorities. The contract system will be introduced on public works.

"I believe there is likelihood of a big development in oil prospects shortly. Experts say that conditions are now better than was the case before big finds in other countries.

RESTRICT IMMIGRANTS

Government of New Zealand Compelled to Check Movement Due to Unemployment

New Zealand has awakened to certain aspects of unemployment in that State which compelled the late Government to restrict assisted immigration. The new Government has announced its intention to continue this policy. During the year ended March 31, 1927, there were 11,240 immigrants who entered New Zealand with State assistance. In 1928, the number dropped to 3,832, and last year to 1,966. The only assisted immigrants admitted are a few domestic servants, a few youths coming under organized training schemes, members of divided families, and one or two "hardship cases." The Governor-General, Sir Charles Ferguson, said that he realized the necessity for restrictions at the present time, but he lamented it. The country was "terribly terribly arrested in its development" by its inability to encourage immigration, he said.

PRINCE'S VISIT TO DYING MAN

Kissed Comrade of Too H. Good-Eye on Lizard's Death Bed

How the Prince of Wales went to comfort a dying man who had expressed a wish to see him was told by Sir Robert Evans at a luncheon of members of the City of London Vacation Course in Education.

"A member of Too H was dying," said Sir Robert, "and the founder of the movement, the Rev. Tubby Clayton, visited him and asked him if he would do something for him.

"I don't think so, said the dying man. I shan't be here tomorrow. There is only one thing I should like, but that is quite impossible. I should like to see the Prince of Wales again before I die.

"He was so good to me when I was in the trenches. But I know that is out of the question."

Mr Clayton went straight to St. James' Palace to learn that the Prince was not in.

He asked that he should be informed by telephone when the Prince returned, and about half-past ten at night he got a message that the Prince had arrived. It was but was very tired and was going to bed.

Mr. Clayton went at once to the palace and was received.

"I hope this is a very important matter, Mr. Clayton," the Prince said, "because I am very tired."

The founder of Too H told his story.

"Before he had finished," Sir Robert said, "the Prince was undressing to go out. He went at once to the bedside, sat down by him, until the early hours of the morning and then kissed him good-bye."

DEVILFISH BATTLE

"Summer Crouch" Wrecks Finest Aquarium Tank of Octopi in the World

The age-old drama of the survival of the fittest is being enacted in the big octopi tank of the Bermuda Aquarium. Miss Gladyse Lucas Mowbray calls the Summer crouch, this year, the octopi in fear upon each other. Only one battered devilfish remains out of what was said to be the finest collection in the world. During the Winter months the octopi live in peace and harmony but as the water grows warmer the big octopi become quarrelsome and a submarine battle royal follows. The specimen best of the Aquarium is scouring the reefs and coral bays for more examples of the fish.

Women's New Freedom Boosts Canned Goods Sale

RELINQUISHMENT of the "Roast Beef of Old England" for canned foods has resulted, says Mr. and Mrs. Helme, president of J. H. Helme & Company, who was in London to explain the building of an addition to the present Helme British plant which will employ several hundred British workmen. They said that the sale of tinned foods here has increased 500 per cent in the last ten years. He attributed this to the freer life of the average English housewife who no longer "reigns in the kitchen," but spends much of her day in sport. Salad consumption also has increased, as indicated by an increase of nearly 500 per cent in sales of salad cream since the war.

TO OFFER DAWES WINE

U.S. Ambassador to Be Honored at Original "Home Town" on October 1

A drink of old wine from the cellars historic alma mater, bearing the arms of Charles II will be offered to General Dawes when he receives the freedom of Sudbury October 1. This will be at a luncheon given in his honor in the ancient Suffolk Borough from which the Ambassador's ancestors emigrated to America nearly 300 years ago.

EQUALITY IN LAW SOUGHT

London Society Pleads Cause of Empire's Colored Races and Ask Uniform Standard in Franchise

WOULD PUT TRIBAL LANDS IN TRUST

A plea for complete equality before the law for the white and colored races of the British Empire is contained in a memorandum issued by the Rt. Hon. Ramsay J. Bannerman MacDonald, by the Anti-Slavery Society.

The memorandum is based on a protest against recently in a number of influential people in South Africa and appeals to the Prime Minister to take up at an early date a national policy upon the treatment of the non-European subjects of the Empire."

Among the signatures which "with slight variation" might be adopted are: "Equality before the law, freedom for any man to perform any work for which he is competent, and equality in the exercise of electoral powers by all who have satisfied a uniform standard—these have been the watchwords of all men."

Behind this stands the recognition of the basic fact that all sections of the population are integral parts of the whole with common interests, that the welfare of the whole country, and not that of any single race or color, is the true concern of all the people.

The memorandum next considers native rights in land which it regards as "the most burning of economic questions that provide for the aboriginal inhabitants in every dependency should ensure resting with complete security of all tribal lands in tribal authorities, or in trustees on behalf of tribes, as in the case of Canada.

LO, THE RICH INDIAN

Call Money Goes Abegging in Bombay Stock Exchange Scramble for It

Advices reaching London report that in Bombay, India, money is a glut on the market and call funds are unlimitable. Reports that a number of prominent stock market operators are planning to transfer the scene of their activities to Lo, they were greeted, however, with refusal. Something should be done about the matter. The thought of call money going abegging in Bombay while New York scrambles for it at from eight per cent to fifteen per cent is lamentable from the point of view of both Lo and Bombay.

WOMEN DEMAND VOTE

Female Suffrage Society of Bermuda Not Discouraged by Supreme Court Action

The members of the Women's Suffrage Society of Bermuda are not discouraged by the recent decision of the Supreme Court of the islands refusing women the right to vote. The society will now be called upon to be introduced at the next session of the Bermuda Legislature, asking for suffrage. As women vote in Great Britain and the overseas Dominions they feel that women of Bermuda should have the same rights. The Legislature, which for years has refused women the vote, is composed largely of wealthy landowners, who oppose any change or innovation in government affairs. Public opinion in favor of suffrage, however, has become so strong that the Legislature may grant the new petition.

BRITAIN MAY SET RECORD IN AVIATION

Commander Burney, of Dirigible R-100, Expects to Establish New Mark in Transatlantic Flight

DEEMS ZEPPELIN WOULD NOT PAY

Small Accommodation for Passengers and $9,000 Cost of Round Trip—Not Commercial Proposition

WITH the Graf Zeppelin at Tokio after flying from Lakehurst to Lake Constance in less than fifty-five and a half hours, thus breaking her previous record, the attention of Britain has been diverted for a second from the Bremen-Friedrichshafen Zeppelin Cup race to ask whether the R-100, the Commercial Airship, will beat the Graf Zeppelin in her latest tests of 6,000 miles in 100 hours.

While the R-100 is not built for speed, Commander C. D. Burney hopes to establish a record.

"The Zeppelin's four-day passage to America would not pay as a regular service," he said. "With steamships taking only a day longer there is no competition—steamers are as much more complete, more comfortable and cheaper. To make a transatlantic Zeppelin service pay, it will be necessary to cross in two and a half days and carry fifty passengers to reduce the cost."

The Graf Zeppelin has now surpassed Commander Burney's speed requirement with her two-day-and-seven-and-a-half-hour transatlantic passage, but the small passenger accommodation and the high cost of flying—$9,000 for a round-the-world ticket—still make it impracticable, he believes.

"MOTHER INDIA'S" AUTHOR SPEAKS

Miss Mayo Sees "Greatest Christian Performance of Its Kind" in Britain's Work

Apt testimony to the work that the white man is doing in the Orient was given by Miss Katherine Mayo, writer of the much discussed Mother India, at a recent luncheon of the English-Speaking Union in London.

Amerikanin, Miss Mayo warned, should not be deceived by what they sometimes hear about British administration in India. The United States at times is guilty with exuberance and honeycombed with propaganda by persons who attempt, through scandalous allegations, to provoke a breach of harmony between the two peoples.

"In the words of that American gentleman and statesman, Dwight Morrow, Lord Irwin, the Administrator of India is 'the greatest Christian performance of our era,' Miss Mayo continued.

"Let America go home and tell their people that the British are doing in India a work that has for its only reward the thanks of Britain would make if it had to grapple with the complicated task facing the British. They are doing the best that honest men can do, and deserve the confidence of their own folk in Britain but of America and elsewhere people who strive for the uplift of the races."

BIG FILM DEAL

South African Concern Closes Contract for Distribution of British Films Throughout Continent

Though within the last few months contracts have been made with various companies for the distribution of British films, one only in America but in all the Continental countries and throughout the British Dominions, perhaps the biggest deal yet made in British films is that of the British International Pictures, Limited. The latter company has come to an agreement with the International Variety and Theatrical Agency, on behalf of African Films, Limited, whereby the latter company has acquired the whole of the output of silent and talking films for the coming year for distribution in South Africa. The price paid for the rights, which are for the first British all-talking film to be made, is understood, to be said to be the biggest ever paid for a film purchased for that country.

Refinery to Open

The sugar refinery of Greenock, Scotland, which has been closed for about two years it is reported will shortly be opened. This will mean employment for several hundreds of workers, and will also benefit the coal and kite industries owing to its considerable requirements in fuel and bags. This is further good improved conditions in the sugar industry of the country.

Door Into Eden

By STEPHEN MOREHOUSE AVER
Illustrated by Norman Borchardt

In the Face of Determined Opposition and With the Handicap of Poor Material, Anne Began Her Experiment of Making a Man Over, and the Result Was

ANNE Hazard's little Meadowlark Tavern, happy discovery for flungry wayfarers, sat white and snug at the foot of a green hill, above which the main highway swerved. A few hundred yards below was the village; and beyond, fifty miles beyond the last roll of hills and yet almost visible, so powerful was its presence in the minds of everybody in Great Meadows, was the city of Bedford.

From the window of her own chamber in the white tavern, and with a hase of evening distance in her grey eyes, Anne Hazard's gaze went fondly along a double line of rails that pointed the direction from Great Meadows to Bedford. She refused to be aware that several deserted freight cars standing faded and hideous near the station scarred the serene white and green beauty of all that place. She refused to be aware of the ominous look of occasional top-heavy motor trucks that hammered towards her down the highway to spoil the swift and silent passage of so many cars. Where was everybody going? Who was coming? For the valley and village and her tavern and Anne herself must remain ready until he came.

It was not hard for Anne to be ready herself. There was always a beauty in her. There was softness and loveliness, also, in her brown hair and her grey gaze and a sure beauty in her direct, honest, fearless manner of speech and thought. Her other possessions were two suits, who lived by little things, one uncle, staunch, good, hard-headed, her university degree and her Meadowlark Tavern, and she had still further a hope that was almost a knowledge that, probably in one of these groups of travelers who filled her tiny dining-room every evening, she would find him.

Her small white apron sat jauntily upon her frock, as she went downstairs and turned into the room so murmurous with talk and strange voices.

A Timid Knock

SHE went on into the kitchen. A timid knock at the door sounded above the bubbling and sputtering of the range. "See who that is, Sophy" she said.

"Let 'em knock. Miss Anne," advised Sophy. "It's only them tramps again."

Anne Hazard opened the door herself, disclosed the dropping thing that stood there in the general shape of a man. A shapeless hat, through which a lock of blond hair projected, covered his head. A grimy white sweater, safety-pinned at the neck, and a pair of tattered and too-short trousers clothed him. A bare toe stuck out hideously from the remains of a shoe.

"A cup of coffee, if you will be so kind, lady."

"You seem to have had enough liquid diet already," said Anne.

A smile flickered across his dirty face.

"You're quite right, lady, I have."

"Pour a cup of coffee for this man, Sophy." Anne glanced at him again. "Are you hungry? Come in and I'll give you some food."

As she drew carefully aside he stumbled through the doorway and of necessity passed in front of her. He bowed absurdly.

"I beg your pardon. Perhaps you'd better put a paper on the chair. I'm not too—clean."

Anne handed him a full plate, astonished into meeting his gaze by the fact that he rose to receive it.

"Eat and don't talk," said Anne, departing for the dining-room. When she went back to the kitchen, that foolish tramp stood up as she entered.

"Your dinner is excellent," he said, and, glancing at Sophy's broad back, which showed very clearly what she thought of tramps, "I have just complimented the cook."

Anne took fifty cents and handed it to the fellow. "Here, take this to the village and find a place to sleep it off. I'll give you fifty cents more for a bath, if I didn't know you'd spend the lot for gin."

Shaved and Washed

THE next night he appeared again, shaved, washed, sober—but not sobered. He had come back, he said, to pay his party call, and Sophy, with grim delight, forced him to carry three heavy tubs of water from the cistern and then set him down to pare a bucketful of the next day's potatoes. He retaliated with a heavily delivered against her work, on the nobility of labor, once you made your mind up to it.

Anne came in just as he'd finished his dinner and noted how quickly he jumped up and stood straight. "My fifty cents has improved you," she said.

"Because the giver graced the gift," he replied.

"Well, take this dollar then and see that the receiver doesn't disgrace it. Will you buy gin?"

"Do you prefer that I don't?"

She examined him quizzically. "How did you get like this? Not your regular hey stew. The real truth."

"I was wounded in France," he said. "But I didn't die. My parents died. There was a girl and she caught influenza and died. There was a silly business—" he made a gesture in the direction of Bedford—"and I tried to occupy my mind by saving it. But that died also. Oh, I suppose there is some of it left back there, if I wanted to go fight for it. But I lost interest."

"What were you during the war? What rank I mean?"

"I was a private, first-class in the beginning and a major, not so first-class, at the end," he said.

"Why do you like like this?"

He laughed. "I enjoy lying. I do it so well. Sometimes I tell the truth though, just for fun."

"And the things you've told me week lies?"

"Only some of them," he said. "What I tell you will be the truth, if you prefer."

"Oh, don't bother," said Anne. "Do you know anything about paint?"

"I'm a expert at paint—"

"Just the man I'm looking for." She caught him up quickly. "I want that little fence out front painted. I'll give you a note to my uncle in the village. He will provide you with the paint—and some clothes. Thirty cents an hour and you can buy food here at half-rate. I suppose you are willing to work?"

"If you prefer that I do—although it was a lie when I said I was an expert on painting."

"Anne Hazard's Tramp"

A FORTNIGHT of whispered rumors made "Anne Hazard's tramp" the sensation of Great Meadows. The postmaster did not believe that Howard Graham was his real name. Anne knew that it wasn't. She'd gone out one afternoon when he'd first started painting the fence and she had asked him. "What is your name?"

"Graham is my name," he said. Something in her face brought the truth. "My first name, anyway."

"And your last?"

"Oh, please, Miss Hazard, I've thought it better not to—but, if you wish, it's Thorne. I've relatives in the city who might be hurt—"

"Of course," said Anne. And, in a week, she had replies to three letters. One, from a great university, denied that any Graham Thorne was on its alumni roll. So that was a lie. A second came from Washington, giving data to show that Graham Thorne had enlisted in May, 1917, as a private first-class and was discharged as a major in January, 1919. So that was true. The third, from the Bedford manufacturing firm of Thorne-Hardesty, admitted knowledge of a Graham Thorne, but stated that he had not been heard from in five years. Two truths, one lie.

"Anyway, tramp or not," remarked the cashier of the drug store, "he's the handsomest man which been in this village in a year of Sundays."

There were other opinions less favorable and less generous towards the Hazard tramp. Anne's Aunt Maud was so thrilled at the thought of her niece's danger that she hobbled, muttering and shaking her head sagely, all the way to the tavern to tell Anne what a risk she ran, allowing that creature to stay there at night with only Anne herself and a few servants. She inspected eagerly the cot that had been improvised for "that creature" at the head of the cellar stairs.

"You'll wake up some morning, young lady, to find your throat cut."

Her uncle was a little more matter-of-fact. "Perhaps he'd better come in to stay with us, and I'll give him a job."

A Roaring Drunk

ANNE shook her head. "He'd be grateful for the job, Uncle Tom, but I've a feeling that, if he got very far away from the tavern, he'd be roaring drunk and on his way in twenty-four hours."

"He will anyway, Anne. You'll be lucky, if he doesn't rob you when he leaves. Let him go now. Why should you care?"

"Well, of course—" Anne hesitated. "I don't care, I suppose—except that it seemed a chance to give a poor fellow a lift."

She told Graham of her uncle's offer that afternoon while he was putting the finishing touches to a wooden arch over the gate. "To work for him and stay at his house. Miss Hazard? Do you wish me to?"

"Well, you might try working for him, anyway. Better spend the nights where you are."

"A Cup of Coffee, If You Will Be So Kind, Lady."
"You Seem to Have Had Enough Liquid Diet Already," Said Anne.

He smiled. "I'll work hard for your uncle—but I'd rather sleep in the yard here at the tavern than in his guest-chamber. This isn't much a bed arch do you think? I took a Beaux Arts prize for design once."

"You've got even lying well any more," she said, and he laughed. "Knock off and get ready for dinner. Afterwards, I shall need some help with my accounts."

"Oh, that's easy, Miss Hazard," he said. "I've audited the records of Thorne-Hardesty offer enough—I mean—" he caught himself. "Please forget that, will you?"

"Don't worry, Graham, or Thorne, rather, the firm has already written me the little it knows about you. By the way, are you a periodic drunkard?"

Anne Took the Picture. . . . "Yes," She Said, "That's the Man. He Robbed Our Cash Drawer Last Night. . . ."

"I suppose so," he said. "Sometimes I go for weeks without drinking."

"How soon will you go back to it and leave here?"

"Whenever you wish me to," he replied.

Anne paused and then asked. "Will you promise to quite drinking for good, Thorne?"

"I will promise to try," he evaded.

"But you won't promise absolutely—even if I prefer you to?"

He faced her, suddenly very pale, and shook his head. "No, I can't."

Meditative Tramp

SHE left him, and he remained there motionless, until the first arrivals for dinner started him from his thoughts.

Strangely enough, there were three young men in the dining-room that evening. Curious that only tonight, the first time in perhaps a fortnight, she had even remembered to wonder if any of them might be the one for whom she had waited so long.

Anne had been watching from her window the following afternoon as Graham—she persisted in thinking of him as Graham—was putting a coat of paint on his gateway arch. A heavy, towering motor-van hailed unexpectedly opposite and the three rough-looking men on the driver's seat hailed him immediately. She heard their voices, but not what they said, and presently one of them climbed down and leaned on the fence beside Graham, jerking his thumb toward the van and laughing.

When she looked again, Graham, too, was aboard the van, which remained as though plodding back towards her in the road. Anne did not wait. She hurried up the stairs almost as rapidly as she had descended.

A few minutes later, composed, an almost cool reserve in her grey eyes, she found him in the kitchen mixing some turpentine with his paint. A blond foreiock lay disarranged upon his forehead and a cloud of either anger or trouble darkened his face. He said: "I'm sorry. I've been drinking."

"Obviously," said Anne. "You are quite a different person. Do you call that—trying?"

"It was thoughtlessness," he said. "I had done it before I stopped to think. I was used to drinking with those fellows. They are rumrunners and I made a trip with them once."

"Why didn't you continue on with them?" she asked coldly. "I thought, for a moment, we were rid of you."

His face flushed and then grew pale. "I am going tonight. I could not leave without trying to thank you but—you also seem quite a different person—I don't know how to begin."

Anne softened. "Don't begin then. We're not yet through with you here Graham. Remember that I still hold your promise to keep on trying."

Blithesome Anne

A MONTH of fresh-blown days and soft nights took the valley into June. People remarked Anne's blithesomeness, and she, for her part, was too happy to notice their chilly, perfunctory greeting, for Great Meadows was, like most communities, convinced of evil if there was an even-break chance for it.

She had lunched with her uncle and their talk was of Graham Thorne. "How is he doing on all these jobs, Uncle Tom?"

"He works hard," admitted her uncle." Just now I have him working with a broom, spreading tar and gravel on the new roof of the Star Garage. It's a tough piece of work at the pare he sets. Well, to be honest, I've tried to break him, but he is too strong. I'd be just as happy, if he—"

"If he quit and left," she completed. "I wouldn't, Uncle Tom."

"That's the point," he said. "You're my brother's postmaster, Anne. There is always a vital weakness in tramps that has made them what they are. Can you forget how this fellow looked when you first saw him? Can you forget it enough ever to love him, Anne?"

"Love him! The Idea!" Anne laughed. "He knows in what way I am interested in him and there hasn't been a word. Uncle Tom, not a single word."

"Then on all these evening walks you've just talked about books and things?"

"Yes," she said. "About books, and sometimes we talk about—just the valley, and the tavern, and the village, and the city vaguely in the distance, and he feels the definiteness and beauty, that it is a composite of the whole world, in the way I'd thought I alone felt."

"Funny," said Uncle Tom. "Funny thing how a man never talks like that except to a girl."

Anne had to wait before she could inspect her cute at the butcher shop, and it was later than five when she strolled away up the road. She had to hurry, or she would be—late. And, after her brief step at the tavern, she was late. He was already walking, with his elbows on the fence at the corner of Raymond's big field.

"Well, how was labor today?" Anne said.

Sweeping Sunlight

HE smiled. "Nothing very difficult. Just sweeping the sunlight off a roof. That's a grand old man—"

"Who? My uncle?"

"No. He's all right, but—" he nodded toward the west, where a huge, glaring sun was riding the crest of the valley hills—"but I was think of the sun just then. You know, there is a certain value in a man's going to the bottom, being deprived of everything but the world itself. The world becomes personal to him, not just 'weather.' The sun is a kindly, but fiery, old man, and a storm is a black menace instead of an inconvenience. On starry nights, perhaps, one can feel the slow turning of the Planet Earth. It is all so real and wonderful."

heavily rooted in the roadway while a thin vapor breathed from its exhaust. A vague alarm fastened Anne's attention, and, when the huge van heaved into motion, a faint cry broke from her. He was going! He's gone!

Suddenly she found herself, frantic and breathless, dashing down the stairs. She gained the lawn, the gate, the roadway, and saw the van already distant, almost at the point of rounding the bend out of sight. She reached out her hands and sold something. She never knew what.

The Tramp's Return

AT the last instant when it seemed that disappearing bulk could be visible, she saw a figure swing down from it and start

"And you long for it," don't you Graham?" He looked at her steadily. "When you call me Graham, is it because your mind still confuses my name, or—because you know it is my first name?"

"My first name is Anne," she replied.

"You are still generous, then," he said. "Thank you. I have thought Anne so long—and dared not say it. No, Anne, I'm not going back to it ever, unless I must."

His grip took the fence-rail until his knuckles were white. With an impulse of compassion Anne touched his fingers. "What is it, Graham? Tell me."

He drew away instantly and put his arms behind him. "Tell you? Anne, my dream must vanish, if I tell you. All right then, you who opened a kitchen door and summoned me back to life. I love you. I love you, Anne. Oh, don't shrink, for I don't hope."

Anne put her hands on his shoulders. "I waited a good many years for you to come, Graham," she said. "It would seem hard, if you made me wait any more." She knew then, in that moment, the answer to so many things, the why of her hoping, the why of the valley and the village and the tavern and their beauty, the why of her own beauty.

Paradise Valley

IT is traditional that Paradise in green valleys does not endure. Perhaps Anne and Graham Thorne should have been grateful that it existed for them at all, even for a week. And yet what other name could have been given to that week but Paradise? The valley was aware of it and covered its white and green with blue and gold. The village saw it and tempered its cynicism with an indulgent smile.

The tavern was full of it. Every evening the dining-room full of strangers seemed homogeneous and gay, as if "joy" was passed up on plaraids all over the place.

And after, when all were departed and the tavern was lost in the shadows and the moon draped her veil over some hidden spot where those two clung to each other, the whole soft night seemed aware and throbbing in union with the beat of their breasts. His laughter, gay-hearted and low, was just audible. "—for who could have suspected, Anne, that the entrance to Paradise would turn out to be a kitchen door?"

"And I," she said, "no luckiesly waiting for you all that time to come in at the front."

"Anne! Are you listening, Anne? Remember the time you asked me to promise absolutely something, and I said I couldn't? Well, I think I can promise now. It is hard to imagine that I should ever again need—that.

"I am sure of you without promise, Graham."

One is so sure at times, or, at least, at one time, without promises, and that may be just as well, for what are promises, pathetic little pleas against a fixed and adamantine destiny? She was watching from her window as the curtain on Paradise was rung down. It was the hour of evening when he returned from work, when she waited, omitting and jeying in these swinging strides that brought him up the road to the tavern gate.

But there was no swinging strides now. She saw the unlovely figure two hundred yards away, the little, aimless steps going sideways as often as ahead. She saw him struggle along the fence toward the back of the house.

"Help Me!"

SHE went downstairs and out the kitchen door and found him pale and bunched beside the cistern. "Help me a little, Anne, will you? he said. "I've had a fall."

"Yes," she said. "You've had a fall, Thorne." She called him Thorne. "I've had a fall, too."

He did not seem to understand. "Thought I was all right, but got giddy coming up the road." His elbow slipped from the cistern and he tottered toward her. "Don't go away. What's the matter, Anne? It will be all right. Just a bad fall."

"And of course, you haven't had a drop to drink? It's all over you!"

"Yes," he said, "they poured it into my mouth while I was—as it spilled, I guess." He made an effort to pull his wits together.

"Anne, why are you staring at me? You don't think—?" His laughter was high-keyed and unnatural. "It's just that I hit my head when I fell—"

"Be still," she said. "I told you that I didn't even lie well any more. You're a liar and you're drunk, just as you were when you came here. You can go the same way, at once, tonight."

She turned and fled away from him inside and upstairs to her own room.

She waited until dinner should be over as her habit took her downstairs to make chairs for the checks. A smiling young man with blue eyes was there. He had been there a good deal lately.

Anne never had any memory of what the young man said to her. She remembered the assurance in his eyes. He laughed when she what he'd said. By the time she reached her own room again, she heard the engine of a little car spurting and then fade in the distance toward the city.

Presently she arose from her chair in the darkness and tiptoed to the back window. Graham Thorne was standing below in the moonlight.

He was erect, but agony was evident in his posture, and a sudden compassion filled her. She wanted to rush down there and thrust her arms about his neck and tell him it didn't matter. What if he had been drunk this week?

Oh, but that wasn't the point. It was the symbol before himself and before her and the world. his new chosen symbol, that should determine whether or not, in spite of the manner of his coming, he was a man, whether the bond between him and her meant enough. No, having violated Paradise in a green valley, it would be better to keep the vision than to accept an unsatisfactory substitute. And even with the thought and as her head sank upon her arms on the window-sill with her first sobs, she knew there was no substitute and that, for them, there could be only the high road or—the road, which was the lowest road. He had chosen. When she lifted her head again, Graham Thorne had gone.

A Saving Routine

NIGHTS have only so many black hours and days have a saving routine. One thing happened in the morning that had made no impression upon Anne. It didn't really matter if he were a thief as well, if one were robbed of money after life has been stolen first. She recalled now her uncle's remark once that she'd be lucky if he didn't rob her when he went. A spinter of wood under the cash table in the dining-room had brought her attention to the fact that the little drawer had been broken into and one hundred and twenty dollars taken.

She did not even think of it again until evening, perhaps an hour before dinner, when a stranger, apparently from Bedford hurried in and asked to speak to the proprietor. "Yes, sir, lady I—" he turned back his coat and flashed his badge. "Thought maybe you could help us, because the fellow we want has been roaming the valley, and he's probably been here."

"Yes," said Anne listlessly, "he's been here a long time. But he left last night."

The detective took out a photograph. "This the man?"

Identifies Robber

ANNE took the picture and gave a little start. She was looking into the challenging, assured gaze of that blue-eyed young man. "Yes," she said, "that's the man. He robbed our cash drawer last night at perhaps eleven-thirty, then drove off towards the city." And so Graham Thorne. If not a man, was, at least, not a thief.

After dinner, she was standing by that little white fence, watching the stars come out and thinking and trying not to think. Her Uncle Tom found her there. "How's Graham, Anne?" he asked at once.

"What do you mean, how is he?" she said. "He's happy, I suppose, wherever he is."

Uncle Tom said nothing for a few minutes. Then: "I was even convinced myself and, when he didn't show up for work today, I thought maybe that fall had hurt him more than he thought."

Some bolt struck upwards from Anne's breast against the top of her head, but her voice betrayed nothing. "Oh, he had a fall?"

"Yes. You know the two Sexier brothers. They were working on the new warehouse roof with Graham and one of them slipped and almost fell to the ground.

"Graham rushed to help him and went over himself. He fell nearly thirty feet and hit his back."

"And he hadn't been drinking?"

"Only what I poured into him to revive him to."

A cry escaped her. "Oh, it was true. Where is he? Where did he go, Uncle Tom?" Her voice rose hysterically and she broke away from him and ran to the gate. She was out of it, running up that curving highway before he could stop her.

But he found her later, sobbing against a bank where she'd thrown herself nearly half a mile up the road. "Come on, Anne," he said, "it's time to go home."

Many Miles Away

IT was Mrs. Frothingham who made the difference in Ann Hazard's life although if it had not been for Graham Thorne it would somehow also. Anne never heard of Mrs. Frothingham's end, in fact, she dwelt many miles away from the city and the world and the village in another valley that she admired quite as much as Anne admired here.

It was one night in September when Mrs. Frothingham opened her kitchen door and beheld a tramp, a rather dirty, tattered and disheveled fellow, but with a fine face. She did not even think he was so very drunk.

"Yes," she said, allowing him no chance to speak, "yes, I'll give you a cup of coffee and save the argument. You don't look like a tramp."

Money to Spend

The Story of Mamie—A Bigtown Girl

By JACK LAIT

THEY picked the old man up, lying limp on his face, with his pockets inside out and a wicked gash in his head. He was maudlin drunk when the ambulance doctor revived him with a kick of dope in the arm.

We police reporters scarcely stopped playing nickel rummy. Along the waterfront such episodes are passing incidents. We can't stop to suffer with every chump, grieve over every brute, wep over the inhumanities of man.

But when the old bird pulled himself out of his hangover in the morning and blubbered to me, as I chanced to be standing in front of his cot in the hospital ward, what he remembered of what had happened to him, I became interested.

For I recognized from the incoherent details the handiwork of Mamie the Wow.

He had come to town on one of those cheap round-trip excursions, tickled with the prospect of being alone in the big burg for a few hours, amid the temptations and thrills far from the eyes of the villagers. When he reached the city, after the hot ride in the peach-seated coach, he struck out toward the bad lands instead of the bright lights. He had money to spend, and he was shopping.

A very attractive girl threw him the eye. Heh-heh—this was indeed big-town stuff. She suggested a drink and said she knew a place. And she steered him to a speakeasy where she got him a pint of poison and sat down with him. The-next thing he knew he didn't know anything.

I Recognized From the Details the Handiwork of Mamie the Wow!

A Sliding Panel

I COULD have pieced in the rest of the machinery for him. A sliding panel in the wall, with him seated just right to take it on the skull, a silent sliding back of the board, a hammer viciously swung on his unprotected head, and Mamie and her husband, Louie, beckoning him for all he had, dumping him out in the nearby vacant lot, looking up the joint and "taking it on the lam."

For the place was operated solely as a trap by Louie and Mamie. And, since she always picked up her man in that district and since any men, whom she could meet who were wandering around these regions could scarcely be of consequence, the cops didn't much give a whoop, and they got away with their raw work—probably kicking back a goodly share of their dirty dough for protection.

All this that I have related is of minor consequence. Such things go on and little do they matter. Anybody who is a book-reader can walk into such mischief is begging for a rap on the dome.

But what I was coming to is the story of Mamie the Wow. And stuff like that does matter. For it unfolds some truths about life among the millions. It turns over some of the conditions which twine themselves around the soft, unformed bodies of our youngsters. It throws a flicker of highlights on the drab existance of multitudes.

I knew her dad intimately. He was a fireman, Terry Kilmichael by name, and he steered the giant wheel on the auto hook-and-ladder as it roared around corners on two wheels, and all the kids thought he was a demi-deity.

Civil Service Job

NOT a very clever men except at his trade was Terry. A civil service job was just the length and breadth of his ambition. He was a widower and had the one child, Mamie. Half the time he worked nights and half the time days. She reared herself.

With the streets for playgrounds and the sinister, bestial elements surrounding an unprotected growing girl, she became a tough youngster. She could scrap and she had a line of lingo that would shut up a stevedore. She went to school when there was nothing more intriguing to do, and between truant officers hunting her for playing hookey, juvenile snoopers spotting her for being out at all hours, and harness cops chasing her for breaking windows and overturning peddlers' wagons, she grew up with the flatfoots, so to speak.

To top all this, she turned out beautiful. Her nickname was the honest expression of the consensus. Mamie was a gorgeous looking girl. When she was thirteen or fourteen I used to give her many a second slant.

Her hair was brown tinged with Irish red. Her eyes were blue and dancing. Her little nose pugged up, and when she smiled her dimples lit up the block. Her figure was plump and rippling, vigorous and feminine. She had as trim a pair of calves as ever passed it up in a downtown dance hall and over it all she bristled with animation, vitality, pep.

Every man and boy around made a play, one way or another, for Mamie. It was quite remarkable that she kept herself decent. When she was eighteen she was hoofing in the chorus of a stock burlesque show, mingling with riff-raff back stage as unsavory as that with which she had rubbed elbows socially all her young life.

With dozens of men, some of them not bad potentialities, as prospects in her sphere came, wild to marry her, she up and ran away with a hard-boiled racketeer, one of Phil Henry's gangsters, chief "wire" in a beer syndicate. She married him all right enough. And she made him a good and loyal wife—while he lasted, which was less than a year.

One night the lads took Mamie's man for a joyride into the open spaces. And Mamie looking ravishing in black was the star of a fine funeral that the boys threw. A widow at eighteen or nineteen, without a nickel except a million dollars worth of looks, Mamie was an interesting case... what with her background and outlook.

Back to Stage

MAMIE went back on the stage. This trip she landed on the big time and made a classy revue. This threw her into another cross section of the game.

Her uncouth ways, far from jarring the Johns, seemed to make her more attractive to some of them. Among these was Maxwell Van Hester, whose blue-book moniker and whose bank book balance made him tops with the phrase of the social whirl as well as the stage spin.

Mamie was a merry lark to him. He thought her highly "refreshing." Her line, her viewpoint of things, her fearless frankness, her free-handed courage as she faced the vicissitudes of worldly affairs, charmed him as much as her glorified figure and her gorgeous features.

Van Hester rushed her off her feet, she who had been so sure-footed—she who had trusted herself to and held her own with peggs and shagges and killers and outlaws without the slightest trepidation or apprehension, was a lamb in the soft white hands of this silk-lined loafer.

Mamie fell madly, hysterically, in love with him.

She abandoned herself to him exclusively. She began to realize her shortcomings and her limitations. She began to study, to live the routine of a hard-working girl trying to improve herself; she refined her talk, her manners, her associations.

Wearies of Her

PRETTY soon Van Hester began to weary of her. What he sought was a playmate—a wild, happy-go-anywhere, drinking, stepping, necking daredevil chorine who would get soused with him, stop at nothing with him, keep him excited and in suspense as to what crazy stunt she'd pull next.

Instead, he found a serious young woman almost timid now in his presence, dressing modestly and simply, reading informative books abstemious as to alcohol and cigarettes, subdued in everything but an intense devotion that not only bored him, but scared him.

Van Hester wasn't marrying—just then. And so, if and when he would ever marry, there were no Mamies in his matrimonial scheme. He had never been in love with her and he didn't want her to care for him in what her street called "a big way."

It was "on" for some six or seven months. When Van Hester started easing out, with the run-round and the subterfuges and the soon obvious efforts at wiggling off the hook, Mamie, who had a snap mind, realized.

She didn't hold him. She didn't beg him. She lolls it on the chin like a game baby—and helped him out of his self-made blind alley.

Van Hester drew a sigh of relief when Mamie with a heart of lead, "aired" him—and took on another show girl.

He left behind him something that science couldn't classify—a widcat with the required disposition of a kitten, firebrand without heat, and animal in in a house robe!

Just Went Numb

FOR a spell, Mamie just went numb. She abjured her old ways and had no inspiration for her new.

Men—many men—still battered at her outposts, but she chilled them off. She worked along listlessly because she had to support herself. The stage work, in daring costume, to syncopated split-beats, meant no more than a hurdy-gurdy outside her window as she sat in contemplation of what had been, what might have been and what would be.

Then she gave out—and gave in.

Burning in her soul with a bitter resentment—a hot hatred and a cold contempt.

The nature which she had fought so hard to undo, to distort, took her as it never had before.

Mamie went back on the trail with a blare and bang.

She became the scandel of even the old neighborhood.

"What do I care?" was her answer to everything.

As long as she held her looks she could get away with it fine. Maxwell Van Hester wasn't the only man with class and jack who would fall for a girl with her looks, a girl who would hit the high spots and make the welkin ring with whoopee.

Mamie became the most notorious girl on the Big Alley and along the collateral paths leading in and out of it.

She figured in scandals, in smash-ups, in fights, in divorces, in police investigations of famous criminal cases. A millionaire couldn't be sued for separation but Mamie figured in the job somewhere; a gangster couldn't be knocked off but it was found he had been out with her or the men wanted had been seen with her.

The newspapers raked up her whole past, dredging in some of the best and some of the worst names in the metropolitan complication of people.

One month she flashed diamonds, the next she was hailed to court for a laundry bill.

She missed performances and rehearsals. One night she fell into the footlights at the apex of the all-important first act finale. That ended her footlights career.

Working Liners

WE didn't hear much of Mamie for a while. They tell me she was working the liners with a bottom-dealing card-shark, and that she got in trouble on the other side, where smoking, fixing and bully is a American don't function so well, and that she did a bit in a French homegow.

The next I saw of her was back in town, hanging out a whole lot with Louie.

A rat in his heart, a penny-ante thief by birth and trade and vocation, he had been a pickpocket, a steerer for an outfit of cheap swindlers, a bathtub-gin bootlegger and a dice shooter.

He and Mamie had been raised together.

He hadn't seen her for some years. For most of those years he had been where he couldn't see anybody—except others like himself.

Louie met her again by quite an ordinary accident—on the sidewalk near the old haunts. Any time Louie was on a sidewalk instead of in a cooler it was an accident. They exchanged greetings, and Louie did the courtesies—he took her into a smoky hideaway and bought her some drinks. They both grew mellow.

Louie told her that he loved her—that he had always loved her—that she was the only girl he had ever loved—the only girl he could ever love.

Hardened, disillusioned, disappointed, battered, Mamie locked up and shot back, "Oh—yeh? I've heard that part of it."

"I'll prove it," asserted Louie.

"How?" demanded Mamie.

"I'll marry you!"

Something New

MAMIE hadn't heard that one for some time. It interested her. So. In the morning they were married. And if you call it love, Louie loved her with a consuming passion. And Mamie, after all she had gone through, loved him in kind.

She had met up at last with a man who could look up to her—even to her, who loved her as she was and whatever she was, who wasn't playing at it—who regarded it as the most vital and the only sacred thing in this life.

And for that men Mamie was willing to go all the way from petty larceny to murder.

Neither had any legitimate way of earning a living. Neither had a chance left in a community which had long since branded them and outlawed them and interdicted them.

They couldn't see a chance toward the sun. So they turned and went further the other way.

Rather a smudgy, sordid vista they looked into as atmosphere from a grand and glorious emotion like the love of a man for a woman and of a woman for a man.

But they faced it—with a smile.

And they worked hand in hand.

In the other hand Louie carried the thug's hammer. With her other hand Mamie steered the victims into its orbit.

This is the second time I've told this story. The first time was without names.

I was sitting in the smoking room of a Havana-bound ship at the height of the season and beside me sat a chap I had known for many years.

He didn't know much of the underworld, though he was a bit of an all-around gadder and had played most of the stimulants of modern metropolitan repertoire.

He said he had once known a girl something like the one I described—her name was Mamie, he thought—never did find out what had become of her, except that she was all to the bad, which was in the cards, because lilies don't grow in mustheaps and alley-cuts don't breed orchids. That environment, opportunity can do them no good.

I didn't follow up the conversation, because just then a polite steward came up, bent down over him and said:

"You're wanted in the saloon for a hand at bridge. I was told to say—Mr. Van Hester."

How Europe Handles Crime and Criminals

With widespread crime prevalent in the United States, it is of interest to see how Europe deals with crime and criminals. Accordingly an investigation of foreign prisons and penology systems has been made by The Colonist and the North American Newspaper Alliance. The results are given in a series of questions, of which this is the fifth.

By HENRIETTA W. BINGHAM
(Special Correspondent of The Colonist and the North American Newspaper Alliance)

France's Penal System

IF France were judged by her attitude toward criminals she would be considered the most inhuman nation of the civilized world.

No attempt is made to reform the habitual criminal. If the rigors of prison have not taught him to avoid a criminal life he will learn a dreadful lesson at Devil's Island.

There is no criminal class in France. Habitual criminals are in the penal colonies. France is the only country which has kept up the practice of sending its worst criminals to hard labor in the colonies.

Devil's Island and the whole series of criminal camps long established in French Guinea are the certain fate of those who commit second or third crimes. Few return from the penal colonies, and fewer still are those who, having served there, have broken the law again.

French juries are often sentimental. The jealous woman who kills husband or lover has an excellent chance of escape. The juries are also susceptible to political considerations, and the crime with the mark of revolt against society is often excused. But once there is a conviction the moment the prisoner has passed into the administration of punishment he is swallowed in a vast unfeeling machine whence there is no escape.

Removing Drama From Crime

THIS is deliberate. It takes the dramatic out of crime. There are no heroes in French prisons. There is no coddling. Prisoners with money buy privileges, as they do everywhere, but they are few.

In most French penitentiaries there are few extra privileges to be had, except an occasional cup of white coffee, paid for by prisoners with money sent by family or friends. There is no entertainment, no effort to ease the humiliating process of the prison term.

There has never been a campaign in France to ameliorate prison conditions, except by Communists working on behalf of their fellows who are in prison, mostly for insubordination to military orders. Their campaign has made no impression.

The general public has never interested itself in criminals. Its attitude is that the man who commits a crime must pay, and the machinery of punishment has long since become an established part of the State it is as difficult to change in the smallest detail as any other administrative function in France.

Everything connected with French prisons is hard and unsentimental, deliberately. Convicts are taken to state penitentiaries in special railroad cars designed to make them realize immediately that they are out of the world as completely as if the guillotine had cut off their heads. The prisoner is placed in irons in a tiny cell with a grill into an inner corridor, guarded by a warden who has been at it all his life, who takes no chances on his prisoner escaping, and who is perfectly indifferent to his captive.

As these prison cars are sent by short stages on slow trains, by day only, the prisoner may have a day or two cramped in irons as his first taste of the loss of freedom. The French temperament being spontaneous and apt to revolt, the mental sufferings during the first few hours in the prison car sometimes leaves an impression stronger than hard, monotonous years in the penitentiary.

The Tasteless Food

LIFE in penitentiaries in France is comparable in most cases to penitentiary life elsewhere—twelve hours of work or obligatory lock-step in a narrow court, twelve hours of confinement in a narrow cell. The food is tasteless, but nourishes. Some penitentiaries have vermin, others are clean.

The regulations for all are the same. The difference lies in the wardens. In one respect the wardens are all alike: their prisoners are to them no longer men but creatures who have lost right to any consideration beyond being fed, examined periodically by a doctor and being allowed to write letters once a month.

The effect upon the prisoners is exactly what the regulations intend. Their spirit is broken. The Communist, Marty, who led the revolt in the French Fleet at Odessa in 1919 and wrote a propaganda for his party a booklet on his impressions of French penitentiaries, was struck by the incapacity of his fellow prisoners to feel revolt.

There is nothing to prevent the prisoner, once he has paid for his crime, rehabilitating himself in France. If he has learned his lesson he goes straight. If he has developed a taste for criminal life the State has an inexorable answer—the penal colony. There is no disposition to analyze or give any consideration whatever to the criminal instinct. The possessor is simply put where he cannot do anything about it.

The criminal before the court a second time has virtually no chance. He is lucky if he is ordered to serve his second sentence in France. A third is inevitably in the penal colony with banishment forever.

That is why there are no habitual criminals and no crime waves in France.

Door Into Eden

(Continued From Preceding Page)

"I used to be all right in my better days," he said.

"Some girl turn you down, I suppose."

"You suppose right," he said. "I tried being a man, but she wouldn't believe I could be. I don't blame her. Nobody would believe it."

"What difference does that make?" she demanded. And then Mrs. Fitzsimhagan said the thing that made the difference in Anne Hasard's life. "What difference does it make who believes you're a man, if you know it yourself. Nobody's a man who needs anybody but himself to prove it.

"Say that again madame, will you?" When she had repeated her remark, he thought for a long time; and then he said. "Perhaps I'll take a whirl at it. How far is Bedford from here? That's where I'd have to begin. I left a business in a hole there five years ago. It's still in the same hole, deeper. What will you bet I can't pull it out in six months?"

Spring was in the valley again. But Anne Hasard did not wait any more to see if anyone would come who would know how beautiful the valley was, or had once been.

She she didn't see Graham Thorne jump out of his car and leap the little fence. "Anne," he called out to her, "Let's go up to the field and watch that sun go down"—just as though it were yesterday. And he looked just the same, except that he wore his own tailored clothes and that he was, if anything, a little bit harder and finer even than he had been before.

"Your beautiful valley," he said. "I've come back 40 it, Anne. For good, this time. I'm going to build you a house in this field and call it Paradise Regained." She was fighting back tears when he drew her into his arms. "For I am now a man, Anne—whether you think so or not."

"I think so, Graham," she said. "I think that, even in the beginning, you were never anything else."

The Judgment of Vulcan

By LEE FOSTER HARTMAN

TO dine on the veranda of the Marine Hotel is the one delightful surprise which Port Charlotte affords the adventurer who has broken from the customary paths of travel in the South Seas. On an eminence above the town, silent and aloof like a monastery, and deep in its garden of lemon trees, it commands a wide prospect of sea and sky. By day the Pacific is a vast stretch of blue, flat like a floor, with a blur of distant islands on the horizon—chief among them Mulos, with its single volcanic cone tapering off into the sky. At night this smithy of Vulcan becomes a glow of red, throbbing faintly against the darkness, a capricious and sullen beacon, immeasurably removed from the path of men. Viewed from the veranda of the Marine Hotel, its vast flare on the horizon seems hardly more than an insignificant spark, like the glowing cigar-end of some guest strolling in the garden after dinner.

It may very likely have been my lighted cigar that guided Eleanor Stanleigh to where I was sitting in the shadows. Her uncle, Major Stanleigh, had left me a few minutes before, and I was glad of the respite from the queer business he had involved me in. The two of us had returned that afternoon from Mulos, where I had taken him in my schooner, the Sylph, to seek out Leavitt and make some inquiries—very important inquiries, it seemed, in Miss Stanleigh's behalf.

Flame-Throated Mountain

THREE days in Mulos, under the shadow of the grim and flame-throated mountain, while I was forced to listen to Major Stanleigh's persistent questionnaire and Leavitt's erratic and garrulous responses—all this, as I was to discover later, at the instigation of the Major's niece—had made me frankly curious about the girl.

I had seen her only once, and then at a distance across the veranda one night when I had been dining there with a friend, but that single vision of her remained vivid and unforgettable—a tall girl of a slender shapelinesss, crowned by a mass of reddish-gold hair that smoldered above the clear olive pallor of her skin.

With that flawless and brilliant coloring she was marked for observation—had doubtless been schooled to a perfect indifference to it, for the slow, almost indolent, grace of her movements was that of a woman coldly unmindful of the gazes lingering upon her (she could not have been more than twenty-six or seven, but I got an unmistakable impression of weariness or baffled purpose emanating from her in spite of her youth and glorious physique. I looked up to see her crossing the veranda to join her uncle and aunt—correct, well-to-do English people that one placed instantly—and my stare was only one of many that followed her as she took her seat and threw aside the light scarf that swathed her bare and gleaming shoulders.

A "Social Item"

MY companion, who happened to be the editor of the local paper, promptly informed me regarding her name and previous residence—the gist of some "social item" which he had already put into print; but that meant nothing, and I could only wonder what had brought her to such an out-of-the-way part of the world as Port Charlotte. She did not seem like a girl who was traveling with her uncle and aunt; one got rather the impression that she was bent on a mission of her own and condescending her relatives along because the conventions demanded it. I resented to my companion the notion that a woman like Miss Stanleigh could have but one of two purposes in this lonely part of the world—she was fleeing from a lover or seeking one.

"In that case," rejoined my friend, with the cynical shrug of the newspaper man, "she has very promptly succeeded. It's whispered that she is going to marry Joyce—of Mulamba Island, you know. Only met him a fortnight ago. Quite a romance, I'm told."

She was endeavoring to get trace of a man named Farquharson, as I was permitted to learn a few days later. Ostensibly it was Major Stanleigh who was bent on locating this young Englishman—Miss Stanleigh's interest in the quest was guardedly withheld—and the trail had led them a pretty chase around the world until some clue, which I never clearly understood, brought them to Port Charlotte. The Major's immediate objective was an eccentric chap named Leavitt who had marooned himself in Mulos. The island offered an ideal retreat for one bent on shunning his own kind, if he did not object to the close proximity of a restless volcano. Clearly, Leavitt did not. He had a scientific interest in the phenomena exhibited by volcanic regions and was versed in geological lore, but the rumors about Leavitt—practically no one ever visited Mulos—did not stop at that.

A Genuine Affection

AND, as Major Stanleigh and I were to discover, the fellow seemed to have developed a genuine affection for Lakalamba, as the smoking cone was called by the natives of the adjoining islands. From long association he had come to know its whims and moods as one comes to know those of a petulant woman he lives with.

Leavitt as a source of information regarding the missing Farquharson seemed preposterous when one reflected how out of touch with the world he had been; to my astonishment, Major Stanleigh's clue was right, for he had at last stumbled upon a man who had known Farquharson well.

He spoke with precision and authority, for he had shared with Farquharson his bungalow there in Mulos—a period of six months, it seemed—and there Farquharson had convinced a tropic fever and died.

"Well, at last we have got all the facts," Major Stanleigh sighed with satisfaction when the Sylph was heading back to Port Charlotte.

"The evidence is conclusive, don't you think?—the grave, Farquharson's personal effects, those of the poor devil's diary."

I nodded assent. In my capacity as owner of the Sylph I had merely undertaken to further Major Stanleigh with passage to Mulos and back, but the events of the last three days had made me a party to the conference, and I was now on terms of something like intimacy with the rather stiff and pompous English gentleman. How far I was from sharing his real confidence I was to discover when Eleanor Stanleigh gave me hers that evening, while I sat smoking in the shadowy garden of the Marine Hotel.

Addressed by Name

I WAS startled to hear her addressing me by name, and then calmly begging me to resume my seat on the bench under the arbor. She was the soul of directness and candor, and after a thoughtful, searching look into my face she came to the point at once. She wanted to hear about Farquharson—from me.

"Of course, my uncle has given me a very full account of what he learned from Mr. Leavitt, and yet many things puzzle me—this Mr. Leavitt most of all."

"A queer chap," I epitomized him.

"Why does he stay there?"

I explained about the volcano. "You can have no idea what an obsession it is with him. There isn't a square foot of its steaming, treacherous surface that he hasn't been over, mapping new fissures, poking into old lava beds, delving into the crater itself on favorable days——"

"Isn't it dangerous?"

"In a way, yes. The volcano itself is harmless enough. He goes poking into the very crater, half stunned himself by its poisonous fumes, scorching his shoes off his feet, and once, I believe, he lost most of his hair and eyebrows—a narrow squeak. He shrugs his head back and laughs at any word of caution. To my notion, it's foolhardy to rush a scientific curiosity to that extreme."

"It is, then, just scientific curiosity?" mused Miss Stanleigh.

Something in her tone made me stop short. Her eyes had lifted to mine—almost appealingly, I fancied. I felt impelled to a sudden burst of confidence.

"At times I wonder. I've caught a look in his eyes, when he's been down on his hands and knees, staring into some infernal ventahole—a look that is—well, uncanny, as if he were peering into the depths of a world far from something quite outside the conceptions of science."

"Did you get the impression that the two men had very much in common?"

"Quite the contrary," I answered. "But Major Stanleigh should know——"

"My uncle never met Mr. Farquharson."

Miss Stanleigh remained lost in thought while her fingers toyed with the pendant of the chain she wore. In the darkness I caught the glitter of a small gold cross.

"Mr. Barnaby," she finally broke the silence, and paused. "I have decided to tell you something. This Mr. Farquharson was my husband.

"I did not see him for four years—did not wish to——" And he vanished completely.

Four years!—just a reticence, I fancied. Her shoulders lifted and a little shiver went over her.

"Yes, and during the past month I have actually prayed that he might be dead. I shall be punished for it."

Off Her Feet

I VENTURED no rejoinder to these words of self-condemnation. Her tone, relevant mundanely, had clearly swept her off her feet in the ardor of their first meeting and instant love.

"It must be a great relief to you," I murmured at length, "to have it all definitely settled at last."

"If I could only feel that it was!"

"Why, surely, Miss Stanleigh," I burst forth, "there can't be any reasonable doubt. Leavitt's mind may be a little flighty—he may have misunderstood his cronies with a few gratuitous details, but Farquharson's book and things—the material evidence of his having lived there——"

"And having died there?"

"Surely Leavitt wouldn't have fabricated that! If he had killed well—"

"I should not care to talk with Mr. Leavitt," Miss Stanleigh cut me short. "I want only to go and ask—if he is Mr. Leavitt."

"If he is Mr. Leavitt?" For a moment I was mystified, and then in a sudden flash I understood.

"I am determined to go to Mulos, Mr. Barnaby," she announced with decision. "I want you to make the arrangements, and with as much secrecy as possible. I shall ask my aunt to go with me."

I assured Miss Stanleigh that the Sylph was at her service.

Reach Mulos

WE reached Mulos just before nightfall, letting go the anchor in placid water under the lee of the shore while the Sylph swung to and the sails fluttered and fell.

In the brief twilight the shore vanished into dim obscurity. Miss Stanleigh who, for the last hour had been standing by the rail, silently watching the island, at last spoke to me over her shoulder.

"Is it far inland—the place. Will it be difficult to find in the dark?"

Her question staggered me, for she was clearly bent on seeking out out Leavitt at once. A strange calmness overlay her.

I conceded to her wish without protest. Leavitt's bungalow lay a quarter of a mile distant. There would be no difficulty in finding the path. I would have a boat put ever at once, I announced in a casual way, which belied my real feelings, for I was beginning to share some of her own secret tension at this night invasion of Leavitt's haunts.

With Williams, the boatswain, carrying a lantern, we pushed into the brush, following the choked trail that led to Leavitt's abode. But the bungalow, when we had reached the clearing and could discern the outlines of the building against the masses of the forest, was dark and deserted.

The lantern, lifted high in the boatswain's hand, cleft at a stroke the darkness within. On the writing-table, cluttered with papers and bits of volcanic rock, stood a bottle and half-empty glass. Things lay about in lugubrious disorder, as if the place had been ransacked by a thief.

Silent Disordered Room

FOR a long moment the three of us faced the silent, disordered room. Suddenly Miss Stanleigh made toward the photographs above the bookshelves.

"This is he," she said, taking up one of the faded prints.

"Yes—Leavitt," I answered.

"Leavitt?" Her fingers tightened upon the photograph. Then abruptly it fell to the floor. "Yes, yes—of course." Her eyes closed very slowly as if an extreme weakness had seized her.

In the shock of that moment I reached out to support her, but she checked my hand. Her grey eyes opened again. A shudder visibly went over her, as if the night air had suddenly become chill.

"Where is he? I must speak to him," said Miss Stanleigh.

"One might think he were deliberately hiding," I muttered.

"Then find him," the girl commanded. I cut short my speculations to direct Williams to search the hut in the rear of the bungalow where, behind bamboo palings, Leavitt's Malay servant maintained an aloof and mysterious existence. I sat down beside Miss Stanleigh on the veranda steps.

The light of Williams' lantern, emerging from behind the bamboo palings, disclosed the burly form of the boatswain with a shrinking Malay in tow. He was jabbering in his native tongue, with much gesticulation of his thin arms. Williams urged him along unceremoniously to the steps of the veranda.

A Complete Funk

THE poor fellow seemed indeed in a state of complete funk. With his thin legs quaking under him, he poured forth in Malay a strange, distorted tale. According to Wadakimba, Leavitt—or Farquharson, to give him his real name—had awakened the high displeasure of the flame-devil within the mountain. Had we not observed that the rose was smoking furiously? And the dust and heavy odor of sulphur in the air? Surely we could feel the very tremor of the ground under our feet. All that day the enraged monster had been spouting mud and lava down upon the white town who had remained in the bungalow, drinking heavily and leaving out maledictions upon his enemy.

At length, in spite of Wadakimba's efforts to dissuade him, he had set out to climb to the crater, vowing to show the flame-devil who was master. He had compelled the terrified Wadakimba to go with him a part of the way. The white man—was he really a god, as he declared himself to be?—had gone alone up the fortuna, fissured slopes, at times lost to sight in yellowish clouds of gas and steam, while his screams and threats of vengeance came back to Wadakimba's ears.

Farquharson must indeed have parted with his reason to have attempted that grotesque sally. Listening to Wadakimba's tale, I pictured the erazed man, scorched to tatters, heedless of bruises and burns, scrambling up that difficult and perilous ascent, and hurling his ridiculous blasphemy into the flares of smoke and steam that issued from that vast cauldron ill by subterranean fires. At his stammering the whole island trembled. A mere whiff of the monster's breath and he would have been snuffed out. According to Wadakimba, the end had indeed come in that fashion. It was as if the mountain had given a deep sigh. The blast had carried away solid rock. A sheet of flame had licked the spot where Farquharson had been hurled heading, and he was not.

Wadakimba, viewing all this from afar, had ventured to the scene of the tragedy. He had picked up Farquharson's scorched helmet, which had been blown off to some distance, and he also exhibited a pair of binoculars washed down by the tide of lava, scarred and twisted by the heat, from which the tenas had melted away.

Departure Deferred

MAJOR Stanleigh and his wife deferred their departure for England until their niece should be properly married to Joyce. At Eleanor's wish, it was a very simple affair, and as Joyce's bride she was so eager to be off to his rubber plantation in Mulamba as he was to set her up there as mistress of his household. I had agreed to give them passage on the Sylph, since the next sailing of the mail boat would have necessitated a fortnight's delay.

In the cabin that evening at dinner, when the two of them deigned to take polite cognizance of my existence, I announced to Joyce that I proposed to hug the island pretty close during the night. It would save considerable time.

Evening had fallen when we came up on deck. Joyce bellhought himself of some cigars in his stateroom and went back. For the moment I was alone with his wife by the rail, watching the stars beginning to prick through the darkening sky.

"You may think it unfeeling of me," she began, quite abruptly, "but all this past trouble of mine, now that it is ended, I have completely dismissed. Already it begins to seem like a horrid dream.

"Perhaps you understand," she went on after a pause. "that I have not told my husband. But I have not deceived him. He knows that I was once married, and that the man is no longer living. He does not wish to know more."

I Sensed Her Mad Impulse Which the Dark Water Suggested. "Mrs. Joyce," I Remonstrated Sharply.

Run Aground

IT was after midnight. The Sylph came about, with sails trembling and lost headway, suddenly she shivered from stem to stern, and with a soft grating sound that was unmistakable came to rest. We were aground in what should have been clear water, with the forest-clad shore of Mulos lying close off to port.

The helmsman turned to me with a look of silly fright on his face, as the wheel revolved useless in his hands. We had shelved with scarcely a jar sufficient to disturb those sleeping below, but in a twinkling Jackson, the mate, appeared on deck in his pajamas.

"What do you make of this?" he exclaimed, as I called for the lead.

"It's the volcano we have to thank for this," was my conjecture. "Its recent activity has caused some displacement of the sea bottom."

There was nothing to do but to wait for the tide to make and lift the vessel clear. It would be a matter of three or four hours. I dismissed the helmsman, and the watch forward, taking advantage of the respite from duty, were soon recumbent in attitudes of heavy sleep.

Alone I paced back and forth—countless soft-footed miles, it seemed, through intermissible hours.

Suddenly a soft thump against the side of the schooner, followed by a scrambling noise, made me turn round. The dripping bedraggled figure of a man in a sleeping suit mounted a rope ladder that hung over the side and paused, grasping the rail.

Sooty Vapors

JUST then the sooty vapors above the edge of maw of the volcano were rent by a flare of crimson, and in the fleeting instant of unnatural daylight I beheld Farquharson, bare-footed and dripping with sea-water, confronting me with a sardonic smile.

"It was not your intention to stop at Mulos," he observed drily, for the plight of the schooner was obvious.

"We'll float clear with the tide," I muttered.

"But in the meantime"—there was something almost menacing in his deliberate pause—"I have the pleasure of this little call upon you."

To get rid of him, to obliterate the horrible fact that he still existed in the flesh, was the instinctive impulse of my staggered brain. But the peril of discovery, the chance that those sleeping below might waken and hear us, held me in a vise of indecision.

"If I could bring myself to reproach you, captain," he spoke on, tenderly pointed. "I might protest that your last visit to this island savored of a too-inquisitive intrusion. You'll pardon my frankness. I had convinced you and Major Stanleigh that Farquharson was dead. To the world at large that should have sufficed. That I choose to remain alive is my own affair. Your sudden return to Mulos—with a lady—would have upset everything. Fate and that inquiry fool of a Malay had not happily intervened. But now, surely there can be no doubt that I am dead?"

"I can persuade you that I attempted to assure him in weak, sepulchral tones. "As now. If you like, I'll put you ashore in the small boat. You must be getting chilly in that wet sleeping-suit."

"As a matter of fact I am, and I was wondering if you would not offer me something to drink."

"If you shall have a bottle to take along," promised with alacrity, but he demurred.

"There is no sociability in that. And you seem very anxious here—stuck for two more hours at least. Come, captain, fetch your bottle and we will share it together."

Mad Caprices

I CONTEMPLATED him helplessly. There was no alternative but to fall in with whatever mad caprice might seize his brain. If I opposed him, it would lead to high and querulous words, and the hideous fact of his presence there—of his mere existence—I was bound to conceal at all hazards.

I went stealthily down into the cabin, where I secured a box of cigars and the first couple of bottles that my hands laid hold of in the locker.

"Now this is something like," he purred, watching like a cat my every motion as I set the glasses forth and guardedly drew the cork.

His disengaged hand had fallen to the side of the chair, and I now observed in dismay that a scarf belonging to Joyce's wife had been left lying on the chair, and that his fingers were absently twisting the silken fringe.

He lifted his glass and drank it off, then thrust it out to be refilled. "Life as the world lives it—bah!" he dismissed it with the scorn of one who counts himself divested of all illusions. "Life would be an infernal bore if it were not for its paradoxes. Now you, Captain Barnaby, would never dream that in becoming dead to the world—in other people's belief—I have become intensely alive. There are opened up infinite possibilities——"

"I'm a plain man of the sea," I rejoined bluntly. "I take life as it comes."

He smiled derisively, drained his glass, and held it out again. "But you have your secrets, rather dismally guarded, to be sure."

"What secrets?" I cried out, goaded almost beyond endurance.

"There is no reason why we should quarrel," he went on. "But there are times which call for plain speaking. Major Stanleigh is probably aware of just what he said to me under a little artful questioning. It seems that a lady who shall be nameless, when we both have the honor of knowing—is in love. Love, mark you. It is always interesting to see that flower bud from the same stalk. However, one naturally defers to a lady, especially when one is very much in her way. Place aux dames, eh? Exit poor Farquharson! You will admit that his was an altruistic soul. Well, she has her freedom—if only to barter it for a new bondage. Shall we drink to the happy future of that romance?"

A feeling of utter loathing went over me. I set my glass down. "It would be a more serviceable compliment to the lady in question if I strangled you on the spot," I muttered boldly.

"But you are forgetting that I am already dead." He threw his head back as if vastly amused. "Come, fill up the glass and hold his glass a little unsteady to be refilled.

Quick, Evil Look

HE gave me a quick, evil look. "Besides, the noise might disturb your passengers." He drained the glass and sprawled back, leaving his head drooping a little forward. The heavy wine was beginning to have its effect upon him.

"You seem very much distressed," he observed with ironic concern. "One might think you were actually shuddering these precious love-birds ——" Suddenly I caught the word feebly from his lips, spoken as if in a dream. The glass hung dripping from his relaxed grasp.

I leaned forward to take the glass which was all but slipping from his hand, when Lakalamba flamed into redoubled fury. It was as if the mountain had suddenly bared its fiery heart to the heavens, and a muffled detonation reached my ears.

Farquharson straightened up with a jerk and scanned the smoking peak. He watched its grateful play as if hypnotized, and began babbling to himself in an incoherent prattle. All his faculties seemed suddenly awake but riveted solely upon the heavy laboring of the mountain. When I ventured to urge him back to shore he made no protest, but followed me into the boat. As I pushed off and took up the oars he had eyes for nothing but the flaming cone.

"The fire upon the altar is lit," he addressed me oracularly, while the fanatic light of a devotee burned in his eyes. "Shall we accept and prepare the sacrifice?"

I leaned over the oars, panting from my exertions, indifferent to his rhapsody.

He leapfrog over the gunwales and strode up the beach. Again he struck his priest-like attitude and invoked me to follow.

"Come, Barnaby, the altar waits," he repeated solemnly. Suddenly he broke into a shrill laugh and ran like a deer in the direction of the forest that stretched up the slopes of the mountain.

Glance of Relief

MY first glance about the deck had been one of relief to note that Joyce and his wife were not there, although the commotion of getting under sail must have awakened them. A breeze had sprung up which would prove a fair wind as soon as the Sylph cleared clear of the point. The mate gave a grunt of satisfaction when at length the schooner began to dip her bow and lay over to the tack.

How Science Compiles a Time-Table of a Baby's Brain

Exploring Minds of New-Born Infants to Discover Secrets of Character at Birth and Obtain a Fixed Standard for Normal and Abnormal Human Behavior.

He is on His Way. Just How He Will "Arrive" Science is Trying to Predict by a Series of Amazing Experiments Described Here. The Photograph Shows Eugene Sutton, the Three-Year-Old Winner of a California "Perfect Child" Contest.

SCIENTISTS have charted the movements of the planets so accurately for hundreds of years into the future that, for instance, they know down to the minute when an eclipse will reach its totality. Subsequent movements of the heavenly bodies have proved the accuracy of these astronomical time-tables. In no less a degree of accuracy has science also recorded the tides for as much as a thousand years into the future.

Now science has undertaken a far more difficult enterprise—probing the secrets of a baby's brain to determine character at birth and to obtain a fixed standard for human behavior.

A baby's actions during the first few hours of life may speak a clue to the infant's future career. Symptoms of mental disease on the one hand, indications of unusual strength of character on the other, may be detected by a keen observer. Napoleon's overweening ambition showed itself clearly when he was a baby at the breast. So at least believes a German student of infant psychology, Dr. Wehmut, who sets forth the results of his investigations in his latest book, "The Psychology of the New Born." He, Wehmut, shows, with wonderful resources of observation, how the five great mental maladies that determine all human character exists wholly formed in the new-born and appear in the very first sets of life.

What is a baby's first action after birth? How long after birth does it take place?

What is the second act, the third, the fourth? How many minutes old is he at each new movement? What does he do when he is a day old, a week, a month, two months, three, six, a year? Is he normal, abnormal, or just average?

No one knows the answers—yet. After perhaps 150,000,000 years of staggering upward from the twilight mind of the ape man, man cannot set down a reliable time-table of the first commands that flow through the brain of a new-born babe. He can tell aviators the weather conditions they will encounter over the middle of the Atlantic, but he does not know how long after birth a baby should move his tongue for the first time.

Dr. Frederick Tilney, the great authority on neurology, is another investigator who believes that upon scientific answers to these questions depend the greater health and happiness of prodigals, misfits, weaklings, failures and criminals in modern society.

Dr. Tilney is to direct the compilation of time-tables showing the brain development of normal babies, abnormal babies, sick babies, babies born of healthy mothers, mothers suffering from any infectious disease from tonsilitis to pneumonia, mothers who use alcohol, tobacco, bromides, babies born of mothers who have lived on a fatless diet and of mothers who have eaten all more than their appetites calls for.

Checked against each other, the time-tables are expected to show that effect the mothers' health and habits have upon the brain of her child.

"The most important part of our research," says Dr. Tilney, "will be to obtain definite standards both for normal and abnormal human behavior—to know exactly how a human should behave at certain date after birth. We shall be able to determine departures from the normal standard in children whose mother has suffered from some poisoning prior to childbirth. The next step will be to determine whether this deviation is sufficient to retard the normal development of the child.

"It is our belief that the most frequent and devastating of human ills is maladjustment to life. This is due to many causes, but the results are always the same—failure and misfits. Many of those who suffer from maladjustment do so through no fault of their own. They do so because the brain is blighted in its making. Some of the 120,000,000 cells are misplaced or defective.

"The resulting effect may be much or little."

The findings may tell man how to use more of his brain, a contributor to London Tit-Bits predicts. At present most brains are used only to one-fifth of their capacity. Man must balance the mechanical side of his brain with that part which governs the art of living together, otherwise the lopsided organ may drive him to destruction in machine and chemical warfare. At present man is half-way between the brain of prehistoric man and the perfect brain of the future, Dr. Tilney believes.

The brain of a baby is made up of thousands of association fibres connecting parts of the body with the principal sensory and reasoning centres in the brain and lacing these centres to each other in an orderly complexity. The normal baby is born with this microscopic infinity of cells beautifully complete and in order—but mostly undeveloped.

As the baby matures, and before each new association fibre is called into the swelling orchestra of the child's life, the fibre is prepared for use by being insulated with myelin. The development of association fibres is slower among the higher animals because the convolutions, or wiring of the brain, are more intricate.

The first message handled by the brain after birth is usually the command to breathe. The infant suffers from the cessation of oxidization in the blood and carbon dioxide starts forming. This stimulates respiration. The signal is passed to the diaphragm to contract, to breathe, and a convulsive struggle for air ensues until the first breath is taken.

As Dr. Tilney and his staff of workers complete the time-tables of the lives of their infant subjects, others will undertake research into chemical and personality disturbances in the six-months-old infant. The physical reasons for the child's reactions to its environmental and intellectual life will be sought, with particular emphasis on the maladjustments which result in inordinate shyness, lack of responsibility, and anti-social conduct in later life.

The relation between unhealthy environment and abnormal development leading to more or less violent anti-social conduct and crime will be carefully investigated.

The purpose of this work is to save society from criminals, instead of condoning crime, say the investigators.

Thyroid and pituitary glands, when underactive, result in abnormal development if not treated in early life. This class is recognizable by uncertainty in mental activities, lack of concentrative power, easy domination by stronger minds, and retreat from problems into the path of least resistance.

Survey Discloses New Era for Blind in World's Work

A RECENT survey made by the New York Association for the Blind, concludes that modern methods of educational and recreational training for the blind, for the time they are children, have "revolutionized the economic status of the sightless man and woman."

"Encouraged from an early age to play lively games, to dance, to roller skate, to exercise on an acrobat's bar," the report proceeds, "in short, to make nimble their arms and legs, the blind man and woman today grows to manhood lean and wonderfully athletic, with ease of movement and fearlessness that enables them to attain social and economic independence, and in some cases to compete ably with sighted workers.

"The blind girl's main handicap ten years ago was fear and awkwardness that resulted from physical inactivity. Today blind girls can obtain primary and high school educations By taking their notes in Braille (raised characters) in the classroom, and having lessons read aloud to them at home, they are able to fulfill their school requirements, and, very often, to win honors in graduation.

Ten Years Ago

"TEN years ago most of those without sight were limited to manual work such as basket weaving, crocheting or knitting. Now in New York City some blind girls are employed as teachers of music, of dancing and of kindergarten work. They are private tutors, stenographers and dictaphone operators, social service workers and basket and rug weavers. The Dictaphone Club, formed at the New York Association for the Blind some months ago to encourage this work, now has a membership of almost thirty."

How a man born blind, became at forty years of age a university professor and a distinguished figure in German philosophy, was told to The New York Times correspondent, Vienna, by Dr. Wilhelm Steinberg, juna president of the World Congress of the Blind, held in Vienna recently.

"I was born blind," said Professor Steinberg "My mother fainted when she learned it. Her tears and sorrows in after years brought me to the decision to show her what a blind boy could do, with will and energy.

"I visited a grammer school for the blind and then, having trained my memory, an ordinary high school. I learned typewriting and wrote everything by this means. I went to the university, studied philosophy, history, sociology and became a doctor of philosophy. When I decided to make a special study of philosophy the State authorities granted me a secretary who read all the books and I made notes in Braille. My first book dealt with the principles of social ethics, my second with the psychology of the blind. Four years after getting my degree I became professor at the Breslau Technical High School. My chief pleasures are the radio, work for fellow-unfortunates and the realization that even a blind man is good for something if he wants to be."

Gave Life to Science In Fight Against Deadly Disease

IT happened the first announcement of the death of Dr. Augusta Marie of the Pasteur Institute, head of the Asylum of Ste. Anne, Paris, appeared in Le Journal Official, which gave the news that he had just been posthumously awarded the Medaille d'Honneur des Epidemies, as a victim of devotion to the cause of humanity.

He was only thirty-eight years of age. He died in a search for a serum which would annihilate the bacillus botulinus, which produces the fatal disease known as botulism. This disease is usually contracted by eating putrid fish or meat or spoiled fruit or vegetables.

In 1921, Dr. Marie discovered a new serum to cure dogs of rabies. Only last February he tentatively announced before the Academy of Medicine what was described as a cure for paralysis. Meanwhile, he had been devoting himself to an investigation of the most deadly form of food poisoning and had been trying to discover a serum which would conquer it.

He knew, his friends say, that he was dealing with a most dangerous enemy to man, and that the microbe he was fighting if it infected him, might bring him slow but certain death from paralysis. Some four weeks ago, while experimenting, his left eye was touched by a drop of liquid containing bacilli botulini. Within three days he knew that he would lose his life, for he was seized with an incipient form of the disease, which rapidly developed.

Knowing that he was doomed, he denied himself to all his friends and to his clients on various excuses and made his preparations to serve science to the last breath. With infinite care he set about recording a complete story of the progress of the disease. One feature of it is that its victim retains his lucidity of mind until the end, and so Dr Marie set down the phases of its development—writing them down at first and later dictating them. Within a fortnight after the accident in his laboratory he dictated the last word.

Hungary's Iron Man

NICHOLAS Horthy is the man who established normal conditions in Hungary after the Great War. Since 1920, he has dominated the Government of that country. Trained for the army, he nevertheless adopts the uniform of an admiral, and he is known as "The Sailor." Only when he goes hunting or when he plays polo does he discard his uniform. He is sixty-one years old, and in 1901 he married Magdolna de Purgy, the gifted and beautiful daughter of one of Hungary's richest landowners. He burst into fame when he organized, in 1920, the "White Army" that beat off the Rumanian invasion.

"Why didn't you follow that college professor's advice and marry the boss' daughter and be a snob?"

"Huh! The snobbish thing wouldn't have

Alarming Displays in Farmhouse Laid to "Poltergeist"

THE "Poltergeist," according to Elliott O'Donnell, a noted authority on this subject, is a mischievous spook, credited with performing all manner of foolish and often alarming pranks, such as the upsetting of furniture and the throwing about and hiding of various objects, apparently for no other reason than to startle and annoy. Now, although this mischievous spirit, as may be gathered from its name—a compound of polter (rackety) and geist (spirit)—is of German origin, it is by no means confined to Germany. The Poltergeist, in fact, is well-known all over Europe.

"The Poltergeist haunting," says Mr. O'Donnell, that strikes me as one of the most startling and mysterious, occurred at a farmhouse near Wem, in Shropshire. Briefly it was this:

"One afternoon, when Mr Hampson, the farmer, his wife and children and two young servants were about to have tea, there was a sudden commotion in the direction of the gafe, and a large saucepan of water that had been set on the fire fell with a loud clatter on to the stone hearth.

"The next moment all the tea things were swept off the table in a heap on the floor, and pieces of burning coal and wood were hurled across the room, with the result that one of the children was struck and her clothes set on fire. The flames were quickly extinguished, but not before the child had been rather badly burned.

"But this was by no means all. Vases and other ornaments on the mantel-shelf were thrown on the ground and smashed, the globe and chimney of the kitchen lamp were treated in a similar fashion, and missiles of all kinds were thrown at the grandfather clock.

"Thoroughly alarmed, Mr Hampson called in his nearest neighbor, a farmer named Lee, and also the village constable. And in the presence of these two witnesses there was more burning about of coal and other objects, and more smashing of glass and crockery.

"The disturbance lasted till there was practically nothing left to break in the room, when they abruptly ceased. Apparently there was no renewal of them, and opinion was divided as to their cause, some saying they were the work of tricksters."

Mississippi Bridge

The cost of the railroad bridge to be built across the Mississippi River by the New Orleans Public Belt Line is estimated at about $19,500,000, according to the application of the belt line made to the Interstate Commerce Commission. The railroad company reports that the annual gross revenue from the bridge will reach $1,000,000.

Many plants are likely to get mulder, and plants should be sprayed with Bordeaux mixture.

University of Louvain Has Reopened Library

THE library of Louvain University, which was destroyed during the war, has recently been reopened. The new books, gifts from various nations, are already in place on the shelves.

Germany has replaced 300,000 volumes, including 700 parchment manuscripts of the fifteenth and sixteenth centuries, and one manuscript of the eleventh century. The University had for its more from Germany then the duplicates possessed by her university libraries, but the Reich Government set aside 4,000,000m. (1,250,000) for the purchase of books for the Louvain Library.

The combined international contribution to the university has added 350,000 volumes to the German contribution. The British donation of about 84,000 books is the largest France has sent 23,000 books and Japan has collected 200,000 yen (£20,000) for the reconstruction of the library.

Miss Mitn, of Boston, Massachusetts, has sent half her own collection of rare books and has dedicated them to the memory of the fallen. Her gift includes a valuable "Book of Hours of Henry III of France." Poland has sent three consignments of rare books.

Astronomers Find Sun's Elements Similar To Earth's

THE results of work at the Mount Wilson Observatory, Pasadena, tending to establish the unity of the material constitution of the sun and the earth, were summarized recently at a joint meeting of the American Physical Society and the Astronomical Society of the Pacific meeting in conjunction with a Pacific division conference of the American Association at the University of California in Berkeley.

The summary was made by Astronomer Charles E. St. John, of Mount Wilson Observatory. He reported that as a result of the Pasadena studies, fifty-eight of the ninety known elements have been identified in the sun, and 4,207 additional lines in sun spectra have been identified as due to known elements. In their based revision of the Rowland Table also, they list a total of 21,835 spectra lines, 19,503 of which have been identified.

On the basis of present knowledge, St. John stated, the six elements forming the greatest number of spectra lines are iron, titanium, chromium, cobalt, nickel and vanadium. He pointed out, however, that none of these except iron is among the metals present, in the greatest abundance in the sun. These last in order of abundance are Magnesium, iron, silicon, sodium, potassium and calcium, all of which are abundant on the earth.

Among the elements newly identified as being present in the sun are: Atomic carbon, nitrogen, oxygen and sulphur. In conclusion, St. John called attention to the great amount of work still to be done in this field and the importance of learning as much concerning the sun as possible.

Lawn mowers should be set so they will not cut grass too short during the warm, dry weather.

Smoke Held Potential Cause of Spread Of Cancer

IN dealing with the smoke nuisance one thing which should not be lost sight of is that it is a potential cause of cancer C. E. Green, as a result of investigation in Scotland and England, concludes that it is due to the sulphur dioxide content of fumes. Discussing the results of Green's work in a Department of Health bulletin, Dr. Jerome Mayers deals with the point as follows: "The excessive presence of sulphur dioxide gas from the use of coal with a high sulphur content was present with the highest incidence of cancer. In all the Orkney Islands except three the death rate is very low. Peat is used in all the islands. In the three islands with high rates it was found on analysis that the peat used had 0.78 or more sulphur, approaching the sulphur content of coal."

As a result of unusually careful data taken over a long period of time, Dr. Meyers reported that his experiments confirmed the opinion of Dr. Green. His data were all taken on residents of Staten Island, with a view to noting the effects of smoke from industrial plants on those living near enough to the New Jersey side of the island. He reports: "There may be etiological relation between the combustion products of coal and oil and cancer. Those sections of Staten Island exposed to smoke fumes and gases show a higher cancer death rate than those not so exposed.

"House heating and chimney ventilation are also important, as gases and fumes from these sources may bear a relation to cancer incidence as found in our districts. The better combustion of fuels in industry and homes, or the absorption of gases, smoke and fumes to avoid atmospheric or room contamination, may mean less cancer.

Beneficial Properties of Vitamins Prove to Be Elusive

MANY of the "cod liver oil" tablets, powders and preparations made from cod liver oil, and supposed to contain the valuable vitamins of the oil, are to a greater or lesser degree of relatively little value, according to chemists in the United States Department of Agriculture. The factors which are operative in causing the destruction of vitamins in some of these preparations are probably causing considerable loss of vitamins from cod liver in feeds which some mixed-feed manufacturers are putting on the market.

"Cod liver oil is known to be rich in vitamins A and D. Vitamin A may also be derived from green-leaved plants. In Winter alfalfa has cured green is a good source of this vitamin. Although fresh cod liver oil contains vitamin A, it is comparatively perishable, as either sunlight or oxygen tends to cause it to disappear. For this reason, if the oil is included in a ready-mixed feed most of the vitamin A may disappear, the chemists say they have found.

Vitamin D is especially important to poultrymen, while swine raisers and dairymen may sometimes profitably fortify their rations with this vitamin, it is stated. It is reasonably stable. This is the vitamin that takes the place of natural sunlight. It probably survives exposure to the air much better than vitamin A.

"Two recent patents may result in new and cheaper supplies of feeding stuffs rich in vitamin D," says the department. "One covers the irradiation of feeds with ultraviolet light. The other deals with the injection of vitamin D from the oils in which it is present. It is claimed that the latter process can be used on oils unsuitable for feeding and that after the extraction the oils are as useful as ever for technical and industrial purposes.

"This is good news for feeders, but owing to the amount of fakery that has been practised with so-called vitamin foods the development of these patent provisions will have to be watched by Federal officials if feeders are to be guarded against paying for claims on the package instead of the genuine product in the container.

"The collaborative investigations of the Food, Drug and Insecticide Administration and the Bureau of Chemistry and Soils have resulted in the discontinuance of the manufacture of some articles formerly represented as cod liver oil preparations and the revision of the labels of many others to eliminate references to cod liver oil or statements of curative virtues based on the reputation of cod liver oil."

Drive on Drownings

In an effort to lessen the number of drownings in the Rhine River, German authorities are placing signs where each occurs. These are marked with the number of persons that have been drowned at that spot, and the figure is kept up to date.

Judgment of Vulcan

(Continued From Preceding Page)

Leaving him in charge, I started to go below, when suddenly Mrs. Joyce, fully dressed, confronted me

"You have been awake long?" I ventured to ask

"Too long," she answered significantly, with her face turned away, looking down into the water. She had taken my hand and drawn me toward the rail. Now I felt her fingers tighten convulsively. I felt the droop of her head and the tense curve of her neck I sensed her mad impulse which the dark water suggested.

"Mrs. Joyce!" I remonstrated sharply.

"What other way out is there?"

"Never that," I said shortly. I urged her forward again. "Did your husband sleep?"

"Thank God, yes!"

"Then you have been awake——"

"For over an hour," she confessed, and I detected the shudder that went over her body.

"The man is mad——"

"But I am married to him."

"When we reach Maldona——" I began, but the words were only torture.

"I cannot—cannot go on. Take me back!—to that island! Let me live abandoned—or rather die——"

For what seemed an interminable time we paced the deck together, while Lakshatha fissed farther and farther astern. Her words came in fitful snatches as if spoken in a delirium, and at times she would pause and grip the rail to stare back, wild-eyed, at the receding island.

Suddenly she started, and in a sort of blinding noonday blaze I saw her face blanch with horror. It was as if at that moment the heavens had cracked asunder and the night had fallen away in chaos. Turning, I saw the cone of the mountain lifting skyward in fragments—and saw no more, for the blinding vision remained seared upon the retina of my eyes. Across the water, slower paced, came the dread concussion of sound.

"Good God! It's carried away the whole island!" I heard the mate's voice bellowing above the cries of the men. The stylph resulted before the approaching storm of fire redescending from the sky.

The first grey of the dawn disclosed Mrs Joyce still standing, by the rail, her head nestling within the arm of her husband, indifferent to the heavy greyish dust that fell in consolation upon her like a silent shower of snow.

The island of Mulna remains today a charred cinder lapped about by the blue Pacific. At times gulls circle over its blackened and desolate surface devoid of every vestige of life. From the squat, truncated mass of Lakshatha, shorn of half its lordly height, a feeble wisp of smoke still issues to the breeze, as if Vulcan, tired of his forge, had banished its fire before abandoning it.

Canada's Representative At Paris Is High Speed Lover

THE Honorable Phillipe Roy, "by royal appointment envoy extraordinary and minister plenipotentiary for His Majesty's Dominion of Canada to the Republic of France" speaking before the Women's Canadian Club in the City of Edmonton, where he had lived for seventeen years, told the romantic story of how he had met his wife.

"In 1890 I came to Edmonton. I had been recommended to come here by Father Lacombe. I was met at the station by a boy with four horses. I thought it was four horses. I was driven with my luggage to the Edmonton Hotel. There I was met by Mrs. Jackson, who received me very hospitably, and gave me a room and a fine meal." Here, the old-timers present who remembered Mrs. Jackson smiled. She was very hospitable and "mothered" everyone she could, but was very obese, filling the whole back seat of the cart when she drove out with her husband, a larger-than-ordinary man himself.

HON. PHILIPPE ROY

"After the meal," Dr. Roy continued, "it was evening, and I went for a walk. I saw a pretty girl. I asked who she was, and was told, 'Oh, that is Miss Young'.

"The next day I felt it was my duty to go around and visit the doctors of the city. So I went to see Dr. H. C. Wilson—he has been dead this many years—but I did not talk of medicine.

"Do you know Miss Young?" I asked.

"He said 'Yes.'

"I want to meet her," I told him.

"Well, come and play golf with me this afternoon, and she will be there," he said.

"So I went, and I met her, and we were married before a year."

Dr. Roy made a fine choice of wife. Miss Young was the daughter of Mr. and Mrs. Harrison Young "old-timers" and a grandchild of the late Rev. George McDougall, pioneer missionary to the Indians. She was a remarkably beautiful and cultivated girl, having been taken to Scotland by her aunt for education.

In their delightful home in Paris the Honorable Philippe and Madame Roy have been charming host and hostess to many Canadians, whose pleasant memories of France and its capital have been enhanced to a great extent by the charming hospitality they have received from the Canadian "minister plenipotentiary."

Schumann-Heink's Son Feared for Mother In Scene

WHEN Schumann-Heink was singing in "Hansel and Gretel" at the Metropolitan one Christmas—she was the old witch—her small son Hansel was taken to see his mother perform. All went well until at the big moment in the opera when the witch is pushed into a fiery oven. Pretty screamed out at the top of his voice:

"Oh, they're throwing my mother in the oven and burning her up!"

And he began to cry: "Mother, mother!" so that everybody looked to see what was the matter.

"Mother" heard it too, and wondered what on earth would happen next (relates Mary Lawton in "Schumann-Heink The Last of the Titans"). But when she came out on the other side, a few seconds later, and little Perdy saw her alive, he screamed out again:

"Oh, there she is! There's mother! They didn't burn her up!" to the great relief of the audience—and Perdy.

Inexhaustive Subject of Conversation Now Has Own Book

ROBBING us of our cherished legends—Washington's cherry tree and axe, Newton's apple, and Franklin's kite, for instance—seems to be the favorite occupation of some authors nowadays. Now come along E. E. Free and Travis Hoke, two noted weather experts, with the contradictory assertion that dew doesn't fall. As is well known, it rises.

And mark the fiendish delight with which they proceed to set us right:

"The chief thing to be said about dew is that it doesn't fall, early or late, on Maxwellton's or any other brae. In fact, it rises. It is, indeed, the condensed breath of the earth, and if poets had known this their poetry might have been improved in art as well as fact."

Then they pick on rainbows—so beloved of popular-song writers:

"Not one person in fifty can tell what a rainbow is like" tall this and lots more like it is in their book "Weather"). Probably every human being sees at least two score rainbows in his lifetime without ever realizing that all rainbows are different. There are thousands of rainbows differing from each other in the number, tints and arrangements of the colors."

Anyhow, the famous reprimch that nobody ever does anything about the weather has been knocked sky high by these two authors. They have written a book about it. It never rains but it pours!

He Was Weak

Physical culture expert (to client): "Do these exercises for increased strength nine times a day."

Client (owner of new house): "But that's hard work. I want the increased strength first so that I can open the window!"

D'Annunzio, a Great Patriot

By F. M. GUALTIERI

D'ANNUNZIO is, undoubtedly, the most interesting figure in Italian literary life today, followed and fought, loved and hated with an intensity that very few other writers have aroused around them. His new poet his prime, is still at his post. From his pen still come pages which have all the force of the first writings. His life has been so full of activity and experience that it surprises, almost, how he had time and serenity to write all the works he did write.

D'Annunzio was born in Pescara on March 13, 1863. In 1897 he was elected member of the Italian Parliament, and swore fealty to the Conservatives. But a few years later, in the Chamber, he rose from his seat and said: "Here is death: there—pointing to the Socialist benches—is life. I, as a man of intellect, go towards life." And so he deserted his party.

At this time an American magazine asked him, through the head of the Associated Press in Rome, if he was willing to write a series of articles.

"I will write them," he said.

"But at what price?"

"Twenty thousand dollars for each article."

"That is prohibitive!"

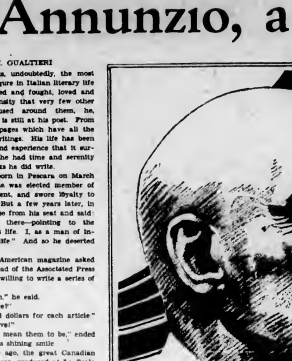
"It is just what I mean them to be," ended up the poet with his shining smile.

When, some time ago, the great Canadian tenor, Edward Johnson, produced at La Scala in Milan, D'Annunzio's masterpiece "La Nave", and "Phaedra," the poet sent him his picture with the following words:

"To Edward Johnson who, with his heroic breath, vivified Ippolito, master of horses, and Marco Orsino, subjugated by tempests."

When the war broke out he was in France, desert of his temptations; he came back in May, 1915, to deliver on the Rock of Quarto, near Genoa, the commemorative address of Garibaldi's famous expedition of the One Thousand.

On that occasion he spoke of the necessity on Italy's part, to join the war with the Allies. Repeating an old attempt he made in literature some reminiscences of the Gospel, he delivered



A Recent Study of D'Annunzio

age because they can serve their country; to the people the beatitudes of his country. He said:

"Blessed are those who are twenty years of age because they can serve their country; to the people the beatitudes of his country. He said:

"Blessed are those who have more, because they can give more."

What he did during the Great War assumes the proportion of legend. He served in all the armies, and certainly no other commander, on no other front, with his example and words, stirred a greater enthusiasm, for the common cause.

When in the Fall of 1917 the Italian army suffered the great reverse at Caporetto, it seemed as if all our hopes had been shattered. In those days he gathered around him the officers serving at the front, and said to them in a faltering voice.

"And now what shall we do? Some of you have given your lives this little night I have left be falling me. Behold, all that love is overcome by an infinite wave of blood, is carried away by a flood that seems without source and without end like the flow of eternity. If that was love, what can this be which tortures us multiplies us? If that was sacrifice, what test is being asked of us today. What are we about to give? Dying is not enough. If dying means to desist from fighting, then we cannot die. We must rise up again."

Mrs. Hoover Delights in Athletics and Out-Door Life

FOR the first time in the history of the country the United States is to have for the first lady of the land a woman actively interested in athletics and experienced in the joys and hardships of strenuous outdoor living. Mrs. Herbert Hoover is as much at home in unroaded mountains and deserts as in the banquet halls and bellrooms of social Washington. She has been entertained by kings and princes in their palaces and she also has been served beans and beans from the camp fire of mountain guides. She has met both with ease and charm that are a distinctive part of her sect for living.

MRS. HOOVER

It did not just happen that Mrs. Hoover became the leader of the Girl Scouts of America. She had been asked to head several dozens of useful and important organizations. The Girl Scout idea won her because it offered an opportunity to lead the young girls of America into the great outdoors and to teach them to love what she calls the beautiful and wonderful world in which they live.

This was no mere theory with Mrs. Hoover. It is one of her abiding faiths that every life needs some communion with nature. Ask her suddenly any day where she would like to be for the wishing of it, and the answer surely will come—"In the red woods," or "On Tamalpais," or "On the desert," or "By the sea."

To see Mrs. Hoover at a White House function or an embassy dinner or a cabinet reception is to meet a woman of great poise and charm and unusual gifts. But to see her in camp, roughing it, taking her share of the drudgery—frequently more than her share—is to know a splendid sportswoman. Long years of roughing it have taught her the game. She is efficient, and more. For years she has been sought for every camping party. No one has ever camped with her who has not become an ardent convert to camping.

Snake in Trouser Leg Gave V.C. Hero His Great Thrill

HAVING a snake up his trouser leg was the most exciting experience he ever had according to Rear Admiral Gordon Campbell, V.C., D.S.O., commander of the famous "Q"-boats, who was a recent visitor to the Pacific Coast. Admiral Campbell had three boats blown up under him during the war, but they are all excluded from his most exciting experience. "It happened in Africa," Admiral Campbell said when referring to the snake incident. "Of course snakes can't bite when they're in a person's trouser leg—but I didn't learn that till later."

Golf Standing

Two players arrived on the first tee of a golf course not many miles from London, to discover a magnificently-attired man accompanied by a caddie just about to drive off. The two politely requested permission to play first. The single player demurred.

"But excuse me," pointed out one of the twain, patiently, "you seem to forget that a single player has no standing on the course."

"No standing, indeed," said the solitary one, sharply. "Why, I have a caddie and you don't."

Seymour Hicks Posed Even When Almost Starved

SEYMOUR Hicks, the noted actor, who, by the way, is a native Nova Scotian, had his lean moments in the days when he began his stage career.

A yarn in which he delights deals with a youthful adventure in an English seaside town.

"I was 'broke'," Mr. Hicks assures his hearers. "And when I say 'broke' I mean 'broke', even for what I was—for a young and none too circumspect actor.

"I was strolling along the beach just wondering whether a few thoughts of a watery grave would bring the solace of tears or merely make me the laughing stock of myself when my roving eye was caught by a glittering object at my feet. It was a golden sovereign.

"I stooped—then straightened up. The beach as usual was thronged with holiday-makers and my nerve failed. I felt a whole household of blushes garnishing each other up by neck to my goggling eyes, but not for nothing had I learned to stand alone upon a stage with careless ease.

"I turned and airily surveyed the summer sea, then, stooping once again I picked up a pebble, then another, then the sovereign.

"Again I rose and levelling my gaze in the most professional manner at my disposal, I dedicately flipped a pebble out to sea.

"Neatly done! No one suspected anything and I smiled. Once more my arm took aim, once more I flipped.

"Some minutes later I strolled into the town and headed revenously for a place of eats. I withdrew my hands from my pockets to see which contained the coin and which the stone.

"And ever since then I have been very keen on listening to fairies yarns. The first chap I hear claiming that he caught a deep sea fish with a sovereign in its middle is going to get the shock of his life, I'll believe him. I three one away."

Actress Got Her Start on The Canadian Stage

THE recent announcement of the marriage of Dahlia Penn, known on the screen as Virginia Vance, to Bryan Washburn, well-known motion picture actor, recalls an incident of the Canadian girl's childhood in Toronto. It was at the time when Percy Haswell and her stock company were in the heyday of their success at the Royal Alexandra Theatre. Dahlia, who had already achieved some fame as a child eloquitonist, attended a Wednesday matinee with her mother and her cousin. After the play a tea was held on the stage of the theatre and the fans were invited to come up and shake hands with members of the company. There was a long line to take advantage of the invitation and Percy Haswell spoke a pleasant word or two to each one and they passed rapidly on. When Dahlia arrived, however, and said greetings in her low, well-trained voice, the leading lady looked at her searchingly and held her hand while those behind waited patiently. "Have you ever thought of going on the stage?" she asked the charming child. Dahlia admitted that to be her ambition, and was thrilled when Miss Haswell said: "We might be able to use you in our company some week." Incidentally it is interesting to recall that the little brown-eyed child, standing beside Percy Haswell and winning acclaim for her part that week, was Violet Dunn, now a Broadway star, whose marriage to an American theatrical producer has just taken place.

Jack Redpath Dougall 60 Years Editor—No Salary

CHOPPING down trees is a pastime sufficient strenuous for most men even in their prime; what must it be for a man who has long passed the Scriptural three score and ten? Yet in this vigorous recreation, John Redpath Dougall, editor of The Montreal Witness for more than sixty years, who celebrated his sixthy-eighth birthday on August 17, spends part of nearly every day at his Summer home at Metis Beach, Quebec.

J. R. DOUGALL

Mr. Dougall, who edits The Witness at long range during his Summer vacations, is McGill University's oldest living graduate. A journalist, who for many years as editor of The Montreal Witness, has used his beneficient influence for the welfare of Canada. In these terms, Mr. Dougall, was presented at McGill Convocation in 1921, when his Alma Mater conferred on him the honorary degree of Doctor of Laws. As the directing influence of a paper which was and is strongly Protestant in an overwhelming Roman Catholic city and Province, an advocate of freedom of trade in a quarter strongly protectionist and a staunch upholder of Prohibition where wet sentiment is prevailing, this gallant old warrior is one, who it may readily be imagined, is unskilled in the art of trimming his sails to the passing breeze. His policy at one time brought upon his paper the ban of the Roman Catholic Church; yet with French-Canadian Catholics his relations have been invariably of the friendliest. He it was who first drew public attention to the inadculable value of the work among the Indians of the West and later among the white settlers on the Prairies, of Father Lacombe, who was recently commemorated by the erection of a statue at St. Albert, Alberta. He was also the first to advocate the fusion of the component bodies into what is now the United Church of Canada, although he has not been sparing of criticism of tendencies towards too much centralization in the new church. His memories of Canada extend a long time before Confederation, he has enjoyed the friendship of most of Canada's public men, was a confidant of Sir Wilfred Laurier and once during a deputation to New Brunswick was lodged with Sir Leonard Tilley, it being stipulated that all the guests assigned to the New Brunswick chief had to be total abstainers! In his youth, when on a visit to Washington during the Civil War, he had the privilege of visiting Lincoln at the White House; and the late Dr. Sun-Yat-Sen never failed to call on him when on a visit to this side of the world. His editorial work is a labor of love; he has never drawn a cent in salary or dividend in all his years on The Witness.

Jascha Heifetz Wears A Charm Ring Over Heart

JASCHA Heifetz, considered one of the greatest living violinists, who appeared in Toronto recently, has one superstition.

He never appears at a concert without wearing his "charm ring." The ring is an exquisite Ceylon ruby, on which has been engraved a little dancing cherub. The stone is set in rare old gold, on which are tracings of a musical scroll.

Of this ring, the artist says: "When I play I do not wear it on my finger, but over my heart. It brings me good luck. Never can I play badly with this ring over my heart."

Bob Lowe of Yukon Fame Was Peel County Boy

SO many famous men have come out of Peel County, Ontario, that it is not surprising if a few are forgotten. Such a one is Bob Lowe—contractor and copper king of the Yukon. Few remember him in his birthplace, but north of the Chilicot Pass his name is one to conjure with, and in 1922 he was the recipient of a unique honor—of which more later.

ROBERT LOWE

Robert Lowe was born near Brampton in 1866. Until he was twenty years old he helped on his father's farm. In 1889 he decided to see something of the world, so he made his way to Griswold, Manitoba, where he secured work on a farm. His wage as hired man was far from princely.

Fortune smiled upon him and he was rapidly becoming a leading figure in the community when there came that first whisper of untold wealth in the Yukon. For an energetic young fellow with an eye for adventure it was too good to miss.

He decided to herde his bet by taking north with him a supply of pack horses, for which, he assumed, prospectors and traders would be willing to pay good prices. The assumption was right and his horse-dealing business proved nearly as profitable as a gold mine.

He started a contracting business and when in the fullness of time the public came to see eye to eye with him on the trade question they just naturally gave him the job of building them. From contracting Lowe jumped to copper and today there are few Yukon pies in which he hasn't a finger.

In 1903 he was elected to the Yukon Council, and in the same year he was made the first Speaker. He held office continuously until 1912, when he resigned to devote the whole of his time to his growing interests.

After his resignation Lowe worked might and main for a bridge across the thundering Yukon and a cable suspension bridge was built.

And there is a bronze plate on the bridge which reads: "This Bridge is Dedicated by His Excellency Baron Byng of Vimy, in Honor of Robert Lowe. August Thirteenth, 1922."

The More Things Change The More They Are The Same

AN amusing story is told by Miss Norma Talmadge concerning a man who paid a visit to Paris.

He took his wife with him and, as neither of them had been to the French capital before, they prepared themselves a good time. They began by treating themselves to a good dinner.

Towards the close of the meal, the man was telling his wife that her French pronunciation was all wrong, and that she shouldn't say "merci," as if it were our English word "mercy."

"Now I'll give the waiter a tip of ten francs," he told her, "and you listen carefully."

He slipped the man a ten-franc note, and the reply was: "Thanks very much, sir."

Desmond Burke Is Famous Shot

DESMOND Burke has always been a romantic figure. Even the name lends itself to romance, as does the face and figure of the winner of the Prince of Wales prize at Bisley this year, who also won the King's prize a few years ago, and three times since has been the runner up. A quiet and purposeful manner cannot altogether conceal some peculiar Celtic quality that rings one forever of Ireland with the smile and the tear in her eye.

DESMOND BURKE

With his tall, graceful figure, well-posed head and fine, dark eyes it is his mother that Burke most resembles. Mrs. Burke typifies that old-fashioned "lady," refined with a certain air of quiet distinction. Yet her soft brown eyes have the undying light deep down in them that is for poets and artists (and in Ireland, for politicians; not only in that country is politics an artistry). One can easily imagine that she might have won distinction in any profession had she not been so busy bringing up her handsome boys and girls.

At the Dominion Rifle Association's annual meet in Ottawa Desmond Burke spends a good deal of time coaching the younger aspirants. He is generous with tips and always on the watch for ambitious youngsters.

Burke's dearest friend is his sometime rival, Kenneth McGregor. They grew up together and are utter contrasts in every way, in nationality, in politics, and even in religion, the latter red-haired and humorous, Burke dark-haired and earnest. They tutored each other, but while McGregor has had considerable success, Burke remains the superior shot, and he chum his generous admirer.

The Bisley range is not nearly so good as Canada's Connaught range, according to Burke although avenues and groves of trees with numerous flower beds interspersed adorn the former. There the ground is alternate hill and hollow, making the poor conditions, with one end of the range much more tricky than the other due to exposure and cross currents. The Canadian team thwt own headquarters, a hut of red cedar where the living-room is decorated with mounted animal heads, sticks and hockey sticks.

Each year the team for Bisley is made up of the eighteen best shots from something like 200 competing riflemen from all Provinces of the Connaught meet of the year before.

This year the Kolapore Cup returns to Canada. An unusually handsome trophy, one and a half feet high, it resembles an Indian water pot and invariably occupies the place of honor in the trophy room at the Connaught range.

Centenarian Chief of Crees Tells Weird Story

KIPLING'S Mogli may have been a myth—Tarzan may be but "a tale for the telling," but ex-chief Buffalo Child of the Rocky Mountain Cree Indians of Western Alberta, probably Canada's oldest Indian vouches for a tale equally strange—and with himself in the stellar role.

Saved as a babe by the only other survivor of a terrible plague of smallpox that decimated the plains Indians—lost on the prairie at five years of age, to be adopted and protected during one bitter cold Alberta Winter—rescued after a struggle by other Indians, and later made a powerful chief, is Buffalo Child's story, and there appears to be no reason for doubting its truth.

The ex-chief is stone blind and very weak physically, but his mind is clear and his intellect keen. He is led around with tenderness by the younger members of the tribe over which he ruled wisely for an average lifetime, and is venerated—worshipped, almost—because of his wonderful past life and his present affliction.

A hundred and four years ago, the old chief said through an interpreter, there was a terrible plague of smallpox throughout the plains Indians of Montana. It spread to the Canadian Indians, and in one lodge of two hundred men, only one dread survivor had buried itself out, but one adult crawled feebly forth alive.

Staggering from the death-camp, he was arrested by a whimper, to see a tiny babe at the cold breast of its dead mother. The men took the child with him to another camp, and the babe, after a battle with death, finally survived.

When five years old, the boy wandered away in the golden sunshine of a late October afternoon. They sought him far and wide, but when the first snows fell, he was still missing and was given up as dead.

The following Spring, after a Winter of unusual severity, Indians from this camp, on a hunting trail, saw an old buffalo cow scraping in the snow to clear the green grasses beneath—the usual method adopted by the buffalo, for securing Winter fodder.

As they looked, the Indians saw a small, brown object rush from between the old cow's forelegs, and threw itself upon the green grasses uncovered from beneath the snow.

Amazed, they rode closer, to find that the object was none other than the five-year-old boy whom they had lost from the camp the previous Fall. The boy, fleet as a deer, evaded capture for some time, while the old buffalo put up a determined battle for her strange little young.

The child was then and there marked for chieftainship honors, grew to young manhood, and later became chief Buffalo Child of the Rocky Mountain Crees, leading his charges with wisdom and courage, in peace and in war, finally handing over the reins of office to his son.

A Trifle Indirect

A traveler raced along the platform and just managed to scramble into the last carriage as the train started. He banged the door shut and, popping his head out of the window, roared to a porter, "Is this all right for Montreal?"

"Yes," yelled the porter. "Change at Hamilton."

Hide the Thimble

Shop assistant (pointing to a row of chickens)—"This chicken, ma'am?"

Customer—"No."

"This one?"

"No."

"This one?"

"No."

"Well, let me know when I'm getting warm."

A Page For CHILDREN

A Solarium Entertainment

Given by Little Folks at Cordova Bay

MRS. H. A. Beckwith has sent The Colonist a nice account of an entertainment the children at Cordova Bay held one night early in August. As nearly all the players were "very, very young," we think many readers as well as the Solarium children will like to read about the fun they had.

How It Began

NEXT door to us, Mrs. Beckwith says, is Mr. Frank Doherty's family of six children, all of whom are talented entertainers. On the other side is Mr. Victor Messon's family. The children and their cousins have learned recitations and songs at school. Early in the season three children and others had a little impromptu affair round our bonfire one evening. Later they had a bigger and better show on the veranda of Mr. Doherty's cottage. This concert was such a success that they decided to prepare a still bigger and better one and to take up a collection in aid of the crippled children at the Solarium. This was the children's own idea and their enthusiasm spread to several homes on both sides of them. Costumes were found and the plays were woven around them.

One had a queen's dress, another a page's suit. Little Mary Doherty, six years old, had a butterfly costume, so she was a fairy butterfly. Her big sister was another fairy dressed in pink. These suggested a woodland scene with the fairy queen being entertained by various dwellers in the woodland. The fairies danced. The page announced the items. The clown did a whistling stunt. The children were about one costume but it was found that two boys could get into one pierrot dress they borrowed. They were Siamese twins and created much merriment.

Mrs. Roskelly wrote several pretty verses for the little ones to say. Everyone had a part. The older children were delightfully kind and helpful to the little ones. Two-year-old John Beckwith was an attendant on the queen and sat at her feet holding a huge dahlia.

"Wedding of the Painted Doll"

THE hit of the evening was an act called "The Wedding of the Painted Doll." The bride was little Mary Doherty, six years old. She wore a lace veil caught up with white flowers and carried an old-fashioned bouquet of Cyrpopdia and pale pink sweet peas. The six-year-old bridesmaids were Mary Witter and Jean Beckwith. Mary wore a lovely peach gown with a bouquet of primulas, mauve stocks and baby's breath. Jean's frock was pale blue. She carried a bouquet of delphiniums, pink Clarkia and Cyrpopdia. All three looked charming.

The groom, represented by another six-year-old maiden, Dagmar Gill, wore a suit of black crepe paper. The minister, with all the dignity of seven years, was Billy Brady. He wore a black crepe gown and looked very solemn as he came in with his eyes on an open book. When the ceremony was over, the bride was showered with confetti (made of crepe paper) in orthodox style.

Mrs. Dickie, of Duncan, visiting Mrs Doherty, made paper costumes. Mrs. Roskelly and girls were scene shifters and stage managers. The audience was delighted and the collection amounted to $8.00.

Eugenie Doherty, who prints nicely, copied Mrs. Roskelly's verses. Cecil Witter and Audrey Messon, a little artist, painted a picture to send with the money to the Solarium. The Cordova Bay child campers hope the little folk there will get as much pleasure from the gift as they had fun in raising it.

Thos. P. Bellchambers

A Modern Saint Francis

ALL children know the story of St. Francis who was the love and trust of the birds in Italy. That was long ago. Since his time many people have come not only to believe but to feel that the birds and beasts are God's creatures and that to hurt one of them wantonly is wrong. Few boys now rob birds' nests and their mothers and sisters have given up wearing the plumage of wild birds in their hats.

In our own country you have heard of Mr. Miner, who protects the wild fowl. On the other side of the world there is a man who has given many years of his life to the preservation of native birds and animals. His name is

Thomas Bellchambers

AUSTRALIA was a land of wide unsettled spaces when fifty-four years ago Thomas Bellchambers went out there to work as a farm hand. The voyage was made in a sailing vessel and took four months. When it was over Tom and a chum went to the great wheatfields to find work. When harvest was over the lads wandered among the stations doing whatever work they could find. As time went on they parted.

Five years passed away before a younger brother came to join the young man. The poor lad did not live long. He was not strong enough for the rough work and Bellchambers was alone again. Before long his mother, a sister and another brother came from their English home on the other side of the world to make a home for the exile. With them was a young girl who became the wife of the young settler. All worked hard, and in the country along the Murray river found plenty to do. The elder brother always found time to study and observe the curious wild creatures of the new land. Some of you will remember the pictures of the kangaroos, the wallabies, and other birds and animals of Australia, shown in the theatre a few months ago. The shyest of these soon became friends of Mr. Bellchambers. Even a wounded eagle had its wing set by this naturalist.

Humbug Scrub

IT was in South Australia that the Bellchambers decided to make their home. On their little farm of eighteen acres they planted an orchard, kept bees, raised vegetables. Now they have 300 acres and a flock of sheep, but the greater part of this land has been enclosed to preserve the creatures whose ways have destroyed. Birds, like the smaller fowl, have no secrets from Mr Bellchambers. The shyest of forest animals love and trust him and his children. In speaking of his life's work to his friend, Mr. Arthur Mee, editor of The Children's Newspaper in London, this lover of nature writes:

A Hard Struggle

"MY lot in the forefront of the battle strenuous, full of hardships and disappointments, expected and hidden abuse, has won enemies as well as friends; but all the time, even when suffering hunger and thirst in the wildest spots, I have glimpsed the glories of God's wonderful creation, and have learned something of His all-embracing love and pity, something of His harmony of perfect law. For there is a power that works in nature and makes it a living whole and not a mere aggregate of living things. Infinite wisdom, infinite love, are met by every sentiment being with infinite trust, for all creatures in a state of nature live by faith."

In the rich land of Australia there have in the past fifty years been many opportunities of making a fortune. Mr. Bellchambers has chosen to work for the safety of the wild creatures and to rouse interest and pity in the hearts of his fellow men. He trusts that funds will be found by nature lovers in Australia, the homeland and other British Dominions to carry on the work he has begun at Humbug Scrub.

Patsy Finds Friends

PATSY Shenwood lay on the rocks watching the gulls as they flew about the lighthouse. She was angry and she tried to keep back the tears that stung her eyes. Mother had suggested that she go and watch the gulls and collect the shells that lay on the rocky beach in front of their Summer cottage.

Patsy was usually a good girl, but today she felt that everyone was treating her like a baby. She had been looking forward to the day her brother Tom would come to their Summer cottage, but dad had received a letter from Tom saying that he could not get his holidays until the next month.

They had been in Scotland three weeks and Patsy had been alone most of the time, and she had found it rather difficult to keep out of mischief, for she was used to lots of friends and fun in their large London home.

Friends and an Adventure

SHE lay wishing something would happen when a merry voice behind her said "Hullo." Patsy jumped up quickly and looked behind her. There stood a boy and girl about her own age with laughing eyes. The girl was the first to speak.

"Who are you and where do you live?" she asked.

Patsy replied "My name is Patsy Shenwood and I am living in that green and white cottage over there. I do not always live here. I am from London."

The boy nodded and said: "I live on the other side of the cove, and this is my cousin Marie, who is spending his holidays with me. My name is Frank Carmen."

"Let's walk along the beach and see what we can find," suggested Patsy. Frank and Marie agreed, so they climbed down the bank to the beach.

Marie and Patsy collected various shells while Frank watched an old tramp steamer sail slowly away in the distance. Time passed on and Frank said: "Let's go to the end of this point."

The three friends walked to the end of the point and began exploring it. They hadn't passed when Marie exclaimed, "The waves have surrounded the point and made it into a small island."

Frank said: "I don't think anyone will see us. The waves are rough and it is nearly dark. No one would venture out in a boat."

"Well, I think the best thing we can do is to jump in and swim," said Patsy. So they swam to the shore. Patsy said, "Good night," and hurried home, where her mother was keeping her supper warm.

Patsy said she did not mind having spoiled her new slippers since she had found two friends to spend the long Summer days with.

WINNIE CURNEY, Aged 13.

Signal Hill, Esquimalt.

Two little hands, dimpled and fat.
Two little feet that patter and pat.
Two bright eyes of heaven's own blue,
Two little arms thrown around you.
One little chin dimpled with fun.
Two little legs that sturdily run.
Two little ears and two little cheeks.
One little mouth that treasured word speeks.
One little brain full of wondring thought,
Quick to absorb whatever he taught.
One little soul, spotless and white,
God give us grace to train him aright.

Rags and the Grouse

By Marion Isabel Angus

THE day was unusually warm. Scott and Rags were walking home from the beach, but, forsaking the main drive, where the sun beat with pitiless fervor, they wandered into the cool depths of an oak grove. Under their feet was a variegated carpet of dainty, ruby-colored fetches, vivid blue camass, golden buttercups, and little star-faced flowers with yellow centres.

Rags was a little black terrier with big appealing brown eyes. Usually his small master found him lots of fun, but this day was so hot that even Rags felt the oppressiveness and failed to respond to Scott's tentative attempts at play.

Suddenly Rags was roused from his lethargy. Some distance ahead of them was a beautiful lopin bush, brilliant with pale lemon-colored catkins. From the shelter emerged a family of grouse, consisting of a sedate, little brown mother, and several chicks.

Rags gave a yelp and darted forward, all his primitive instincts aroused and the heat entirely forgotten.

Instantly the cover disappeared as if the earth had swallowed them, but the ban stood her ground till Rags was very near.

By this time Scott had somewhat recovered from the astonishment that had found him at the unexpected appearance of the little brood.

"Rags," he called, and Rags stopped—well-trained dog that he was!—but looked sheepishly towards Scott.

The enemy's pause puzzled the little mother. She fluttered away from the lupin tree, whirred her tiny wings and in a variety of ways endeavored to hold their attention till the chicks had reached a place of safety.

Rags eyed her interestedly and occasionally his bright eyes sought Scott's as if to say, "Why can't I give chase? What with the hard and not being able to chase these creatures it is certainly a dog's life I'm leading today."

Finally convinced that her little brood had had time to reach the safety of their nest, the grouse rose softly and flew a short distance. In a moment she was lost to sight amid the long, thick grass. As her line of flight was diagonally opposite the place of her appearance, Scott wondered at the sagacity and valor of the little mother, in covering the flight of her nestlings and at the same time ensuring her own safety so that she might continue to minister to their needs after the danger had passed.

Rags whined with disappointment, but Scott laughed and said, "Saved from you this time, Rags. I think we will call it a day and return home. It is too hot for anything else."

Rags followed him disconsolately along the dim, fern-sweet trail.

Insect Friends and Enemies

THE air and the earth are filled with insects in these August days. What do you know about the bees and the wasps, the butterflies and grasshoppers, the flies and the gnats, the mosquitoes and beetles and all the rest of the tiny creatures that live around us. Have you watched the ants at the nest?

Perhaps you have no interest in any of this part of the creation, and yet it is very important that some people should know whether these tiny creatures are friends or enemies. If they do us good how are they to be fed and protected? If they injure the plants they supply our food or our clothing, or our shelter, how are they to be destroyed? It has been stated that one tenth of the crops of the world are eaten by insects. There is plenty of work for the boy or the girl who has sharp eyes and know how to use them.

A Poet and His Dog

WALTER Savage Landor, the great poet and critic, loved animals, especially dogs and cats, and in his home they became the best of friends. He had one dog named "Pomero," whom he especially loved. One day a lady asked him if he would sell Pomero. "I would not sell him for a million," was his reply.

"Are you serious?" she asked him.

"Entirely so," he said. A million dollars would not make me any happier than I am now, while to lose Pomero would make me miserable. Do you understand?"

Pomero and his master were inseparable, and had one little habit, or accomplishment, that is not usual. He could laugh! and when his master would laugh, then Pomero would burst out laughing, too, and so loudly that sometimes the pair could be heard clear down the street. They also used to attend concerts together. Pomero often being much affected by the music.

Landor once wrote to a friend "Pomero is now sitting on my head, superintending all I write and telling me to give you his love."

The time came when little Pomero had to go, and his master was inconsolable. But he did not grieve alone for (we will let his master tell it):

"Everybody in the house grieves for Pomero. The cat lies day and night upon his grave, and I will not disturb him though I want to plant violets upon it, and have his epitaph placed around his little urn. Cor intus est fidele, nam cor est canis" (which means the heart within is faithful for that heart is a dog!)—Raja-Yoga Messenger.

Little Willie's favorite uncle had arrived.

"Hello, old chap!" said Uncle. And how do you like school?"

"I like it best closed," was Willie's reply.

Odds and Ends

If we are to save ourselves and those who come after us from a renewal in an even more frightful form of all we suffered in the Great War, we must in our very notions and everyday conversation seek peace and ensue it. —H. R. H. The Prince of Wales.

When I look back upon by boyhood I like to think that I was successively an engine-driver, a tramcar conductor, a sailor, an actor, and then for four years successively Foreign Secretary of this country and Prime Minister.—Archbishop of Canterbury.

Helen's Birthday Party

By Iris Noel

WHEN Helen awoke on Saturday morning the first thing she thought of was that it was her birthday.

"I am ten years old now," she said to herself. "What a lovely day for my birthday." She looked out of the window at the warm sunshine and listened to the birds singing.

When Helen went into breakfast she saw several parcels on the table in her place and over the back of her chair hung a lovely blue silk dress.

"Happy birthday, dear," said Mother. "How do you like your dress?"

Helen lifted the dress up carefully and admired it. "It is perfectly lovely," she answered. "Thank you ever so much for it."

She ran to her mother and kissed her, then she looked at her other presents, and found a nice book from her father, a sewing box from her aunt and an eversharp pencil from her uncle.

During breakfast she wondered what she would do all day.

This was the first time since she could remember that she had not had a party. When they moved into their new house Mother had said: "I am afraid you will not be able to have a birthday party this year as the house is so small."

Helen had told her she did not mind then, but now that it really was her birthday it seemed different.

She started to say: "I wish we had not moved," but she stopped.

Rags eyed her interestedly and occasionally his bright eyes sought Scott's as if to say, "Why can't I give chase? What with the hard and not being able to chase these creatures it is certainly a dog's life I'm leading today."

Finally convinced that her little brood had had time to reach the safety of their nest, the grouse rose softly and flew a short distance. In a moment she was lost to sight amid the long, thick grass. As her line of flight was diagonally opposite the place of her appearance, Scott wondered at the sagacity and valor of the little mother, in covering the flight of her nestlings and at the same time ensuring her own safety so that she might continue to minister to their needs after the danger had passed.

Rags whined with disappointment, but Scott laughed and said, "Saved from you this time, Rags. I think we will call it a day and return home. It is too hot for anything else."

Rags followed him disconsolately along the dim, fern-sweet trail.

"Why don't you call some from, and how did you know it was my birthday?" questioned Helen.

"This is your birthday party," explained Mother.

"They met at my place," added Jean, "to give you a surprise. Come and see your presents." (Jean lived in a house touching the beach.)

Jean gave Helen a pretty necklace, the other girls gave her a box of chocolates, a handkerchief, a bracelet, some notepaper and a nice book.

The girls put on their bathing suits and went into the water. After this they dressed and the maid said soon Helen's mother called. "Come on girls, dinner is ready."

"They saw she had spread a cloth on the sands.

"Look at the cake," cried Jean. "Strawberry cake!"

"Yes, strawberries," counted Helen. "Are they not big dear?"

"Look at the salads," cried Doris.

There was a salad for each person, in a pepper cup.

There were also plenty of sandwiches, cookies and bananas.

After dinner Helen passed around her box of chocolates. When they had rested two hours they went into the water again. After they were dressed the second time, Helen cried: "Look at the lovely pony."

The girls looked and they saw a lovely Shetland pony. A boy was leading him, and there was a girl riding on his back.

"Five cents a ride," the boy called as he passed them.

"Would you each like a ride," asked Helen's mother.

"Yes, yes," they exclaimed at once.

Helen's mother gave them some money so they all had a ride. When it was time to go home the girls told Helen they had enjoyed themselves.

As Helen was putting away her presents that night she said: "I have had a wonderful time, Mother. It was lots more fun than a party in the house."

"I'm glad you enjoyed your birthday surprise," answered Mother.

When Helen went to bed that night she thought what a nice birthday she had had and she was very glad she had not grumbled that morning about not having a party.

Up the Hill and Down The Hill

In the dale are vines and apples,
Here upon the hills are none;
In the dale are gay companions,
Here are only wind and sun.

On the hill are cold and silence,
All the world is down below;
In the market, courts and taverns,
And the roads made long ago.

In the dale are wealth and favors,
Food and fire and jest and love;
All the ease and sweet of living—
All its starkness lies above.

Yet some hearts have loved the hilltop
Till it claimed them for its own:
Leaders, prophets, music-makers,
They have lived on heights alone.

And they cared not when men mocked them
From the easy world afar:
Fame and fortune could not buy them.
They were close to more than fame.

—Children's Newspaper.

An Animal That Washes Its Food

WE naturally expect human beings to wash their food before cooking it, and we expect them to wash their faces and hands several times a day and keep clean at all times. But we don't expect animals to do things we do, and especially we do not expect them to wash their food before actually eating it. But the unexpected has a way of happening, you know, so it is not so very surprising to learn that there is an animal who washes every single thing he eats if he can get in water to do it. And if he can't get to water, he goes through all the motions of washing his food anyhow.

The funny thing is that this animal is found in British Columbia and in almost every State in the United States. If not in every one, yet you might live a whole lifetime and never see one. Indeed, thousands of persons have never seen one at all, and never will unless they happen to come upon one in a cage at the zoo.

The raccoon is a close relative to all members of the bear tribe and is even a cousin to the big grizzly, yet he lives in hollow trees or dens under some creek bank and sleeps by day so that he can prowl about at night. He is what is called a nocturnal animal for this reason. He is a funny little fellow with a long bushy tail, having a series of black rings around it and a broad head. His nose runs to a sharp point like the nose of a fox, and across his face, covering his eyes, is a broad band of black fur which makes him look as though he were wearing a mask all the time.

His hands are much like ours and his hind feet are almost the shape of a baby's, so that his track in the mud often looks as though a tiny baby had passed that way. He is smaller than a setter dog, in fact, he is only about four times as big as an ordinary cat, and so round and fluffy that he looks like a walking ball of fur. He hunts his food along the creeks mostly, for he is fond of fish, frogs, small snakes, birds and bird eggs, as well as green corn and a lot of other things. And whenever he goes to eat anything at all, if possible he always dips it in the water and washes it first with his little black "hands."

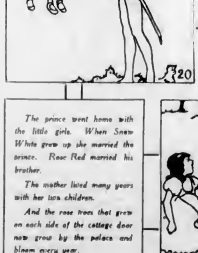
The raccoon has a disposition much like a dog and makes a great pet if caught when he is young and treated kindly. He gets very tame and is a friendly little rascal if properly taken care of.

The more I study nature the more I stand amazed at the works of the Creator. I pray while I am engaged in my work in the laboratory.—Louis Pasteur.

Snow White and Rose Red

By M. GENEVIEVE SILVESTER

MAKE-A-BOOK—Save the twelve pictures that tell this story to make a book. Cut them out and paste them on white paper. You will then have a complete story. Cut a cover from stiff paper, and sew the pages of the book into it with a big, strong stitch.



The bear called, "Snow White and Rose Red, do not go away! I will go with you." The children knew their friend.

Then his fur coat fell off and he stood up a man. "I am a prince," he said. "The bad dwarf stole my treasure and enchanted me in a bear, and I could not be myself until he was dead."

20 21

The prince went home with the little girls. When Snow White grew up she married the prince. Rose Red married his brother.

The mother lived many years with her two children.

And the rose trees that grew on each side of the cottage door now grow by the palace and bloom every year.

Suburban Country

Agriculture is a fact yesterday; on it rests the life and happiness of mankind.—Julian A. Hawgood

Care of Poultry on the Farm

By R. C. GIBSON

THERE is no need at this time to insist on the necessity for periodical culling of your poultry—ducks do less than the other classes of stock, but what should be impressed on all is the fact that it is no use to think that because the youngsters have been bred from the very best of stock, it is a foregone conclusion that the progeny must be all of the very best. If such were the case, how very much easier poultry-keeping would be. But you have got to make up your mind that it is not the case and that continuous culling is the only means you have got of making sure that you keep none but the most profitable of stock. And now to get back to ducks. In the following article (our notes) we shall tell you how to cull both the laying birds and the growing ducklings; the former for ducks you may be harboring and the latter to prevent useless birds from finding their way into the Winter laying pen.

The Good Layer

BEFORE you pick up a single bird you can tell something of its capabilities while in the run. The good layer is active, first at the food trough and last away; has a keen appetite and eways a more or less full crop; is early about in the morning and late to bed at night. In the case of the adult, she will be well expanded behind if she is a good layer; she will walk with legs wide apart and will give the appearance of being ideally proportioned. The good layer is all curves, an angular bird is a doubtful profit-earner. Having scanned and noted them in the run, each one is now picked up and examined. Do not forget that ducks should be caught and lifted by the neck, rerely by the wings and never by the legs, but they are held practically in the same manner as an ordinary fowl. That is to say, the bird faces the back of the operator, the breast rests along the palm of the left hand and the thighs lie in between the fingers. The body is held in the "crutch" made between the arm and the side of the body, but while the front, head, etc., is being examined, the bird is reversed.

Judging Temperament

WHEN you pick up a duck you will be able to judge its temperament. The good layer is friendly, docile and quiet; the dud is wild, flustered and protests loudly. Of course, ducks are naturally rather more nervous than hens. Now let us start a closer inspection, commenting at the back and work our way to the head. The distance between the pelvic does not teach us so much as in the case of fowls, for they do not move so much, according to laying. All that can be said definitely is that the bones of a good laying duck will be at least three fingers apart and quite thin and straight. A much surer sign of whether she is in lay or not is given by the expansion of the abdomen, this drawing up and becoming smaller as she goes out of lay. The distance between the pelvic bones and the breast bone (the keel) should be at least three fingers, differing slightly according to the size of breed. Thus in a Buff Orpington five fingers would denote a good layer.

The Abdomen

THE abdomen itself must be big, deep, wide and pliable. Naturally in a good duck which is going to lay it will not be fully expanded, and in such a case you must check your opinion of the bird by noting other points. In fact, it is important that all points be taken collectively, no one in particular being regarded as absolutely definite. The good layer stands with legs wide apart. You should be able to pass a hand between the limbs and barely touch them. The legs themselves should be fine-scaled, flat and if laying has been prolonged and heavy, pale in tint. The bones should be neither too coarse nor too fine, with coarseness we get few eggs and with excessively good quality we get small eggs and danger of bodily breakdown. The legs act as the safest clue for bone quality. They should be flat, not spindly, round, or thick. Next we come to the body. The back should be flat, not hollow, nor rounded, and the tail should be quite "square" to the body and not leaning to either side. We need depth in the chest to allow for ample heart development and plenty of space at the back for big internals and egg-making apparatus. The back must be long to give room for a big, efficient oviduct, i.e., egg-shelling passages. Length is measured from the base of the neck to the front of the tail. Width of back is also necessary to provide space for a big ovary, i.e., egg-making organ. This test, however, is better applied when picking out the breeders, for it has been found that width of back does not have such an effect as length as regards actual laying. Its only point, being that a narrow bird makes a doubtful breeder and may possibly lay rather small eggs. Width of the shoulders, by the way, is more important than width lower down the back. The body itself should be heart-shaped, the top of the "heart" being the back of the bird, the line being that the bird must not have flat sides. They should be rounded like the sides of a heart. The best layers at this time of the year are faded in color when worn plumage, but you must not compare birds that have been in a shady orchard with those that are kept in a sunny run, for the sun has a fading action, too. The feathering is the next point to note. As with fowls, the plumage of a good duck is always lightly carried. It is silky, small, fine in texture and lies quite close to the body. The feathering round the abdomen is bunchy and held well together like a wooly ball. The pelvic layer has harsh and sticky feathering.

What Feathering Tells

THE feathers of the back of the good duck are light and cannot easily be ruffled up the wrong way; if they are held up they return quickly to their place. Excessive feathering is a sign of a poor layer. Baggy thighs, thick neck and a fluffy body indicate that the bird is using her energy for fine feathers instead of fine eggs. This bird is now turned round so as to examine the head and neck. These parts are the great indications of laying ability. The neck, covered lightly with feathering should be scaly and thin and fit very gradually to the body.

The head should be the essence of quality and, together with the beak, should form something like a wedge. The tops of the beak and the head in the Runners and the Khaki-Campbell should be in one straight line. The bill must not be too long or thick, as this indicates general coarseness and therefore poor laying. The top of the skull should be flat, not rounded, and the eyes should bage out from the head when viewed from the front. The tiny feathering round the face should be extremely light, small and not in heavy profusion. The eye should be large round, bright and set high up in the skull and the nostrils should be large and clean. As far as weight is concerned, choose the medium as better the best. Thus a Runner duck would weigh 3½ pounds, a Khaki-Campbell, 3½ pounds, a Buff Orpington, 9 pounds, a Pekin, 6½ pounds, a Cayuga, 9 pounds and a Magpie, 4½ pounds. With young ducklings practically the same notes apply, as for the layers, except, of course, the large abdomen, but there must be fullness and space of abdomen even in the maturing stock. The head is again a good sign. It should be fine billed, have tight feathering, big, round, brilliant eye, set high in the skull. The body feathering should be tight, and those that are quickest and easiest are sure to turn out best layers. The legs and bone in general should be fine, the pelvic straight and thin, while a good long back with decent width at the shoulders and legs set far apart, are just as indispensable in the young as in adult stock.

If You Want a Garden Next Summer Plan Now

GARDEN planning takes a great deal of thought, and it is not easy to find time for careful thought in the busy Spring season. Than tasks crowd upon us, always more than there is time to do. We understand then what an advantage one has who has made his season's work in detail during the Winter, when there is time to think.

The first step in planning, we are often told, is to form a comprehensive idea of the garden you will make. Just what does this mean? You would know, if it were a house you were planning—how many rooms, what style of architecture, the chief materials to be used. All would be decided definitely. A house is standardized; our ideas are well fixed, but the function of the garden is less well known to us.

Just what part do you wish your garden to play in relation to your home? «Is it to be merely the ornamental exterior of the house, the outside dress of the home? Is it to be the outdoors of the home, a living-room with a carpet of grass, a ceiling of the blue sky, and decorations of flowers? Is it to be the family and one's guests can enter without feeling that they are going outside. The owner's attitude toward his garden means everything in its development.

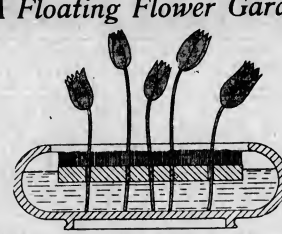
The conception of the garden as an intimate part of the home is growing. It is coming as the use of screened porches came, in our house architecture. We moved from the inside rooms to the screened porch in Summer, and now we are moving from the porch to the garden and finding it possible to live outdoors in comfort and pleasure amid surroundings of ordered beauty. This is the modern Canadian conception of the home garden.

The garden owner who accepts this conception and determines to build an outdoor living-room will still have to compromise with the older idea, however, and decorate one portion of the home grounds for public display. This is the front yard, which in our Canadian suburbs is to all privileged purposes part of the street, as much as the parkway. To introduce privacy in this portion of the grounds is usually impossible. It should be developed in harmony with the neighboring yards and in such a manner as best to emphasize the house design and present at all seasons of the year a dignified and inviting appearance.

Having surrendered his front yard to pure ornamental purposes, the home owner seeking outdoor comfort, coolness and privacy, turns naturally to the back yard, and it is here the outdoor living-room has to be developed. The private garden in a room primarily for the owner's enjoyment, and in that essential respect only is to be found the reason why the modern style beats lightly upon those which have sometimes been thought of great importance, such as the relative merits and fitness of formal and naturalistic planting. An outdoor room, like an indoor room, calls for design. It requires definite proportions. It must be in balance, for which purpose its axes need to be indicated, so that its occupants may not be made uneasy as in a house interior and unmatched windows and uneven walls. For purposes of privacy and separation the garden room needs to be screened from outside view and from many views out, since there are few back yards where the surrounding spectacles are all attractive. The screen may be provided by trees and shrubs, or by a wall or fence.

Given the essentials of design and boundaries the decorations of the outdoor room become a matter of the owner's taste.

A Floating Flower Garden



The Cut Flowers Are Inserted in a Sheet of Perforated Cork Over Which Grass Seed Has Been Scattered in Spring and Flower Seeds Have Been Sown

A bowl or tub of cut flowers, in a bowl or other vessel containing water, Leon Marx, of London, suggests the idea of using a sheet of cork with holes bored through it to receive the stems. Thus arranged, the flowers will stand prettily upright.

If grass seed is sprinkled over the surface of the cork it will sprout and form a miniature floating lawn around the flowers. Bulbs may be placed on the float, which, when they have germinated, will form a little floating garden.

Garden Week by Week

By NORMAN W. F. RANT, F.R.H.S.

AT this time of the year it is no waste of time to look back over the work of the past season and to size up the success and the failures. In this way one will be in a better position in the Autumn to plan next year's garden with the idea of making it better than this year's.

In all probability in making this survey the gardener will find that his chief lack is an adequate quantity of late-flowering subjects. In a country with the climate of Vancouver Island, it is an easy thing to have a beautiful spring garden and a fine garden in the early Summer. This is due, of course, to the abundant Winter rain. In the late Summer and the Fall, however, it is more difficult to get the quantity of bloom one would wish to have, due very largely to lack of rain, but also to the fact that the right subjects are not planted.

For Late Blooms

FOR late Summer and Fall blooming one should have plenty of perennial asters (Michaelmas daisies). These plants have been developed to a great degree in the last ten years. The colors have been much improved, the size of the individual flowers made much larger and the plants themselves improved in habit. The pink varieties are very fine, Dick Ballard, Eric, Lil Fardell and Louvain being among the best, while among the best blue and mauve varieties Climax, Cloudy Blue, King of the Belgians and Rachel Ballard may be mentioned.

Helenniums are excellent late-flowering perennials and may be had in colors ranging from light yellow to brown. Grown in conjunction with perennial asters, the effect is splendid. It is well to note that both these plants look much better when planted in masses of from six to a dozen or more plants.

Hardy "Mums"

HARDY chrysanthemums should be more grown than they are, but do not make the mistake of planting old plants. It is better to plant young stock from cuttings in the Spring. They will give more flowers than the old plants. Any color scheme may be worked out with chrysanthemums as almost any color except blue may be found among them.

Gaillardias will bloom quite late if the flowers are kept cut off when they fade. They are very gay subjects and give a wealth of color with very little trouble.

Planning Ahead

IT will soon be time to think about what one is going to plant for next year's garden—trees, shrubs, bulbs, perennial plants and annuals—and it is well to make a note of what one has to procure, well in advance of planting time. Roses should be ordered without delay because the earlier these are planted the better they will bloom next year. By the same token the ground in which planting is to take place should be put into condition. This takes time if it is to be thoroughly done, and it should be thoroughly done if success is to be the reward.

The effect of all the soil in the vicinity of Victoria is deficient in lime, and it is quite safe to give any beds or borders that one is preparing for planting in the Fall a good dressing of it. Lime may be applied in the form of ground lime rock, as live lime or as slacked lime. The last is much better than the most used here and can be applied at the rate of from one to three tons to the acre. The effect of lime is to sweeten the soil and to make the plant food in it available to the plants. Do not incorporate farmyard manure with the soil at the same time as applying lime, but wait a couple of months at least.

Choosing Fertilizers

IN these days of scarce farmyard manure one is often asked what is the safest thing to use in the way of a fertilizer. Bone is best either in the form of bone meal or coarse bone. The former acts more quickly while the latter lasts much longer. Bone meal is safe to use while many of the chemical fertilizers are dangerous if they are not handled with care and knowledge of their action.

There is nothing better to create humus in the soil than a good dressing of rotted oak leaves, rotted grass clippings and rotted weeds. When the leaves are swept up in the Fall and when the grass is cut in the Summer, and when weeds are pulled up at all seasons of this year, they should be put in a pile to stand out-of-doors—away corner and allowed to rot so that this mass of vegetable matter may be dug into the beds and borders from time to time. A dressing from this compost heap in conjunction with some bone will be found as a fertilizing agency as one could desire.

Wheat Crop of 1928

DISTRIBUTION figures showing the disposal of the wheat crop of 1928 are now fairly complete. Exports of wheat during the crop year ended July 31, 1929, amounted to 352,424,699 bushels, while exports of wheat flour totalled 11,896,775 barrels, or the equivalent of 59,139,488 bushels of wheat, making 408,564,187 bushels of wheat in all. The amount required for seed for the 1929 crop is estimated at forty-four and a half million bushels, while food requirements may be put at forty-four million bushels. The total thus accounted for is 497,064,187 bushels, while stocks in Canada on July 31, 1929, were reported as 104,426,327 bushels, making 601,490,514 bushels accounted for in all.

The carry-over on July 31, 1928, from the 1927 crop was 77,626,000 bushels, and imports during the crop year are estimated at one million bushels. The amount of wheat disposed of from the 1928 crop is therefore shown as approximately 523 million bushels.

Unmerchantable grain from the 1928 crop was estimated at 27,854,000 bushels, while the loss in cleaning was placed at 16,007,000 bushels. Those figures indicate that the gross crop of wheat harvested in Canada in 1928 amounted to 566,726,000 bushels, of which approximately 544,000,000 were grown in the Prairie Provinces.

It may be pointed out that the Dominion Bureau of Statistics estimate of September 11, 1928, indicated a crop of 565,488,000 bushels for all Canada (537,333,000 bushels for the Prairie Provinces). This, it will be remembered, was, at the time, subjected to much adverse criticism as being too high. The estimate of September, 1927, was also attacked in a similar manner, although in both cases the estimates were shown by subsequent marketing figures to be low rather than high.

Fur-Farming Industry

THAT the fur-farming industry of Canada is of growing importance is shown by the annual report for the year 1927, just issued by the Dominion Bureau of Statistics. The number of the fur farms in 1927 (exclusive of muskrat and beaver farms) was 3,330, an increase over the preceding year of 661, while the value of property amounted to $18,000,000, an increase of $1,000,000. The silver fox is, of course, of chief importance, but other kinds of fur-bearing animals are raised successfully, including blue fox, patch or cross fox, red fox, mink, raccoon, skunk, marten, fisher, coyote, chinchilla and other kinds of rabbit and Karakul sheep.

Muskrat farming and beaver farming are also engaged in, but these comprise a separate industry and the statistics for it are shown separately in the report.

The number of silver foxes on the farms at the end of the year 1927 numbered 17,941, and other kinds of fur-bearing animals, 14,164. The value of pelts of ranch bred animals was over $3,000,000, with silver fox pelts accounted for ninety-six per cent. The highest price received for the pelt of a ranch bred silver fox in 1927 was $625.

Copies of the report may be obtained on application to the Dominion Bureau of Statistics, Ottawa.

From Sitka Spruce

Dresses and hats of Sitka spruce veneer, modishly turned, have made their appearance in Hoquiam, Wash. Bathing suits of veneer also have been worn recently on Ocean Harbor beaches. The dress is done in the sleeveless manner. The hat is the eyebrow turban with overlapping leaf design. The veneer, cut one-eighteenth of an inch thick, is easily cut and trimmed with small scissors.

Meat Supply

The United States Biological Survey has increased the meat supply by cross-breeding Alaskan reindeer with caribou and thus producing animals of heavier weight.

New Vitamin Value Is Discovered in Milk

MILK contains a hitherto unrecognized factor, which is vitamin in character, and which is essential for the growth of chicks and for the prevention of a peculiar type of paralysis which results in incurable deformities if long continued, according to an experiment recently finished by L. C. Norris, C. F. Heuser and H. S. Wilgus Jr., of the Cornell University Agricultural Experiment Station. It is possible that the effects obtained from this factor have previously been credited to vitamin B.

The discovery was accidental to a certain extent and resulted from an attempt to get a chick ration that would be free from phosphorus, which would be suitable for studying the requirements of chicks for these minerals. In the course of the experiment such a ration should produce a rate of growth, when properly supplemented with calcium and phosphorus, equal to that obtained by good poultrymen.

Since milk, meat scrap and fish meal are rich sources of these minerals it was decided to use casein, purified milk protein, as the main source of protein in the experimental ration. This protein contains only mere traces of vitamin B.

The lack of this vitamin was considered a serious difficulty. To overcome it, resort was made to a milk vitamin B concentrate furnished by a commercial company. This concentrate has been shown to be as rich as yeast in vitamin B.

While important checks were used to determine the value of the ration. They were divided into three lots, A, B, and C. Each lot contained thirty chicks.

Lot A was fed the experimental ration, supplemented by 2.14 per cent of the milk vitamin B concentrate. Lot B received the same ration plus 2.68 per cent of the concentrate. These quantities of the vitamin concentrate represented respectively the approximate amounts of vitamin B in twenty per cent and seven per cent dried milk, and corresponded to two rations already giving satisfactory growth in experimental work.

For the first two weeks all lots grew at about the same rate. However, at the end of the third week, lot C, which received the unsupplemented ration, had fallen behind in growth. It never again equaled the other lots, although toward the end of the experiment this lot partially recovered and developed at the same rate as the other lots.

In addition to the slow growth a peculiar type of leg weakness, entirely distinct from rickets, appeared in lot C at the third week. The birds lost the use of their legs to a large extent and frequently walked on their hocks. Approximately fifty per cent of this lot was lame at the end of the fifth week.

In lot B two cases of lameness occurred during the third and fourth weeks. One of them died at seven weeks and the other failed to grow to any extent throughout the remainder of the experiment. No lameness developed in lot A.

It is apparent from these results that this so-called milk vitamin B concentrate contains some factor which accelerates the growth of chicks and prevents a certain type of leg weakness or paralysis. It would be unwise however, to conclude from this experiment that milk should be invariably used in all poultry rations. Some chicks have been reared in the past with little or no milk.

New Strawberries Now Being Developed

ALL cultivated strawberries in Canada and the United States and most of those of Europe are descended from one of two wild strawberries of American origin, one a native of the Pacific Coast and the other a native of the Eastern Coast.

There are many other wild strawberries, however, that did not participate in developing our present kinds. In the untried wild ones may lurk some valuable quality that can be bred into our domestic varieties to make them more desirable. Plant breeders are turning to the wild sorts for improving the strawberry, especially to develop new types better adapted to purposes of canning, preserving and candy making.

The United States Department of Agriculture has achieved considerable success in this field. Four promising varieties, especially suited for preserving, have been selected from the thousands of crosses made. They are known only by number as yet and will need to be tested for adaptation before they can be recommended for planting.

The technique of breeding is relatively simple, but making the selections is difficult and laborious. To breed a new kind, no matter for what purpose, two parent varieties are crossed. They may be wild or cultivated. The pollen from the flower of one is placed on the pistil of the flower of the other. The seed developing from such a cross is planted in a similar manner, although in both cases the estimates were shown by subsequent marketing figures to be low rather than high.

Red Squill Controls Rat Menace to Poultry

THE control of rats in poultry establishments is usually of great importance, as the abundance of food in poultry rations almost invariably attracts large numbers of rats, which cause serious losses among the chickens. The question at times raised as to whether or not red squill, the rat poison now becoming commonly used in such cases, is harmful to the poultry. A number of tests have been made in the laboratory and in the field by the United States Biological Survey and others to determine the effect of red squill on adult chickens, and up to the present time no record of adult poultry harmed with squill has been received. These tests included in one case two hens fed on a ten per cent concentration of red squill rat bait to the exclusion of all other food for a period of six weeks, without apparent injury.

No experiment, however, had been made to determine the effect of red squill on baby chicks until a recent investigation conducted by the Biological Survey staff in co-operation with the North Carolina State College Experiment Station. In a series of feeding tests baby chicks showed a distinct preference for feed that did not contain squill powder. It was found that chicks are not likely to eat enough feed composed of ten per cent squill in one, two or three feedings to cause death, even when given to the exclusion of other feed, and this is highly improbable to not likely to occur when squill feed is exposed to vigorous chicks for five consecutive days when other palatable feed is obtainable.

Since chicks show a distinct dislike for red squill powder, and since it is not highly toxic to them, it can be used with safety as a rat poison in places accessible to chicks, if they are well supplied by other more palatable feed and care is taken to prevent them feeding on squill feed for more than forty-eight hours, says The Survey.

Lathyrus (sweet pea) is a decorative climbing vine for fences and trellises. There are varieties with pure white, pale pink and crimson flowers.

Farm Co-operation Grows

IN the ten-year period from 1919 to 1928 there was a phenomenal development in several co-operative marketing associations of farmers, according to a recent bulletin of the United States Department of Agriculture. The number of associations for farmers' mutual purchasing, as listed by the department, practically doubled; the membership increased 218 per cent and the amount of business handled in 1928 was 277 per cent greater than in 1919.

The largest gain in the number of associations was made in the four Southeast Central States and the second largest in the four Southwest Central States. The gains in these sections were due almost entirely to the formation of large scale tobacco associations in Kentucky and the large scale cotton associations in Tennessee, Alabama, Mississippi, Arkansas, Louisiana and Texas, according to the report.

Large percentage gains in amount of business handled are credited to the West South Central, the East South Central and the South Atlantic and the New England States. While the three Pacific Coast States showed the smallest gains, the amount of business handled by their co-operatives nearly doubled in the ten-year period.

The development of agricultural co-operation in America has been a series of waves, the bulletin says. But despite backwash, there has been a material gain throughout the years in number of active associations, in the number of individuals participating in co-operative enterprises and in volume of sales and purchases made by the associations.

Data have been collected and tabulated for nearly 12,000 associations of the estimated 30,000 farmers' mutual associations. 10,000 associations listed by the department as active transacted business in 1928 to the amount of $3,400,000,000 or far the greatest part of this amount represented sales of farm products.

A Rare Orchid

WHILE out on a nature walk near Thetis Lake I chanced upon a plant which turned out to be quite uncommon. It was the large round-leaved orchis (Habenaria orbicula). It grows about eighteen inches high and has large greenish flowers studded about at the top of the spike. It has two large round, basal leaves which, on being turned over, are found to have a silver sheen.

It has been found on the Island in only one place namely Strathcona Park. It was found there by Mr W. B. Anderson. In Henry's Flora, of Southern British Columbia, it is not recorded as growing on the Island at all. It does not appear to be common on the Mainland below an altitude of two thousand feet. Henry's Flora of Washington has given it under the synonym of Habenaria orbicula as being found only in deep woods and being very rare.

There are several varieties of Habenaria found near Victoria.

The commonest is Habenaria elegans, which is found in all neighboring woods. It has a greenish flower which is plentifully disbursed on the stem.

Habenaria unalaschensis I have found near the Alpine Club's camp at Shield's Lake. Interesting flora are abundant in that district and the botanists of the camp were very pleased with it.

Under oak trees in Oak Bay is found Habenaria dilatata which is only found in such a habitat. It has flowers of green and white bunched up near the top of the four-teen-inch spike.

Habenarias, though not very attractive are always interesting because of the detailed examination needed to identify the different species.—C. W. Yates.
